Tomsk (Siberia) Business Mission – Melbourne March 2013

Dear sir/Madam,

A delegation from the Tomsk Chamber of Commerce and Industry is visiting Australia for the first time to meet specialists from related fields with a view to establishing long-term business and scientific relationships.

The Siberian Region of Tomsk carries out its international activities under the slogan “The Island of intelligence in the ocean of resources”. The capital Tomsk is home to some of Russia’s top universities and research institutes. The region is ranked first in Russia in terms of the number of people engaged in R&D per capita and the concentration of scientific employees with higher qualifications. This has resulted in a dynamic and innovative business culture specializing in cutting edge advances in specialist fields. This includes IT, Electronics, Communications, Mining (Gas and Oil), and the Engineering sectors.

Many of these innovations are world class, unique and relevant to Australian Business and landscape. In preparation for the visit research was undertaken to identify potential partnership companies that match the technological expertise that the delegation brings. TRBOapps was high on the list and we hope that yourself or a member of your team is able to attend.

The Australian Russian Business Council is pleased to offer the opportunity to join the delegation for a “Business Exchange”.
