

How 5G can accelerate digitalization and post-Covid growth in Norway

6. November 2020

Jon Fredrik Baksaas

Laxmi Akkaraju

The two most important global trends right now:

1

2

Opposing dynamics characterise and complicate these trends

NEED FOR REMOTE SERVICES

DIGITAL INCLUSION

TRANSFORMATIVE SERVICES

NEED FOR UBIQUITOUS TECHNOLOGY

NEED FOR UNIFORM DIGITAL EXPERIENCES

GLOBAL RECESSION DUE TO COVID19

TECHLASH, POTENTIAL NEGATIVE
IMPACT OF TECHNOLOGY (DATA,
ETHICS, SOCIETY)

GEOPOLITICS + RISE OF WALLED
GARDENS FRAGMENTS SCALE

DATA SOVEREIGNTY

Three game changers within Digitisation:

DIGITISATION

SOFTWARE

VIRTUALISATION/CLOUD

PLATFORM

All of these new technologies leverage and enhance the digitization trends mentioned

Examples

5G NETWORKS

Artificial Intelligence

Internet of Things

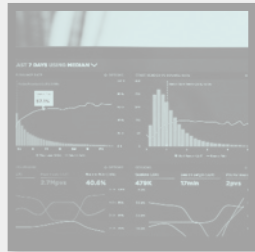

Robots and Cobots

Autonomous Vehicles

Additive Manufacturing

Big Data

Blockchain

Cloud and Edge Computing

Biotechnology

Quantum Computing

Agenda

What is 5G?

How will 5G accelerate growth post COVID?

The Challenges Ahead

What is 5G?

**From infrastructure centric to software centric
connectivity**

Generational leap every 10 years...

3rd Industrial Revolution

4th Industrial Revolution

1980s

1990s

2000s

2010s

2020s

1G

Post-paid Market

- Proof-of-Concept for cellular
- Analog-based

2G

Prepaid Market

- Interoperability
- Interconnection
- Roaming

3G

Emerging Market

- Swappable SIM cards
- Open market devices

4G

Internet Market

- Always-on data
- Smartphones
- App stores

5G

Enterprise Market

- Horizontal enablers (AI, IoT, APIs, Network Slices)
- Industrialised partnership model (incl. NaaS / IaaS / PaaS)

How is 5G different?

Capacity/Latency

Radio innovations bring...

Better
Spectral Efficiency

Higher
Spectral Capacity

More flexible
Spectral Reuse

Flexibility

Software defined networks (SDN), network functions virtualisation (NFV), network slicing

Stronger, better & faster
next generation mobile
technology

1000x
Capacity

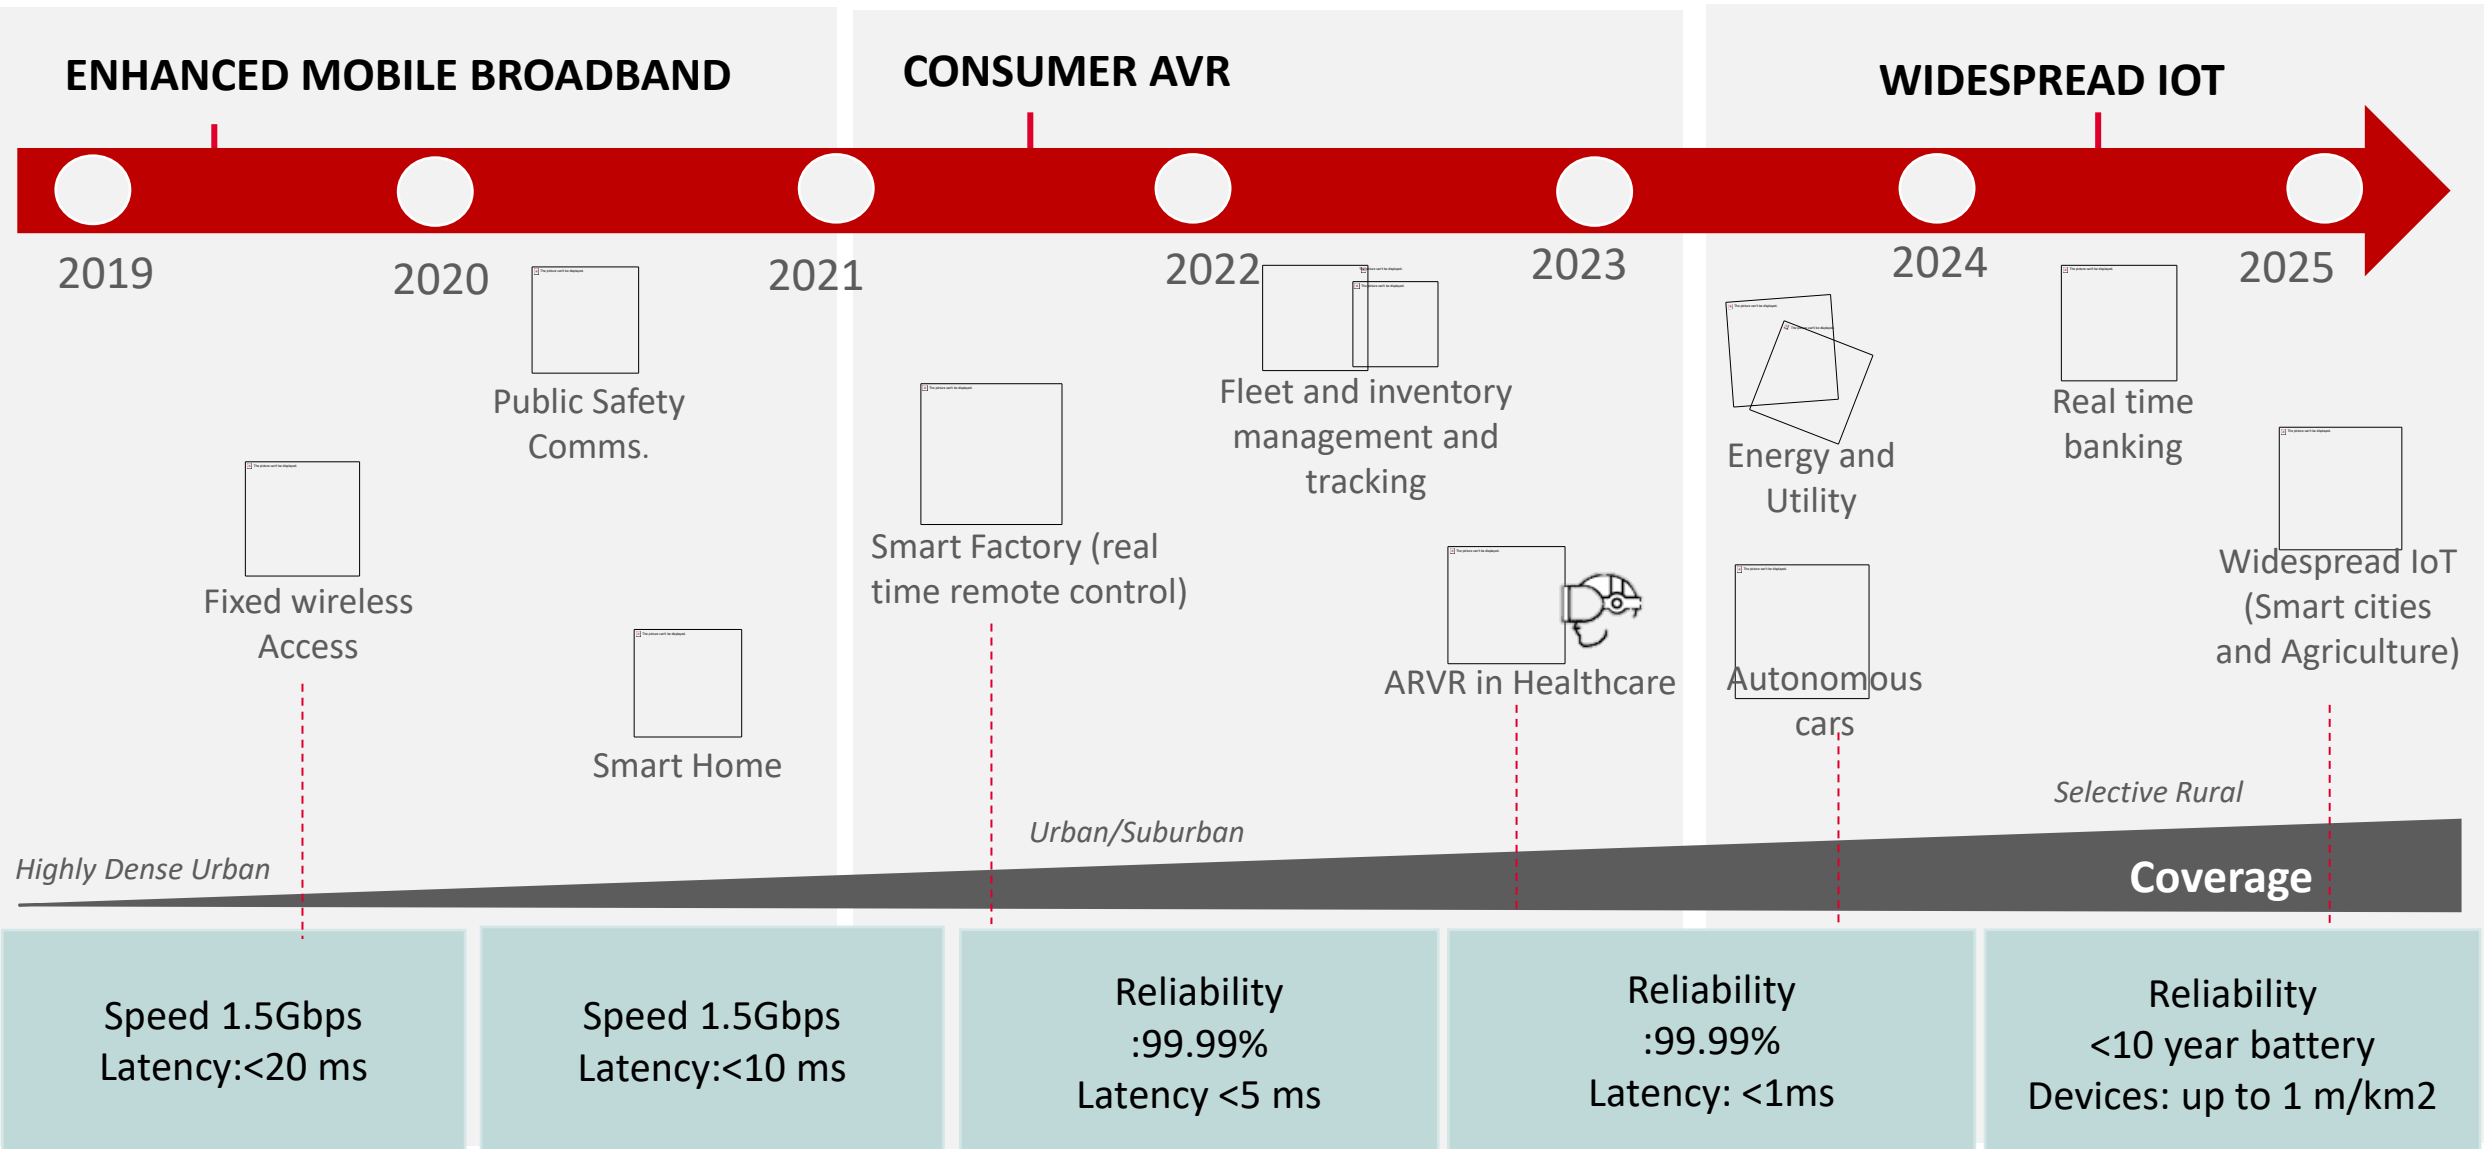

1ms
Latency

10-100x
Data
rates

-90%
Energy
use

Plus infinite innovations & use cases...

The new features will enable many new service

... and 5G launches are gaining momentum

As of Q2 2020, 87 operators in 39 markets had deployed commercial 5G networks...

■ Planned commercial 5G network ■ Live commercial 5G network

...including 3 operators in Norway

Telenor opens first commercial 5G network in Norway

(Trondheim, 13 March 2020) Telenor's commercial 5G network opens today in nine different cities and villages across Norway, making Telenor the first mobile operator in the country to offer 5G to customers.

TELIA LAUNCHES 5G IN NORWAY

2020-05-12

Today, Telia in Norway opens up its 5G network to customers in Lillestrøm and parts of Grouddalen in Oslo. During 2020, the 5G coverage will be extended throughout Oslo, and it will also be launched in Trondheim and Bergen. Telia's aim is to be first in Norway with a nation-wide 5G network by the end of 2023, and the ambition is 5G over the course of

Nå åpner det tredje 5G-nettet i Norge

Ice begynner testfasen sin i Tromsø.

We have the opportunity to lead again...

5G Adoption 2020 (%)

How will 5G accelerate growth?

How?

**ECONOMIC
CONTRIBUTION and JOB
CREATION**

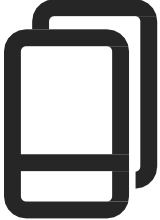

**DIGITISATION OF
INDUSTRIES
INNOVATION /
NEW SERVICES**

**SOCIAL VALUE – DIGITAL
INCLUSION
CLIMATE &
SUSTAINABILITY**

Mobile technology is everywhere...

	Unique Mobile Subscribers	Mobile Internet Users	Internet of Things	Smartphones
				
2019	5.2b (67%)	3.8b (49%)	12.0b	65%
2025	5.8b (70%)	5.0b (61%)	24.6b	80%

Mobile technology – economic contributions

MOBILE CONTRIBUTION TO GDP

2019

\$4.1tn

2024

\$4.9tn

4.7% of GDP

4.9% of GDP

EMPLOYMENT

2019

16m

Jobs directly supported
by the mobile ecosystem

+14m indirect jobs

OPERATOR CAPEX

2025

\$1.14tn

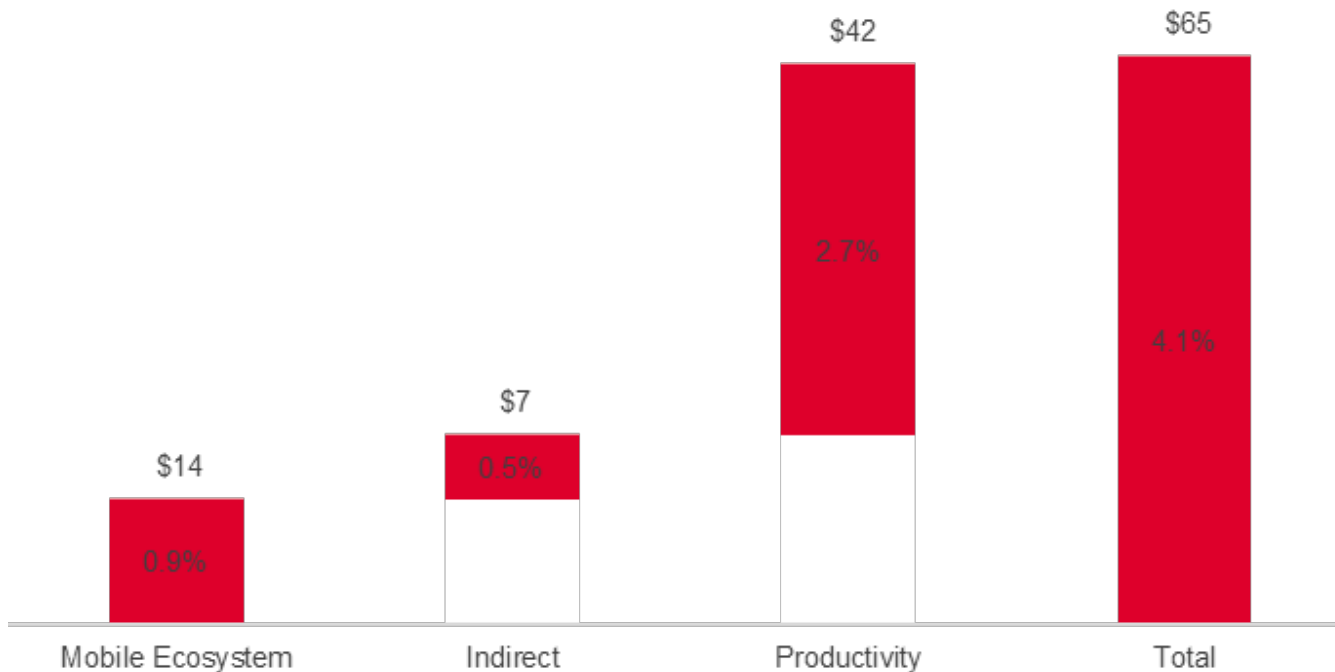

Operator capex (78% on 5G)

Economic contribution of mobile in the Nordic* region

2019

2030

Total economic contribution of the mobile ecosystem (\$ billions, % of GDP)

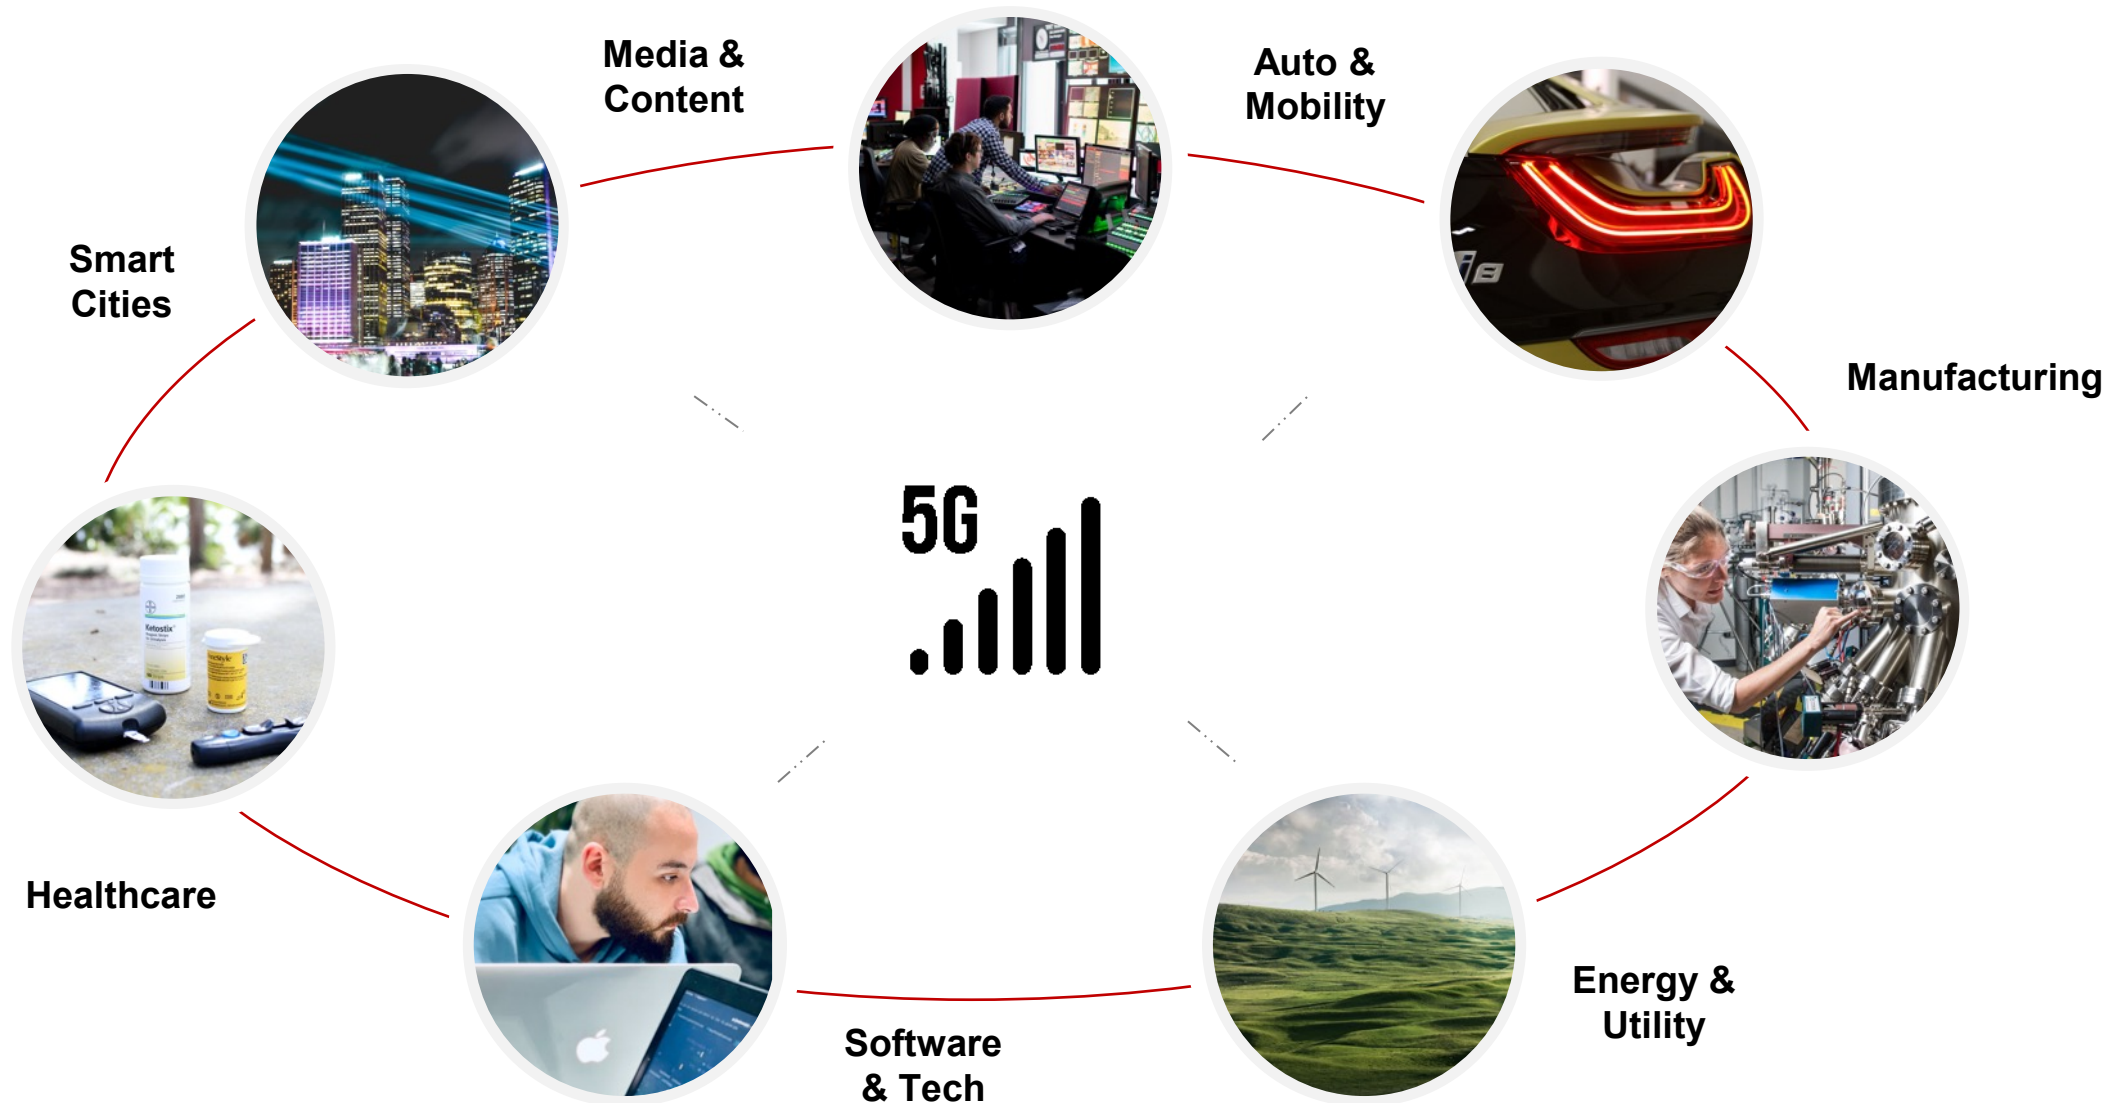

An addition **\$10 B** (.5%) of annual regional GDP is expected

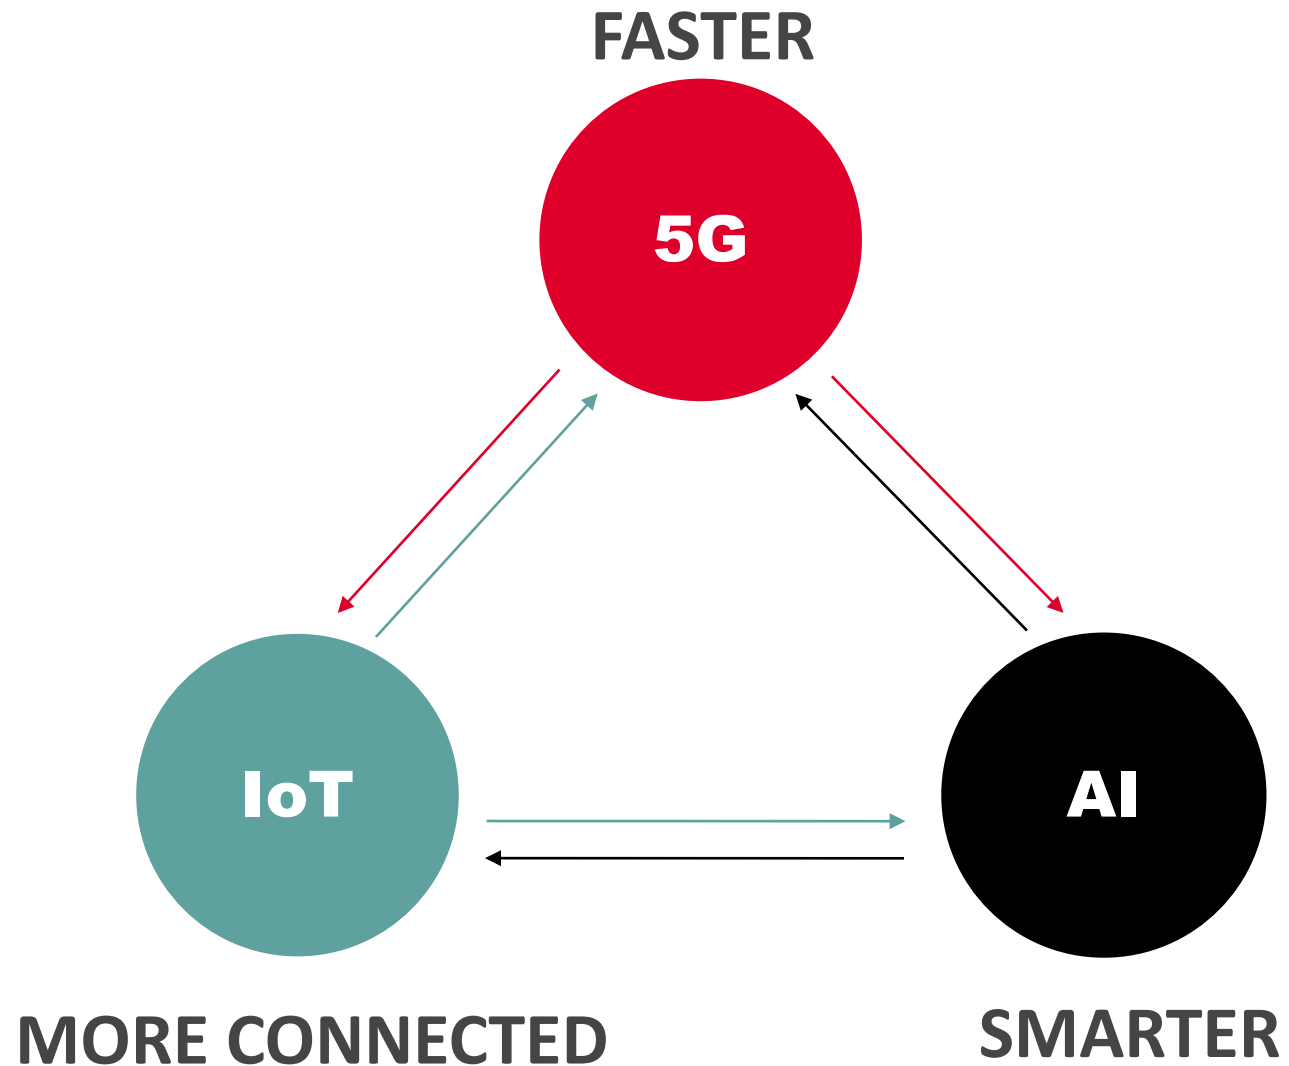

Source: GSMA Intelligence (Total may not add up due to rounding)

*Nordic region includes Denmark, Finland, Iceland, Norway and Sweden.

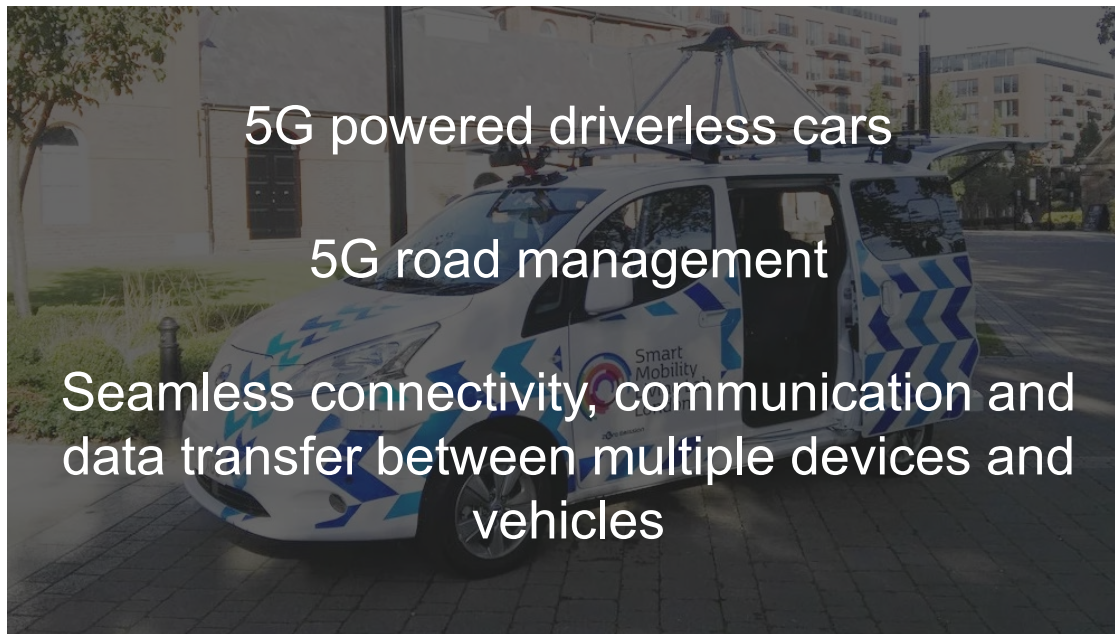

5G will accelerate digitization and enable platforms across all industries

The intersection of AI, IoT and 5G will help bring intelligent connectivity to life

Example - Mobility

Partnership

Loughborough University

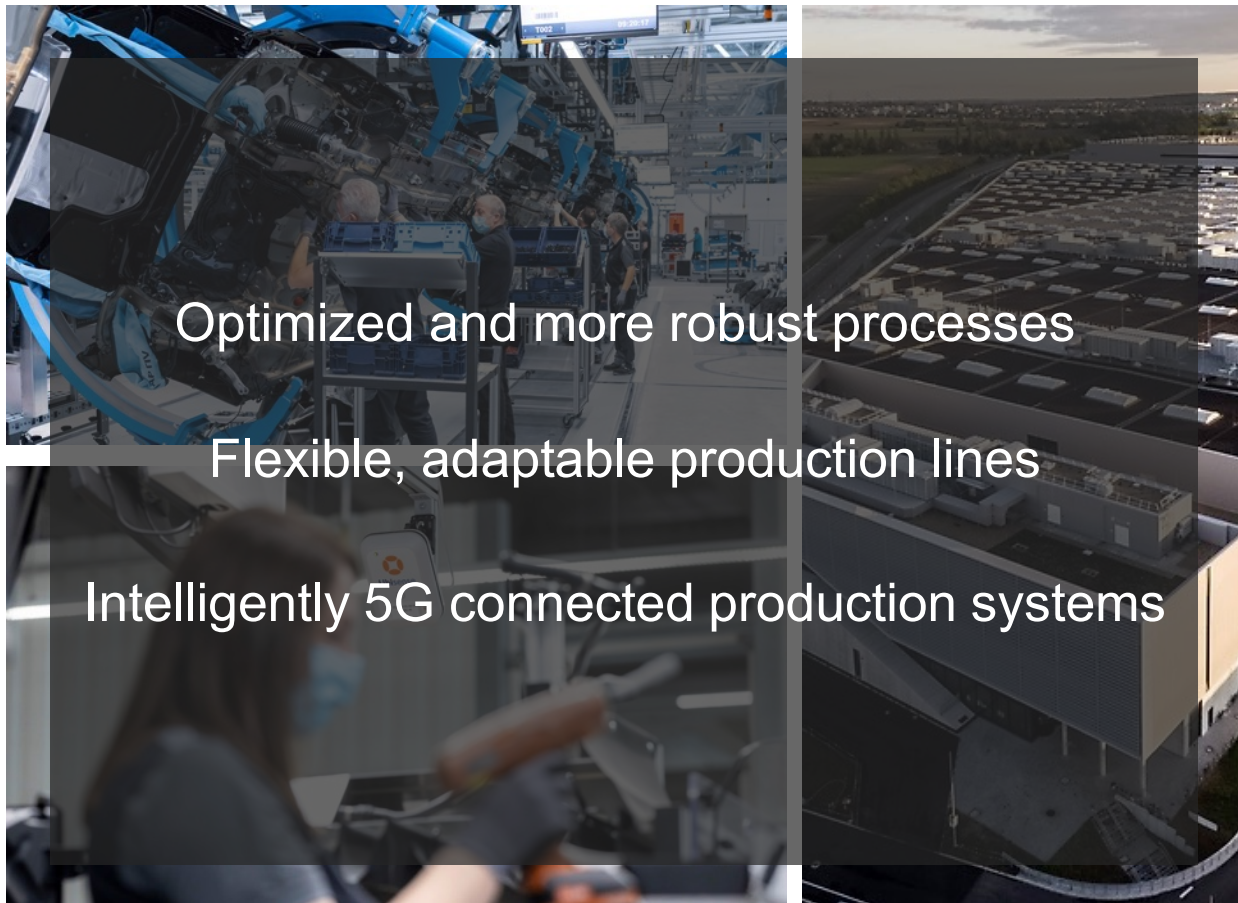

Business benefits: Mobility

Reduce motorists time in traffic	Reduce CO2 emissions	Reduce economic costs through 5G-based road management	Upsell of other digital services e.g. media, insurance products
----------------------------------	----------------------	--	---

Functional drivers of 5G

Enhanced mobile broadband	Ultra-reliable low latency comms.	Massive machine-type comms.	Security critical	Power efficiency
---------------------------	-----------------------------------	-----------------------------	-------------------	------------------

Manufacturing

Partnership

Business benefits: Manufacturing processes

Customized and personalized products	Improved worker safety/reduced fatalities	Managing carbon footprints/CO2 emission per unit of value added
--------------------------------------	---	---

Functional drivers of 5G

Enhanced mobile broadband	Ultra-reliable low latency comms.	Massive machine-type comms.	Security critical	Power efficiency
---------------------------	-----------------------------------	-----------------------------	-------------------	------------------

Logistics – Harbour

Partnership

Business benefits: Logistics

~70% Labour cost savings

Increased flexibility of equipment

Higher Efficiency of equipemnt

Functional drivers of 5G

Enhanced mobile broadband

Ultra-reliable low latency comms.

Massive machine-type comms.

Security critical

Power efficiency

Healthcare

Nokia logo

Partnership

Neusoft

Business benefits: Healthcare

Bridging digital divide/
proportion of
population covered by
a network, technology

Effective
and
speedy
recovery

Value added as a
proportion of GDP
and per capita due to
reduced operating
costs

Scalability of
solutions/faster
proof of
concepts

Functional drivers of 5G

Enhanced
mobile
broadband

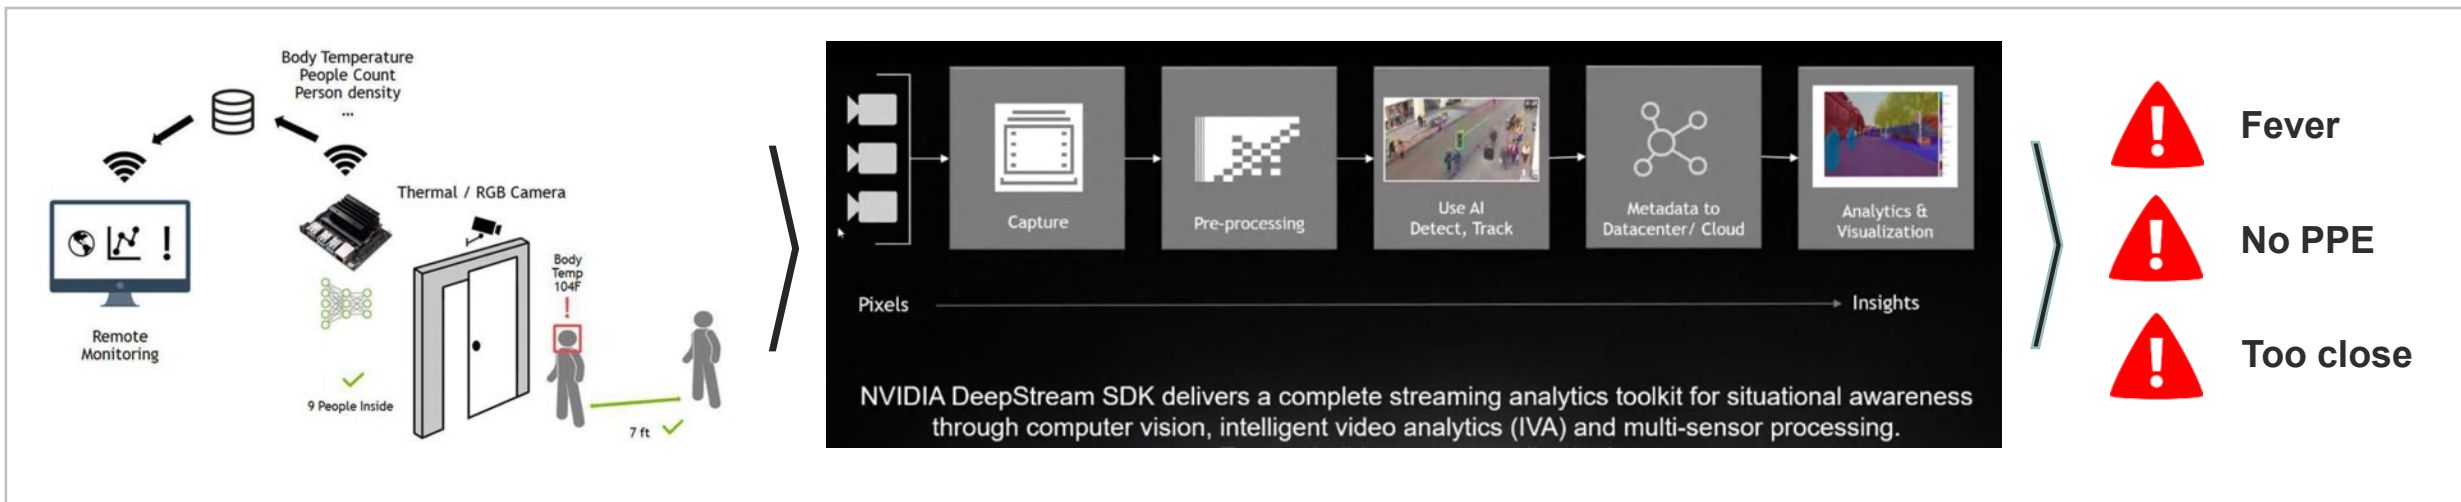

Ultra-reliable
low latency

Massive
machine-
type comms.

Security
critical

Power
efficiency

Fighting COVID19

Thermal imaging for Body Temperature alerts

Personal Protective Equipment compliance

Proximity assessment for social distancing

Media and Entertainment is the biggest consumer use case for 5G

Global Market Size

\$2.5tr

Global media and entertainment market size 2024

Where 5G Brings Media and Entertainment to Life

Cloud gaming

The ability to play a game on any device without owning the physical hardware or needing a local copy of the game itself

Immersive entertainment

The ability to experience standard media in a multi-dimensional realm achieved by combining reality with technology

MNOs are already making huge strides in 5G + Media and Entertainment

Immersive technology brings in offline world elements online...

360 Live Streaming Sports Events

...and enhances the customer experience and creates virtual worlds offline

VR/AR eSports Live Streaming

AR to enhance experience

VR Theme Parks

Mobile isn't just about economic value, generates social value too

Climate change, environment,
disaster response

Reducing inequalities

Connecting
underserved areas

Education

Health

Citizen Inclusion
(financial, social, economic)

Privacy, fraud and
consumer protection

Economic growth and
Innovation

5G Fixed Wireless Access (FWA) will help connect the unconnected

Half the world is still unconnected...

50%

Population that had no internet access in 2019 (ITU)

1.9X

More likely that households with internet access in developed countries than developing countries

11.8%

% of households in less developed countries that had internet access

...5G FWA can help bridge this divide

- FWA: established means of providing internet access to homes using wireless mobile network technology rather than fixed lines
- 5G FWA can be used to quickly and cheaply deliver an alternative to wired broadband
- It can provide a level of service bandwidth capacity comparable to fibre optics
- Therefore a great technology to help connect the unconnected

Mobile enables X10 carbon savings in other sectors than our own emissions

How much?

1.4bn Mwh

Mobile's contribution to reduction of electricity and gas consumption

520bn litres of fuel

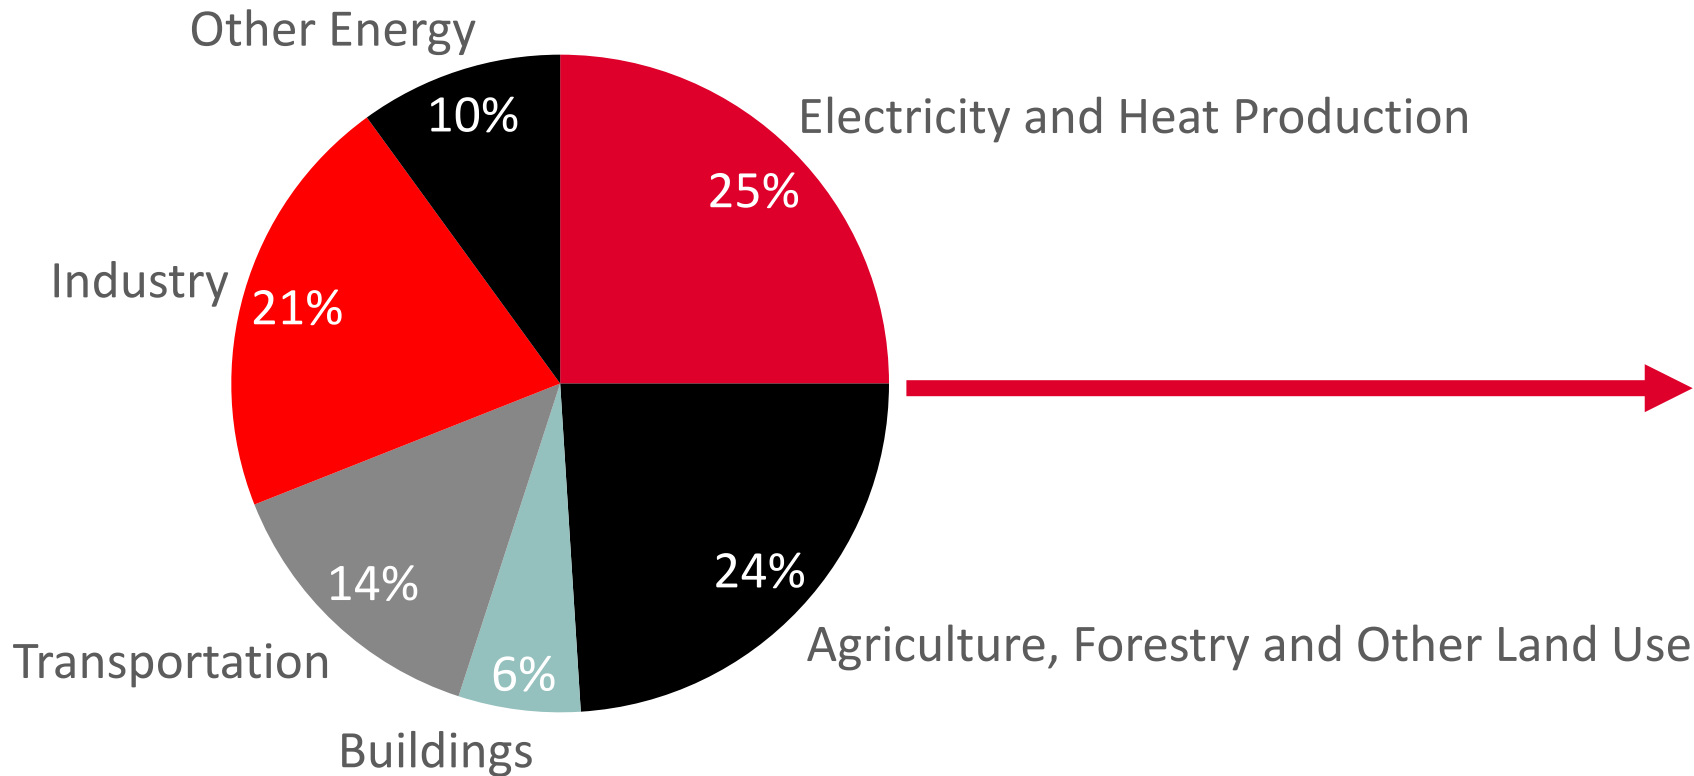

Volume of fuel not used globally due to mobile connectivity

How?

The mobile industry contributes less than 1% of global greenhouse gas emissions

Global Greenhouse Gas Emissions by Economic Sector

<1%
Global
Emissions

COVID19 highlighted how mobile can provide more than just resilient connectivity

GEOPOLITICS

SKILLS

Examples of 5G Licence Obligations

Obligations include population and/or geographical coverage, data speeds, deployment, investment, sharing

- **Several countries have imposed coverage obligations (population and/or geographical):**
 - E.g. Germany 98% of HH, Netherlands 98% of all municipalities, Italy 80% of commutes, Czech Republic 95% of population
- **Several countries included covering roads and railways:** Germany, Qatar, Norway
- **QoS obligations:** Germany 100 Mb/s for HH covered, 10 ms latency for highways and federal roads
- **Network deployment obligations:** Singapore MNOs have to deploy 5G SA networks over 3.5 GHz band from the start and deploy mmWave within 12 months
- **Investment (\$) and number of BTS to be deployed:** Korea (150,000 base stations - 22,500 within three years (2021 - 15%), 45,000 within five years (2023 - 30%))
- **Sharing:** Finland (leasing spectrum for the purpose of providing services in the area not covered); France (option to share/assign spectrum to verticals to cater for their needs);
- **Commitments to expand optical fiber networks (Japan)**
- **Solutions for verticals:** France imposed commitments for MNOs to grant reasonable requests from vertical industry companies by providing customised solutions or share the spectrum spectrum; slicing or tiers services by 2023 imposed
- **Higher prices in exchange for no coverage obligations:** Sweden, Denmark
- **Lower or no upfront fees in exchange for coverage obligations:** Austria, UAE, Qatar

Geopolitics is polarising technologies

AI as a geopolitical arms race

The world leader

Cutting-edge expertise held by private tech companies

The ethical approach

AI leadership based on European principles

The future AI super-power

Seeking AI world leadership by 2030

Public policy

No central AI policy

Focus on role of ethics in addition to AI capabilities

National plan to accelerate AI development by 2020

Public funding

\$0bn for 2018-2020
\$2bn DARPA funding

EU investing €1.5bn by 2020
UK £1bn, France €1.8bn

Estimated government investment ~\$30bn by 2020

Strategic advantage

Mature research, talent and venture capital pools

Strong regulation and privacy protection

Enormous amount of data
Relaxed regulation on privacy

How can companies, regions, countries enhance digital competitiveness?

Regulatory & Technology

Identify and amplify specific country's unique drivers

Public Policy

Capital Investment

Technological framework

Future Readiness

Long-term vision + swift implementation

Adaptive attitudes

Business agility

IT integration

Knowledge

Talent

Training & education

Encourage innovation and entrepreneurship

In the last 3 years Norway has become less digital competitive compared to peers
