The Securities and Exchange Commission has not approved or disapproved these securities or passed upon the adequacy of this prospectus. Any representation to the contrary is a criminal offense.

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Funds' annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Funds' website (www.nuveen.com), and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you have already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from the Funds electronically anytime by contacting the financial intermediary (such as a broker-dealer or bank) through which you hold your Fund shares or, if you are a direct investor, by enrolling at www.nuveen.com/e-reports.

You may elect to receive all future shareholder reports in paper free of charge at any time by contacting your financial intermediary or, if you are a direct investor, by calling 800-257-8787 and selecting option #1. Your election to receive reports in paper will apply to all funds held in your account with your financial intermediary or, if you are a direct investor, to all your directly held Nuveen Funds and any other directly held funds within the same group of related investment companies.

Section 1 Fund Summaries

Nuveen All-American Municipal Bond Fund

Investment Objective

The investment objective of the Fund is to provide you with as high a level of current interest income exempt from regular federal income taxes as is consistent with preservation of capital.

Fees and Expenses of the Fund

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund or in other Nuveen Mutual Funds. More information about these and other discounts, as well as eligibility requirements for each share class, is available from your financial advisor and in “How You Can Buy and Sell Shares” on page 42 of the Fund’s prospectus and “Purchase and Redemption of Fund Shares” on page S-76 of the Fund’s statement of additional information. In addition, more information about sales charge discounts and waivers for purchases of shares through specific financial intermediaries is set forth in the appendix to the Fund’s prospectus entitled “Variations in Sales Charge Reductions and Waivers Available Through Certain Intermediaries.”

The tables and examples below do not reflect any commissions that shareholders may be required to pay directly to their financial intermediaries when buying or selling Class I shares.

Shareholder Fees

(fees paid directly from your investment)

	Class A	Class C	Class C2	Class R6	Class I
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	4.20%	None	None	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of the lesser of purchase price or redemption proceeds) ¹	None	1.00%	1.00%	None	None
Maximum Sales Charge (Load) Imposed on Reinvested Dividends	None	None	None	None	None
Exchange Fee	None	None	None	None	None
Annual Low Balance Account Fee (for accounts under \$1,000) ²	\$15	\$15	\$15	None	\$15

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Class C2	Class R6	Class I
Management Fees	0.40%	0.40%	0.40%	0.40%	0.40%
Distribution and/or Service (12b-1) Fees	0.20%	1.00%	0.75%	0.00%	0.00%
Other Expenses					
Interest and Related Expenses ³	0.03%	0.03%	0.03%	0.03%	0.03%
Remainder of Other Expenses	0.07%	0.07%	0.07%	0.04%	0.07%
Total Annual Fund Operating Expenses	0.70%	1.50%	1.25%	0.47%	0.50%

¹ The contingent deferred sales charge on Class C shares and Class C2 shares applies only to redemptions within 12 months of purchase.

² Fee applies to the following types of accounts under \$1,000 held directly with the Fund: accounts established pursuant to the Uniform Transfers to Minors Act (UTMA) or Uniform Gifts to Minors Act (UGMA).

³ Includes interest expense and fees paid on Fund borrowings and/or interest and related expenses from inverse floaters.

Example

The following example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then either redeem or do not redeem your shares at the end of a period. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	Class A	Class C	Class C2	Class R6	Class I
1 Year	\$ 489	\$ 153	\$ 127	\$ 48	\$ 51
3 Years	\$ 634	\$ 474	\$ 397	\$ 151	\$ 160
5 Years	\$ 793	\$ 818	\$ 686	\$ 263	\$ 280
10 Years	\$ 1,254	\$ 1,791	\$ 1,511	\$ 591	\$ 628

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 14% of the average value of its portfolio.

Principal Investment Strategies

Under normal market conditions, the Fund invests at least 80% of the sum of its net assets and the amount of any borrowings for investment purposes in municipal bonds that pay interest that is exempt from regular federal personal income tax. These municipal bonds include obligations issued by U.S. states and their subdivisions, authorities, instrumentalities and corporations, as well as obligations issued by U.S. territories (such as Puerto Rico, the U.S. Virgin Islands and Guam) that pay interest that is exempt from regular federal personal income tax. The Fund may invest without limit in securities that generate income subject to the alternative minimum tax. The Fund is a long-term bond fund and, as such, will generally maintain, under normal market conditions, an investment portfolio with an overall weighted average maturity of greater than 10 years.

Under normal market conditions, the Fund invests at least 80% of its net assets in investment grade municipal bonds rated BBB/Baa or higher at the time of purchase by at least one independent rating agency, or, if unrated, judged by the Fund’s sub-adviser to be of comparable quality. The Fund may invest up to 20% of its net assets in below investment grade municipal bonds, commonly referred to as “high yield” or “junk” bonds.

The Fund may invest in all types of municipal bonds, including general obligation bonds, revenue bonds and participation interests in municipal leases. The Fund may invest in zero coupon bonds, which are issued at substantial discounts from their value at maturity and pay no cash income to their holders until they mature.

The Fund may invest up to 15% of its net assets in municipal securities whose interest payments vary inversely with changes in short-term tax-exempt interest rates (“*inverse floaters*”). Inverse floaters are derivative securities that provide leveraged exposure to underlying municipal bonds. The Fund’s investments in inverse floaters are designed to increase the Fund’s income and returns through this leveraged exposure. These investments are speculative, however, and also create the possibility that income and returns will be diminished.

The Fund may utilize the following derivatives: futures contracts; options on futures contracts; swap agreements, including interest rate swaps, and options on swap agreements. The Fund may use these derivatives in an attempt to manage market risk, credit risk and yield curve risk, and to manage the effective maturity or duration of securities in the Fund’s portfolio.

The Fund’s sub-adviser uses a value-oriented strategy and looks for higher-yielding and undervalued municipal bonds that offer above-average total return. The sub-adviser may choose to sell municipal bonds with deteriorating credit or limited upside potential compared to other available bonds.

Principal Risks

The price and yield of this Fund will change daily. You could lose money by investing in the Fund. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The principal risks of investing in the Fund listed below are presented alphabetically to facilitate your ability to find particular risks and compare them with the risks of other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears.

Active Management Risk—The Fund’s sub-adviser actively manages the Fund’s investments. Consequently, the Fund is subject to the risk that the investment techniques and risk analyses employed by the Fund’s sub-adviser may not produce the desired results. This could cause the Fund to lose value or its investment results to lag relevant benchmarks or other funds with similar objectives.

Alternative Minimum Tax Risk—The Fund has no limit as to the amount that can be invested in alternative minimum tax bonds. Therefore, all or a portion of the Fund's otherwise exempt-interest dividends may be taxable to those shareholders subject to the federal alternative minimum tax.

Call Risk—If, during periods of falling interest rates, an issuer calls higher-yielding municipal bonds held by the Fund, the Fund may have to reinvest in securities with lower yields, which may adversely impact the Fund's performance.

Credit Risk—Credit risk is the risk that an issuer or other obligated party of a municipal bond may be unable or unwilling to make interest and principal payments when due and the related risk that the value of a municipal bond may decline because of concerns about the issuer's ability or willingness to make such payments. The Fund's investments in inverse floaters will increase the Fund's credit risk.

Credit Spread Risk—Credit spread risk is the risk that credit spreads (i.e., the difference in yield between securities that is due to differences in their credit quality) may increase when the market believes that bonds generally have a greater risk of default. Increasing credit spreads may reduce the market values of the Fund's municipal bonds. Credit spreads often increase more for lower rated and unrated securities than for investment grade securities. In addition, when credit spreads increase, reductions in market value will generally be greater for longer-maturity securities.

Cybersecurity Risk—Cybersecurity risk is the risk of an unauthorized breach and access to Fund assets, customer data (including private shareholder information), or proprietary information, or the risk of an incident occurring that causes the Fund, its investment adviser or sub-adviser, custodian, transfer agent, distributor or other service provider or a financial intermediary to suffer a data breach, data corruption or lose operational functionality. Successful cyber-attacks or other cyber-failures or events affecting the Fund or its service providers may adversely impact the Fund or its shareholders. Additionally, a cybersecurity breach could affect the issuers in which the Fund invests, which may cause the Fund's investments to lose value.

Derivatives Risk—The use of derivatives involves additional risks and transaction costs which could leave the Fund in a worse position than if it had not used these instruments. Derivative instruments can be used to acquire or to transfer the risk and returns of a security or other asset without buying or selling the security or asset. These instruments may entail investment exposures that are greater than their cost would suggest. As a result, a small investment in derivatives can result in losses that greatly exceed the original investment. Derivatives can be highly volatile, illiquid and difficult to value. An over-the-counter derivative transaction between the Fund and a counterparty that is not cleared through a central counterparty also involves the risk that a loss may be sustained as a result of the failure of the counterparty to the contract to make required payments. The payment obligation for a cleared derivative transaction is guaranteed by a central counterparty, which exposes the Fund to the creditworthiness of the central counterparty.

High Yield Securities Risk—High yield securities, which are rated below investment grade and commonly referred to as "junk" bonds, are high risk investments that may cause income and principal losses for the Fund. They generally have greater credit risk, are less liquid and have more volatile prices than investment grade securities.

Income Risk—The Fund's income could decline during periods of falling interest rates or when the Fund experiences defaults on municipal bonds it holds. Also, if the Fund invests in inverse floaters, the Fund's income may decrease if short-term interest rates rise.

Interest Rate Risk—Interest rate risk is the risk that the value of the Fund's municipal bonds will decline because of rising interest rates. Very low or negative interest rates may magnify interest rate risk. Changing interest rates, including rates that fall below zero, may have unpredictable effects on markets, result in heightened market volatility and detract from the Fund's performance to the extent that it is exposed to such interest rates. Municipal bonds may be subject to a greater risk of rising interest rates than would normally be the case due to the current period of historically low rates and the effect of potential government fiscal policy initiatives and resulting market reaction to those initiatives. When interest rates change, the values of longer-duration municipal bonds usually change more than the values of shorter-duration municipal bonds. Conversely, municipal bonds with shorter durations or maturities will be less volatile but may provide lower returns than municipal bonds with longer durations or maturities. Rising interest rates also may lengthen the duration of municipal bonds with call features, since exercise of the call becomes less likely as interest rates rise, which in turn will make the securities more sensitive to changes in interest rates and result in even steeper price declines in the event of further interest rate increases. Interest rate risk may be increased by the Fund's investment in inverse floaters because of the leveraged nature of these investments.

Inverse Floaters Risk—The use of inverse floaters by the Fund creates effective leverage. Due to the leveraged nature of these investments, they will typically be more volatile and involve greater risk than the fixed rate municipal bonds underlying the inverse floaters. An investment in certain inverse floaters will involve the risk that the Fund could lose more

than its original principal investment. Distributions on inverse floaters bear an inverse relationship to short-term municipal bond interest rates. Thus, distributions paid to the Fund on its inverse floaters will be reduced or even eliminated as short-term municipal bond interest rates rise and will increase when short-term municipal bond interest rates fall. Inverse floaters generally will underperform the market for fixed rate municipal bonds in a rising interest rate environment.

Market Risk—The market value of the Fund’s investments may go up or down, sometimes rapidly or unpredictably and for short or extended periods of time, due to the particular circumstances of individual issuers or due to general conditions impacting issuers more broadly. Global economies and financial markets have become highly interconnected, and thus economic, market or political conditions or events in one country or region might adversely impact the value of the Fund’s investments whether or not the Fund invests in such country or region. Events such as war, terrorism, natural and environmental disasters and the spread of infectious illnesses or other public health emergencies may have a severe negative impact on the global economy, could cause financial markets to experience extreme volatility and losses, and could result in the disruption of trading and the reduction of liquidity in many instruments.

Municipal Bond Market Liquidity Risk—Inventories of municipal bonds held by brokers and dealers have decreased in recent years, lessening their ability to make a market in these securities. This reduction in market making capacity has the potential to decrease the Fund’s ability to buy or sell bonds, and increase bond price volatility and trading costs, particularly during periods of economic or market stress. In addition, recent federal banking regulations may cause certain dealers to reduce their inventories of municipal bonds, which may further decrease the Fund’s ability to buy or sell bonds. As a result, the Fund may be forced to accept a lower price to sell a security, to sell other securities to raise cash, or to give up an investment opportunity, any of which could have a negative effect on performance. If the Fund needed to sell large blocks of bonds to raise cash (such as to meet heavy shareholder redemptions), those sales could further reduce the bonds’ prices and hurt performance.

Municipal Lease Obligations Risk—Participation interests in municipal leases pose special risks because many leases and contracts contain “non-appropriation” clauses that provide that the governmental issuer has no obligation to make future payments under the lease or contract unless money is appropriated for this purpose by the appropriate legislative body.

Municipal Securities Risk—The values of municipal securities held by the Fund may be adversely affected by local political and economic conditions and developments. The Fund may make significant investments in a particular segment of the municipal bond market or in the debt of issuers located in the same state or territory. Adverse conditions in such industry or location could have a correspondingly adverse effect on the financial condition of issuers. These conditions may cause the value of the Fund’s shares to fluctuate more than the values of shares of funds that invest in a greater variety of investments. The amount of public information available about municipal bonds is generally less than for certain corporate equities or bonds, meaning that the investment performance of the Fund may be more dependent on the analytical abilities of the Fund’s sub-adviser than funds that invest in stock or other corporate investments.

Tax Risk—Income from municipal bonds held by the Fund could be declared taxable because of, among other things, unfavorable changes in tax laws, adverse interpretations by the Internal Revenue Service or state tax authorities, or noncompliant conduct of a bond issuer or other obligated party. Investments in taxable municipal bonds and certain derivatives utilized by the Fund may cause the Fund to have taxable investment income.

Unrated Bond Risk—Unrated municipal bonds determined by the Fund’s sub-adviser to be of comparable quality to rated municipal bonds which the Fund may purchase may pay a higher interest rate than such rated municipal bonds and be subject to a greater risk of illiquidity or price changes. Less public information is typically available about unrated municipal bonds or issuers than rated bonds or issuers.

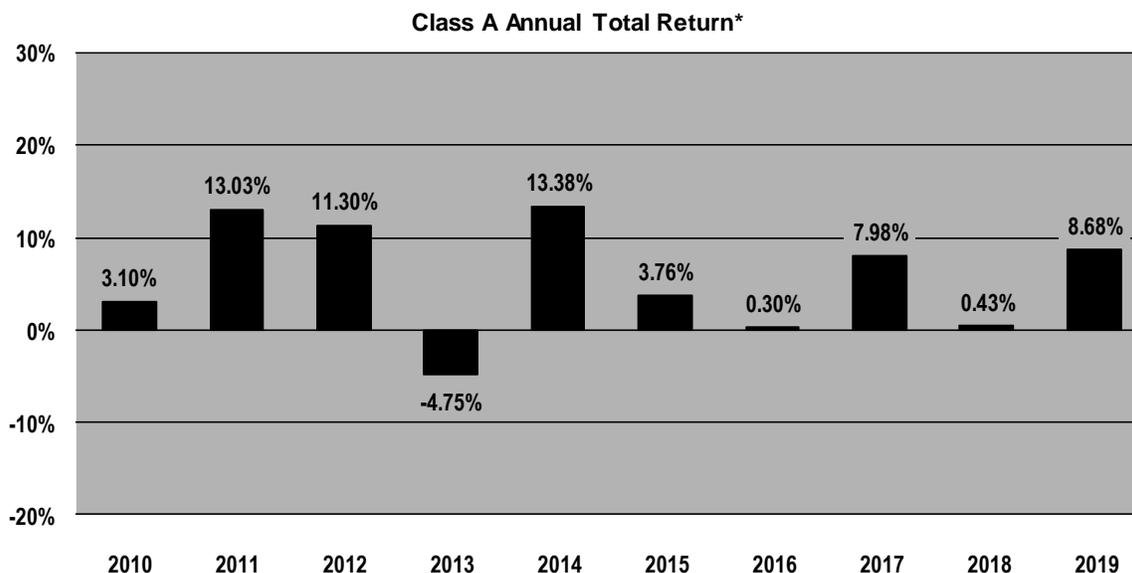

Valuation Risk—The municipal bonds in which the Fund invests typically are valued by a pricing service utilizing a range of market-based inputs and assumptions, including readily available market quotations obtained from broker-dealers making markets in such instruments, cash flows and transactions for comparable instruments. There is no assurance that the Fund will be able to sell a portfolio security at the price established by the pricing service, which could result in a loss to the Fund. Pricing services generally price municipal bonds assuming orderly transactions of an institutional “round lot” size, but some trades may occur in smaller, “odd lot” sizes, often at lower prices than institutional round lot trades. Different pricing services may incorporate different assumptions and inputs into their valuation methodologies, potentially resulting in different values for the same securities. As a result, if the Fund were to change pricing services, or if the Fund’s pricing service were to change its valuation methodology, there could be a material impact, either positive or negative, on the Fund’s net asset value.

Zero Coupon Bonds Risk—Because interest on zero coupon bonds is not paid on a current basis, the values of zero coupon bonds will be more volatile in response to interest rate changes than the values of bonds that distribute income regularly. Although zero coupon bonds generate income for accounting purposes, they do not produce cash flow, and thus the Fund could be forced to liquidate securities at an inopportune time in order to generate cash to distribute to shareholders as required by tax laws.

Fund Performance

The following bar chart and table provide some indication of the potential risks of investing in the Fund. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available at www.nuveen.com/performance or by calling (800) 257-8787.

The bar chart below shows the variability of the Fund's performance from year to year for Class A shares. The bar chart and highest/lowest quarterly returns that follow do not reflect sales charges, and if these charges were reflected, the returns would be less than those shown.

* Class A year-to-date total return as of June 30, 2020 was 0.59%. The performance of the other share classes will differ due to their different expense structures.

During the ten-year period ended December 31, 2019, the Fund's highest and lowest quarterly returns were 5.25% and -5.32%, respectively, for the quarters ended June 30, 2011 and December 31, 2010.

The table below shows the variability of the Fund's average annual returns and how they compare over the time periods indicated with those of a broad measure of market performance and an index of funds with similar investment objectives. All after-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. After-tax returns are shown for Class A shares only; after-tax returns for other share classes will vary. Your own actual after-tax returns will depend on your specific tax situation and may differ from what is shown here.

Both the bar chart and the table assume that all distributions have been reinvested. Performance reflects fee waivers, if any, in effect during the periods presented. If any such waivers had not been in place, returns would have been reduced.

Prior to February 10, 2014, Class C2 shares were designated Class C shares.

**Average Annual Total Returns
for the Periods Ended
December 31, 2019**

	Inception Date	1 Year	5 Years	10 Years	Since Inception (Class C)	Since Inception (Class R6)
Class A (return before taxes)	10/3/88	4.08%	3.28%	5.11%	N/A	N/A
Class A (return after taxes on distributions)		4.08%	3.27%	5.10%	N/A	N/A
Class A (return after taxes on distributions and sale of Fund shares)		3.82%	3.34%	4.92%	N/A	N/A

Portfolio Managers

<u>Name</u>	<u>Title</u>	<u>Portfolio Manager of Fund Since</u>
John V. Miller, CFA	Senior Managing Director and Head of Municipals	December 2010
Timothy T. Ryan, CFA	Managing Director	November 2016

Purchase and Sale of Fund Shares

You may purchase, redeem or exchange shares of the Fund on any business day through a financial advisor or other financial intermediary. Class C2 shares are available only through exchanges from other Nuveen Municipal Bond Funds and dividend reinvestments by current Class C2 shareholders. The Fund's initial and subsequent investment minimums generally are as follows, although certain financial intermediaries may impose their own investment minimums and the Fund may reduce or waive the minimums in some cases:

	<u>Class A and Class C</u>	<u>Class R6</u>	<u>Class I</u>
Eligibility and Minimum Initial Investment	\$3,000	Available only to certain investors as described in the prospectus and through fee-based programs. \$1 million for all accounts except: • \$100,000 for clients of financial intermediaries who charge such clients an ongoing fee for advisory, investment, consulting or related services.	Available only through fee-based programs and to other limited categories of investors as described in the prospectus. \$100,000 for all accounts except: • \$250 for clients of financial intermediaries and family offices that have accounts holding Class I shares with an aggregate value of at least \$100,000 (or that are expected to reach this level). • No minimum for certain other categories of eligible investors as described in the prospectus.
Minimum Additional Investment	\$100	No minimum.	No minimum.

Tax Information

The Fund intends to make interest income distributions that are exempt from regular federal income tax. However, all or a portion of these distributions may be subject to the federal alternative minimum tax and state and local taxes. In addition, a portion of the Fund's distributions may be subject to regular federal income tax.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank or financial advisor), the Fund, its distributor or its investment adviser may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your financial advisor or visit your financial intermediary's website for more information.

Nuveen Intermediate Duration Municipal Bond Fund

Investment Objective

The investment objective of the Fund is to provide you with as high a level of current interest income exempt from regular federal income taxes as is consistent with preservation of capital.

Fees and Expenses of the Fund

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund or in other Nuveen Mutual Funds. More information about these and other discounts, as well as eligibility requirements for each share class, is available from your financial advisor and in “How You Can Buy and Sell Shares” on page 42 of the Fund’s prospectus and “Purchase and Redemption of Fund Shares” on page S-76 of the Fund’s statement of additional information. In addition, more information about sales charge discounts and waivers for purchases of shares through specific financial intermediaries is set forth in the appendix to the Fund’s prospectus entitled “Variations in Sales Charge Reductions and Waivers Available Through Certain Intermediaries.”

The tables and examples below do not reflect any commissions that shareholders may be required to pay directly to their financial intermediaries when buying or selling Class I shares.

Shareholder Fees

(fees paid directly from your investment)

	Class A	Class C	Class C2	Class I
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	3.00%	None	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of the lesser of purchase price or redemption proceeds) ¹	None	1.00%	1.00%	None
Maximum Sales Charge (Load) Imposed on Reinvested Dividends	None	None	None	None
Exchange Fee	None	None	None	None
Annual Low Balance Account Fee (for accounts under \$1,000) ²	\$15	\$15	\$15	\$15

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Class C2	Class I
Management Fees	0.38%	0.38%	0.38%	0.38%
Distribution and/or Service (12b-1) Fees	0.20%	1.00%	0.75%	0.00%
Other Expenses	0.07%	0.07%	0.07%	0.07%
Total Annual Fund Operating Expenses	0.65%	1.45%	1.20%	0.45%

¹ The contingent deferred sales charge on Class C shares and Class C2 shares applies only to redemptions within 12 months of purchase.

² Fee applies to the following types of accounts under \$1,000 held directly with the Fund: accounts established pursuant to the Uniform Transfers to Minors Act (UTMA) or Uniform Gifts to Minors Act (UGMA).

Example

The following example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then either redeem or do not redeem your shares at the end of a period. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	Class A	Class C	Class C2	Class I
1 Year	\$ 364	\$ 148	\$ 122	\$ 46
3 Years	\$ 502	\$ 459	\$ 381	\$ 144
5 Years	\$ 651	\$ 792	\$ 660	\$ 252
10 Years	\$ 1,086	\$ 1,735	\$ 1,455	\$ 567

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example,

affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 22% of the average value of its portfolio.

Principal Investment Strategies

Under normal market conditions, the Fund invests at least 80% of the sum of its net assets and the amount of any borrowings for investment purposes in municipal bonds that pay interest that is exempt from regular federal personal income tax. These municipal bonds include obligations issued by U.S. states and their subdivisions, authorities, instrumentalities and corporations, as well as obligations issued by U.S. territories (such as Puerto Rico, the U.S. Virgin Islands and Guam) that pay interest that is exempt from regular federal personal income tax. The Fund may invest without limit in securities that generate income subject to the alternative minimum tax. Under normal market conditions, the Fund maintains a weighted average effective duration of between 3 and 10 years, and expects to generally maintain a weighted average effective duration of between 4.5 and 7 years.

Under normal market conditions, the Fund invests at least 80% of its net assets in investment grade municipal bonds rated BBB/Baa or higher at the time of purchase by at least one independent rating agency, or, if unrated, judged by the Fund's sub-adviser to be of comparable quality. The Fund may invest up to 20% of its net assets in below investment grade municipal bonds, commonly referred to as "high yield" or "junk" bonds.

The Fund may invest in all types of municipal bonds, including general obligation bonds, revenue bonds and participation interests in municipal leases. The Fund may invest in zero coupon bonds, which are issued at substantial discounts from their value at maturity and pay no cash income to their holders until they mature.

The Fund may invest up to 15% of its net assets in municipal securities whose interest payments vary inversely with changes in short-term tax-exempt interest rates ("*inverse floaters*"). Inverse floaters are derivative securities that provide leveraged exposure to underlying municipal bonds. The Fund's investments in inverse floaters are designed to increase the Fund's income and returns through this leveraged exposure. These investments are speculative, however, and also create the possibility that income and returns will be diminished.

The Fund may utilize the following derivatives: futures contracts; options on futures contracts; swap agreements, including interest rate swaps, and options on swap agreements. The Fund may use these derivatives in an attempt to manage market risk, credit risk and yield curve risk, and to manage the effective maturity or duration of securities in the Fund's portfolio.

The Fund's sub-adviser uses a value-oriented strategy and looks for higher-yielding and undervalued municipal bonds that offer above-average total return. The sub-adviser may choose to sell municipal bonds with deteriorating credit or limited upside potential compared to other available bonds.

Principal Risks

The price and yield of this Fund will change daily. You could lose money by investing in the Fund. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The principal risks of investing in the Fund listed below are presented alphabetically to facilitate your ability to find particular risks and compare them with the risks of other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears.

Active Management Risk—The Fund's sub-adviser actively manages the Fund's investments. Consequently, the Fund is subject to the risk that the investment techniques and risk analyses employed by the Fund's sub-adviser may not produce the desired results. This could cause the Fund to lose value or its investment results to lag relevant benchmarks or other funds with similar objectives.

Alternative Minimum Tax Risk—The Fund has no limit as to the amount that can be invested in alternative minimum tax bonds. Therefore, all or a portion of the Fund's otherwise exempt-interest dividends may be taxable to those shareholders subject to the federal alternative minimum tax.

Call Risk—If, during periods of falling interest rates, an issuer calls higher-yielding municipal bonds held by the Fund, the Fund may have to reinvest in securities with lower yields, which may adversely impact the Fund's performance.

Credit Risk—Credit risk is the risk that an issuer or other obligated party of a municipal bond may be unable or unwilling to make interest and principal payments when due and the related risk that the value of a municipal bond may decline because of concerns about the issuer's ability or willingness to make such payments. The Fund's investments in inverse floaters will increase the Fund's credit risk.

Credit Spread Risk—Credit spread risk is the risk that credit spreads (i.e., the difference in yield between securities that is due to differences in their credit quality) may increase when the market believes that bonds generally have a greater risk of default. Increasing credit spreads may reduce the market values of the Fund's municipal bonds. Credit spreads often increase more for lower rated and unrated securities than for investment grade securities. In addition, when credit spreads increase, reductions in market value will generally be greater for longer-maturity securities.

Cybersecurity Risk—Cybersecurity risk is the risk of an unauthorized breach and access to Fund assets, customer data (including private shareholder information), or proprietary information, or the risk of an incident occurring that causes the Fund, its investment adviser or sub-adviser, custodian, transfer agent, distributor or other service provider or a financial intermediary to suffer a data breach, data corruption or lose operational functionality. Successful cyber-attacks or other cyber-failures or events affecting the Fund or its service providers may adversely impact the Fund or its shareholders. Additionally, a cybersecurity breach could affect the issuers in which the Fund invests, which may cause the Fund's investments to lose value.

Derivatives Risk—The use of derivatives involves additional risks and transaction costs which could leave the Fund in a worse position than if it had not used these instruments. Derivative instruments can be used to acquire or to transfer the risk and returns of a security or other asset without buying or selling the security or asset. These instruments may entail investment exposures that are greater than their cost would suggest. As a result, a small investment in derivatives can result in losses that greatly exceed the original investment. Derivatives can be highly volatile, illiquid and difficult to value. An over-the-counter derivative transaction between the Fund and a counterparty that is not cleared through a central counterparty also involves the risk that a loss may be sustained as a result of the failure of the counterparty to the contract to make required payments. The payment obligation for a cleared derivative transaction is guaranteed by a central counterparty, which exposes the Fund to the creditworthiness of the central counterparty.

High Yield Securities Risk—High yield securities, which are rated below investment grade and commonly referred to as "junk" bonds, are high risk investments that may cause income and principal losses for the Fund. They generally have greater credit risk, are less liquid and have more volatile prices than investment grade securities.

Income Risk—The Fund's income could decline during periods of falling interest rates or when the Fund experiences defaults on municipal bonds it holds. Income risk is generally higher for limited-term bonds so investors may experience a fluctuation in the monthly income from the Fund. Also, if the Fund invests in inverse floaters, the Fund's income may decrease if short-term interest rates rise.

Interest Rate Risk—Interest rate risk is the risk that the value of the Fund's municipal bonds will decline because of rising interest rates. Very low or negative interest rates may magnify interest rate risk. Changing interest rates, including rates that fall below zero, may have unpredictable effects on markets, result in heightened market volatility and detract from the Fund's performance to the extent that it is exposed to such interest rates. Municipal bonds may be subject to a greater risk of rising interest rates than would normally be the case due to the current period of historically low rates and the effect of potential government fiscal policy initiatives and resulting market reaction to those initiatives. When interest rates change, the values of longer-duration municipal bonds usually change more than the values of shorter-duration municipal bonds. Conversely, municipal bonds with shorter durations or maturities will be less volatile but may provide lower returns than municipal bonds with longer durations or maturities. Rising interest rates also may lengthen the duration of municipal bonds with call features, since exercise of the call becomes less likely as interest rates rise, which in turn will make the securities more sensitive to changes in interest rates and result in even steeper price declines in the event of further interest rate increases. Interest rate risk may be increased by the Fund's investment in inverse floaters because of the leveraged nature of these investments.

Inverse Floaters Risk—The use of inverse floaters by the Fund creates effective leverage. Due to the leveraged nature of these investments, they will typically be more volatile and involve greater risk than the fixed rate municipal bonds underlying the inverse floaters. An investment in certain inverse floaters will involve the risk that the Fund could lose more than its original principal investment. Distributions on inverse floaters bear an inverse relationship to short-term municipal bond interest rates. Thus, distributions paid to the Fund on its inverse floaters will be reduced or even eliminated as short-term municipal bond interest rates rise and will increase when short-term municipal bond interest rates fall. Inverse floaters generally will underperform the market for fixed rate municipal bonds in a rising interest rate environment.

Market Risk—The market value of the Fund's investments may go up or down, sometimes rapidly or unpredictably and for short or extended periods of time, due to the particular circumstances of individual issuers or due to general conditions impacting issuers more broadly. Global economies and financial markets have become highly interconnected, and thus economic, market or political conditions or events in one country or region might adversely impact the value of the Fund's

investments whether or not the Fund invests in such country or region. Events such as war, terrorism, natural and environmental disasters and the spread of infectious illnesses or other public health emergencies may have a severe negative impact on the global economy, could cause financial markets to experience extreme volatility and losses, and could result in the disruption of trading and the reduction of liquidity in many instruments.

Municipal Bond Market Liquidity Risk—Inventories of municipal bonds held by brokers and dealers have decreased in recent years, lessening their ability to make a market in these securities. This reduction in market making capacity has the potential to decrease the Fund's ability to buy or sell bonds, and increase bond price volatility and trading costs, particularly during periods of economic or market stress. In addition, recent federal banking regulations may cause certain dealers to reduce their inventories of municipal bonds, which may further decrease the Fund's ability to buy or sell bonds. As a result, the Fund may be forced to accept a lower price to sell a security, to sell other securities to raise cash, or to give up an investment opportunity, any of which could have a negative effect on performance. If the Fund needed to sell large blocks of bonds to raise cash (such as to meet heavy shareholder redemptions), those sales could further reduce the bonds' prices and hurt performance.

Municipal Lease Obligations Risk—Participation interests in municipal leases pose special risks because many leases and contracts contain "non-appropriation" clauses that provide that the governmental issuer has no obligation to make future payments under the lease or contract unless money is appropriated for this purpose by the appropriate legislative body.

Municipal Securities Risk—The values of municipal securities held by the Fund may be adversely affected by local political and economic conditions and developments. The Fund may make significant investments in a particular segment of the municipal bond market or in the debt of issuers located in the same state or territory. Adverse conditions in such industry or location could have a correspondingly adverse effect on the financial condition of issuers. These conditions may cause the value of the Fund's shares to fluctuate more than the values of shares of funds that invest in a greater variety of investments. The amount of public information available about municipal bonds is generally less than for certain corporate equities or bonds, meaning that the investment performance of the Fund may be more dependent on the analytical abilities of the Fund's sub-adviser than funds that invest in stock or other corporate investments.

Tax Risk—Income from municipal bonds held by the Fund could be declared taxable because of, among other things, unfavorable changes in tax laws, adverse interpretations by the Internal Revenue Service or state tax authorities, or noncompliant conduct of a bond issuer or other obligated party. Investments in taxable municipal bonds and certain derivatives utilized by the Fund may cause the Fund to have taxable investment income.

Unrated Bond Risk—Unrated municipal bonds determined by the Fund's sub-adviser to be of comparable quality to rated municipal bonds which the Fund may purchase may pay a higher interest rate than such rated municipal bonds and be subject to a greater risk of illiquidity or price changes. Less public information is typically available about unrated municipal bonds or issuers than rated bonds or issuers.

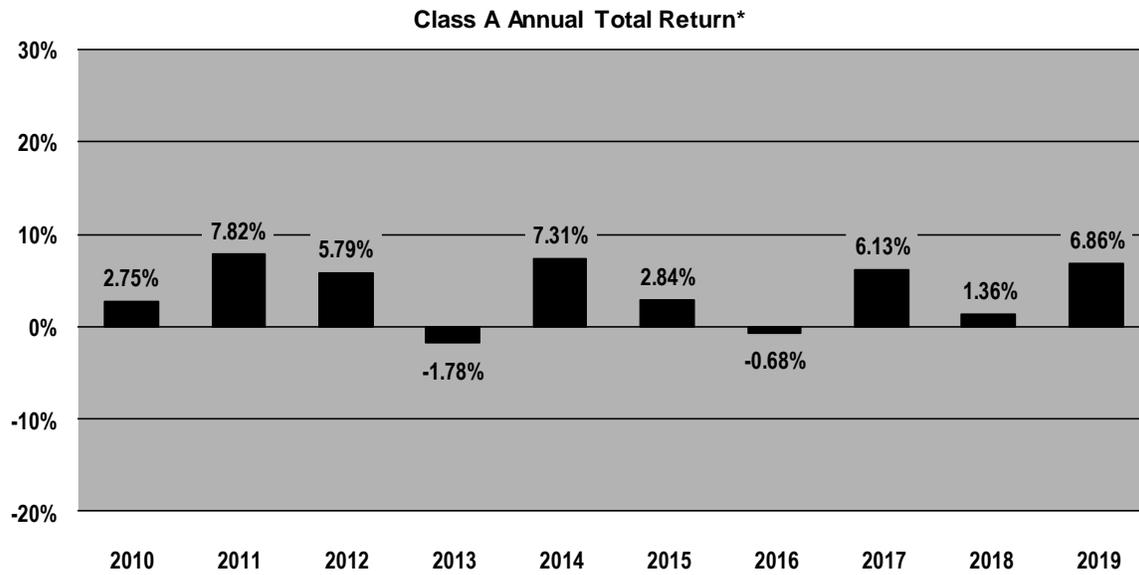

Valuation Risk—The municipal bonds in which the Fund invests typically are valued by a pricing service utilizing a range of market-based inputs and assumptions, including readily available market quotations obtained from broker-dealers making markets in such instruments, cash flows and transactions for comparable instruments. There is no assurance that the Fund will be able to sell a portfolio security at the price established by the pricing service, which could result in a loss to the Fund. Pricing services generally price municipal bonds assuming orderly transactions of an institutional "round lot" size, but some trades may occur in smaller, "odd lot" sizes, often at lower prices than institutional round lot trades. Different pricing services may incorporate different assumptions and inputs into their valuation methodologies, potentially resulting in different values for the same securities. As a result, if the Fund were to change pricing services, or if the Fund's pricing service were to change its valuation methodology, there could be a material impact, either positive or negative, on the Fund's net asset value.

Zero Coupon Bonds Risk—Because interest on zero coupon bonds is not paid on a current basis, the values of zero coupon bonds will be more volatile in response to interest rate changes than the values of bonds that distribute income regularly. Although zero coupon bonds generate income for accounting purposes, they do not produce cash flow, and thus the Fund could be forced to liquidate securities at an inopportune time in order to generate cash to distribute to shareholders as required by tax laws.

Fund Performance

The following bar chart and table provide some indication of the potential risks of investing in the Fund. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available at www.nuveen.com/performance or by calling (800) 257-8787.

The bar chart below shows the variability of the Fund's performance from year to year for Class A shares. The bar chart and highest/lowest quarterly returns that follow do not reflect sales charges, and if these charges were reflected, the returns would be less than those shown.

* Class A year-to-date total return as of June 30, 2020 was 1.36%. The performance of the other share classes will differ due to their different expense structures.

During the ten-year period ended December 31, 2019, the Fund's highest and lowest quarterly returns were 3.14% and -4.34%, respectively, for the quarters ended June 30, 2011 and December 31, 2016.

The table below shows the variability of the Fund's average annual returns and how they compare over the time periods indicated with those of a broad measure of market performance and an index of funds with similar investment objectives. All after-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. After-tax returns are shown for Class A shares only; after-tax returns for other share classes will vary. Your own actual after-tax returns will depend on your specific tax situation and may differ from what is shown here.

Both the bar chart and the table assume that all distributions have been reinvested. Performance reflects fee waivers, if any, in effect during the periods presented. If any such waivers had not been in place, returns would have been reduced.

Prior to February 10, 2014, Class C2 shares were designated Class C shares.

	Inception Date	Average Annual Total Returns for the Periods Ended December 31, 2019			Since Inception (Class C)
		1 Year	5 Years	10 Years	
Class A (return before taxes)	6/13/95	3.67%	2.63%	3.47%	N/A
Class A (return after taxes on distributions)		3.67%	2.62%	3.46%	N/A
Class A (return after taxes on distributions and sale of Fund shares)		3.27%	2.64%	3.38%	N/A
Class C (return before taxes)	2/10/14	6.04%	2.44%	N/A	2.82%
Class C2 (return before taxes)	6/13/95	6.30%	2.70%	3.22%	N/A
Class I (return before taxes)	11/29/76	7.16%	3.48%	3.99%	N/A
S&P Municipal Bond Intermediate Index ¹ (reflects no deduction for fees, expenses or taxes)		6.92%	3.30%	4.13%	3.65%
Lipper Intermediate Municipal Debt Funds Category Average ² (reflects no deduction for taxes or sales loads)		6.46%	2.66%	3.40%	3.05%

¹ An unleveraged, market value-weighted index containing all bonds in the S&P Municipal Bond Index that mature between 3 and 14.999 years.

² Represents the average annualized returns for all reporting funds in the Lipper Intermediate Municipal Debt Funds Category.

Portfolio Manager of Fund Since

December 2007

Purchase and Sale of Fund Shares

You may purchase, redeem or exchange shares of the Fund on any business day through a financial advisor or other financial intermediary. Class C2 shares are available only through exchanges from other Nuveen Municipal Bond Funds and dividend reinvestments by current Class C2 shareholders. The Fund's initial and subsequent investment minimums generally are as follows, although certain financial intermediaries may impose their own investment minimums and the Fund may reduce or waive the minimums in some cases:

	Class A and Class C	Class I
Eligibility and Minimum Initial Investment	\$3,000	Available only through fee-based programs and to other limited categories of investors as described in the prospectus. \$100,000 for all accounts except: <ul style="list-style-type: none">• \$250 for clients of financial intermediaries and family offices that have accounts holding Class I shares with an aggregate value of at least \$100,000 (or that are expected to reach this level).• No minimum for certain other categories of eligible investors as described in the prospectus.
Minimum Additional Investment	\$100	No minimum.

Tax Information

The Fund intends to make interest income distributions that are exempt from regular federal income tax. However, all or a portion of these distributions may be subject to the federal alternative minimum tax and state and local taxes. In addition, a portion of the Fund's distributions may be subject to regular federal income tax.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank or financial advisor), the Fund, its distributor or its investment adviser may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your financial advisor or visit your financial intermediary's website for more information.

Nuveen Limited Term Municipal Bond Fund

Investment Objective

The investment objective of the Fund is to provide you with as high a level of current interest income exempt from regular federal income taxes as is consistent with preservation of capital.

Fees and Expenses of the Fund

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund or in other Nuveen Mutual Funds. More information about these and other discounts, as well as eligibility requirements for each share class, is available from your financial advisor and in “How You Can Buy and Sell Shares” on page 42 of the Fund’s prospectus and “Purchase and Redemption of Fund Shares” on page S-76 of the Fund’s statement of additional information. In addition, more information about sales charge discounts and waivers for purchases of shares through specific financial intermediaries is set forth in the appendix to the Fund’s prospectus entitled “Variations in Sales Charge Reductions and Waivers Available Through Certain Intermediaries.”

The tables and examples below do not reflect any commissions that shareholders may be required to pay directly to their financial intermediaries when buying or selling Class I shares.

Shareholder Fees

(fees paid directly from your investment)

	Class A	Class C	Class C2	Class I
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	2.50%	None	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of the lesser of purchase price or redemption proceeds) ¹	None	1.00%	1.00%	None
Maximum Sales Charge (Load) Imposed on Reinvested Dividends	None	None	None	None
Exchange Fee	None	None	None	None
Annual Low Balance Account Fee (for accounts under \$1,000) ²	\$15	\$15	\$15	\$15

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Class C2	Class I
Management Fees	0.34%	0.34%	0.34%	0.34%
Distribution and/or Service (12b-1) Fees	0.20%	1.00%	0.55%	0.00%
Other Expenses				
Interest and Related Expenses ³	0.01%	0.01%	0.01%	0.01%
Remainder of Other Expenses	0.07%	0.07%	0.07%	0.07%
Total Annual Fund Operating Expenses	0.62%	1.42%	0.97%	0.42%

¹ The contingent deferred sales charge on Class C shares and Class C2 shares applies only to redemptions within 12 months of purchase.

² Fee applies to the following types of accounts under \$1,000 held directly with the Fund: accounts established pursuant to the Uniform Transfers to Minors Act (UTMA) or Uniform Gifts to Minors Act (UGMA).

³ Includes interest expense and fees paid on Fund borrowings and/or interest and related expenses from inverse floaters.

Example

The following example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then either redeem or do not redeem your shares at the end of a period. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	Class A	Class C	Class C2	Class I
1 Year	\$ 312	\$ 145	\$ 99	\$ 43
3 Years	\$ 444	\$ 449	\$ 309	\$ 135
5 Years	\$ 587	\$ 776	\$ 536	\$ 235
10 Years	\$ 1,005	\$ 1,702	\$ 1,190	\$ 530

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 22% of the average value of its portfolio.

Principal Investment Strategies

Under normal market conditions, the Fund invests at least 80% of the sum of its net assets and the amount of any borrowings for investment purposes in municipal bonds that pay interest that is exempt from regular federal personal income tax. These municipal bonds include obligations issued by U.S. states and their subdivisions, authorities, instrumentalities and corporations, as well as obligations issued by U.S. territories (such as Puerto Rico, the U.S. Virgin Islands and Guam) that pay interest that is exempt from regular federal personal income tax. The Fund may invest without limit in securities that generate income subject to the alternative minimum tax. The Fund generally invests in bonds with short-to intermediate-term maturities. The Fund will attempt to maintain the weighted average maturity of its portfolio securities at three to seven years under normal market conditions.

Under normal market conditions, the Fund invests at least 80% of its net assets in investment grade municipal bonds rated BBB/Baa or higher at the time of purchase by at least one independent rating agency, or, if unrated, judged by the Fund’s sub-adviser to be of comparable quality. The Fund may invest up to 20% of its net assets in below investment grade municipal bonds, commonly referred to as “high yield” or “junk” bonds.

The Fund may invest in all types of municipal bonds, including general obligation bonds, revenue bonds and participation interests in municipal leases. The Fund may invest in zero coupon bonds, which are issued at substantial discounts from their value at maturity and pay no cash income to their holders until they mature.

The Fund may invest up to 15% of its net assets in municipal securities whose interest payments vary inversely with changes in short-term tax-exempt interest rates (“*inverse floaters*”). Inverse floaters are derivative securities that provide leveraged exposure to underlying municipal bonds. The Fund’s investments in inverse floaters are designed to increase the Fund’s income and returns through this leveraged exposure. These investments are speculative, however, and also create the possibility that income and returns will be diminished.

The Fund may utilize the following derivatives: futures contracts; options on futures contracts; swap agreements, including interest rate swaps, and options on swap agreements. The Fund may use these derivatives in an attempt to manage market risk, credit risk and yield curve risk, and to manage the effective maturity or duration of securities in the Fund’s portfolio.

The Fund’s sub-adviser uses a value-oriented strategy and looks for higher-yielding and undervalued municipal bonds that offer above-average total return. The sub-adviser may choose to sell municipal bonds with deteriorating credit or limited upside potential compared to other available bonds.

Principal Risks

The price and yield of this Fund will change daily. You could lose money by investing in the Fund. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The principal risks of investing in the Fund listed below are presented alphabetically to facilitate your ability to find particular risks and compare them with the risks of other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears.

Active Management Risk—The Fund’s sub-adviser actively manages the Fund’s investments. Consequently, the Fund is subject to the risk that the investment techniques and risk analyses employed by the Fund’s sub-adviser may not produce the desired results. This could cause the Fund to lose value or its investment results to lag relevant benchmarks or other funds with similar objectives.

Alternative Minimum Tax Risk—The Fund has no limit as to the amount that can be invested in alternative minimum tax bonds. Therefore, all or a portion of the Fund’s otherwise exempt-interest dividends may be taxable to those shareholders subject to the federal alternative minimum tax.

Call Risk—If, during periods of falling interest rates, an issuer calls higher-yielding municipal bonds held by the Fund, the Fund may have to reinvest in securities with lower yields, which may adversely impact the Fund’s performance.

Credit Risk—Credit risk is the risk that an issuer or other obligated party of a municipal bond may be unable or unwilling to make interest and principal payments when due and the related risk that the value of a municipal bond may decline because of concerns about the issuer's ability or willingness to make such payments. The Fund's investments in inverse floaters will increase the Fund's credit risk.

Credit Spread Risk—Credit spread risk is the risk that credit spreads (i.e., the difference in yield between securities that is due to differences in their credit quality) may increase when the market believes that bonds generally have a greater risk of default. Increasing credit spreads may reduce the market values of the Fund's municipal bonds. Credit spreads often increase more for lower rated and unrated securities than for investment grade securities. In addition, when credit spreads increase, reductions in market value will generally be greater for longer-maturity securities.

Cybersecurity Risk—Cybersecurity risk is the risk of an unauthorized breach and access to Fund assets, customer data (including private shareholder information), or proprietary information, or the risk of an incident occurring that causes the Fund, its investment adviser or sub-adviser, custodian, transfer agent, distributor or other service provider or a financial intermediary to suffer a data breach, data corruption or lose operational functionality. Successful cyber-attacks or other cyber-failures or events affecting the Fund or its service providers may adversely impact the Fund or its shareholders. Additionally, a cybersecurity breach could affect the issuers in which the Fund invests, which may cause the Fund's investments to lose value.

Derivatives Risk—The use of derivatives involves additional risks and transaction costs which could leave the Fund in a worse position than if it had not used these instruments. Derivative instruments can be used to acquire or to transfer the risk and returns of a security or other asset without buying or selling the security or asset. These instruments may entail investment exposures that are greater than their cost would suggest. As a result, a small investment in derivatives can result in losses that greatly exceed the original investment. Derivatives can be highly volatile, illiquid and difficult to value. An over-the-counter derivative transaction between the Fund and a counterparty that is not cleared through a central counterparty also involves the risk that a loss may be sustained as a result of the failure of the counterparty to the contract to make required payments. The payment obligation for a cleared derivative transaction is guaranteed by a central counterparty, which exposes the Fund to the creditworthiness of the central counterparty.

High Yield Securities Risk—High yield securities, which are rated below investment grade and commonly referred to as "junk" bonds, are high risk investments that may cause income and principal losses for the Fund. They generally have greater credit risk, are less liquid and have more volatile prices than investment grade securities.

Income Risk—The Fund's income could decline during periods of falling interest rates or when the Fund experiences defaults on municipal bonds it holds. Income risk is generally higher for limited-term bonds so investors may experience a fluctuation in the monthly income from the Fund. Also, if the Fund invests in inverse floaters, the Fund's income may decrease if short-term interest rates rise.

Interest Rate Risk—Interest rate risk is the risk that the value of the Fund's municipal bonds will decline because of rising interest rates. Very low or negative interest rates may magnify interest rate risk. Changing interest rates, including rates that fall below zero, may have unpredictable effects on markets, result in heightened market volatility and detract from the Fund's performance to the extent that it is exposed to such interest rates. Municipal bonds may be subject to a greater risk of rising interest rates than would normally be the case due to the current period of historically low rates and the effect of potential government fiscal policy initiatives and resulting market reaction to those initiatives. When interest rates change, the values of longer-duration municipal bonds usually change more than the values of shorter-duration municipal bonds. Conversely, municipal bonds with shorter durations or maturities will be less volatile but may provide lower returns than municipal bonds with longer durations or maturities. Rising interest rates also may lengthen the duration of municipal bonds with call features, since exercise of the call becomes less likely as interest rates rise, which in turn will make the securities more sensitive to changes in interest rates and result in even steeper price declines in the event of further interest rate increases. Interest rate risk may be increased by the Fund's investment in inverse floaters because of the leveraged nature of these investments.

Inverse Floaters Risk—The use of inverse floaters by the Fund creates effective leverage. Due to the leveraged nature of these investments, they will typically be more volatile and involve greater risk than the fixed rate municipal bonds underlying the inverse floaters. An investment in certain inverse floaters will involve the risk that the Fund could lose more than its original principal investment. Distributions on inverse floaters bear an inverse relationship to short-term municipal bond interest rates. Thus, distributions paid to the Fund on its inverse floaters will be reduced or even eliminated as short-term municipal bond interest rates rise and will increase when short-term municipal bond interest rates fall. Inverse floaters generally will underperform the market for fixed rate municipal bonds in a rising interest rate environment.

Market Risk—The market value of the Fund’s investments may go up or down, sometimes rapidly or unpredictably and for short or extended periods of time, due to the particular circumstances of individual issuers or due to general conditions impacting issuers more broadly. Global economies and financial markets have become highly interconnected, and thus economic, market or political conditions or events in one country or region might adversely impact the value of the Fund’s investments whether or not the Fund invests in such country or region. Events such as war, terrorism, natural and environmental disasters and the spread of infectious illnesses or other public health emergencies may have a severe negative impact on the global economy, could cause financial markets to experience extreme volatility and losses, and could result in the disruption of trading and the reduction of liquidity in many instruments.

Municipal Bond Market Liquidity Risk—Inventories of municipal bonds held by brokers and dealers have decreased in recent years, lessening their ability to make a market in these securities. This reduction in market making capacity has the potential to decrease the Fund’s ability to buy or sell bonds, and increase bond price volatility and trading costs, particularly during periods of economic or market stress. In addition, recent federal banking regulations may cause certain dealers to reduce their inventories of municipal bonds, which may further decrease the Fund’s ability to buy or sell bonds. As a result, the Fund may be forced to accept a lower price to sell a security, to sell other securities to raise cash, or to give up an investment opportunity, any of which could have a negative effect on performance. If the Fund needed to sell large blocks of bonds to raise cash (such as to meet heavy shareholder redemptions), those sales could further reduce the bonds’ prices and hurt performance.

Municipal Lease Obligations Risk—Participation interests in municipal leases pose special risks because many leases and contracts contain “non-appropriation” clauses that provide that the governmental issuer has no obligation to make future payments under the lease or contract unless money is appropriated for this purpose by the appropriate legislative body.

Municipal Securities Risk—The values of municipal securities held by the Fund may be adversely affected by local political and economic conditions and developments. The Fund may make significant investments in a particular segment of the municipal bond market or in the debt of issuers located in the same state or territory. Adverse conditions in such industry or location could have a correspondingly adverse effect on the financial condition of issuers. These conditions may cause the value of the Fund’s shares to fluctuate more than the values of shares of funds that invest in a greater variety of investments. The amount of public information available about municipal bonds is generally less than for certain corporate equities or bonds, meaning that the investment performance of the Fund may be more dependent on the analytical abilities of the Fund’s sub-adviser than funds that invest in stock or other corporate investments.

Tax Risk—Income from municipal bonds held by the Fund could be declared taxable because of, among other things, unfavorable changes in tax laws, adverse interpretations by the Internal Revenue Service or state tax authorities, or noncompliant conduct of a bond issuer or other obligated party. Investments in taxable municipal bonds and certain derivatives utilized by the Fund may cause the Fund to have taxable investment income.

Unrated Bond Risk—Unrated municipal bonds determined by the Fund’s sub-adviser to be of comparable quality to rated municipal bonds which the Fund may purchase may pay a higher interest rate than such rated municipal bonds and be subject to a greater risk of illiquidity or price changes. Less public information is typically available about unrated municipal bonds or issuers than rated bonds or issuers.

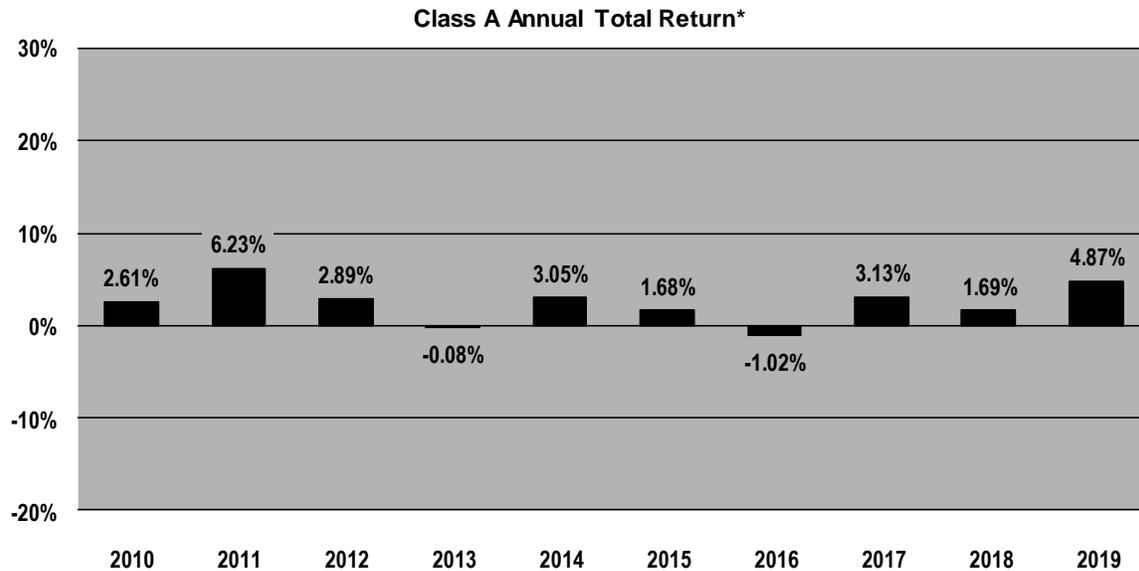

Valuation Risk—The municipal bonds in which the Fund invests typically are valued by a pricing service utilizing a range of market-based inputs and assumptions, including readily available market quotations obtained from broker-dealers making markets in such instruments, cash flows and transactions for comparable instruments. There is no assurance that the Fund will be able to sell a portfolio security at the price established by the pricing service, which could result in a loss to the Fund. Pricing services generally price municipal bonds assuming orderly transactions of an institutional “round lot” size, but some trades may occur in smaller, “odd lot” sizes, often at lower prices than institutional round lot trades. Different pricing services may incorporate different assumptions and inputs into their valuation methodologies, potentially resulting in different values for the same securities. As a result, if the Fund were to change pricing services, or if the Fund’s pricing service were to change its valuation methodology, there could be a material impact, either positive or negative, on the Fund’s net asset value.

Zero Coupon Bonds Risk—Because interest on zero coupon bonds is not paid on a current basis, the values of zero coupon bonds will be more volatile in response to interest rate changes than the values of bonds that distribute income regularly. Although zero coupon bonds generate income for accounting purposes, they do not produce cash flow, and thus the Fund could be forced to liquidate securities at an inopportune time in order to generate cash to distribute to shareholders as required by tax laws.

Fund Performance

The following bar chart and table provide some indication of the potential risks of investing in the Fund. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available at www.nuveen.com/performance or by calling (800) 257-8787.

The bar chart below shows the variability of the Fund's performance from year to year for Class A shares. The bar chart and highest/lowest quarterly returns that follow do not reflect sales charges, and if these charges were reflected, the returns would be less than those shown.

* Class A year-to-date total return as of June 30, 2020 was 1.89%. The performance of the other share classes will differ due to their different expense structures.

During the ten-year period ended December 31, 2019, the Fund's highest and lowest quarterly returns were 2.52% and -2.79%, respectively, for the quarters ended June 30, 2011 and December 31, 2016.

The table below shows the variability of the Fund's average annual returns and how they compare over the time periods indicated with those of a broad measure of market performance and an index of funds with similar investment objectives. All after-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. After-tax returns are shown for Class A shares only; after-tax returns for other share classes will vary. Your own actual after-tax returns will depend on your specific tax situation and may differ from what is shown here.

Both the bar chart and the table assume that all distributions have been reinvested. Performance reflects fee waivers, if any, in effect during the periods presented. If any such waivers had not been in place, returns would have been reduced.

Prior to February 10, 2014, Class C2 shares were designated Class C shares.

**Average Annual Total Returns
for the Periods Ended
December 31, 2019**

	Inception Date	1 Year	5 Years	10 Years	Since Inception (Class C)
Class A (return before taxes)	10/19/87	2.25%	1.53%	2.22%	N/A
Class A (return after taxes on distributions)		2.25%	1.52%	2.22%	N/A
Class A (return after taxes on distributions and sale of Fund shares)		2.13%	1.59%	2.19%	N/A
Class C (return before taxes)	2/10/14	3.95%	1.25%	N/A	1.30%
Class C2 (return before taxes)	12/1/95	4.49%	1.67%	2.13%	N/A
Class I (return before taxes)	2/6/97	5.08%	2.25%	2.70%	N/A
S&P Municipal Bond Short Intermediate Index ¹ (reflects no deduction for fees, expenses or taxes)		4.73%	2.17%	2.60%	2.18%
Lipper Short-Intermediate Municipal Debt Funds Category Average ² (reflects no deduction for taxes or sales loads)		4.46%	1.78%	2.18%	1.88%

¹ An unleveraged, market value-weighted index containing all bonds in the S&P Municipal Bond Index that mature between 1 and 7.999 years.

² Represents the average annualized returns for all reporting funds in the Lipper Short-Intermediate Municipal Debt Funds Category.

Management

Nuveen Fund Advisors, LLC

Sub-Adviser

Nuveen Asset Management, LLC

Portfolio Manager

Name

Paul L. Brennan, CFA

Title

Managing Director

Portfolio Manager of Fund Since

August 2006

Purchase and Sale of Fund Shares

You may purchase, redeem or exchange shares of the Fund on any business day through a financial advisor or other financial intermediary. Class C2 shares are available only through exchanges from other Nuveen Municipal Bond Funds and dividend reinvestments by current Class C2 shareholders. The Fund's initial and subsequent investment minimums generally are as follows, although certain financial intermediaries may impose their own investment minimums and the Fund may reduce or waive the minimums in some cases:

	Class A and Class C	Class I
Eligibility and Minimum Initial Investment	\$3,000	Available only through fee-based programs and to other limited categories of investors as described in the prospectus. \$100,000 for all accounts except: <ul style="list-style-type: none"> • \$250 for clients of financial intermediaries and family offices that have accounts holding Class I shares with an aggregate value of at least \$100,000 (or that are expected to reach this level). • No minimum for certain other categories of eligible investors as described in the prospectus.
Minimum Additional Investment	\$100	No minimum.

Tax Information

The Fund intends to make interest income distributions that are exempt from regular federal income tax. However, all or a portion of these distributions may be subject to the federal alternative minimum tax and state and local taxes. In addition, a portion of the Fund's distributions may be subject to regular federal income tax.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank or financial advisor), the Fund, its distributor or its investment adviser may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial

intermediary and your salesperson to recommend the Fund over another investment. Ask your financial advisor or visit your financial intermediary's website for more information.

Nuveen Short Term Municipal Bond Fund

Investment Objective

The investment objective of the Fund is to provide current income that is exempt from federal income tax to the extent consistent with preservation of capital.

Fees and Expenses of the Fund

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in the Fund or in other Nuveen Mutual Funds. More information about these and other discounts, as well as eligibility requirements for each share class, is available from your financial advisor and in “How You Can Buy and Sell Shares” on page 42 of the Fund’s prospectus and “Purchase and Redemption of Fund Shares” on page S-52 of the Fund’s statement of additional information. In addition, more information about sales charge discounts and waivers for purchases of shares through specific financial intermediaries is set forth in the appendix to the Fund’s prospectus entitled “Variations in Sales Charge Reductions and Waivers Available Through Certain Intermediaries.”

The tables and examples below do not reflect any commissions that shareholders may be required to pay directly to their financial intermediaries when buying or selling Class I shares.

Shareholder Fees

(fees paid directly from your investment)

	Class A	Class C	Class C2	Class I
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	2.50%	None	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of the lesser of purchase price or redemption proceeds) ¹	None	1.00%	1.00%	None
Maximum Sales Charge (Load) Imposed on Reinvested Dividends	None	None	None	None
Exchange Fee	None	None	None	None
Annual Low Balance Account Fee (for accounts under \$1,000) ²	\$15	\$15	\$15	\$15

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Class C2	Class I
Management Fees	0.41%	0.41%	0.41%	0.41%
Distribution and/or Service (12b-1) Fees	0.20%	1.00%	0.55%	0.00%
Other Expenses	0.08%	0.08%	0.08%	0.08%
Total Annual Fund Operating Expenses	0.69%	1.49%	1.04%	0.49%

¹ The contingent deferred sales charge on Class C shares and Class C2 shares applies only to redemptions within 12 months of purchase.

² Fee applies to the following types of accounts under \$1,000 held directly with the Fund: accounts established pursuant to the Uniform Transfers to Minors Act (UTMA) or Uniform Gifts to Minors Act (UGMA).

Example

The following example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then either redeem or do not redeem your shares at the end of a period. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	Class A	Class C	Class C2	Class I
1 Year	\$ 319	\$ 152	\$ 106	\$ 50
3 Years	\$ 465	\$ 471	\$ 331	\$ 157
5 Years	\$ 625	\$ 813	\$ 574	\$ 274
10 Years	\$ 1,087	\$ 1,779	\$ 1,271	\$ 616

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example,

affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 37% of the average value of its portfolio.

Principal Investment Strategies

Under normal market conditions, the Fund invests at least 80% of the sum of its net assets and the amount of any borrowings for investment purposes in municipal bonds that pay interest that is exempt from regular federal personal income tax. These municipal bonds include obligations issued by U.S. states and their subdivisions, authorities, instrumentalities and corporations, as well as obligations issued by U.S. territories (such as Puerto Rico, the U.S. Virgin Islands and Guam) that pay interest that is exempt from regular federal personal income tax. The Fund may invest without limit in securities that generate income subject to the alternative minimum tax. The Fund normally may invest up to 20% of its net assets in taxable obligations. The Fund will attempt to maintain the weighted average maturity of its portfolio securities at three years or less under normal market conditions.

Under normal market conditions, the Fund invests at least 80% of its net assets in investment grade municipal bonds rated BBB/Baa or higher at the time of purchase by at least one independent rating agency, or, if unrated, judged by the Fund's sub-adviser to be of comparable quality. The Fund may invest up to 20% of its net assets in below investment grade municipal bonds, commonly referred to as "high yield" or "junk" bonds.

The Fund may invest in all types of municipal bonds, including general obligation bonds, revenue bonds and participation interests in municipal leases. The Fund may invest in zero coupon bonds, which are issued at substantial discounts from their value at maturity and pay no cash income to their holders until they mature.

The Fund may invest up to 15% of its net assets in municipal securities whose interest payments vary inversely with changes in short-term tax-exempt interest rates ("*inverse floaters*"). Inverse floaters are derivative securities that provide leveraged exposure to underlying municipal bonds. The Fund's investments in inverse floaters are designed to increase the Fund's income and returns through this leveraged exposure. These investments are speculative, however, and also create the possibility that income and returns will be diminished.

The Fund may utilize the following derivatives: futures contracts and options on futures contracts. The Fund may use these derivatives in an attempt to manage market risk, credit risk and yield curve risk, and to manage the effective maturity or duration of securities in the Fund's portfolio. The Fund may not use such instruments to gain exposure to a security or type of security that it would be prohibited by its investment restrictions from purchasing directly.

The Fund's sub-adviser uses a value-oriented strategy and looks for higher-yielding and undervalued municipal bonds that offer above-average total return. The sub-adviser may choose to sell municipal bonds with deteriorating credit or limited upside potential compared to other available bonds.

Principal Risks

The price and yield of this Fund will change daily. You could lose money by investing in the Fund. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The principal risks of investing in the Fund listed below are presented alphabetically to facilitate your ability to find particular risks and compare them with the risks of other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears.

Active Management Risk—The Fund's sub-adviser actively manages the Fund's investments. Consequently, the Fund is subject to the risk that the investment techniques and risk analyses employed by the Fund's sub-adviser may not produce the desired results. This could cause the Fund to lose value or its investment results to lag relevant benchmarks or other funds with similar objectives.

Alternative Minimum Tax Risk—The Fund has no limit as to the amount that can be invested in alternative minimum tax bonds. Therefore, all or a portion of the Fund's otherwise exempt-interest dividends may be taxable to those shareholders subject to the federal alternative minimum tax.

Call Risk—If, during periods of falling interest rates, an issuer calls higher-yielding municipal bonds held by the Fund, the Fund may have to reinvest in securities with lower yields, which may adversely impact the Fund's performance.

Credit Risk—Credit risk is the risk that an issuer or other obligated party of a municipal bond may be unable or unwilling to make interest and principal payments when due and the related risk that the value of a municipal bond may decline because of concerns about the issuer's ability or willingness to make such payments. The Fund's investments in inverse floaters will increase the Fund's credit risk.

Credit Spread Risk—Credit spread risk is the risk that credit spreads (i.e., the difference in yield between securities that is due to differences in their credit quality) may increase when the market believes that bonds generally have a greater risk of default. Increasing credit spreads may reduce the market values of the Fund's municipal bonds. Credit spreads often increase more for lower rated and unrated securities than for investment grade securities. In addition, when credit spreads increase, reductions in market value will generally be greater for longer-maturity securities.

Cybersecurity Risk—Cybersecurity risk is the risk of an unauthorized breach and access to Fund assets, customer data (including private shareholder information), or proprietary information, or the risk of an incident occurring that causes the Fund, its investment adviser or sub-adviser, custodian, transfer agent, distributor or other service provider or a financial intermediary to suffer a data breach, data corruption or lose operational functionality. Successful cyber-attacks or other cyber-failures or events affecting the Fund or its service providers may adversely impact the Fund or its shareholders. Additionally, a cybersecurity breach could affect the issuers in which the Fund invests, which may cause the Fund's investments to lose value.

Derivatives Risk—The use of derivatives involves additional risks and transaction costs which could leave the Fund in a worse position than if it had not used these instruments. Derivative instruments can be used to acquire or to transfer the risk and returns of a security or other asset without buying or selling the security or asset. These instruments may entail investment exposures that are greater than their cost would suggest. As a result, a small investment in derivatives can result in losses that greatly exceed the original investment. Derivatives can be highly volatile, illiquid and difficult to value. An over-the-counter derivative transaction between the Fund and a counterparty that is not cleared through a central counterparty also involves the risk that a loss may be sustained as a result of the failure of the counterparty to the contract to make required payments. The payment obligation for a cleared derivative transaction is guaranteed by a central counterparty, which exposes the Fund to the creditworthiness of the central counterparty.

High Yield Securities Risk—High yield securities, which are rated below investment grade and commonly referred to as "junk" bonds, are high risk investments that may cause income and principal losses for the Fund. They generally have greater credit risk, are less liquid and have more volatile prices than investment grade securities.

Income Risk—The Fund's income could decline during periods of falling interest rates or when the Fund experiences defaults on municipal bonds it holds. Income risk is generally higher for limited-term bonds so investors may experience a fluctuation in the monthly income from the Fund. Also, if the Fund invests in inverse floaters, the Fund's income may decrease if short-term interest rates rise.

Interest Rate Risk—Interest rate risk is the risk that the value of the Fund's municipal bonds will decline because of rising interest rates. Very low or negative interest rates may magnify interest rate risk. Changing interest rates, including rates that fall below zero, may have unpredictable effects on markets, result in heightened market volatility and detract from the Fund's performance to the extent that it is exposed to such interest rates. Municipal bonds may be subject to a greater risk of rising interest rates than would normally be the case due to the current period of historically low rates and the effect of potential government fiscal policy initiatives and resulting market reaction to those initiatives. When interest rates change, the values of longer-duration municipal bonds usually change more than the values of shorter-duration municipal bonds. Conversely, municipal bonds with shorter durations or maturities will be less volatile but may provide lower returns than municipal bonds with longer durations or maturities. Rising interest rates also may lengthen the duration of municipal bonds with call features, since exercise of the call becomes less likely as interest rates rise, which in turn will make the securities more sensitive to changes in interest rates and result in even steeper price declines in the event of further interest rate increases. Interest rate risk may be increased by the Fund's investment in inverse floaters because of the leveraged nature of these investments.

Inverse Floaters Risk—The use of inverse floaters by the Fund creates effective leverage. Due to the leveraged nature of these investments, they will typically be more volatile and involve greater risk than the fixed rate municipal bonds underlying the inverse floaters. An investment in certain inverse floaters will involve the risk that the Fund could lose more than its original principal investment. Distributions on inverse floaters bear an inverse relationship to short-term municipal bond interest rates. Thus, distributions paid to the Fund on its inverse floaters will be reduced or even eliminated as short-term municipal bond interest rates rise and will increase when short-term municipal bond interest rates fall. Inverse floaters generally will underperform the market for fixed rate municipal bonds in a rising interest rate environment.

Market Risk—The market value of the Fund's investments may go up or down, sometimes rapidly or unpredictably and for short or extended periods of time, due to the particular circumstances of individual issuers or due to general conditions impacting issuers more broadly. Global economies and financial markets have become highly interconnected, and thus economic, market or political conditions or events in one country or region might adversely impact the value of the Fund's

investments whether or not the Fund invests in such country or region. Events such as war, terrorism, natural and environmental disasters and the spread of infectious illnesses or other public health emergencies may have a severe negative impact on the global economy, could cause financial markets to experience extreme volatility and losses, and could result in the disruption of trading and the reduction of liquidity in many instruments.

Municipal Bond Market Liquidity Risk—Inventories of municipal bonds held by brokers and dealers have decreased in recent years, lessening their ability to make a market in these securities. This reduction in market making capacity has the potential to decrease the Fund's ability to buy or sell bonds, and increase bond price volatility and trading costs, particularly during periods of economic or market stress. In addition, recent federal banking regulations may cause certain dealers to reduce their inventories of municipal bonds, which may further decrease the Fund's ability to buy or sell bonds. As a result, the Fund may be forced to accept a lower price to sell a security, to sell other securities to raise cash, or to give up an investment opportunity, any of which could have a negative effect on performance. If the Fund needed to sell large blocks of bonds to raise cash (such as to meet heavy shareholder redemptions), those sales could further reduce the bonds' prices and hurt performance.

Municipal Lease Obligations Risk—Participation interests in municipal leases pose special risks because many leases and contracts contain "non-appropriation" clauses that provide that the governmental issuer has no obligation to make future payments under the lease or contract unless money is appropriated for this purpose by the appropriate legislative body.

Municipal Securities Risk—The values of municipal securities held by the Fund may be adversely affected by local political and economic conditions and developments. The Fund may make significant investments in a particular segment of the municipal bond market or in the debt of issuers located in the same state or territory. Adverse conditions in such industry or location could have a correspondingly adverse effect on the financial condition of issuers. These conditions may cause the value of the Fund's shares to fluctuate more than the values of shares of funds that invest in a greater variety of investments. The amount of public information available about municipal bonds is generally less than for certain corporate equities or bonds, meaning that the investment performance of the Fund may be more dependent on the analytical abilities of the Fund's sub-adviser than funds that invest in stock or other corporate investments.

Tax Risk—Income from municipal bonds held by the Fund could be declared taxable because of, among other things, unfavorable changes in tax laws, adverse interpretations by the Internal Revenue Service or state tax authorities, or noncompliant conduct of a bond issuer or other obligated party. Investments in taxable municipal bonds and certain derivatives utilized by the Fund may cause the Fund to have taxable investment income.

Unrated Bond Risk—Unrated municipal bonds determined by the Fund's sub-adviser to be of comparable quality to rated municipal bonds which the Fund may purchase may pay a higher interest rate than such rated municipal bonds and be subject to a greater risk of illiquidity or price changes. Less public information is typically available about unrated municipal bonds or issuers than rated bonds or issuers.

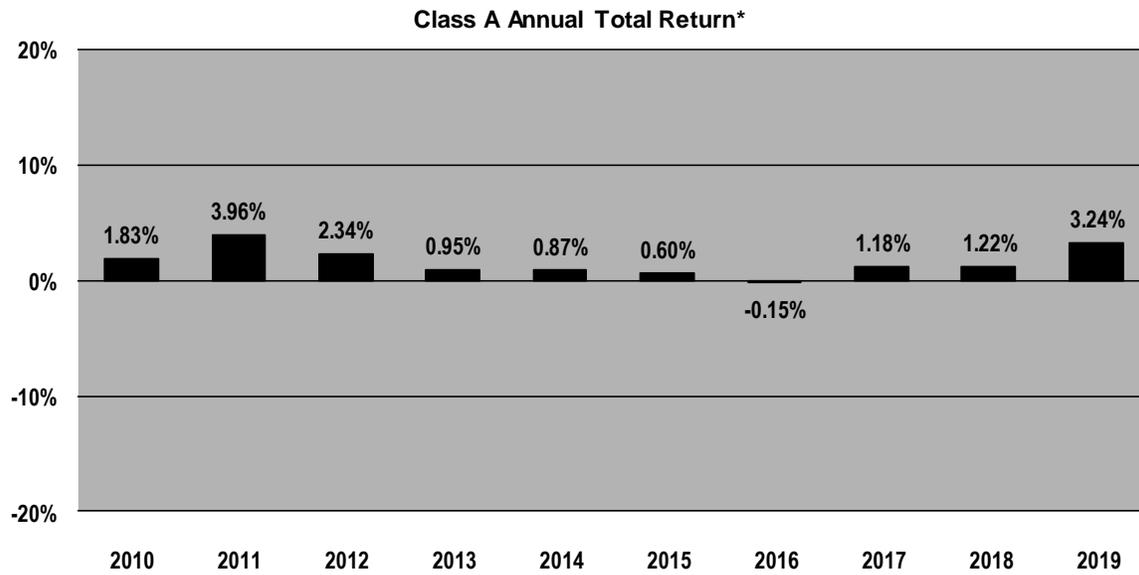

Valuation Risk—The municipal bonds in which the Fund invests typically are valued by a pricing service utilizing a range of market-based inputs and assumptions, including readily available market quotations obtained from broker-dealers making markets in such instruments, cash flows and transactions for comparable instruments. There is no assurance that the Fund will be able to sell a portfolio security at the price established by the pricing service, which could result in a loss to the Fund. Pricing services generally price municipal bonds assuming orderly transactions of an institutional "round lot" size, but some trades may occur in smaller, "odd lot" sizes, often at lower prices than institutional round lot trades. Different pricing services may incorporate different assumptions and inputs into their valuation methodologies, potentially resulting in different values for the same securities. As a result, if the Fund were to change pricing services, or if the Fund's pricing service were to change its valuation methodology, there could be a material impact, either positive or negative, on the Fund's net asset value.

Zero Coupon Bonds Risk—Because interest on zero coupon bonds is not paid on a current basis, the values of zero coupon bonds will be more volatile in response to interest rate changes than the values of bonds that distribute income regularly. Although zero coupon bonds generate income for accounting purposes, they do not produce cash flow, and thus the Fund could be forced to liquidate securities at an inopportune time in order to generate cash to distribute to shareholders as required by tax laws.

Fund Performance

The following bar chart and table provide some indication of the potential risks of investing in the Fund. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available at www.nuveen.com/performance or by calling (800) 257-8787.

The bar chart below shows the variability of the Fund's performance from year to year for Class A shares. The bar chart and highest/lowest quarterly returns that follow do not reflect sales charges, and if these charges were reflected, the returns would be less than those shown.

* Class A year-to-date total return as of June 30, 2020 was 0.80%. The performance of the other share classes will differ due to their different expense structures.

During the ten-year period ended December 31, 2019, the Fund's highest and lowest quarterly returns were 1.88% and -1.08%, respectively, for the quarters ended June 30, 2011 and December 31, 2010.

The table below shows the variability of the Fund's average annual returns and how they compare over the time periods indicated with those of a broad measure of market performance and an index of funds with similar investment objectives. All after-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. After-tax returns are shown for Class A shares only; after-tax returns for other share classes will vary. Your own actual after-tax returns will depend on your specific tax situation and may differ from what is shown here.

Both the bar chart and the table assume that all distributions have been reinvested. Performance reflects fee waivers, if any, in effect during the periods presented. If any such waivers had not been in place, returns would have been reduced.

Prior to February 10, 2014, Class C2 shares were designated Class C shares.

	Inception Date	Average Annual Total Returns for the Periods Ended December 31, 2019				
		1 Year	5 Years	10 Years	Since Inception (Class C)	Since Inception (Class C2)
Class A (return before taxes)	10/25/02	0.63%	0.70%	1.34%	N/A	N/A

¹ An unleveraged, market value-weighted index containing all bonds in the S&P Municipal Bond Index that mature between 6 months and 3.999 years.

² Represents the average annualized returns for all reporting funds in the Lipper Short Municipal Debt Funds Category.

Management

Investment Adviser

Nuveen Fund Advisors, LLC

Sub-Adviser

Nuveen Asset Management, LLC

Portfolio Manager

<u>Name</u>	<u>Title</u>	<u>Portfolio Manager of Fund Since</u>
Christopher L. Drahn, CFA	Managing Director	October 2002

Purchase and Sale of Fund Shares

You may purchase, redeem or exchange shares of the Fund on any business day through a financial advisor or other financial intermediary. Class C2 shares are available only through exchanges from other Nuveen Municipal Bond Funds and dividend reinvestments by current Class C2 shareholders. The Fund's initial and subsequent investment minimums generally are as follows, although certain financial intermediaries may impose their own investment minimums and the Fund may reduce or waive the minimums in some cases:

	<u>Class A and Class C</u>	<u>Class I</u>
Eligibility and Minimum Initial Investment	\$3,000	Available only through fee-based programs and to other limited categories of investors as described in the prospectus. \$100,000 for all accounts except: <ul style="list-style-type: none">• \$250 for clients of financial intermediaries and family offices that have accounts holding Class I shares with an aggregate value of at least \$100,000 (or that are expected to reach this level).• No minimum for certain other categories of eligible investors as described in the prospectus.
Minimum Additional Investment	\$100	No minimum.

Tax Information

The Fund intends to make interest income distributions that are exempt from regular federal income tax. However, all or a portion of these distributions may be subject to the federal alternative minimum tax and state and local taxes. In addition, a portion of the Fund's distributions may be subject to regular federal income tax.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank or financial advisor), the Fund, its distributor or its investment adviser may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your financial advisor or visit your financial intermediary's website for more information.

Section 2 How We Manage Your Money

To help you better understand the Funds, this section includes a detailed discussion of the Funds' investment and risk management strategies. For a more complete discussion of these matters, please see the statement of additional information, which is available by calling (800) 257-8787 or by visiting Nuveen's website at www.nuveen.com.

Who Manages the Funds

Nuveen Fund Advisors, LLC ("Nuveen Fund Advisors"), the Funds' investment adviser, offers advisory and investment management services to a broad range of clients, including investment companies and other pooled investment vehicles. Nuveen Fund Advisors has overall responsibility for management of the Funds, oversees the management of the Funds' portfolios, manages the Funds' business affairs and provides certain clerical, bookkeeping and other administrative services. Nuveen Fund Advisors is located at 333 West Wacker Drive, Chicago, Illinois 60606. Nuveen Fund Advisors is a subsidiary of Nuveen, LLC, the investment management arm of Teachers Insurance and Annuity Association of America ("TIAA"). TIAA is a life insurance company founded in 1918 by the Carnegie Foundation for the Advancement of Teaching and is the companion organization of College Retirement Equities Fund. As of June 30, 2020, Nuveen, LLC managed approximately \$1.05 trillion in assets, of which approximately \$144.4 billion was managed by Nuveen Fund Advisors.

Nuveen Fund Advisors has selected its affiliate, Nuveen Asset Management, LLC ("Nuveen Asset Management"), located at 333 West Wacker Drive, Chicago, Illinois 60606, to serve as sub-adviser to each Fund. Nuveen Asset Management manages the investment of the Funds' assets on a discretionary basis, subject to the supervision of Nuveen Fund Advisors.

The Funds are managed by one or more portfolio managers, who are responsible for the day-to-day management of the Funds, with expertise in the area applicable to the Funds' investments. In the case of Funds with multiple portfolio managers, each may be responsible for different aspects of the Fund's management. For example, one manager may be principally responsible for selecting appropriate investments for a Fund, while another may be principally responsible for asset allocation. The following is a list of the portfolio managers primarily responsible for managing each Fund's investments, along with their relevant experience. The Funds' portfolio managers may change from time to time.

Name & Title	Experience Over Past Five Years	Total Experience (since dates specified below)

* Including tenure at affiliate or predecessor firms, as applicable

Additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers and the portfolio managers' ownership of securities in the Funds is provided in the statement of additional information.

Management Fees

The management fee schedule for each Fund consists of two components: a Fund-level fee, based only on the amount of assets within a Fund, and a complex-level fee, based on the aggregate amount of all eligible fund assets managed by Nuveen Fund Advisors.

The annual Fund-level fee, payable monthly, is based upon the average daily net assets of each Fund as follows:

Average Daily Net Assets	Nuveen All-American Municipal Bond Fund	Nuveen Intermediate Duration Municipal Bond Fund	Nuveen Limited Term Municipal Bond Fund	Nuveen Short Term Municipal Bond Fund
For the first \$125 million	0.3000%	0.3000%	0.2500%	0.2500%
For the next \$125 million	0.2875%	0.2875%	0.2375%	0.2375%
For the next \$250 million	0.2750%	0.2750%	0.2250%	0.2250%
For the next \$500 million	0.2625%	0.2625%	0.2125%	0.2125%
For the next \$1 billion	0.2500%	0.2500%	0.2000%	0.2000%
For the next \$3 billion	0.2250%	0.2250%	0.1750%	0.1750%
For the next \$5 billion	0.2000%	0.2000%	0.1500%	0.1500%
For net assets over \$10 billion	0.1875%	0.1875%	0.1375%	0.1375%

The overall complex-level fee begins at a maximum rate of 0.2000% of each Fund's average daily net assets, based upon complex-level assets of \$55 billion, with breakpoints for eligible assets above that level. Nuveen Limited Term Municipal Bond Fund pays the overall complex-level fee rate. Nuveen All-American Municipal Bond Fund, Nuveen Intermediate Duration Municipal Bond Fund and Nuveen Short Term Municipal Bond Fund's complex-level fee rate is determined by taking the current overall complex-level fee rate and making, as appropriate, an upward adjustment to that rate based upon the percentage of the Fund's assets that are not "eligible assets." The maximum management fee rate for each Fund is the Fund-level fee plus 0.2000%. As of June 30, 2020, the Funds' effective complex-level fee rates were as follows:

	Complex-Level Fee Rate
Nuveen All-American Municipal Bond Fund	0.1610%
Nuveen Intermediate Duration Municipal Bond Fund	0.1613%
Nuveen Limited Term Municipal Bond Fund	0.1582%
Nuveen Short Term Municipal Bond Fund	0.1744%

For the most recent fiscal year, each Fund paid Nuveen Fund Advisors the following management fees (net of fee waivers and expense reimbursements, where applicable) as a percentage of average daily net assets:

Nuveen All-American Municipal Bond Fund	0.40%
Nuveen Intermediate Duration Municipal Bond Fund	0.38%
Nuveen Limited Term Municipal Bond Fund	0.34%
Nuveen Short Term Municipal Bond Fund	0.41%

Nuveen Fund Advisors has agreed to waive fees and/or reimburse expenses so that the total annual operating expenses (excluding 12b-1 distribution and/or service fees, interest expenses, taxes, acquired fund fees and expenses, fees incurred in acquiring and disposing of portfolio securities and extraordinary expenses) for Nuveen Intermediate Duration Municipal Bond Fund do not exceed 0.75% of the average daily net assets of any class of Fund shares. This expense limitation may be terminated or modified only with the approval of shareholders of the Fund.

Information regarding the Board of Directors'/Trustees' approval of the investment management agreements is available in the Funds' annual report for the fiscal year ended March 31, 2020.

More About Our Investment Strategies

The Funds' investment objectives, which are described in the "Fund Summaries" section, may not be changed without shareholder approval.

Each Fund has adopted a fundamental investment policy (a "*Name Policy*"). Each Fund, under normal market conditions, will invest at least 80% of the sum of its net assets and the amount of any borrowings for investment purposes in municipal bonds that pay interest that is exempt from regular federal personal income tax. The Funds will consider both direct investments and indirect investments (e.g., investments in other investment companies, derivatives and synthetic instruments with economic characteristics similar to the direct investments that meet the Name Policy) when determining compliance with the Name Policy. For purposes of the Name Policy, a Fund will value eligible derivatives at fair value or market value instead of notional value. A Name Policy may not be changed without shareholder approval.

The Funds' investment policies may be changed by the Board of Directors/Trustees without shareholder approval unless otherwise noted in this prospectus or the statement of additional information.

The Funds' principal investment strategies are discussed in the "Fund Summaries" section. These are the strategies that the Funds' investment adviser and sub-adviser believe are most likely to be important in trying to achieve the Funds' investment objectives. This section provides more information about these strategies, as well as information about some additional strategies that the Funds' sub-adviser uses, or may use, to achieve the Funds' objectives. You should be aware that each Fund may also use strategies and invest in securities that are not described in this prospectus, but that are described in the statement of additional information. For a copy of the statement of

additional information, call Nuveen Funds at (800) 257-8787 or visit Nuveen's website at www.nuveen.com.

Municipal Bonds

States, local governments and municipalities and other issuing authorities issue municipal bonds to raise money for various public purposes such as building public facilities, refinancing outstanding obligations and financing general operating expenses. These bonds include general obligation bonds, which are backed by the full faith and credit of the issuer and may be repaid from any revenue source, and revenue bonds, which may be repaid only from the revenue of a specific facility or source.

The Funds may purchase municipal bonds that represent lease obligations. These carry special risks because the issuer of the bonds may not be obligated to appropriate money annually to make payments under the lease. In order to reduce this risk, the Funds will, in making purchase decisions, take into consideration the issuer's incentive to continue making appropriations until maturity.

The municipal bonds in which the Funds invest may include refunded bonds and zero coupon bonds. Refunded bonds may have originally been issued as general obligation or revenue bonds, but become "refunded" when they are secured by an escrow fund, usually consisting entirely of direct U.S. government obligations and/or U.S. government agency obligations. Zero coupon bonds are issued at substantial discounts from their value at maturity and pay no cash income to their holders until they mature. When held to maturity, their entire return comes from the difference between their purchase price and their maturity value.

The municipal bonds in which the Funds invest may have variable, floating, or fixed interest rates.

In evaluating municipal bonds of different credit qualities or maturities, Nuveen Asset Management takes into account the size of yield spreads. Yield spread is the additional return the Funds may earn by taking on additional credit risk or interest rate risk. For example, yields on low quality bonds are higher than yields on high quality bonds because investors must be compensated for incurring the higher credit risk associated with low quality bonds. If yield spreads do not provide adequate compensation for the additional risk associated with low quality bonds, the Funds may buy bonds of relatively higher quality. Similarly, in evaluating bonds of different maturities, Nuveen Asset Management evaluates the comparative yield available on these bonds. If yield spreads on long-term bonds do not compensate the Funds adequately for the additional interest rate risk the Funds must assume, the Funds may buy bonds of relatively shorter maturity. In addition, municipal bonds in a particular industry may provide higher yields relative to their risk compared to bonds in other industries. If that occurs, the Funds may buy more bonds from issuers in that industry.

The Funds may normally invest up to 20% of their net assets in municipal bonds that are not exempt from regular federal personal income tax. Income received from the Funds' municipal bonds may be subject to the federal alternative minimum tax and state and local taxes.

Credit Quality. The Funds have principal investment strategies requiring them to invest in municipal bonds that have received a particular rating from a rating service, such as Moody's or Standard & Poor's. Any reference in this prospectus to a specific rating encompasses all gradations of that rating. For example, if the prospectus says that a Fund may invest in securities rated as low as B, the Fund may invest in securities rated B-. The rating assigned to a particular investment does not necessarily reflect the issuer's current financial condition and does not reflect an assessment of the

investment's volatility or liquidity. Municipal bonds that are rated below investment grade (BB/Ba or lower) are commonly referred to as "high yield" or "junk" bonds. High yield bonds typically offer higher yields than investment grade bonds with similar maturities but involve greater risks, including the possibility of default or bankruptcy, and increased market price volatility.

Portfolio Maturity and Effective Duration

Maturity measures the time until a bond makes its final payment. Each Fund buys municipal bonds with different maturities in pursuit of its investment objective, but will generally maintain, under normal market conditions, an investment portfolio with an overall weighted average maturity within a defined range. Nuveen Short Term Municipal Bond Fund will attempt to maintain the weighted average maturity of its portfolio securities at three years or less under normal market conditions. Nuveen Limited Term Municipal Bond Fund will attempt to maintain the weighted average maturity of its portfolio securities at three to seven years under normal market conditions. Nuveen All-American Municipal Bond Fund will maintain, under normal market conditions, an investment portfolio with an overall weighted average maturity in excess of 10 years.

Effective duration measures a bond's expected life on a present value basis, taking into account the bond's yield, interest payments, final maturity and, in the case of a bond with an embedded option (e.g., the right of the issuer to call the bond prior to maturity, or a sinking fund schedule), the probability that the option will be exercised. Effective duration is a reasonably accurate measure of a bond's price sensitivity to changes in interest rates. The longer the effective duration of a bond, the greater the bond's price sensitivity is to changes in interest rates, which typically corresponds to higher volatility and risk. For example, if a bond has an effective duration of five years, its value will decrease by approximately 5% if interest rates rise by 1%. Under normal market conditions, Nuveen Intermediate Duration Municipal Bond Fund maintains a weighted average effective duration of between 3 and 10 years, and expects to generally maintain a weighted average effective duration of between 4.5 and 7 years. A Fund's measurement of weighted average effective duration will reflect the impact of portfolio leverage through any investments in inverse floaters.

Inverse Floaters

Each Fund may invest up to 15% of its net assets in inverse floaters issued in tender option bond ("TOB") transactions. In a TOB transaction, one or more highly-rated municipal bonds are deposited into a special purpose trust that issues floating rate securities ("floaters") to outside parties and inverse floaters to long-term investors like the Funds. The floaters pay interest at a rate that is reset periodically (generally weekly) to reflect current short-term tax-exempt interest rates. Holders of the floaters have the right to tender such securities back to the TOB trust for par plus accrued interest (the "put option"), typically on seven days' notice. Holders of the floaters are paid from the proceeds of a successful remarketing of the floaters or by a liquidity provider in the event of a failed remarketing. The inverse floaters pay interest at a rate equal to (a) the interest accrued on the underlying bonds, minus (b) the sum of the interest payable on the floaters and fees payable in connection with the TOB. Thus, the interest payments on the inverse floaters will vary inversely with the short-term rates paid on the floaters. Holders of the inverse floaters typically have the right to simultaneously (a) cause the holders of the floaters to tender those floaters to the TOB trust at par plus accrued interest and (b) purchase the municipal bonds from the TOB trust.

Because holders of the floaters have the right to tender their securities to the TOB trust at par plus accrued interest, holders of the inverse floaters are exposed to all of the gains or losses on the underlying municipal bonds, despite the fact that their net cash

investment is significantly less than the value of those bonds. This multiplies the positive or negative impact of the underlying bonds' price movements on the value of the inverse floaters, thereby creating effective leverage. The effective leverage created by any TOB transaction depends on the value of the securities deposited in the TOB trust relative to the value of the floaters it issues. The higher the percentage of the TOB trust's total value represented by the floaters, the greater the effective leverage. For example, if municipal bonds worth \$100 are deposited in a TOB trust and the TOB trust issues floaters worth \$75 and inverse floaters worth \$25, the TOB trust will have a leverage ratio of 3:1 and the inverse floaters will exhibit price movements at a rate that is four times that of the underlying bonds deposited into the trust. If that same TOB trust were to issue only \$50 of floaters, the leverage ratio would be 1:1 and the inverse floaters would exhibit price movements at a rate that is only two times that of the underlying bonds.

Short-Term Investments and Cash Equivalents

Under normal market conditions, each Fund may invest up to 20% of its net assets in short-term investments, such as short-term, high quality municipal bonds or tax-exempt money market funds, except that Nuveen Short Term Municipal Bond Fund is not subject to such limitation on short-term investments. The Funds may invest in short-term, high quality taxable securities or shares of taxable money market funds if suitable short-term municipal bonds or shares of tax-exempt money market funds are not available at reasonable prices and yields. If the Funds invest in taxable securities, they may not be able to achieve their investment objectives.

As a non-principal investment strategy, each Fund may invest up to 100% of its assets in cash equivalents and short-term investments as a temporary defensive measure in response to adverse market conditions or to keep cash on hand fully invested. During these periods, the weighted average maturity of a Fund's investment portfolio may fall below the defined range described in the respective Fund Summary under "Principal Investment Strategies," if applicable, and a Fund may not achieve its objective. A Fund does not expect to invest substantial amounts in short-term investments as a defensive measure except under extraordinary circumstances.

For more information on eligible short-term investments, see the statement of additional information.

Disclosure of Portfolio Holdings

A description of the Funds' policies and procedures with respect to the disclosure of the Funds' portfolio holdings is available in the Funds' statement of additional information. A list of each Fund's portfolio holdings is available on the Funds' website—www.nuveen.com/mutual-funds—by navigating to your Fund's web page and clicking on the "Characteristics" link. By following this link, you can obtain a list of your Fund's top ten holdings as of the end of the most recent month. A complete list of portfolio holdings information is generally made available on the Funds' website approximately five business days following the end of each most recent month. This information will remain available on the website until the Funds file with the Securities and Exchange Commission their annual, semi-annual or quarterly holdings report for the fiscal period that includes the date(s) as of which the website information is current.

How We Select Investments

Investment Philosophy

Nuveen Asset Management believes that the tax treatment of municipal securities and the structural characteristics in the municipal securities market create opportunities to enhance the after-tax total return and diversification of the investment portfolios of taxable investors. Nuveen Asset Management follows a disciplined, research-driven investment approach to find securities that combine exceptional relative value with above-average return potential.

Investment Process

Nuveen Asset Management believes that a value-oriented investment strategy that seeks to identify underrated and undervalued securities and sectors is positioned to capture the opportunities inherent in the municipal securities market and potentially outperform the general municipal securities market over time. The primary elements of Nuveen Asset Management's investment process are:

- Credit analysis and surveillance
- Sector analysis
- Limited industry concentration
- Trading strategies
- Sell discipline
- Yield curve and structural analysis

What the Risks Are

Risk is inherent in all investing. Investing in a mutual fund involves risk, including the risk that you may receive little or no return on your investment or even that you may lose part or all of your investment. Therefore, before investing you should consider carefully the principal risks and certain other risks that you assume when you invest in the Funds. See the "Fund Summaries" section for a description of the principal risks of investing in a particular Fund. Additional information about these risks is listed alphabetically below. Because of these risks, you should consider an investment in the Funds to be a long-term investment.

Principal Risks

Active management risk: The funds' sub-adviser actively manages each fund's investments. Consequently, the funds are subject to the risk that the investment techniques and risk analyses employed by the funds' sub-adviser may not produce the desired results. This could cause a fund to lose value or its investment results to lag relevant benchmarks or other funds with similar objectives. Additionally, legislative, regulatory or tax developments may affect the investment techniques available to the funds' sub-adviser in connection with managing a fund and may also adversely affect the ability of a fund to achieve its investment goal.

Alternative minimum tax risk: Each fund has no limit as to the amount that can be invested in alternative minimum tax bonds. Therefore, all or a portion of a fund's otherwise exempt-interest dividends may be taxable to those shareholders subject to the federal alternative minimum tax.

Call risk: Municipal bonds are subject to call risk. Many bonds may be redeemed at the option of the issuer, or “called,” before their stated maturity date. In general, an issuer will call its bonds if they can be refinanced by issuing new bonds which bear a lower interest rate. A fund is subject to the possibility that during periods of falling interest rates, a bond issuer will call its high yielding bonds. A fund would then be forced to invest the unanticipated proceeds at lower interest rates, resulting in a decline in the fund’s income. Such redemptions and subsequent reinvestments would also increase a fund’s portfolio turnover. If the called bond was purchased or is currently valued at a premium, the value of the premium may be lost in the event of prepayment.

Credit risk: Credit risk is the risk that an issuer of a municipal bond held by a fund may be unable or unwilling to make interest and principal payments and the related risk that the value of a municipal bond may decline because of concerns about the issuer’s ability or willingness to make such payments. Municipal bonds are subject to varying degrees of credit risk, which are often reflected in credit ratings. The credit rating of a municipal bond may be lowered if the issuer suffers adverse changes in its financial condition, which can lead to greater volatility in the price of the bond and in shares of a fund, and can also affect the bond’s liquidity and make it more difficult for a fund to sell. When a fund purchases unrated securities, it will depend on the sub-adviser’s analysis of credit risk without the assessment of an independent rating organization, such as Moody’s or Standard & Poor’s. Credit risk may be increased by a fund’s investments in inverse floaters because of the leveraged nature of these investments.

To the extent that a fund holds municipal bonds that are secured or guaranteed by financial institutions, changes in the credit quality of such financial institutions could cause the values of these municipal bonds to decline.

Credit spread risk: Credit spread risk is the risk that credit spreads (*i.e.*, the difference in yield between securities that is due to differences in their credit quality) may increase when the market believes that bonds generally have a greater risk of default. Increasing credit spreads may reduce the market values of a fund’s securities. Credit spreads often increase more for lower rated and unrated securities than for investment grade securities. In addition, when credit spreads increase, reductions in market value will generally be greater for longer-maturity securities.

Cybersecurity risk: Intentional cybersecurity breaches include: unauthorized access to systems, networks or devices (such as through “hacking” activity); infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow, or otherwise disrupt operations, business processes, or website access or functionality. In addition, unintentional incidents can occur, such as the inadvertent release of confidential information (possibly resulting in the violation of applicable privacy laws).

A cybersecurity breach could result in the loss or theft of customer data or funds, the inability to access electronic systems (“denial of services”), loss or theft of proprietary information or corporate data, physical damage to a computer or network system, or costs associated with system repairs. Such incidents could cause a fund, a fund’s adviser or sub-adviser, a financial intermediary, or other service providers to incur regulatory penalties, reputational damage, additional compliance costs or financial loss. Negative impacts on a fund could include the inability to calculate net asset value, transact business, process transactions on behalf of shareholders or safeguard data. In addition, such incidents could affect issuers in which a fund invests, and thereby cause the fund’s investments to lose value.

Derivatives risk: The use of derivatives presents risks different from, and possibly greater than, the risks associated with investing directly in traditional securities. Derivatives can be highly volatile, illiquid and difficult to value, and there is the risk that changes in the value of a derivative held by a fund will not correlate with the asset, index or rate underlying the derivative contract.

The use of derivatives can lead to losses because of adverse movements in the price or value of the underlying asset, index or rate, which may be magnified by certain features of the contract. A derivative transaction also involves the risk that a loss may be sustained as a result of the failure of the counterparty to the contract to make required payments. These risks are heightened when the management team uses derivatives to enhance a fund's return or as a substitute for a position or security, rather than solely to hedge (or offset) the risk of a position or security held by the fund.

In addition, when a fund engages in certain derivative transactions, it is effectively leveraging its investments, which could result in exaggerated changes in the net asset value of the fund's shares and can result in losses that exceed the amount originally invested. The success of a fund's derivatives strategies will depend on the sub-adviser's ability to assess and predict the impact of market or economic developments on the underlying asset, index or rate and the derivative itself, without the benefit of observing the performance of the derivative under all possible market conditions.

A fund may also enter into over-the-counter ("OTC") transactions in derivatives. Transactions in the OTC markets generally are conducted on a principal-to-principal basis. The terms and conditions of these instruments generally are not standardized and tend to be more specialized or complex, and the instruments may be harder to value. In general, there is less governmental regulation and supervision of transactions in the OTC markets than of transactions entered into on organized exchanges. In addition, certain derivative instruments and markets may not be liquid, which means a fund may not be able to close out a derivatives transaction in a cost-efficient manner.

Short positions in derivatives may involve greater risks than long positions, as the risk of loss on short positions is theoretically unlimited (unlike a long position, in which the risk of loss may be limited to the notional amount of the instrument).

Swap agreements may involve fees, commissions or other costs that may reduce a fund's gains from a swap agreement or may cause the fund to lose money.

Futures contracts are subject to the risk that an exchange may impose price fluctuation limits, which may make it difficult or impossible for a fund to close out a position when desired.

Options contracts may expire unexercised, which may cause a fund to realize a capital loss equal to the premium paid on a purchased option or a capital gain equal to the premium received on a written option.

High yield securities risk: Securities that are rated below-investment grade are commonly referred to as "high yield" securities or "junk" bonds. High yield securities usually offer higher yields than investment grade securities, but also involve more risk. Analysis of the creditworthiness of issuers of high yield securities may be more complex than for issuers of higher rated debt securities. High yield securities may be more susceptible to real or perceived adverse economic conditions than investment grade securities, and they generally have more volatile prices and carry more risk to principal. In addition, high yield securities generally are less liquid than investment grade securities. Any investment in distressed or defaulted securities subjects a fund to even greater credit risk than investments in other below-investment grade securities.

Income risk: A fund's income from its municipal bonds could decline during periods of falling interest rates because the fund generally may have to invest the proceeds from sales of fund shares, as well as the proceeds from maturing portfolio municipal bonds (or portfolio securities that have been called, see "Call risk" above), in lower-yielding securities. In addition, a fund's income could decline when the fund experiences defaults on municipal bonds it holds. To the extent that a fund invests in floating-rate securities, the income generated from such securities will decrease during periods of falling interest rates. Also, if a fund invests in inverse floaters, whose income payments vary inversely with changes in short-term market rates, the fund's income may decrease if short-term interest rates rise.

Interest rate risk: Municipal bonds held by a fund will fluctuate in value with changes in interest rates. In general, municipal bonds will increase in value when interest rates fall and decrease in value when interest rates rise. Short-term and long-term interest rates do not necessarily move in the same amount or in the same direction. Very low or negative interest rates may magnify interest rate risk. Changing interest rates, including rates that fall below zero, may have unpredictable effects on markets, result in heightened market volatility and detract from a fund's performance to the extent that it is exposed to such interest rates. Under certain circumstances, very low or negative interest rates may cause a fund to have very low or negative yields on some of its securities. A fund may be subject to a greater risk of rising interest rates than would normally be the case due to the current period of historically low rates and the effect of potential government fiscal policy initiatives and resulting market reaction to those initiatives. Longer-term municipal bonds are generally more sensitive to interest rate changes. Therefore, a fund that has a portfolio with a longer weighted average maturity or effective duration may be impacted to a greater degree than a fund that has a portfolio with a shorter weighted average maturity or effective duration. Conversely, municipal bonds with shorter durations or maturities will be less volatile but may provide lower returns than municipal bonds with longer durations or maturities. Rising interest rates also may lengthen the duration of municipal bonds with call features, since exercise of the call becomes less likely as interest rates rise, which in turn will make the securities more sensitive to changes in interest rates and result in even steeper price declines in the event of further interest rate increases. Interest rate risk may be increased by a fund's investment in inverse floaters and forward commitments because of the leveraged nature of these investments.

Inverse floaters risk: The use of inverse floaters by a fund creates effective leverage. Due to the leveraged nature of these investments, the value of an inverse floater will increase and decrease to a significantly greater extent than the values of the TOB trust's underlying municipal bonds in response to changes in market interest rates or credit quality. An investment in inverse floaters typically will involve greater risk than an investment in a fixed rate municipal bond, including, in the case of recourse inverse floaters (discussed below), the risk that a fund may lose more than its original principal investment.

Distributions on inverse floaters bear an inverse relationship to short-term municipal bond interest rates. Thus, distributions paid to a fund on its inverse floaters will be reduced or even eliminated as short-term municipal bond interest rates rise and will increase when short-term municipal bond interest rates fall. The greater the amount of floaters sold by a TOB trust relative to the inverse floaters (i.e., the greater the effective leverage of the inverse floaters), the more volatile the distributions on the inverse floaters will be. Inverse floaters generally will underperform the market for fixed rate municipal bonds in a rising interest rate environment.

A fund may invest in recourse inverse floaters. With such an investment, the fund will be required to reimburse the liquidity provider of a TOB trust for any shortfall between the outstanding amount of any floaters and the value of the municipal bonds in the TOB trust in the event the floaters cannot be successfully remarketed, which could cause the fund to lose money in excess of its investment.

A TOB trust may be terminated without a fund's consent upon the occurrence of certain events, such as the bankruptcy or default of the issuer of the securities in the trust. If that happens, the floaters will be redeemed at par (plus accrued interest) out of the proceeds from the sale of securities in the TOB trust, and the fund will be entitled to the remaining proceeds, if any. Thus, if there is a decrease in the value of the securities held in the TOB trust, the fund may lose some or all of the principal amount of its investment in the inverse floaters. As noted above, in the case of recourse inverse floaters, the fund could lose money in excess of its investment.

TOB trusts have historically been established by third party sponsors (e.g., banks, broker-dealers and other financial institutions). Rules implementing section 619 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Volcker Rule") have generally precluded banking entities and their affiliates from sponsoring TOB trusts. In response to these restrictions, market participants have developed a new structure for TOB trusts designed to ensure that no banking entity is sponsoring the TOB trust for purposes of the Volcker Rule. To the extent that a fund, rather than a third-party bank or financial institution, sponsors a TOB trust, certain responsibilities that previously belonged to the sponsor bank will be performed by, or under the general oversight of, the fund. A fund's additional duties and responsibilities under the new TOB trust structure may give rise to certain additional risks including compliance, securities law and operational risks.

Market risk: The market value of a fund's investments may go up or down, sometimes rapidly or unpredictably and for short or extended periods of time. Market values may change due to the particular circumstances of individual issuers or due to general conditions impacting issuers more broadly within a specific country, region, industry, sector or asset class. Global economies and financial markets have become highly interconnected, and thus economic, market or political conditions or events in one country or region might adversely impact issuers in a different country or region. As a result, the value of a fund's investments may be negatively affected whether or not the fund invests in a country or region directly impacted by such conditions or events.

Additionally, unexpected events and their aftermaths, including broad financial dislocations (such as the "great recession" of 2008-09), war, terrorism, natural and environmental disasters and the spread of infectious illnesses or other public health emergencies (such as the COVID-19 coronavirus pandemic first detected in December of 2019), may adversely affect the global economy and the markets and issuers in which a fund invests. These events could reduce consumer demand or economic output, result in market closures, travel restrictions or quarantines, or widespread unemployment, and generally have a severe negative impact on the global economy. Such events could also impair the information technology and other operational systems upon which a fund's service providers, including the investment adviser and sub-adviser, rely, and could otherwise disrupt the ability of employees of a fund's service providers to perform essential tasks on behalf of a fund. Furthermore, such events could cause financial markets to experience elevated or even extreme volatility and losses, and could result in the disruption of trading and the reduction of liquidity in many instruments. Governmental and quasi-governmental authorities and regulators throughout the world have in the past responded to major economic disruptions with a variety of significant fiscal and monetary

policy changes, including but not limited to, direct capital infusions into companies, new monetary programs and dramatically lower interest rates. An unexpected or quick reversal of these policies, or the ineffectiveness of these policies, could increase volatility in securities markets, which could adversely affect the value of a fund's investments.

Municipal bond market liquidity risk: Inventories of municipal bonds held by brokers and dealers have decreased in recent years, lessening their ability to make a market in these securities. This reduction in market making capacity has the potential to decrease a fund's ability to buy or sell bonds, and increase bond price volatility and trading costs, particularly during periods of economic or market stress. In addition, recent federal banking regulations may cause certain dealers to reduce their inventories of municipal bonds, which may further decrease a fund's ability to buy or sell bonds. As a result, the fund may be forced to accept a lower price to sell a security, to sell other securities to raise cash, or to give up an investment opportunity, any of which could have a negative effect on performance. If a fund needed to sell large blocks of bonds to raise cash (such as to meet heavy shareholder redemptions), those sales could further reduce the bonds' prices and hurt fund performance.

Municipal lease obligations risk: Participation interests in municipal leases are undivided interests in a lease, installment purchase contract, or conditional sale contract entered into by a state or local government unit to acquire equipment or facilities. Participation interests in municipal leases pose special risks because many leases and contracts contain "non-appropriation" clauses that provide that the governmental issuer has no obligation to make future payments under the lease or contract unless money is appropriated for this purpose by the appropriate legislative body. If an issuer stopped making payment on the municipal lease, the obligation held by a fund would likely lose some or all of its value. In addition, some municipal lease obligations may be less liquid than other debt obligations, making it difficult for a fund to sell the obligation at an acceptable price. Although these kinds of obligations are secured by the leased equipment or facilities, it might be difficult and time consuming to dispose of the equipment or facilities in the event of non-appropriation, and a fund might not recover the full principal amount of the obligation.

Municipal securities risk: The values of municipal securities may be adversely affected by local political and economic conditions and developments. Adverse conditions in an industry significant to a local economy could have a correspondingly adverse effect on the financial condition of local issuers. Other factors that could affect municipal securities include a change in the local, state, or national economy, a downgrade of a state's credit rating or the rating of authorities or political subdivisions of the state, demographic factors, ecological or environmental concerns, inability or perceived inability of a government authority to collect sufficient tax or other revenues, statutory limitations on the issuer's ability to increase taxes, and other developments generally affecting the revenue of issuers (for example, legislation or court decisions reducing state aid to local governments or mandating additional services). This risk would be heightened to the extent that a fund invests a substantial portion of the below-investment grade quality portion of its portfolio in the bonds of similar projects (such as those relating to the education, health care, housing, transportation, or utilities industries), in industrial development bonds, or in particular types of municipal securities (such as general obligation bonds, municipal lease obligations, private activity bonds or moral obligation bonds) that are particularly exposed to specific types of adverse economic, business or political events. The value of municipal securities may also be adversely affected by rising health care costs, increasing unfunded pension liabilities, and by the phasing out

of federal programs providing financial support. In recent periods, a number of municipal issuers have defaulted on obligations, been downgraded or commenced insolvency proceedings. Financial difficulties of municipal issuers may continue or get worse. In addition, the amount of public information available about municipal bonds is generally less than for certain corporate equities or bonds, meaning that the investment performance of a fund may be more dependent on the analytical abilities of the fund's sub-adviser than funds that invest in stock or other corporate investments.

To the extent that a fund invests a significant portion of its assets in the securities of issuers located in a given state or U.S. territory, it will be disproportionately affected by political and economic conditions and developments in that state or territory and may involve greater risk than funds that invest in a larger universe of securities. In addition, economic, political or regulatory changes in that state or territory could adversely affect municipal securities issuers in that state or territory and therefore the value of a fund's investment portfolio.

Tax risk: There is no guarantee that a fund's income will remain exempt from federal income taxes. Proposals have been made to restrict or eliminate the federal income tax exemption for interest on municipal securities, and similar proposals may be introduced in the future. Proposed "flat tax" and "value added tax" proposals would also have the effect of eliminating the tax preference for municipal securities. Some of the proposals would apply to interest on municipal securities issued before the date of enactment, which would adversely affect their value to a material degree. If such a proposal were enacted, the availability of municipal securities for investment by a fund and the value of the fund's portfolio would be adversely affected.

In addition, recent tax law changes could have a material impact on the value of municipal securities. Because advance refunding bonds issued after December 31, 2017 are no longer tax-exempt, the total supply of municipal bonds could decrease going forward. In addition, the reduction of the U.S. corporate income tax rate to 21% could make municipal obligations less attractive to certain institutional investors, resulting in lower demand for municipal obligations. Additional changes in tax rates or the treatment of income from certain types of municipal securities, among other things, could negatively affect the municipal securities markets.

A fund's investments in municipal securities rely on the opinion of the issuer's bond counsel that the interest paid on those securities will not be subject to federal income tax. Tax opinions are generally provided at the time the municipal security is initially issued and neither a fund or its portfolio manager(s) will independently review the bases for those tax opinions or guarantee that the tax opinions are correct. However, after a fund buys a security, the Internal Revenue Service may determine that a bond issued as tax-exempt should in fact be taxable and the fund's dividends with respect to that bond might be subject to federal income tax. If this happens, the value of the security would likely fall and a shareholder of a fund may have to file an amended tax return and pay additional taxes.

Investments in taxable obligations, as well as certain derivatives utilized by a fund, may cause a fund to have taxable investment income. In addition, a fund may recognize taxable ordinary income from market discount. A fund may also realize capital gains on the sale of its securities. These capital gains will be taxable regardless of whether they are derived from the sale of tax-exempt bonds or taxable securities.

Unrated bond risk: Unrated municipal bonds determined by the funds' sub-adviser to be of comparable quality to rated municipal bonds which a fund may purchase may pay a higher interest rate than such rated municipal bonds and be subject to a greater risk of

illiquidity or price changes. Less public information is typically available about unrated municipal bonds or issuers than rated bonds or issuers.

Valuation risk: The municipal bonds in which a fund may invest typically are valued by a pricing service utilizing a range of market-based inputs and assumptions, including readily available market quotations obtained from broker-dealers making markets in such instruments, cash flows and transactions for comparable instruments. There is no assurance that a fund will be able to sell a portfolio security at the price established by the pricing service, which could result in a loss to the fund. Pricing services generally price municipal bonds assuming orderly transactions of an institutional “round lot” size, but some trades may occur in smaller, “odd lot” sizes, often at lower prices than institutional round lot trades. Different pricing services may incorporate different assumptions and inputs into their valuation methodologies, potentially resulting in different values for the same securities. As a result, if a fund were to change pricing services, or if a fund’s pricing service were to change its valuation methodology, there could be a material impact, either positive or negative, on the fund’s net asset value.

Zero coupon bonds risk: As interest on zero coupon bonds is not paid on a current basis, the values of the bonds are subject to greater fluctuations than are the value of bonds that distribute income regularly and may be more speculative than such bonds. Accordingly, the values of zero coupon bonds may be highly volatile as interest rates rise or fall. In addition, while zero coupon bonds generate income for purposes of generally accepted accounting standards, they do not generate cash flow and thus could cause a fund to be forced to liquidate securities at an inopportune time in order to distribute cash, as required by certain tax laws.

Non-Principal Risks

Large transactions risk: A fund may experience adverse effects due to large purchases or redemptions of fund shares. A large redemption by an individual shareholder, or an increase in redemptions generally by fund shareholders, may cause a fund to sell portfolio securities at times when it would not otherwise do so, which may negatively impact the fund’s net asset value and liquidity. If a fund has difficulty selling portfolio securities in a timely manner to meet redemption requests, the fund may have to borrow money to do so. In such an instance, a fund’s remaining shareholders would bear the costs of such borrowings, and such costs could reduce the fund’s returns. In addition, until a fund is able to sell securities to meet redemption requests, the fund’s market exposure may be greater than it ordinarily would be, which would magnify the impact of any market movements on the fund’s performance. Similarly, large fund share purchases may adversely affect a fund’s performance to the extent that the fund is delayed in investing new cash and is required to maintain a larger cash position than it ordinarily would, reducing the fund’s market exposure. Increased redemption activity may also result in unexpected taxable distributions to shareholders if such sales of investments resulted in gains and thereby accelerated the realization of taxable income. In addition, large redemptions could result in a fund’s current expenses being allocated over a smaller asset base, leading to an increase in the fund’s expense ratio.

Section 3 How You Can Buy and Sell Shares

The Funds offer multiple classes of shares, each with a different combination of sales charges, fees, eligibility requirements and other features. Your financial advisor can help you determine which class is best for you. For further details, please see the statement of additional information. Because the prospectus and the statement of additional information are available free of charge on Nuveen's website at www.nuveen.com, we do not disclose the following share class information separately on the website.

What Share Classes We Offer

The different share classes offered by the Funds are described below. You will pay up-front or contingent deferred sales charges on some of these share classes. In addition, some share classes are subject to annual distribution and/or service fees in the amounts described below, which are paid out of a Fund's assets. These fees are paid to Nuveen Securities, LLC (the "Distributor"), a subsidiary of Nuveen, LLC and the distributor of the Funds, and are used primarily for providing compensation to financial intermediaries in connection with the distribution of Fund shares and for providing ongoing account services to shareholders. The Funds have adopted a distribution and service plan under Rule 12b-1 under the Investment Company Act of 1940, as amended (the "1940 Act"), that allows each Fund to pay these distribution and service fees. More information on this plan can be found under "Distribution and Service Payments—Distribution and Service Plan." Because fees paid under the plan are paid out of a Fund's assets on an ongoing basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of sales charges.

Class A Shares

You can purchase Class A shares at the offering price, which is the net asset value per share plus an up-front sales charge. You may qualify for a reduced sales charge, or the sales charge may be waived, as described in "How to Reduce Your Sales Charge." Class A shares are also subject to an annual service fee of 0.20% of your Fund's average daily net assets, which compensates your financial advisor or other financial intermediary for providing ongoing service to you. The Distributor retains the service fee on accounts with no financial intermediary of record. The up-front Class A sales charges for the Funds are as follows:

Nuveen All-American Municipal Bond Fund

Amount of Purchase	Sales Charge as % of Public Offering Price	Sales Charge as % of Net Amount Invested	Maximum Financial Intermediary Commission as % of Public Offering Price
Less than \$50,000	4.20%	4.38%	3.70%
\$50,000 but less than \$100,000	4.00	4.18	3.50
\$100,000 but less than \$250,000	3.50	3.63	3.00
\$250,000 and over*	—	—	1.00

* You can purchase \$250,000 or more of Class A shares at net asset value without an up-front sales charge. The Distributor pays financial intermediaries of record at a rate of 1.00% of the first \$2.5 million, plus 0.75% of the next \$2.5 million, plus 0.50% of the amount over \$5 million, which includes an advance of the first year's service fee. Unless you are eligible for a waiver, you may be assessed a contingent deferred sales charge ("CDSC") of 1.00% if you redeem any of your shares within 18 months of purchase. See "Contingent Deferred Sales Charges" below for information concerning the CDSC and "How to Reduce Your Sales Charge—CDSC Waivers and Reductions" below for information concerning CDSC waivers and reductions.

Nuveen Intermediate Duration Municipal Bond Fund

Amount of Purchase	Sales Charge as % of Public Offering Price	Sales Charge as % of Net Amount Invested	Maximum Financial Intermediary Commission as % of Public Offering Price
Less than \$50,000	3.00%	3.09%	2.50%
\$50,000 but less than \$100,000	2.50	2.56	2.00
\$100,000 but less than \$250,000	2.00	2.04	1.50
\$250,000 and over*	—	—	1.00

* You can purchase \$250,000 or more of Class A shares at net asset value without an up-front sales charge. The Distributor pays financial intermediaries of record at a rate of 1.00% of the first \$2.5 million, plus 0.75% of the next \$2.5 million, plus 0.50% of the amount over \$5 million, which includes an advance of the first year's service fee. Unless you are eligible for a waiver, you may be assessed a CDSC of 1.00% if you redeem any of your shares within 18 months of purchase. See "Contingent Deferred Sales Charges" below for information concerning the CDSC and "How to Reduce Your Sales Charge—CDSC Waivers and Reductions" below for information concerning CDSC waivers and reductions.

Nuveen Limited Term Municipal Bond Fund

Nuveen Short Term Municipal Bond Fund

Amount of Purchase	Sales Charge as % of Public Offering Price	Sales Charge as % of Net Amount Invested	Maximum Financial Intermediary Commission as % of Public Offering Price
Less than \$50,000	2.50%	2.56%	2.00%
\$50,000 but less than \$100,000	2.00	2.04	1.60
\$100,000 but less than \$250,000	1.50	1.52	1.20
\$250,000 and over*	—	—	0.70

* You can purchase \$250,000 or more of Class A shares at net asset value without an up-front sales charge. The Distributor pays financial intermediaries of record at a rate of 0.70% of the first \$2.5 million, plus 0.50% of the next \$2.5 million, plus 0.25% of the amount over \$5 million, which includes an advance of the first year's service fee. Unless you are eligible for a waiver, you may be assessed a CDSC of 0.70% if you redeem any of your shares within 18 months of purchase for Nuveen Limited Term Municipal Bond Fund and within 12 months of purchase for Nuveen Short Term Municipal Bond Fund. See "Contingent Deferred Sales Charges" below for information concerning the CDSC and "How to Reduce Your Sales Charge—CDSC Waivers and Reductions" below for information concerning CDSC waivers and reductions.

Investors may purchase Class A shares only for Fund accounts held with a financial advisor or other financial intermediary, and not directly with a Fund. In addition, Class A shares may not be available through certain financial intermediaries. Please consult with your financial intermediary to determine whether their policies allow for an investment in Class A shares.

Class C Shares

You can purchase Class C shares at the offering price, which is the net asset value per share without any up-front sales charge. Class C shares are subject to annual distribution and service fees of 1.00% of your Fund's average daily net assets. The annual 0.25% service fee compensates your financial advisor or other financial intermediary for providing ongoing service to you. The annual 0.75% distribution fee compensates the Distributor for paying your financial advisor or other financial intermediary an ongoing sales commission. The Distributor compensates your financial advisor or other financial intermediary at the time of sale at a rate of 1.00% of the amount of Class C shares purchased, which includes an advance of the first year's service and distribution fees. The Distributor retains the service and distribution fees on accounts with no financial intermediary of record. If you redeem your shares within 12 months of purchase, you will normally pay a 1.00% CDSC, which is calculated on the lower of your purchase price or redemption proceeds. You do not pay a CDSC on any Class C shares you purchase by reinvesting dividends. You may qualify for a reduced CDSC, or the CDSC may be waived, as described in "How to Reduce Your Sales Charge" below.

Investors purchasing Class C shares should consider whether they would qualify for a reduced or eliminated sales charge on Class A shares that would make purchasing

Class A shares a better choice. Class A share sales charges can be reduced or eliminated based on the size of the purchase, or pursuant to a letter of intent or rights of accumulation. See “How to Reduce Your Sales Charge” below.

Class C share purchase orders equaling or exceeding \$250,000 will not be accepted. In addition, the Funds limit the cumulative amount of Class C shares that may be purchased by a single purchaser. Your financial intermediary may set lower maximum purchase limits for Class C shares. See the statement of additional information for more information.

Class C shares automatically convert to Class A shares after 10 years, thus reducing future annual expenses. Conversions occur during the month in which the 10-year anniversary of the purchase occurs. The automatic conversion is based on the relative net asset values of the two share classes without the imposition of a sales charge or fee. The automatic conversion of Class C shares to Class A shares does not apply to shares held through group retirement plan recordkeeping platforms of certain financial intermediaries who hold such shares in an omnibus account and do not track participant level share lot aging to facilitate such a conversion.

Investors may purchase Class C shares only for Fund accounts held with a financial advisor or other financial intermediary, and not directly with a Fund. In addition, Class C shares may not be available through certain financial intermediaries. Please consult with your financial intermediary to determine whether their policies allow for an investment in Class C shares.

Class C2 Shares

Your Fund will issue Class C2 shares upon the exchange of Class C2 shares from another Nuveen Municipal Bond Fund or for purposes of dividend reinvestment, but Class C2 shares are not available for new accounts or for additional investment into existing accounts. Class C2 shares are subject to annual distribution and service fees of 0.75% (0.55% for Nuveen Limited Term Municipal Bond Fund and Nuveen Short Term Municipal Bond Fund) of your Fund’s average daily net assets. The annual 0.20% service fee compensates your financial advisor or other financial intermediary for providing ongoing service to you. The annual 0.55% (0.35% for Nuveen Limited Term Municipal Bond Fund and Nuveen Short Term Municipal Bond Fund) distribution fee compensates the Distributor for paying your financial advisor or other financial intermediary an ongoing sales commission. If you redeem your shares within 12 months of purchase, you will normally pay a 1.00% CDSC, which is calculated on the lower of your purchase price or redemption proceeds. You do not pay a CDSC on any Class C2 shares you purchase by reinvesting dividends. You may qualify for a reduced CDSC, or the CDSC may be waived, as described in “How to Reduce Your Sales Charge” below.

Class C2 shares automatically convert to Class A shares after 10 years, thus reducing future annual expenses. Conversions occur during the month in which the 10-year anniversary of the purchase occurs. The automatic conversion is based on the relative net asset values of the two share classes without the imposition of a sales charge or fee. The automatic conversion of Class C2 shares to Class A shares does not apply to shares held through group retirement plan recordkeeping platforms of certain financial intermediaries who hold such shares in an omnibus account and do not track participant level share lot aging to facilitate such a conversion.

Class R6 Shares

Eligible investors can purchase Class R6 shares at the offering price, which is the net asset value per share without any up-front sales charge. As Class R6 shares are not

subject to sales charges or ongoing service or distribution fees, they have lower ongoing expenses than the other classes.

Class R6 shares are available for purchase by clients of financial intermediaries who charge such clients an ongoing fee for advisory, investment, consulting or related services. Such clients may include individuals, corporations, endowments and foundations. The minimum initial investment for such clients is \$100,000, but this minimum will be waived for clients of financial intermediaries that have accounts holding Class R6 shares with an aggregate value of at least \$100,000. The Distributor may also waive the minimum for clients of financial intermediaries anticipated to reach this Class R6 share holdings level. All other eligible investors must meet a minimum initial investment of at least \$1,000,000 in a Fund. Such minimum investment requirement may be applied collectively to affiliated accounts, in the discretion of the Distributor. Class R6 shares may be purchased through financial intermediaries only if such intermediaries have entered into an agreement with the Distributor to offer Class R6 shares. Class R6 shares are only available in cases where neither the investor nor the intermediary will receive any commission payments, account servicing fees, record keeping fees, 12b-1 fees, sub-transfer agent fees, so called “finder’s fees,” administration fees or similar fees with respect to Class R6 shares. Provided they meet the minimum investment and other eligibility requirements, eligible investors include:

- Foundations and endowment funds;
- Any state, county, or city, or its instrumentality, department, authority or agency;
- Omnibus or other pooled accounts registered to insurance companies, trust companies, bank trust departments, registered investment advisor firms and family offices;
- Investment companies;
- Corporations, including corporate non-qualified deferred compensation plans of such corporations;
- Collective investment trusts; and
- Discretionary accounts managed by Nuveen Fund Advisors or its affiliates.

Class R6 shares are also available for purchase, with no minimum initial investment, by the following categories of investors:

- Current and former trustees/directors of any Nuveen Fund, and their immediate family members (as defined in the statement of additional information).
- Officers of Nuveen, LLC and its affiliates, and their immediate family members.
- Full-time and retired employees of Nuveen, LLC and its affiliates, and their immediate family members.

Only Nuveen All-American Municipal Bond Fund issues Class R6 shares.

Class I Shares

You can purchase Class I shares at the offering price, which is the net asset value per share without any up-front sales charge. As Class I shares are not subject to sales charges or ongoing service or distribution fees, they have lower ongoing expenses than the other classes.

Class I shares are available for purchase by clients of financial intermediaries who charge such clients an ongoing fee for advisory, investment, consulting or related services. Such clients may include individuals, corporations, endowments and

foundations. The minimum initial investment for such clients is \$100,000, but this minimum will be lowered to \$250 for clients of financial intermediaries that have accounts holding Class I shares with an aggregate value of at least \$100,000. The Distributor may also lower the minimum to \$250 for clients of financial intermediaries anticipated to reach this Class I share holdings level.

Class I shares are also available for purchase by family offices and their clients. A family office is a company that provides certain financial and other services to a high net worth family or families. The minimum initial investment for family offices and their clients is \$100,000, but this minimum will be lowered to \$250 for clients of family offices that have accounts holding Class I shares with an aggregate value of at least \$100,000. The Distributor may also lower the minimum to \$250 for clients of family offices anticipated to reach this Class I share holdings level.

Class I shares are also available for purchase, with no minimum initial investment, by the following categories of investors:

- Certain bank or broker-affiliated trust departments.
- Advisory accounts of Nuveen Fund Advisors and its affiliates.
- Investors purchasing through a brokerage platform of a financial intermediary that has an agreement with the Distributor to offer such shares solely when acting as an agent for such investors. Investors transacting through a financial intermediary's brokerage platform may be required to pay a commission directly to the intermediary.
- Current and former trustees/directors of any Nuveen Fund, and their immediate family members (as defined in the statement of additional information).
- Officers of Nuveen, LLC and its affiliates, and their immediate family members.
- Full-time and retired employees of Nuveen, LLC and its affiliates, and their immediate family members.
- Certain financial intermediary personnel, and their immediate family members.
- Certain other institutional investors described in the statement of additional information.

A financial intermediary through which you hold Class I shares may have the authority under its account agreement to exchange your Class I shares for another class of Fund shares having higher expenses than Class I shares if you withdraw from or are no longer eligible for the intermediary's fee-based program or under other circumstances. You may be subject to the sales charges and service and/or distribution fees applicable to the share class that you receive in such an exchange. You should contact your financial intermediary for more information about your eligibility to purchase Class I shares and the class of shares you would receive in an exchange if you no longer meet Class I eligibility requirements.

Please refer to the statement of additional information for more information about Class A, Class C, Class C2, Class R6 and Class I shares, including more detailed program descriptions and eligibility requirements. Additional information is also available from your financial advisor, who can also help you prepare any necessary application forms.

Contingent Deferred Sales Charges

If you redeem Class A, Class C or Class C2 shares that are subject to a CDSC, you may be assessed a CDSC upon redemption. When you redeem Class A, Class C or Class C2 shares subject to a CDSC, your Fund will first redeem any shares that are not

subject to a CDSC, and then redeem the shares you have owned for the longest period of time, unless you ask the Fund to redeem your shares in a different order. No CDSC is imposed on shares you buy through the reinvestment of dividends and capital gains. The CDSC holding period is calculated on a monthly basis and begins on the first day of the month in which the purchase was made. When you redeem shares subject to a CDSC, the CDSC is calculated on the lower of your purchase price or redemption proceeds, deducted from your redemption proceeds, and paid to the Distributor. The CDSC may be waived under certain special circumstances as described below under “How You Can Buy and Sell Shares—How to Reduce Your Sales Charge—CDSC Waivers and Reductions,” in the appendix to this prospectus titled “Variations in Sales Charge Reductions and Waivers Available Through Certain Intermediaries,” and in the statement of additional information.

How to Reduce Your Sales Charge

The Funds offer a number of ways to reduce or eliminate the up-front sales charge on Class A shares. In addition, under certain circumstances, the Funds will waive or reduce the CDSC imposed on redemptions of Class C or Class C2 shares and certain Class A shares purchased at net asset value. **The availability of the sales charge reductions and waivers discussed below will depend on the policies of the financial intermediary through which you purchase your shares. Information on intermediaries’ variations from the reductions and waivers discussed below are disclosed in the appendix to this prospectus, “Variations in Sales Charge Reductions and Waivers Available Through Certain Intermediaries.”** In all instances, it is your responsibility to notify your financial intermediary at the time of purchase of any relationship or other facts qualifying you for sales charge waivers or discounts. **In order to obtain waivers and discounts that are not available through your intermediary, you will have to purchase Fund shares through another intermediary.**

Class A Sales Charge Reductions

- *Rights of Accumulation.* In calculating the appropriate sales charge on a purchase of Class A shares of a Fund, you may be able to add the amount of your purchase to the value, based on the current net asset value per share, of all of your prior purchases of any Nuveen Mutual Fund.
- *Letter of Intent.* Subject to certain requirements, you may purchase Class A shares of a Fund at the sales charge rate applicable to the total amount of the purchases you intend to make over a 13-month period.

For purposes of calculating the appropriate sales charge as described under *Rights of Accumulation* and *Letter of Intent* above, you may include purchases by (i) you, (ii) your spouse or domestic partner and children under the age of 21 years, and (iii) a corporation, partnership or sole proprietorship that is 100% owned by any of the persons in (i) or (ii). In addition, a trustee or other fiduciary can count all shares purchased for a single trust, estate or other single fiduciary account that has multiple accounts (including one or more employee benefit plans of the same employer).

Class A Sales Charge Waivers

Class A shares of a Fund may be purchased at net asset value without a sales charge as follows:

- *Purchases of \$250,000 or more (although such purchases may be subject to a CDSC in certain circumstances, see “What Share Classes We Offer—Contingent Deferred Sales Charges” above).*
- *Shares purchased through the reinvestment of Nuveen Defined Portfolio (unit investment trusts offered through the Distributor prior to March 1, 2002) and Nuveen Mutual Fund dividends and capital gain distributions.*
- *Shares purchased for accounts held directly with a Fund that do not have a financial intermediary of record.*
- *Employees of Nuveen, LLC and its affiliates.* Purchases by current and retired employees of Nuveen, LLC and its affiliates and such employees’ immediate family members (as defined in the statement of additional information).
- *Current and former trustees/directors of the Nuveen Funds.*
- *Financial intermediary personnel.* Purchases by any person who, for at least the last 90 days, has been an officer, director, or employee of any financial intermediary or any such person’s immediate family member.
- *Certain trust departments.* Purchases by bank or broker-affiliated trust departments investing funds over which they exercise exclusive discretionary investment authority and that are held in a fiduciary, agency, advisory, custodial or similar capacity.
- *Additional categories of investors.* Purchases made (i) by investors purchasing on a periodic fee, asset-based fee or no transaction fee basis through a broker-dealer sponsored mutual fund purchase program; (ii) by clients of investment advisers, financial planners or other financial intermediaries that charge periodic or asset-based fees for their services; and (iii) through a financial intermediary that has entered into an agreement with the Distributor to offer the Funds’ shares to self-directed investment brokerage accounts and that may or may not charge a transaction fee to its customers. Intermediaries that have entered into such an agreement are listed in the appendix to this prospectus, “Variations in Sales Charge Reductions and Waivers Available Through Certain Intermediaries.”

In order to obtain a sales charge reduction or waiver on Class A share purchases, it may be necessary at the time of purchase for you to inform the Funds or your financial advisor of the existence of other accounts in which there are holdings eligible to be aggregated for such purposes. You may need to provide the Funds or your financial advisor information or records, such as account statements, in order to verify your eligibility for a sales charge reduction or waiver. This may include account statements of family members and information regarding Nuveen Mutual Fund shares held in accounts with other financial advisors. You or your financial advisor must notify the Distributor at the time of each purchase if you are eligible for any of these programs. The Funds may modify or discontinue these programs at any time.

CDSC Waivers and Reductions

The CDSC payable upon the redemption of Class C or Class C2 shares, and on Class A shares that were purchased at net asset value without a sales charge because the purchase amount exceeded \$250,000, may be waived or reduced under the following circumstances:

- In the event of total disability of the shareholder.
- In the event of death of the shareholder.
- For certain redemptions made pursuant to a systematic withdrawal plan.

- For redemptions in connection with a payment of account or plan fees.
- For redemptions of accounts not meeting required minimum balances.
- Upon an optional conversion by a Fund of Class C or Class C2 shares held in an account which no longer has a financial intermediary of record into Class A shares.
- For redemptions of Class C or Class C2 shares where the Distributor did not advance the first year's service and distribution fees to the intermediary.
- For redemptions of Class A shares where the Distributor did not pay a sales charge to the intermediary when the shares were purchased.

More information on these and other available CDSC waivers and reductions can be found in the appendix to this prospectus, "Variations in Sales Charge Reductions and Waivers Available Through Certain Intermediaries," and in the statement of additional information.

How to Buy Shares

Fund shares may be purchased on any business day, which is any day the New York Stock Exchange (the "NYSE") is open for business. Generally, the NYSE is closed on weekends and national holidays. The share price you pay depends on when the Distributor receives your order and on the share class you are purchasing. Orders received before the close of trading on a business day (normally, 4:00 p.m. New York time) will receive that day's closing share price; otherwise, you will receive the next business day's price.

You may purchase Fund shares (1) through a financial advisor or other financial intermediary or (2) directly from the Funds. Class A and Class C shares may not be purchased directly from a Fund. In addition, the availability of Class A and Class C shares through a financial intermediary will depend on the policies of the intermediary.

Through a Financial Advisor

You may buy shares through your financial advisor, who can handle all the details for you, including opening a new account. Financial advisors can also help you review your financial needs and formulate long-term investment goals and objectives. In addition, financial advisors generally can help you develop a customized financial plan, select investments and monitor and review your portfolio on an ongoing basis to help assure your investments continue to meet your needs as circumstances change. Financial advisors (including brokers or agents) are paid for providing ongoing investment advice and services, either from Fund sales charges and fees or by charging you a separate fee in lieu of a sales charge.

Financial advisors or other dealer firms may charge their customers a processing or service fee in connection with the purchase or redemption of Fund shares. The amount and applicability of such a fee is determined and disclosed to customers by each individual dealer. Processing or service fees typically are fixed, nominal dollar amounts and are in addition to the sales and other charges described in this prospectus and the statement of additional information. Your dealer will provide you with specific information about any processing or service fees you will be charged. Shares you purchase through your financial advisor or other intermediary will normally be held with that firm. For more information, please contact your financial advisor.

Directly from the Funds

Eligible investors may purchase shares directly from the Funds.

- *By wire.* You can purchase shares by making a wire transfer from your bank. Before making an initial investment by wire, you must submit a new account form to a Fund. After receiving your form, a service representative will contact you with your account number and wiring instructions. Your order will be priced at the next closing share price based on the share class of your Fund, calculated after your Fund's custodian receives your payment by wire. Wired funds must be received prior to 4:00 p.m. New York time to be eligible for same day pricing. Neither your Fund nor the transfer agent is responsible for the consequences of delays resulting from the banking or Federal Reserve wire system, or from incomplete wiring instructions. Before making any additional purchases by wire, you should call Nuveen Funds at (800) 257-8787. You cannot purchase shares by wire on days when federally chartered banks are closed.
- *By mail.* You may open an account directly with the Funds and buy shares by completing an application and mailing it along with your check to: Nuveen Funds, P.O. Box 219140, Kansas City, Missouri 64121-9140. Applications may be obtained at www.nuveen.com or by calling (800) 257-8787. No third party checks will be accepted.

Purchase orders and redemption requests are not processed until received in proper form by the transfer agent of a Fund.

- *On-line.* Existing shareholders with direct accounts may process certain account transactions on-line. You may purchase additional shares or exchange shares between existing, identically registered direct accounts. You can also look up your account balance, history and dividend information, as well as order duplicate account statements and tax forms from the Funds' website. To access your account, click on the "Online Account Access" link under the "Individual Investors—Mutual Fund Account Access" heading at www.nuveen.com/client-access. The system will walk you through the log-in process. To purchase shares on-line, you must have established Fund Direct privileges on your account prior to the requested transaction. See "Special Services—Fund Direct" below.
- *By telephone.* Existing shareholders with direct accounts may also process account transactions via the Funds' automated information line. Simply call (800) 257-8787, press 1 for mutual funds and the voice menu will walk you through the process. To purchase shares by telephone, you must have established Fund Direct privileges on your account prior to the requested transaction. See "Special Services—Fund Direct" below.

The Distributor does not have a customer relationship with you solely by virtue of acting as principal underwriter and distributor for your Fund. The Distributor does not offer or provide investment monitoring, make investment decisions for you, or hold customer accounts or assets. You make the ultimate decision regarding whether to buy or sell any Nuveen Fund.

Special Services

To help make your investing with us easy and efficient, we offer you the following services at no extra cost. Your financial advisor can help you complete the forms for these services, or you can call Nuveen Funds at (800) 257-8787 for copies of the necessary forms.

Systematic Investing

Once you have opened an account satisfying the applicable investment minimum, systematic investing allows you to make regular additional investments through automatic deductions from your bank account, directly from your paycheck or from exchanging shares from another mutual fund account. The minimum automatic deduction is \$100 per month. There is no charge to participate in your Fund's systematic investment plan. You can stop the deductions at any time by notifying your Fund in writing.

- *From your bank account.* You can make systematic investments of \$100 or more per month by authorizing your Fund to draw pre-authorized checks on your bank account.
- *From your paycheck.* With your employer's consent, you can make systematic investments each pay period (collectively meeting the monthly minimum of \$100) by authorizing your employer to deduct monies from your paycheck.
- *Systematic exchanging.* You can make systematic investments by authorizing the Distributor to exchange shares from one Nuveen Mutual Fund account into another identically registered Nuveen Mutual Fund account of the same share class.

Your Fund may cancel your participation in its systematic investment plan if it is unable to deliver a current prospectus to you because of an incorrect or invalid mailing address.

Systematic Withdrawal

If the value of your Fund account is at least \$10,000, you may request to have \$50 or more withdrawn automatically from your account. You may elect to receive payments monthly, quarterly, semi-annually or annually, and may choose to receive a check, have the monies transferred directly into your bank account (see "Fund Direct" below), paid to a third party or sent payable to you at an address other than your address of record. You must complete the appropriate section of the account application or Account Update Form to participate in each Fund's systematic withdrawal plan.

You should not establish systematic withdrawals if you intend to make concurrent purchases of Class A or Class C shares because you may unnecessarily pay a sales charge or CDSC on these purchases.

Exchanging Shares

You may exchange Fund shares into an identically registered account for the same class of another Nuveen Mutual Fund available in your state. With respect to Class C2 shares, you are eligible to exchange shares into (i) Class C2 shares of other Nuveen Municipal Bond Funds, or (ii) Class C shares of any other Nuveen Mutual Fund, but if you exchange back into a Nuveen Municipal Bond Fund, you will receive Class C shares instead of Class C2 shares. Your exchange must meet the minimum purchase requirements of the fund into which you are exchanging. You may also, under certain limited circumstances, exchange between certain classes of shares of the same fund, subject to the payment of any applicable CDSC. Please consult the statement of additional information for details.

Each Fund reserves the right to revise or suspend the exchange privilege, limit the amount or number of exchanges, or reject any exchange. In the event that a Fund rejects an exchange request, neither the redemption nor the purchase side of the exchange will be processed. If you would like the redemption request to be processed even if the purchase order is rejected, you may submit a separate redemption request (see "How to Sell Shares" below). Shareholders will be provided with at least 60 days' notice of any material revision to or termination of the exchange privilege.

Because an exchange between funds is treated for tax purposes as a purchase and sale, any gain may be subject to tax. An exchange between classes of shares of the same fund may not be considered a taxable event. You should consult your tax advisor about the tax consequences of exchanging your shares.

Fund DirectSM

The Fund Direct Program allows you to link your Fund account to your bank account, transfer money electronically between these accounts and perform a variety of account transactions, including purchasing shares by telephone and investing through a systematic investment plan. You may also have dividends, distributions, redemption payments or systematic withdrawal plan payments sent directly to your bank account.

Reinstatement Privilege

If you redeem Class A or Class C shares, you may reinvest all or part of your redemption proceeds up to one year later without incurring any additional charges. You may only reinvest into the same share class you redeemed. If you paid a CDSC, any shares purchased pursuant to the reinstatement privilege will not be subject to a CDSC. You may use this reinstatement privilege only once for any redemption. The reinstatement privilege is not available for Class C2 shares.

How to Sell Shares

You may sell (redeem) your shares on any business day, which is any day the NYSE is open for business. You will receive the share price next determined after your Fund has received your properly completed redemption request. Your redemption request must be received before the close of trading (normally, 4:00 p.m. New York time) for you to receive that day's price. The Fund will normally mail your check the next business day after a redemption request is received, but in no event more than seven days after your request is received. If you are selling shares purchased recently with a check, your redemption proceeds will not be mailed until your check has cleared, which may take up to ten business days from your purchase date.

You may sell your shares (1) through a financial advisor or (2) directly to the Funds.

Through a Financial Advisor

You may sell your shares through your financial advisor, who can prepare the necessary documentation. Your financial advisor may charge for this service.

Directly to the Funds

- *By mail.* You can sell your shares at any time by sending a written request to the appropriate Fund, c/o Nuveen Funds, P.O. Box 219140, Kansas City, Missouri 64121-9140. Your request must include the following information:
 - The Fund's name;
 - Your name and account number;
 - The dollar or share amount you wish to redeem;
 - The signature of each owner exactly as it appears on the account;
 - Any certificates you have for the shares;
 - The name of the person to whom you want your redemption proceeds paid (if other than to the shareholder of record);

- The address where you want your redemption proceeds sent (if other than the address of record); and
- Any required signature guarantees.

After you have established your account, signatures on a written request must be guaranteed if:

- You would like redemption proceeds payable or sent to any person, address or bank account other than that on record;
- You have changed the address on your Fund's records within the last 30 days;
- Your redemption request is in excess of \$50,000; or
- You are requesting a change in ownership on your account.

Non-financial transactions, including establishing or modifying certain services such as changing bank information on an account, will require a signature guarantee or signature verification from a Medallion Signature Guarantee Program member or other acceptable form of authentication from a financial institution source. In addition to the situations described above, the Funds reserve the right to require a signature guarantee, or another acceptable form of signature verification, in other instances based on the circumstances of a particular situation.

A signature guarantee assures that a signature is genuine and protects shareholders from unauthorized account transfers. Banks, savings and loan associations, trust companies, credit unions, broker-dealers and member firms of a national securities exchange may guarantee signatures. Call your financial intermediary to determine if it has this capability. A notary public is not an acceptable signature guarantor. Proceeds from a written redemption request will be sent to you by check unless another form of payment is requested.

- *On-line.* You may redeem shares or exchange shares between existing, identically registered accounts on-line. To access your account, click on the "Online Account Access" link under the "Individual Investors—Mutual Fund Account Access" heading at www.nuveen.com/client-access. The system will walk you through the log-in process. On-line redemptions are not available for shares owned in certificate form and, with respect to redemptions where the proceeds are payable by check, may not exceed \$50,000. Checks will only be issued to you as the shareholder of record and mailed to your address of record. If you have established Fund Direct privileges, you may have redemption proceeds transferred electronically to your bank account. In this case, the redemption proceeds will be transferred to your bank on the next business day after the redemption request is received. You should contact your bank for further information concerning the timing of the credit of the redemption proceeds in your bank account.
- *By telephone.* If your account is held with your Fund and not in your brokerage account, and you have authorized telephone redemption privileges, call (800) 257-8787 to redeem your shares, press 1 for mutual funds and the voice menu will walk you through the process. Telephone redemptions are not available for shares owned in certificate form and, with respect to redemptions where the proceeds are payable by check, may not exceed \$50,000. Checks will only be issued to you as the shareholder of record and mailed to your address of record, normally the next business day after the redemption request is received. If you have established Fund Direct privileges, you may have redemption proceeds transferred electronically to your bank account. In this case, the redemption proceeds will be transferred to your

bank on the next business day after the redemption request is received. You should contact your bank for further information concerning the timing of the credit of the redemption proceeds in your bank account.

An Important Note About Telephone Transactions

Although Nuveen Funds has certain safeguards and procedures to confirm the identity of callers, it will not be liable for losses resulting from following telephone instructions it reasonably believes to be genuine.

Also, you should verify your trade confirmations immediately upon receipt.

Accounts with Low Balances

A Fund reserves the right to liquidate or assess a low balance fee on any account (other than accounts holding Class R6 shares) held directly with the Fund that has a balance that has fallen below the account balance minimum of \$1,000 for any reason, including market fluctuations.

If a Fund elects to exercise the right to assess a low balance fee, then annually the Fund will assess a \$15 low balance account fee on certain accounts with balances under the account balance minimum that are accounts established pursuant to the UTMA or UGMA. At the same time, other accounts with balances under the account balance minimum will be liquidated, with proceeds being mailed to the address of record. Prior to the assessment of any low balance fee or liquidation of low balance accounts, affected shareholders will receive a communication notifying them of the pending action, thereby providing time for shareholders to bring their accounts up to the account balance minimum prior to any fee assessment or account liquidation. You will not be assessed a CDSC if your account is liquidated.

Meeting Redemption Requests

Each Fund typically will pay redemption proceeds using cash reserves maintained in the Fund's portfolio, or using the proceeds from sales of portfolio securities. The Funds also may meet redemption requests through overdrafts at the Funds' custodian, by borrowing under a credit agreement to which the Funds are parties, or by borrowing from another Nuveen Fund under an inter-fund lending program maintained by the Nuveen Funds pursuant to exemptive relief granted by the Securities and Exchange Commission. See "Investment Policies and Techniques—Borrowing" in the statement of additional information. These additional methods are more likely to be used to meet large redemption requests or in times of stressed market conditions.

Although the Funds generally pay redemption proceeds in cash, if a Fund determines that it would be detrimental to its remaining shareholders to make payment of a redemption order wholly in cash, that Fund may pay a portion of your redemption proceeds in securities or other Fund assets. In this situation, you would generally receive a proportionate distribution of each security held by the Fund to the extent practicable. Although it is unlikely that your shares would be redeemed in-kind, you would probably have to pay brokerage costs to sell the securities or other assets distributed to you, as well as taxes on any capital gains from that sale. Until they are sold, any securities or other assets distributed to you as part of a redemption in-kind may be subject to market risk.

Section 4 General Information

To help you understand the tax implications of investing in the Funds, this section includes important details about how the Funds make distributions to shareholders. We discuss some other Fund policies as well. Please consult the statement of additional information and your tax advisor for more information about taxes.

Dividends, Distributions and Taxes

The Funds declare dividends daily and pay such dividends monthly, usually on the first business day of the month. Your account will begin to accrue dividends on the business day after the day when the monies used to purchase your shares are collected by the transfer agent. Each Fund seeks to pay monthly tax-exempt dividends at a level rate that reflects the past and projected net income of the Fund. To help maintain more stable monthly distributions, the distribution paid by a Fund for any particular monthly period may be more or less than the amount of net income actually earned by the Fund during such period, and any such under- (or over-) distribution of income is reflected in the Fund's net asset value. This policy is designed to result in the distribution of substantially all of a Fund's net income over time. The Funds declare and pay any taxable capital gains or other taxable distributions once a year at year end. The Funds may declare and pay dividends, capital gains or other taxable distributions more frequently, if necessary or appropriate in the Board's discretion.

Payment and Reinvestment Options

The Funds automatically reinvest your dividends in additional Fund shares unless you request otherwise. You may request to have your dividends paid to you by check, sent via electronic funds transfer through Automated Clearing House network or reinvested in shares of another Nuveen Mutual Fund. For further information, contact your financial advisor or call Nuveen Funds at (800) 257-8787. If you request that your distributions be paid by check but those distributions cannot be delivered because of an incorrect mailing address, or if a distribution check remains uncashed for six months, the undelivered or uncashed distributions and all future distributions will be reinvested in Fund shares at the current net asset value.

Taxes and Tax Reporting

Because the Funds invest primarily in municipal bonds, the regular monthly dividends you receive will generally be exempt from regular federal income tax. All or a portion of these dividends, however, may be subject to state and local taxes or to the federal alternative minimum tax.

Generally the Funds do not seek to realize taxable income or capital gains. However, the Funds may realize and distribute taxable income or capital gains from time to time as a result of each Fund's normal investment activities. The Funds' distributions of these amounts are taxed as ordinary income or capital gains and are taxable whether received in cash or reinvested in additional shares. Distributions from the Funds' long-term capital gains are taxable as capital gains, while distributions from short-term capital gains and net investment income are generally taxable as ordinary income. The Funds' taxable dividends are not expected to qualify for a dividends received deduction if you are a corporate shareholder or for the lower tax rates on qualified dividend income.

Early in each year, you will receive a statement detailing the amount and nature of all distributions that you were paid during the prior year. If you hold your investment at the firm where you purchased your Fund shares, you will receive the statement from that firm. If you hold your shares directly with the Fund, the Distributor will send you the statement. The tax status of your distributions is the same whether you reinvest them or elect to receive them in cash.

If you receive social security or railroad retirement benefits, you should consult your tax advisor about how an investment in the Funds may affect the taxation of your benefits.

Each sale or exchange of Fund shares may be a taxable event. When you exchange shares of one Nuveen Mutual Fund for shares of a different Nuveen Mutual Fund, the exchange is treated the same as a sale for tax purposes. A sale may result in capital gain or loss to you. The gain or loss generally will be treated as short-term if you held the shares for 12 months or less and long-term if you held the shares for more than 12 months at the time of disposition.

Please note that if you do not furnish your Fund with your correct Social Security number or employer identification number, you fail to provide certain certifications to your Fund, you fail to certify whether you are a U.S. citizen or a U.S. resident alien, or the Internal Revenue Service notifies the Fund to withhold, federal law requires your Fund to withhold federal income tax from your distributions and redemption proceeds at the applicable withholding rate.

Buying or Selling Shares Close to a Record Date

Buying Fund shares shortly before the record date for a taxable income or capital gain distribution is commonly known as “buying the dividend.” The entire distribution may be taxable to you even though a portion of the distribution effectively represents a return of your purchase price.

Non-U.S. Investors

The Funds are offered for sale in the United States and are not widely available outside the United States. Non-U.S. investors should be aware that U.S. withholding and estate taxes and certain U.S. tax reporting requirements may apply to any investment in a Fund.

Cost Basis Method

For shares acquired on or after January 1, 2012, you may elect a cost basis method to apply to all existing and future accounts you may establish. The cost basis method you select will determine the order in which shares are redeemed and how your cost basis information is calculated and subsequently reported to you and to the Internal Revenue Service. Please consult your tax advisor to determine which cost basis method best suits your specific situation. If you hold your account directly with a Fund, please contact Nuveen Funds at (800) 257-8787 for instructions on how to make your election. If you hold your account with a financial intermediary, please contact that financial intermediary for instructions on how to make your election. If you hold your account directly with a Fund and do not elect a cost basis method, your account will default to the average cost basis method. The average cost basis method generally calculates cost basis by determining the average price paid for Fund shares that may have been purchased at different times for different prices. Financial intermediaries choose their own default cost basis method.

Taxable Equivalent Yields

The taxable equivalent yield is the current yield you would need to earn on a taxable investment in order to equal a stated federal tax-free yield on a municipal investment. To

assist you in comparing municipal investments like the Funds with fully taxable alternative investments, the table below presents the taxable equivalent yields for a range of hypothetical federal tax-free yields and tax rates:

Taxable Equivalents of Tax-Free Yields	To Equal a Tax-Free Yield of:			
	2.00%	3.00%	4.00%	5.00%
Tax Rate:	A Taxable Investment Would Need to Yield:			
10%	2.22%	3.33%	4.44%	5.56%
12%	2.27%	3.41%	4.55%	5.68%
22%	2.56%	3.85%	5.13%	6.41%
24%	2.63%	3.95%	5.26%	6.58%
32%	2.94%	4.41%	5.88%	7.35%
35%	3.08%	4.62%	6.15%	7.69%
37%	3.17%	4.76%	6.35%	7.94%
40.8%*	3.38%	5.07%	6.76%	8.45%

* This is the maximum stated regular federal tax rate of 37.00% plus the 3.8% Medicare tax imposed on the net investment income of certain taxpayers. The Medicare tax could also apply to taxpayers in other tax brackets.

The yields and tax rates shown above are hypothetical and do not predict your actual returns or effective tax rate. For more detailed information, see the statement of additional information or consult your tax advisor.

Distribution and Service Payments

Distribution and Service Plan

The Distributor serves as the selling agent and distributor of the Funds' shares. In this capacity, the Distributor manages the offering of the Funds' shares and is responsible for all sales and promotional activities. In order to reimburse the Distributor for its costs in connection with these activities, including compensation paid to financial intermediaries, each Fund has adopted a distribution and service plan under Rule 12b-1 under the 1940 Act (the "*Plan*"). See "How You Can Buy and Sell Shares—What Share Classes We Offer" for a description of the distribution and service fees paid under the Plan.

Under the Plan, the Distributor receives a distribution fee for Class C and Class C2 shares primarily for providing compensation to financial intermediaries, including the Distributor, in connection with the distribution of shares. The Distributor receives a service fee for Class A, Class C and Class C2 shares to compensate financial intermediaries, including the Distributor, for providing ongoing account services to shareholders. These services may include establishing and maintaining shareholder accounts, answering shareholder inquiries and providing other personal services to shareholders. Fees paid under the Plan also compensate the Distributor for other expenses, including printing and distributing prospectuses to persons other than shareholders, and preparing, printing, and distributing advertising materials, sales literature and reports to shareholders used in connection with the sale of shares. Because fees paid under the Plan are paid out of a Fund's assets on an ongoing basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of sales charges. Long-term holders of Class C and Class C2 shares may pay more in distribution and service fees and CDSCs than the economic equivalent of the maximum front-end sales charge permitted under the Financial Industry Regulatory Authority Conduct Rules.

Other Payments by the Funds

In addition to the distribution and service fees the Funds pay under the Plan and fees the Funds pay to their transfer agent, the Distributor or Nuveen Fund Advisors, on behalf of the Funds, may enter into non-Plan agreements with financial intermediaries pursuant to

which the Funds will pay financial intermediaries for administrative, networking, recordkeeping, sub-transfer agency and shareholder services. These non-Plan payments are generally based on either (1) a percentage of the average daily net assets of Fund shareholders serviced by a financial intermediary or (2) a fixed dollar amount for each account serviced by a financial intermediary. The aggregate amount of these payments may be substantial and may vary significantly among intermediaries.

Other Payments by the Distributor and Nuveen Fund Advisors

In addition to the sales commissions and payments from distribution and service fees made to financial intermediaries as previously described, the Distributor and Nuveen Fund Advisors may from time to time make additional payments, out of their own resources, to certain financial intermediaries that sell shares of Nuveen Mutual Funds in order to promote the sales and retention of Fund shares by those firms and their customers. The amounts of these payments vary by financial intermediary and, with respect to a given firm, are typically calculated by reference to the amount of the firm's recent gross sales of Nuveen Mutual Fund shares and/or total assets of Nuveen Mutual Funds held by the firm's customers. The level of payments that the Distributor and/or Nuveen Fund Advisors is willing to provide to a particular financial intermediary may be affected by, among other factors, the firm's total assets held in and recent net investments into Nuveen Mutual Funds, the firm's level of participation in Nuveen Mutual Fund sales and marketing programs, the firm's compensation program for its registered representatives who sell Nuveen Mutual Fund shares and provide services to Nuveen Mutual Fund shareholders, and the asset class of the Nuveen Mutual Funds for which these payments are provided. The statement of additional information contains additional information about these payments, including the names of the firms to which payments are made. The Distributor may also make payments to financial intermediaries in connection with sales meetings, due diligence meetings, prospecting seminars and other meetings at which the Distributor promotes its products and services.

In connection with the availability of Nuveen Mutual Funds within selected mutual fund no-transaction fee institutional platforms and fee-based wrap programs at certain financial intermediaries, the Distributor and Nuveen Fund Advisors also make payments out of their own assets to those firms as compensation for certain recordkeeping, shareholder communications and other account administration services provided to Nuveen Mutual Fund shareholders who own their Fund shares through these platforms or programs. These payments are in addition to the service fee and any applicable sub-transfer agency or similar fees paid to these firms with respect to these services by the Nuveen Mutual Funds out of Fund assets.

The amounts of payments to a financial intermediary could be significant, and may create an incentive for the intermediary or its representatives to recommend or offer shares of the Funds to you. The intermediary may elevate the prominence or profile of the Funds within the intermediary's organization by, for example, placing the Funds on a list of preferred or recommended funds and/or granting the Distributor and/or its affiliates preferential or enhanced opportunities to promote the Funds in various ways within the intermediary's organization.

There is some uncertainty concerning whether the types of payments described above may be made to or received by a financial intermediary with respect to Class I shares offered through the intermediary's brokerage platform where the intermediary imposes commissions on purchases and redemptions of such shares. Such payments may be terminated in light of future regulatory developments.

Net Asset Value

The price you pay for your shares or the amount you receive upon redemption of your shares is based on your Fund's net asset value per share, which is determined as of the close of trading (normally 4:00 p.m. New York time) on each day the NYSE is open for business. Each Fund's latest net asset value per share is available on the Funds' website at www.nuveen.com. Net asset value is calculated for each class of each Fund by taking the value of the class's total assets, including interest or dividends accrued but not yet collected, less all liabilities, and dividing by the total number of shares outstanding. The result, rounded to the nearest cent, is the net asset value per share.

In determining net asset value, portfolio instruments generally are valued using prices provided by independent pricing services or obtained from other sources, such as broker-dealer quotations. Exchange-traded instruments generally are valued at the last reported sales price or official closing price on an exchange, if available. Independent pricing services typically value non-exchange-traded instruments utilizing a range of market-based inputs and assumptions. For example, when available, pricing services may utilize inputs such as benchmark yields, reported trades, broker-dealer quotes, spreads, and transactions for comparable instruments. In pricing certain instruments, the pricing services may consider information about an instrument's issuer or market activity provided by the Funds' investment adviser or sub-adviser. Pricing service valuations of non-exchange-traded instruments represent the service's good faith opinion as to what the holder of an instrument would receive in an orderly transaction for an institutional round lot position under current market conditions. It is possible that these valuations could be materially different from the value that a Fund realizes upon the sale of an instrument.

If a price cannot be obtained from a pricing service or other pre-approved source, or if, in the judgment of Nuveen Fund Advisors, a price is unreliable, a portfolio instrument will be valued at its fair value as determined in good faith by the Board of Directors/Trustees or its appointee. Nuveen Fund Advisors may determine that a price is unreliable in various circumstances. For example, a price may be deemed unreliable if it has not changed for an identified period of time, or has changed from the previous day's price by more than a threshold amount, and recent transactions and/or broker dealer price quotations differ materially from the price in question.

The Board of Directors/Trustees has adopted valuation procedures for the Funds and has appointed the Nuveen Fund Advisors' Valuation Committee with the day-to-day responsibility for fair value determinations. All fair value determinations made by the Valuation Committee are subject to review and ratification by the Board of Directors/Trustees. As a general principle, the fair value of a portfolio instrument is the amount that an owner might reasonably expect to receive upon the instrument's current sale. A range of factors and analysis may be considered when determining fair value, including relevant market data, interest rates, credit considerations and/or issuer specific news. However, fair valuation involves subjective judgments and it is possible that the fair value determined for a portfolio instrument may be materially different from the value that could be realized upon the sale of that instrument.

Frequent Trading

The Funds are intended for long-term investment and should not be used for excessive trading. Excessive trading in the Funds' shares can disrupt portfolio management, lead to higher operating costs, and cause other operating inefficiencies for the Funds.

However, the Funds are also mindful that shareholders may have valid reasons for periodically purchasing and redeeming Fund shares.

Accordingly, the Funds have adopted a Frequent Trading Policy that seeks to balance the Funds' need to prevent excessive trading in Fund shares while offering investors the flexibility in managing their financial affairs to make periodic purchases and redemptions of Fund shares.

The Funds' Frequent Trading Policy generally limits an investor to two "round trip" trades in a 60-day period. A "round trip" is the purchase and subsequent redemption of Fund shares, including by exchange. Each side of a round trip may be comprised of either a single transaction or a series of closely-spaced transactions.

The Funds primarily receive share purchase and redemption orders through third-party financial intermediaries, some of whom rely on the use of omnibus accounts. An omnibus account typically includes multiple investors and provides the Funds only with a net purchase or redemption amount on any given day where multiple purchases, redemptions and exchanges of shares occur in the account. The identity of individual purchasers, redeemers and exchangers whose orders are aggregated in omnibus accounts, and the size of their orders, will generally not be known by the Funds. Despite the Funds' efforts to detect and prevent frequent trading, the Funds may be unable to identify frequent trading because the netting effect in omnibus accounts often makes it more difficult to identify frequent traders. The Distributor has entered into agreements with financial intermediaries that maintain omnibus accounts with the Funds' transfer agent. Under the terms of these agreements, the financial intermediaries undertake to cooperate with the Distributor in monitoring purchase, exchange and redemption orders by their customers in order to detect and prevent frequent trading in the Funds through such accounts. Pursuant to these agreements, financial intermediaries may disclose to a Fund an investor's taxpayer identification number and a record of the investor's transactions at the request of the Fund. Technical limitations in operational systems at such intermediaries or at the Distributor may also limit the Funds' ability to detect and prevent frequent trading. In addition, the Funds may permit certain financial intermediaries, including broker-dealer and retirement plan administrators, among others, to enforce their own internal policies and procedures concerning frequent trading. Such policies may differ from the Funds' Frequent Trading Policy and may be approved for use in instances where the Funds reasonably believe that the intermediary's policies and procedures effectively discourage inappropriate trading activity. Shareholders holding their accounts with such intermediaries may wish to contact the intermediary for information regarding its frequent trading policy. Although the Funds do not knowingly permit frequent trading, they cannot guarantee that they will be able to identify and restrict all frequent trading activity.

The Funds reserve the right in their sole discretion to waive unintentional or minor violations (including transactions below certain dollar thresholds) if they determine that doing so would not harm the interests of Fund shareholders. In addition, certain categories of redemptions may be excluded from the application of the Frequent Trading Policy, as described in more detail in the statement of additional information. These include, among others, redemptions pursuant to systematic withdrawal plans, redemptions in connection with the total disability or death of the investor, involuntary redemptions by operation of law, redemptions in payment of account or plan fees, and certain redemptions by retirement plans, including redemptions in connection with qualifying loans or hardship withdrawals, termination of plan participation, return of excess contributions, and required minimum distributions. The Funds may also modify or

suspend the Frequent Trading Policy without notice during periods of market stress or other unusual circumstances.

The Funds reserve the right to impose restrictions on purchases or exchanges that are more restrictive than those stated above if they determine, in their sole discretion, that a transaction or a series of transactions involves market timing or excessive trading that may be detrimental to Fund shareholders. The Funds also reserve the right to reject any purchase order, including exchange purchases, for any reason. For example, a Fund may refuse purchase orders if the Fund would be unable to invest the proceeds from the purchase order in accordance with the Fund's investment policies and/or objective, or if the Fund would be adversely affected by the size of the transaction, the frequency of trading in the account or various other factors. For more information about the Funds' Frequent Trading Policy and its enforcement, see "Purchase and Redemption of Fund Shares—Frequent Trading Policy" in the statement of additional information.

Fund Service Providers

The custodian of the assets of the Funds is State Street Bank and Trust Company, One Lincoln Street, Boston, Massachusetts 02111. The custodian also provides certain accounting services to the Funds. The Funds' transfer, shareholder services and dividend paying agent, DST Asset Manager Solutions, Inc., P.O. Box 219140, Kansas City, Missouri 64121-9140, performs bookkeeping, data processing and administrative services for the maintenance of shareholder accounts.

Section 5 Financial Highlights

The financial highlights table is intended to help you understand a Fund's financial performance for the past five fiscal years or, if shorter, the period of operations for the class of shares. Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in a Fund (assuming reinvestment of all dividends and distributions). The information has been derived from the Funds' financial statements, which have been audited by PricewaterhouseCoopers LLP, whose report for the most recent fiscal year, along with the Funds' financial statements, are included in the annual report, which is available upon request.

Nuveen All-American Municipal Bond Fund

(a) Per share Net Investment Income (Loss) is calculated using the average daily shares method.

(b) Total return is the combination of changes in NAV without any sales charge, reinvested dividend income at NAV and reinvested capital gains distributions at NAV, if any. Total returns are not annualized.

(c) The expense ratios reflect, among other things, the interest expense deemed to have been paid by the Fund on the floating rate certificates issued by the special purpose trusts for the self-deposited inverse floaters held by the Fund and the interest expense and related fees paid on borrowings, where applicable. Each Ratio of Expenses to Average Net Assets includes interest and related expenses for each share class as follows:

	Interest and Related Expenses
Year Ended March 31:	
2020	0.03%
2019	0.04
2018	0.03
2017(f)	0.03*
Year Ended April 30:	
2016	—
2015	—

(d) Portfolio Turnover Rate is calculated based on the lesser of long-term purchases or sales divided by the average long-term market value during the period.

(e) For the period June 30, 2016 (commencement of operations) through March 31, 2017.

(f) For the eleven months ended March 31, 2017.

* Annualized.

(a) Per share Net Investment Income (Loss) is calculated using the average daily shares method.

(b) Total return is the combination of changes in NAV without any sales charge, reinvested dividend income at NAV and reinvested capital gains distributions at NAV, if any. Total returns are not annualized.

(c) After fee waiver and/or expense reimbursement from Nuveen Fund Advisors, where applicable. During the fiscal years ended April 30, 2015 and April 30, 2016, Nuveen Fund Advisors agreed to waive 0.25% of the 12b-1 distribution and/or service fees for Class C Shares through August 31, 2015. After August 31, 2015, Nuveen Fund Advisors is no longer waiving fees or reimbursing expenses for Class C Shares.

(d) The expense ratios reflect, among other things, the interest expense deemed to have been paid by the Fund on the floating rate certificates issued by the special purpose trusts for the self-deposited inverse floaters held by the Fund and the interest expense and related fees paid on borrowings, where applicable. Each Ratio of Expenses to Average Net Assets includes interest and related expenses for each share class as follows:

	Interest and Related Expenses
Year Ended March 31:	
2020	0.01%
2019	—
2018	—
2017(f)	—
Year Ended April 30:	
2016	—
2015	—

(e) Portfolio Turnover Rate is calculated based on the lesser of long-term purchases or sales divided by the average long-term market value during the period.

(f) For the eleven months ended March 31, 2017.

* Annualized.

(a) Per share Net Investment Income (Loss) is calculated using the average daily shares method.

(b) Total return is the combination of changes in NAV without any sales charge, reinvested dividend income at NAV and reinvested capital gains distributions at NAV, if any. Total returns are not annualized.

(c) After fee waiver and/or expense reimbursement from Nuveen Fund Advisors, where applicable. During the fiscal years ended April 30, 2015 and April 30, 2016, Nuveen Fund Advisors agreed to waive 0.45% of the 12b-1 distribution and/or service fees for Class C Shares through August 31, 2015. After August 31, 2015, Nuveen Fund Advisors is no longer waiving fees or reimbursing expenses for Class C Shares.

(d) Portfolio Turnover Rate is calculated based on the lesser of long-term purchases or sales divided by the average long-term market value during the period.

(e) For the eleven months ended March 31, 2017.

* Annualized.

** Rounds to less than \$0.01 per share.

Appendix to the Prospectus

**VARIATIONS IN SALES CHARGE REDUCTIONS AND WAIVERS
AVAILABLE THROUGH CERTAIN INTERMEDIARIES**

The availability of certain sales charge variations, waivers and discounts will depend on whether you purchase your shares directly from a Fund or through a financial intermediary. Financial intermediaries may impose different sales charges and have unique policies and procedures regarding the availability of sales charge waivers and/or discounts (including based on account type), which differ from those described in the prospectus and are disclosed below. All sales charges and sales charge variations, waivers and discounts available to investors, other than those set forth below, are described in the prospectus. To the extent a financial intermediary notifies Nuveen Fund Advisors, LLC (the “*Adviser*”) or Nuveen Securities, LLC (the “*Distributor*”) of its intention to impose sales charges or have sales charge waivers and/or discounts that differ from those described in the prospectus, such information provided by that intermediary will be disclosed in this Appendix.

In all instances, it is your responsibility to notify your financial intermediary at the time of purchase of any relationship or other facts qualifying you for sales charge waivers or discounts. Please contact your financial intermediary with questions regarding your eligibility for applicable sales charge variations, waivers and discounts or for additional information regarding your intermediary’s policies for implementing particular sales charge variations, waivers and discounts. For waivers and discounts not available through a particular financial intermediary, shareholders will have to purchase shares directly from a Fund or through another intermediary to receive these waivers or discounts.

The information provided below for a particular financial intermediary is reproduced based on information provided by that intermediary. A financial intermediary’s administration and implementation of its particular policies with respect to any variations, waivers and/or discounts is neither supervised nor verified by the Funds, the Adviser or the Distributor.

CLASS A SHARE FRONT-END SALES CHARGE WAIVERS AVAILABLE AT AMERIPRISE FINANCIAL

The following information applies to Class A share purchases if you have an account with or otherwise purchase Fund shares through Ameriprise Financial:

Shareholders purchasing Fund shares through an Ameriprise Financial platform or account will be eligible only for the following front-end sales charge waivers with respect to Class A shares, which may differ from those disclosed elsewhere in this Fund’s prospectus or SAI.

- Employer-sponsored retirement plans (e.g., 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans). For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs or SAR-SEPs.
- Shares purchased through an Ameriprise Financial investment advisory program (if Class I or a similar share class for such investment advisory program is not available).
- Shares purchased by third party investment advisors on behalf of their advisory clients through Ameriprise Financial’s platform (if Class I or a similar share class for such investment advisory program is not available).
- Shares purchased through reinvestment of capital gain distributions and dividend reinvestment when purchasing shares of the same Fund (but not any other Nuveen-sponsored mutual fund).
- Shares exchanged from Class C shares of the same fund in the month of or following the 10-year anniversary of the purchase date.
- Employees and registered representatives of Ameriprise Financial or its affiliates and their immediate family members.

- Shares purchased by or through qualified accounts (including IRAs, Coverdell Education Savings Accounts, 401(k)s, 403(b) tax sheltered custodial accounts subject to ERISA, and defined benefit plans) that are held by a covered family member, defined as an Ameriprise financial advisor and/or the advisor's spouse, advisor's lineal ascendant (mother, father, grandmother, grandfather, great grandmother, great grandfather), advisor's lineal descendant (son, daughter, step son, step daughter, grandson, granddaughter, great grandson, great granddaughter) or any spouse of a covered family member who is a lineal descendant.
- Shares purchased from the proceeds of redemptions of a Nuveen-sponsored mutual fund, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (i.e., Rights of Reinstatement).

SALES WAIVERS AND REDUCTIONS IN SALES CHARGES AVAILABLE AT ROBERT W. BAIRD & CO. ("BAIRD")

Effective June 30, 2020, shareholders purchasing fund shares through a Baird platform or account will only be eligible for the following sales charge waivers (front-end sales charge waivers and CDSC waivers) and discounts, which may differ from those disclosed elsewhere in this prospectus or the SAI.

Front-End Sales Charge Waivers on Class A Shares Available at Baird

- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing share of the same fund
- Share purchase by employees and registers representatives of Baird or its affiliate and their family members as designated by Baird
- Shares purchase from the proceeds of redemptions from another Nuveen-sponsored mutual fund, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same accounts, and (3) redeemed shares were subject to a front-end or deferred sales charge (known as rights of reinstatement)
- A shareholder in Class C Shares will have their share converted at net asset value to Class A shares of the fund if the shares are no longer subject to CDSC and the conversion is in line with the policies and procedures of Baird
- Employer-sponsored retirement plans or charitable accounts in a transactional brokerage account at Baird, including 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans. For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs or SAR-SEPs

CDSC Waivers on Class A and C Shares Available at Baird

- Shares sold due to death or disability of the shareholder
- Shares sold as part of a systematic withdrawal plan as described in this prospectus
- Shares bought due to returns of excess contributions from an IRA account
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the shareholder reaching the qualified age based on applicable IRS regulations.
- Shares sold to pay Baird fees but only if the transaction is initiated by Baird
- Shares acquired through a right of reinstatement

Front-End Sales Charge Discounts Available at Baird: Breakpoints and/or Rights of Accumulation

- Breakpoints as described in this prospectus
- Rights of accumulation, which entitles shareholders to breakpoint discounts, will be automatically calculated based on the aggregated holding of all Nuveen-sponsored mutual fund assets held by accounts within the purchaser's household at Baird. Eligible Nuveen-sponsored mutual fund assets not held at Baird may be included in the rights of accumulation calculation only if the shareholder notifies his or her financial advisor about such assets
- Letters of intent, which allow for breakpoint discounts based on anticipated purchases of Nuveen-sponsored mutual funds through Baird over a 13-month period of time

SALES WAIVERS AND REDUCTIONS IN SALES CHARGES AVAILABLE AT EDWARD JONES

Effective on or after May 1, 2020, clients of Edward Jones (also referred to as "shareholders") purchasing fund shares on the Edward Jones commission and fee-based platforms are eligible only for the following sales charge discounts (also referred to as "breakpoints") and waivers, which can differ from breakpoints and waivers described elsewhere in the mutual fund prospectus or SAI or through another broker-dealer. In all instances, it is the shareholder's responsibility to inform Edward Jones at the time of purchase of any relationship, holdings of Nuveen-sponsored mutual funds or other facts qualifying the purchaser for breakpoints or waivers. Edward Jones can ask for documentation of such circumstance.

Breakpoints

Rights of Accumulation (ROA)

- The applicable sales charge on a purchase of Class A shares is determined by taking into account all Nuveen-sponsored mutual fund assets held by the shareholder (except share classes held in retirement plans) or in an account grouped by Edward Jones with other accounts for the purpose of providing certain pricing considerations ("pricing groups"). This includes all share classes held on the Edward Jones platform and/or held on another platform. The inclusion of eligible Nuveen-sponsored mutual fund assets in the rights of accumulation calculation is dependent on the shareholder notifying his or her financial advisor of such assets at the time of calculation.
- ROA is determined by calculating the higher of cost or market value (current shares x NAV).

Letter of Intent (LOI)

- Through an LOI, shareholders can receive the sales charge and breakpoint discounts for purchases shareholders intend to make over a 13-month period from the date Edward Jones receives the LOI. The LOI is determined by calculating the higher of cost or market value of qualifying holdings at LOI initiation in combination with the value that the shareholder intends to buy over a 13-month period to calculate the front-end sales charge and any breakpoint discounts. Each purchase the shareholder makes during that 13-month period will receive the sales charge and breakpoint discount that applies to the total amount. The inclusion of eligible Nuveen-sponsored mutual fund assets in the LOI calculation is dependent on the shareholder notifying his or her financial advisor of such assets at the time of calculation. Purchases made before the LOI is received by Edward Jones are not covered under the LOI and will not reduce the sales charge previously paid. Sales charges will be adjusted if LOI is not met.

Sales Charge Waivers

Sales charges are waived for the following shareholders and in the following situations:

- Associates of Edward Jones and its affiliates and their family members who are in the same pricing group (as determined by Edward Jones under its policies and procedures) as the associate. This waiver will continue for the remainder of the associate's life if the associate retires from Edward Jones in good-standing.
- Shares purchased in an Edward Jones fee-based program.
- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment.
- Shares purchased from the proceeds of redeemed shares of a Nuveen-sponsored mutual fund so long as the following conditions are met: 1) the proceeds are from the sale of shares within 60 days of the purchase, and 2) the sale and purchase are made in the same share class and the same account or the purchase is made in an individual retirement account with proceeds from liquidations in a non-retirement account (known as Rights of Reinstatement).
- Shares exchanged into Class A shares from another share class so long as the exchange is into the same fund and was initiated at the discretion of Edward Jones. Edward Jones is responsible for any remaining CDSC due to the fund company, if applicable. Any future purchases are subject to the applicable sales charge as disclosed in the prospectus.
- Exchanges from Class C shares to Class A shares of the same fund, generally, in the 84th month following the anniversary of the purchase date or earlier at the discretion of Edward Jones.

Contingent Deferred Sales Charge (CDSC) Waivers

If the shareholder purchases shares that are subject to a CDSC and those shares are redeemed before the CDSC is expired, the shareholder is responsible to pay the CDSC except in the following conditions:

- The death or disability of the shareholder
- Systematic withdrawals with up to 10% per year of the account value
- Return of excess contributions from an Individual Retirement Account (IRA)
- Shares sold as part of a required minimum distribution for IRA and retirement accounts if the redemption is taken in or after the year the shareholder reaches qualified age based on applicable IRS regulations
- Shares sold to pay Edward Jones fees or costs in such cases where the transaction is initiated by Edward Jones
- Shares exchanged in an Edward Jones fee-based program
- Shares acquired through a Right of Reinstatement

Other Important Information

Minimum Purchase Amounts

- The following initial and subsequent investment minimums apply to any class of Nuveen-sponsored mutual fund shares purchased on Edward Jones commission and fee-based platforms:
 - \$250 initial purchase minimum
 - \$50 subsequent purchase minimum

Minimum Balances

- Edward Jones may redeem at its discretion fund holdings with a balance of \$250 or less. The following types of accounts are not included in this policy:
 - A fee-based account held on an Edward Jones platform
 - A 529 account held on an Edward Jones platform
 - An account with an active systematic investment plan or letter of intent (LOI)

Changing Share Classes

- Edward Jones at its discretion may exchange at NAV a shareholder's holdings of a Nuveen-sponsored mutual fund to Class A shares of the same fund.

CLASS A AND CLASS C SHARE SALES CHARGE REDUCTIONS AND WAIVERS AVAILABLE THROUGH JANNEY MONTGOMERY SCOTT LLC

Effective May 1, 2020, shareholders purchasing fund shares through a Janney Montgomery Scott LLC (“*Janney*”) brokerage account will be eligible only for the following load waivers (front-end sales charge waivers and contingent deferred sales charge (“*CDSC*”) waivers) and discounts, which may differ from those disclosed elsewhere in this fund's Prospectus or SAI.

Front-end sales charge waivers on Class A shares available at Janney

- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same fund (but not any other Nuveen-sponsored mutual fund).
- Shares purchased by employees and registered representatives of Janney or its affiliates and their family members as designated by Janney.
- Shares purchased from the proceeds of redemptions of a Nuveen-sponsored mutual fund, provided (1) the repurchase occurs within ninety (90) days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (i.e., right of reinstatement).
- Employer-sponsored retirement plans (e.g., 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans). For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans.
- Class C shares that are no longer subject to a contingent deferred sales charge and are converted to Class A shares of the same fund pursuant to Janney's policies and procedures.

CDSC waivers on Class A and C shares available at Janney

- Shares sold upon the death or disability of the shareholder.
- Shares sold as part of a systematic withdrawal plan as described in the fund's Prospectus.
- Shares purchased in connection with a return of excess contributions from an IRA account.
- Shares sold as part of a required minimum distribution for IRA and retirement accounts if the redemption is taken in or after the year the shareholder reaches the qualified age based on applicable IRS regulations.
- Shares sold to pay Janney fees but only if the transaction is initiated by Janney.

- Shares acquired through a right of reinstatement.

Front-end sales charge discounts available at Janney: breakpoints, rights of accumulation, and/or letters of intent

- Breakpoints as described in the fund's Prospectus.
- Rights of accumulation ("ROA"), which entitle shareholders to breakpoint discounts, will be automatically calculated based on the aggregated holding of all Nuveen-sponsored mutual fund assets held by accounts within the purchaser's household at Janney. Eligible Nuveen-sponsored mutual fund assets not held at Janney may be included in the ROA calculation only if the shareholder notifies his or her financial advisor about such assets.
- Letters of intent which allow for breakpoint discounts based on anticipated purchases of Nuveen-sponsored mutual funds, over a 13-month time period. Eligible Nuveen-sponsored mutual fund assets not held at Janney Montgomery Scott may be included in the calculation of letters of intent only if the shareholder notifies his or her financial advisor about such assets.

CLASS A AND CLASS C SHARE SALES CHARGE REDUCTIONS AND WAIVERS AVAILABLE THROUGH MERRILL LYNCH

Shareholders purchasing Fund shares through a Merrill Lynch platform or account will be eligible only for the following load waivers (front-end sales charge waivers and contingent deferred sales charge waivers) and discounts, which may differ from those disclosed in the Funds' prospectus or SAI. Shareholders should contact Merrill Lynch to determine their eligibility for these waivers and discounts.

Front-End Sales Load Waivers on Class A Shares Available at Merrill Lynch

- Employer-sponsored retirement, deferred compensation and employee benefit plans (including health savings accounts) and trusts used to fund those plans, provided that the shares are not held in a commission-based brokerage account and shares are held for the benefit of the plan
- Shares purchased by a 529 Plan (does not include 529 Plan units or 529-specific shares classes or equivalents)
- Shares purchased through a Merrill Lynch affiliated investment advisory program
- Shares exchanged due to the holdings moving from a Merrill Lynch affiliated investment advisory program to a Merrill Lynch brokerage (non-advisory) account pursuant to Merrill Lynch's policies relating to sales load discounts and waivers
- Shares purchased by third party investment advisors on behalf of their advisory clients through Merrill Lynch's platform
- Shares of funds purchased through the Merrill Edge Self-Directed platform
- Shares purchased through reinvestment of capital gain distributions and dividend reinvestment when purchasing shares of the same fund (but not any other Nuveen-sponsored mutual fund)
- Shares exchanged from Class C shares of the same fund pursuant to Merrill Lynch's policies relating to sales load discounts and waivers
- Employees and registered representatives of Merrill Lynch or its affiliates and their family members
- Directors or Trustees of the Funds, and employees of the Funds' investment adviser or any of its affiliates, as described in the prospectus

- Eligible shares purchased from the proceeds of redemptions of a Nuveen-sponsored mutual fund, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (known as Rights of Reinstatement). Automated transactions (i.e. systematic purchases and withdrawals) and purchases made after shares are automatically sold to pay Merrill Lynch's account maintenance fees are not eligible for reinstatement

CDSC Waivers on A and C Shares Available at Merrill Lynch

- Death or disability of the shareholder
- Shares sold as part of a systematic withdrawal plan as described in the prospectus
- Return of excess contributions from an IRA Account
- Shares sold as part of a required minimum distribution for IRA and retirement accounts pursuant to the Internal Revenue Code
- Shares sold to pay Merrill Lynch fees but only if the transaction is initiated by Merrill Lynch
- Shares acquired through a Right of Reinstatement
- Shares held in retirement brokerage accounts, that are exchanged for a lower cost share class due to transfer to a fee based account or platform
- Shares received through an exchange due to the holdings moving from a Merrill Lynch affiliated investment advisory program to a Merrill Lynch brokerage (non-advisory) account pursuant to Merrill Lynch's policies relating to sales load discounts and waivers

Front-End Load Discounts Available at Merrill Lynch: Breakpoints, Rights of Accumulation & Letters of Intent

- Breakpoints as described in the prospectus
- Rights of Accumulation ("ROA") which entitle shareholders to breakpoint discounts as described in the Fund's prospectus will be automatically calculated based on the aggregated holding of all Nuveen-sponsored mutual fund assets held by accounts (including 529 program holdings, where applicable) within the purchaser's household at Merrill Lynch. Eligible Nuveen-sponsored mutual fund assets not held at Merrill Lynch may be included in the ROA calculation only if the shareholder notifies his or her financial advisor about such assets
- Letters of Intent ("LOI") which allow for breakpoint discounts using the same criteria as ROA above, but based on anticipated purchases of any Nuveen-sponsored mutual fund over a 13-month period of time

CLASS A SHARE FRONT-END SALES CHARGE WAIVERS AVAILABLE AT MORGAN STANLEY WEALTH MANAGEMENT

Shareholders purchasing Fund shares through a Morgan Stanley Wealth Management transactional brokerage account will be eligible only for the following front-end sales charge waivers with respect to Class A shares, which may differ from and may be more limited than those disclosed elsewhere in this Fund's prospectus or SAI. Shareholders should contact Morgan Stanley Wealth Management to determine their eligibility for these waivers and discounts.

- Employer-sponsored retirement plans (e.g., 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans). For purposes

of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans

- Morgan Stanley employee and employee-related accounts according to Morgan Stanley's account linking rules
- Shares purchased through reinvestment of dividends and capital gains distributions when purchasing shares of the same fund
- Shares purchased through a Morgan Stanley self-directed brokerage account
- Class C (i.e., level-load) shares that are no longer subject to a contingent deferred sales charge and are converted to Class A shares of the same fund pursuant to Morgan Stanley Wealth Management's share class conversion program
- Shares purchased from the proceeds of redemptions of a Nuveen-sponsored mutual fund, provided (i) the repurchase occurs within 90 days following the redemption, (ii) the redemption and purchase occur in the same account, and (iii) redeemed shares were subject to a front-end or deferred sales charge.

CLASS A AND CLASS C SHARE SALES CHARGE REDUCTIONS AND WAIVERS AVAILABLE THROUGH OPPENHEIMER & CO. INC.

Effective June 30, 2020, shareholders purchasing fund shares through an Oppenheimer & Co. Inc. ("OPCO") platform or account are eligible only for the following load waivers (front-end sales charge waivers and contingent deferred, or back-end, sales charge waivers) and discounts, which may differ from those disclosed elsewhere in this prospectus or SAI.

Front-End Sales Load Waivers on Class A Shares available at OPCO

- Employer-sponsored retirement, deferred compensation and employee benefit plans (including health savings accounts) and trusts used to fund those plans, provided that the shares are not held in a commission-based brokerage account and shares are held for the benefit of the plan
- Shares purchased by or through a 529 Plan
- Shares purchased through a OPCO affiliated investment advisory program
- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same fund (but not any other Nuveen-sponsored mutual fund)
- Shares purchased from the proceeds of redemptions of a Nuveen-sponsored mutual fund, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (known as Rights of Restatement)
- A shareholder in Class C shares will have their shares converted at net asset value to Class A shares (or the appropriate share class) of the Fund if the shares are no longer subject to a CDSC and the conversion is in line with the policies and procedures of OPCO
- Employees and registered representatives of OPCO or its affiliates and their family members
- Directors or Trustees of the Funds, and employees of the Funds' investment adviser or any of its affiliates, as described in this prospectus

CDSC Waivers on A and C Shares available at OPCO

- Death or disability of the shareholder

- Shares sold as part of a systematic withdrawal plan as described in the prospectus
- Return of excess contributions from an IRA Account
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the shareholder reaching the qualified age based on applicable IRS regulations as described in the prospectus
- Shares sold to pay OPCO fees but only if the transaction is initiated by OPCO
- Shares acquired through a Right of Reinstatement

Front-End Load Discounts Available at OPCO: Breakpoints, Rights of Accumulation & Letters of Intent

- Breakpoints as described in the prospectus.
- Rights of Accumulation (ROA) which entitle shareholders to breakpoint discounts will be automatically calculated based on the aggregated holding of all Nuveen-sponsored mutual fund assets held by accounts within the purchaser's household at OPCO. Eligible Nuveen-sponsored mutual fund assets not held at OPCO may be included in the ROA calculation only if the shareholder notifies his or her financial advisor about such assets.

CLASS A AND CLASS C SHARE SALES CHARGE REDUCTIONS AND WAIVERS AVAILABLE THROUGH RAYMOND JAMES & ASSOCIATES, INC., RAYMOND JAMES FINANCIAL SERVICES, INC. AND EACH ENTITY'S AFFILIATES ("RAYMOND JAMES")

Shareholders purchasing Fund shares through a Raymond James platform or account, or through an introducing broker-dealer or independent registered investment adviser for which Raymond James provides trade execution, clearance, and/or custody services, will be eligible only for the following load waivers (front-end sales charge waivers and contingent deferred sales charge waivers) and discounts, which may differ from those disclosed elsewhere in your Fund's prospectus or SAI.

Front-End Sales Load Waivers on Class A Shares Available at Raymond James

- Shares purchased through a Raymond James investment advisory program.
- Shares purchased of a Nuveen-sponsored mutual fund through a systematic reinvestment of capital gains and dividend distributions.
- Employees and registered representatives of Raymond James or its affiliates and their family members as designated by Raymond James.
- Shares purchased from the proceeds of redemptions of a Nuveen-sponsored mutual fund, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (known as Rights of Reinstatement).
- A shareholder in the Fund's Class C shares will have their shares converted at net asset value to Class A shares (or the appropriate share class) of the Fund if the shares are no longer subject to a CDSC and the conversion is in line with the policies and procedures of Raymond James.

CDSC Waivers on Class A and C Shares Available at Raymond James

- Death or disability of the shareholder.
- Shares sold as part of a systematic withdrawal plan as described in the prospectus.
- Return of excess contributions from an IRA Account.

- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the shareholder reaching the qualified age based on applicable IRS regulations as described in the prospectus.
- Shares sold to pay Raymond James fees but only if the transaction is initiated by Raymond James.
- Shares acquired through a Right of Reinstatement.

Front-End Load Discounts Available at Raymond James: Breakpoints, Rights of Accumulation, and/or Letters of Intent

- Breakpoints as described in the prospectus.
- Rights of accumulation which entitle shareholders to breakpoint discounts will be automatically calculated based on the aggregated holding of all Nuveen-sponsored mutual fund assets held by accounts within the purchaser's household at Raymond James. Eligible Nuveen-sponsored mutual fund assets not held at Raymond James may be included in the calculation of rights of accumulation only if the shareholder notifies his or her financial advisor about such assets.
- Letters of intent which allow for breakpoint discounts based on anticipated purchases of Nuveen-sponsored mutual funds, over a 13-month time period. Eligible Nuveen-sponsored mutual fund assets not held at Raymond James may be included in the calculation of letters of intent only if the shareholder notifies his or her financial advisor about such assets.

CLASS A SALES CHARGE WAIVERS AVAILABLE ONLY THROUGH SPECIFIED INTERMEDIARIES

As described in the prospectus, Class A shares may be purchased at net asset without a sales charge by employer-sponsored retirement plans ("ESRPs") as defined in the prospectus, except that, in the case of ESRPs held through a brokerage account, Class A shares will be available at net asset value without a sales charge only if the broker-dealer has entered into an agreement with the Distributor that allows for such purchases.

The following intermediaries have entered into such an agreement:

Baker & Co., Inc.
 Cetera Advisor Networks LLC
 Cetera Advisors LLC
 Cetera Financial Specialists LLC
 Cetera Investment Services LLC
 Country Club Financial Services, Inc.
 Cutter & Co. Brokerage Inc.
 Davenport & Co. LLC

As described in the prospectus, Class A shares may be purchased at net asset value without a sales charge through a financial intermediary that has entered into an agreement with the Distributor to offer the Funds' shares to self-directed investment brokerage accounts and that may or may not charge a transaction fee to its customers.

The following intermediaries have entered into such an agreement:

J.P. Morgan Securities LLC
Merrill Lynch, Pierce, Fenner & Smith Inc.
TD Ameritrade, Inc.
TD Ameritrade Clearing, Inc.

Other Information for Fund Shareholders

Several additional sources of information are available to you, including the codes of ethics adopted by the Funds, Nuveen, LLC, Nuveen Fund Advisors and Nuveen Asset Management. The appendix to this prospectus, "Variations in Sales Charge Reductions and Waivers Available Through Certain Intermediaries," contains information on sales charge reductions and waivers available through certain financial intermediaries that differ from the sales charge reductions and waivers disclosed in this prospectus and the related statement of additional information. The statement of additional information, incorporated by reference into this prospectus, contains detailed information on the policies and operation of the Funds included in this prospectus. Additional information about the Funds' investments is available in the annual and semi-annual reports to shareholders. In the Funds' annual report, you will find a discussion of the market conditions and investment strategies that significantly affected the Funds' performance during their last fiscal year.

The Funds' most recent statement of additional information, annual and semi-annual reports and certain other information are available, free of charge, by calling Nuveen Funds at (800) 257-8787, on the Funds' website at www.nuveen.com, or through your financial advisor. Shareholders may call the toll free number above with any inquiries.

You may also obtain this and other Fund information directly from the Securities and Exchange Commission ("SEC"). Reports and other information about the Funds are available on the EDGAR Database on the SEC's website at <http://www.sec.gov>. You may also request Fund information by sending an e-mail request to publicinfo@sec.gov. The SEC may charge a copying fee for this information.

Household Mailings

Each year you are automatically sent an updated summary prospectus and annual and semi-annual reports for your Fund. You may also occasionally receive proxy statements for your Fund. In order to reduce the volume of mail you receive, when possible, only one copy of these documents will be sent to shareholders who are part of the same family and share the same household address. If you would like to opt out of these household-based mailings, please call Nuveen Funds at (800) 257-8787.

Nuveen All-American Municipal Bond Fund, Nuveen Intermediate Duration Municipal Bond Fund and Nuveen Limited Term Municipal Bond Fund are series of Nuveen Municipal Trust, whose Investment Company Act file number is 811-07873.

Nuveen Short Term Municipal Bond Fund is a series of Nuveen Investment Funds, Inc., whose Investment Company Act file number is 811-05309.
