

电子科技大学

Copy the first line "电子科技大学", then paste it to somewhere, it will become "电子子科技大大学".

How to generate this pdf file?

The pdf is generated in Mac OS.

First, write "电子科技大学" in a txt file.

Second, click the "File".

Third, click the "Export As PDF"

Then, it becomes what you see.

Reason

It is because of the font's ToUnicode map's problem. You can check the pdf file's structure, you will see the ToUnicode in the font, it maps <09fc> to <2f26 5b50> which are "子子". Also, it maps <095f> to <2f24 5927> which are "大大".
