Logged as Administrator, I created a category with the following permission:

 Category Setting Permission Setting 	3		
	Make it public (everyone can access):		
Group Id	Membership Type	Action	
/platform/administrators	÷	â	
Add Permission			
	Save Cancel		

So, I logged out and logged in another user, that have no Administrator rights. When I go to dashboard and try to add a new gadget, I can see the gadgets and the category that should be only visible to administrators.

redhat 📄 Site 💷 Group 🛞 D	ashboard	<u>Ĵ</u> James Anderson Published ≎
James Anderson		
Click & Type Page Name 💿 🕂		
	Arraste seus gadgets aqui.	
	Area de Dashboard	
	CategoryForAdm Hello World Example	
	Calculator	
	Rss Reader	
	Todo	

As you can see, the user James have isn't in Administrators group:

Group Id	Membership Type	Action
