Environment

All companies leave some environmental impact, be it using electricity to run an office or contributing to deforestation for grazing land. This section is concerned with the environmental issues your company is confronted by and how you mitigate them. It is important for companies to take responsibility for the environmental impacts their operations may have (e.g. energy consumption during manufacturing, use of energy in the office, chemical use), but also for the products or services they market (e.g. impacts from product use, such as energy efficiency of an electronic product or end-of-life issues, such as recycling the product).
