## Evince

### Simply a document viewer

Evince is a document viewer for multiple document formats. The goal of evince is to replace the multiple document viewers that exist on the GNOME Desktop with a single simple application.

Evince is specifically designed to support the file following formats: PDF, Postscript, djvu, tiff, dvi, XPS, SyncTex support with gedit, comics books (cbr,cbz,cb7 and cbt). For a comprehensive list of formats supported, see [Supported Document Formats](#).

### Getting Evince

You should get Evince from your distribution, but if you can't find it or are looking for the latest release you might be able to get it here.

The section [Where to Download Evince](#) has the most updated information on where and how to get Evince from packages to source.
