

# Acrobat X Pro annotations

---

Sticky note 

Highlight text

Text at cursor

Replace, ~~strikethrough~~, underline

Note

## Drawing Markups:

An *annotation* associates an object with a location on a page of a PDF document, or provides a way to interact with the document. PDF includes a wide variety of standard annotation types.

This is a text box - looks like a floating text story or a floating text in MSWord

Text callout

Many of the standard annotation types may be displayed in either the *open* or the *closed* state. When closed, they appear on the page in some distinctive form, such as an icon, a box, or a rubber stamp, depending on the specific annotation type. When the user *activates* the annotation by clicking it, it exhibits its associated object, such as by opening a pop-up window displaying a text note (Figure 8.2) or by playing a sound or a movie.

This is a typewriter

An option is called 'Add or Edit Text Box'
