SECTION A
INTRODUCTION
TO OPENTYPE®

**WHAT IS
OPENTYPE?**

OpenType® is a cross-platform font file format developed jointly by Adobe and Microsoft. The two main benefits of the OpenType format are its cross-platform compatibility (the same font file works on Macintosh and Windows computers), and its ability to support widely expanded character sets and layout features, which provide rich linguistic support and advanced typographic control.

OpenType fonts can be installed and used alongside PostScript® Type 1 and TrueType fonts.

The range of supported layout features may differ in the various FontFont OpenType packages, therefore each OpenType package will be accompanied by this FF Info Guide listing the layout features supported by this specific font package.

You'll find a glossary of all available OpenType layout features in Section B of the general FF OpenType User Guide.

Please see the FontFont OpenType® User Guide
at <http://www.fontfont.com/opentype>

ABOUT FF ERNESTINE REGULAR

FF Ernestine was born from the search for a versatile monoline text typeface that would feel warm yet serious, feminine yet rigid, charming yet sturdy. Its rather large x-height and wide, open shapes enable it to work well down to small sizes; ligatures, stylistic and contextual alternates, a selection of arrows, and two sizes of small caps enrich its typographic palette. Nina Stössinger first drew the Roman as a study project at the postgraduate Type Design programme in Zurich, and the Italic in dialogue with Hrant Papazian's Armenian design. Both the Roman and the Italic (which doubles as a harmonious companion to the Armenian component) are available in four individually drawn weights. The four corresponding Armenian weights, nicknamed "Vem" and – in the Pro version – identically included in the Roman and Italic fonts, share the specific personable character of the family while optimizing the proportions for the Armenian script.

ABOUT NINA STÖSSINGER

Nina Stössinger was born near Basel, Switzerland, in 1978. After some initial experience with web design, Nina soon quit her studies of English and some of her nights designing type. FF Ernestine is her first commercially released typeface design.

ABOUT HRANT PAPAŽIAN

Hrant Papazian is an Armenian native of Lebanon; his perspective on written communication was formed at the crossroads of three competing visual cultures. He now lives in Los Angeles, relishing the unique ethnic salad. A multimedia designer by trade, Hrant's true love remains the black-and-white, but colorful world of non-Latin typeface design. A recipient of type design awards from Critique Magazine, Granshan and Creative Review, Hrant has delivered numerous presentations at international typographic conferences from San Francisco to Thessaloniki. He has received commissions from Agfa, Unitype, IKEA, the Narod Cultural Institute, Disney, UCLA, the Israel Postal Authority, Microsoft, TeX Users Group and Liverpool University.
