Onderwerp
Individual project master

Dear Mr. Bargiacchi,

The Examination Board Artificial Intelligence has approved that the individual project 'Decentralized Modeling and Planning for Heterogenous Multi-Agent Solutions' - as described in the project proposal - can be used as a free choice course in the master program Artificial Intelligence. The project will count for 6 EC.

As soon as the project has been completed, the supervisor/examiner will grade the project. The grade has to be delivered together with this letter to the ServiceDesk of the Education Service Centre to be registered.

Yours sincerely
On behalf of the Examination Board,

C.M. Dofferhoff MSc
Official secretary
