Created attachment 795124 [details]
/etc/cups/cups-pdf.conf

Joachim Backes **2013-09-13 01:27:26 EDT** **Comment 3** **[reply] [−]**

Still the same effect with cups-pdf-2.6.1-6.fc20.x86_64

Remi Collet **2013-09-13 01:34:26 EDT** **Comment 4** **[reply] [−]**

Sorry, but I cannot reproduce.
Please provide a sample "input" text.

Created attachment 797159 [details]
input from gnome-terminal (ls -l)

Joachim Backes **2013-09-13 03:00:41 EDT** **Comment 6** **[reply] [−]**

Created attachment 797161 [details]
generated pdf by "lpr -Ppdf input"

Remi Collet **2013-09-13 07:22:09 EDT** **Comment 7** **[reply] [−]**

Cannot reproduce with default Cups-PDF printer created during RPM install.

How your "pdf" printer was created ?

Can you try with this command :

```
/usr/sbin/lpadmin -p Cups-PDF -v cups-pdf:/ -m CUPS-PDF.ppd -E
```
