

Simplify Cookie Compliance for GDPR and ePrivacy Directive

New global regulations, like the GDPR and ePrivacy Directive, require businesses to inform visitors about the data being collected on their websites and provide visitors with the opportunity to decide what information to share. In order to comply with these new laws, businesses are rethinking their cookie compliance.

CookiePro simplifies cookie consent through a number of different approaches, such as notice only, opt-out, implied, and opt-in consent, which meet diverse ePrivacy, GDPR, IAB Europe, DoNotTrack, DAA, and NAI standards. The CookiePro tool allows website owners to easily implement a cookie banner and preference center by scanning, identifying, and sorting millions of website behavior trackers, including cookies, tags, web beacons, and more. CookiePro is powered by OneTrust Cookie Consent Technology which is approved by the CNIL, IAPP, Google, Oracle AddThis, and AppNexus.

Is Your Website Cookie Compliant?

1. Enter Website

Enter the website domain you want to scan into the CookiePro Website Scanner

2. Scan Website

CookiePro will scan 10 website pages for Cookies, Tags, Forms and a Privacy Policy

3. Generate Report

The scan results will be sent to your email detailing the website's privacy risk and recommendations

Integrates with Tag Managers

Integrates with Content Management Systems

Features

Automated Cookie Scan

Scan your website against our database of 5M+ cookies and tracking technologies to identify and categorize tracking technologies on your site.

Cookie Policy

Automatically generate a cookie policy based on the scan, and schedule an auto scan to keep it up-to-date. Easily update the policy once it is added on your site.

Cookie Consent Banner

Generate a cookie banner for your site using one of the UI templates provided, or customize your own based on your approach to capturing visitor consent.

Cookie Policy Localization

Our customizable interface allows to generate a fully branded privacy policy or design your own. Tailor the experience based on location and language.

Simplify Cookie Preferences

Site visitors can manage their cookie preferences using the CookiePro preference center to quickly enable and disable preferences at any time directly on your site.

Quick Implementations

24/7 access to our support portal with comprehensive documentation to get started quickly and support you throughout your entire implementation

Show Only in EU

Show your banner only to visitors in the EU? Use reverse IP lookup to only show the banner to visitors accessing the site from an EU IP address.

ENTERPRISE

Language Detection

Language detection localizes content for site visitors based on the language-culture setting in their browser or webpage.

ENTERPRISE

Records of Consent

CookiePro will capture all site visitor preferences to maintain granular records of consent. Not ready for records? This can be toggled on or off in the tool.

ENTERPRISE

Audit Trails

Captured consent, settings modifications on the cookie banner and preferences are stored in an audit log in the CookiePro consent module to show compliance history.
