

Dear Blueflag Customer,

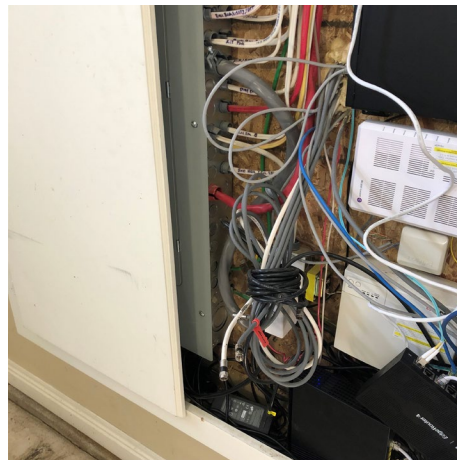

When looking for the Coax cable in your home. Here are some images of the coax cable and passable locations in your home.

---

1.) *This is what the Coax Cable looks like. Notice the copper Pin in the center. Also, the threaded inside.*

---

---

2.) *The most likely location for the Coax is in or near your electrical panel.*

---

---

3.) *If your house was previously using a Coax Cable for internet your connection may look like this, but this connection is not always active and may be disconnected in the house at a central communication cabinet.*

---
