

# SUSTAINABLE COST-EFFECTIVE AGRICULTURE

## BOARDS

### WE COME TO YOU

We will bring our mill to your worksite or property and eliminate the need for you to transport your logs. We can mill your cut timber into almost any size boards you need.

### MILLED TO YOUR SPECIFICATIONS

We can produce the highest quality lumber from your trees, to your specifications. Whether you have one log or hundreds. Hardwood or softwood, boards, decking, blanks for woodturning, furniture stock, beams... the possibilities are endless!

### MINIMAL WASTE

In many cases even the scraps are useful. Some wood scraps are great for smoking meat or fish. Sawdust and bark can be composted. And there's always the leftovers to use for the fireplace, or that backyard fire pit.

## BEES

### FOR THE SERIOUS GARDENER

Boards and Bees rents beehives to gardeners, farmholders, and local homeowners. We will also work with clients on a rent-to-own basis.

### PROFESSIONAL INSTALLATION

Our beekeepers prepare and maintain the hives on your property. The installation is designed to make the honeybees' job of taking care of and improving your property easy. But we will also arrange to protect the hive from family pets, children's play areas, excess sun, moisture, or any other detrimental elements so it may flourish naturally.

### WE MAINTAIN. YOUR GARDEN GROWS

Honeybees have outstanding pollination abilities and are ideal to improve the yield of backyard gardens and small acreage farms. Honeybees are normally available for rental from the end of April until August. We provide all maintenance and regular check-ups of the hive at no extra cost.

# BOARDS & BEES

## PERSONAL SERVICE

Whether you are a large operation or an individual land owner, our level of service and attention to detail is the same. We believe in working relationships that produce benefits for our clients. We work with our clients closely and listen to their needs ensuring that each project is a success.
