The RIBA Plan of Work 2013 is the definitive framework for the contemporary building design and construction process. It provides a stage-by-stage model to assist all members of the project team to manage the process from inception to completion and beyond. This practical guide explains how the RIBA Plan of Work 2013 can be applied for optimal results in construction projects, revealing the Plan of Work as much more than just a project framework. It can be used as a tool to ensure best outcomes and guide thinking across a range of key themes including whole life costs, procurement routes, BIM, and social and environmental sustainability. With useful explanations of the various stages and technical terms, this book is packed with guidance and tips for using the Plan of Work to ensure genuinely integrated projects. Intended as complementary to the RIBA Plan of Work 2013 Online, the RIBA Job Book, and Assembling the Project Team, it is for construction professionals industry-wide, from architectural practices to clients and contractors, as well as students studying for their professional examinations.

The RIBA Plan of Work 2013 Guide: Design Management is part of a brand new series providing must-read practical guidance to running efficient and successful projects using the new RIBA Plan of Work 2013. Each guide takes a core project task – in this case the role of the Design Lead - and explains the essential activities and considerations required at each stage of the new Plan of Work. Easy to use and navigate and in a small and handy format these guides will provide the ultimate quick reference support at your desk or on site. The author provides concise and pragmatic advice rooted in real world experience – a 'how to' that will resonate with practitioners. In-text features such as 'hints and tips', 'checklists', 'forms and templates' and 'signposts' to trusted resources will provide user-friendly support. Boxed examples will highlight best practice and illuminate common problems and solutions borne of hard won experience.

The RIBA Plan of Work 2013 Guide: Design Management is part of a brand new series providing must-read practical guidance to running efficient and successful projects using the new RIBA Plan of Work 2013. Each guide takes a core project task – in this case the role of the Contract Administrator - and explains the essential activities and considerations required at each stage of the new Plan of Work. Easy to use and navigate and in a small and handy format these guides will provide the ultimate quick reference support at your desk or on site. The author provides concise and pragmatic advice rooted in real world experience – a 'how to' that will resonate with practitioners. In-text features such as 'hints and tips', 'checklists', 'forms and templates' and 'signposts' to trusted resources will provide user-friendly support. Boxed examples will highlight best practice and illuminate common problems and solutions borne of hard won experience.

The RIBA Job Book is the Royal Institute of British Architects' long-established and recognised standard reference for running construction projects. This major new update fully reflects the new RIBA Plan of Work 2013 and contemporary working practice. It embraces themes of collaboration within the project team, better briefing, advances in information technology and BIM, and the continued importance of sustainability including valuable detail on a range of 'cradle to grave' processes in a building project. Applicable to all forms of procurement and to all sizes and types of project, the RIBA Job Book provides a systematic operational framework that is comprehensive in scope and easy-to-follow, and which examines step-by-step the key obligations of the architect or lead consultant. Setting out all the actions to be undertaken throughout a project, it includes invaluable checklists, notes and practical guidance.

The groundbreaking guide to modern leadership in architectural practice *Leading Collaborative Architectural Practice* is the leadership handbook for today's design and construction professionals. Endorsed by the American Institute of Architects, this book describes the collaborative approach to leadership that is becoming increasingly prevalent in modern practice; gone are the days of authoritative "star" architects— today's practice is a brand, and requires the full input of every member of the team. This book builds off of a two-year AIA research project to provide a blueprint for effective leadership: the ability, awareness, and commitment to lead project teams who work together to accomplish the project's goals. Both group and individual hands-on exercises help facilitate implementation, and extensive case studies show how these techniques have helped real-world firms build exemplary success through collaborative teamwork and leadership. Highly illustrated and accessible, this approach is presented from the practicing architect's point of view—but the universal principles and time-tested methods also provide clear guidance for owners, contractors, engineers, project managers, and students. Build a culture of collaboration, commitment, and interpersonal awareness Adopt effective leadership techniques at the team, project, or practice level Handle conflict and resolve communication issues using tested approaches Learn how real-world projects use effective leadership to drive success The last decade has seen a sea-change in architectural leadership. New practices no longer adopt the name and identity of a single person, but create their own identity that represents the collaborative work of the entire group. Shifts in technology and changing workplace norms have made top-down management structures irrelevant, so what does it now mean to lead? *Forefront* presents effective contemporary leadership in the architectural practice, and real-world guidance on everyday implementation.

BIM Demystified is a short, practical introduction to Building Information Modelling (BIM). Addressing BIM from the point of view of mainstream practice as opposed to a cutting-edge technological

perspective, it offers a user-friendly yet thorough explanation of a subject which is often swamped by jargon and deluged with spin. Taking a wide view of BIM – encompassing business opportunity, Code of Conduct, cultural issues and the necessity for better legal arrangements too – the book's chapters range from the BIM ingredients (including objects, parametrics, and standards), to the business case for BIM and how to implement it. BIM requires a shift in attitudes if its benefits are to be obtained – and this book will allow individuals at all levels in any practice to build a firmer understanding of the merits and wider application of the subject. It brings together both managers and technologists within businesses throughout the AECC chain to form better and more valuable propositions for built environment interventions.

Despite co-ordination being the principal focus of the Lead Designer's role, there is very little written about how to undertake these duties. What tools can the Lead Designer use to address the many complexities of developing a design as part of an iterative process? How can the Lead Designer redefine what they do using a digital world to provide profoundly different and new services? This book analyses at all of these questions, setting out how the Lead Designer can perform effectively and efficiently in the digital world, addressing clients' new whole life project requirements and new ways of constructing and assembling buildings. Managing increasing numbers of specialists in the construction process requires experience to ensure that their contributions are properly managed and produced at the right time. This book considers this challenge. It will also consider how the Lead Designer can effectively lead and manage health and safety aspects and risks (the principal designer role in UK regulations).

The RIBA Plan of Work 2013 Guide: Design Management is part of a brand new series providing must-read practical guidance to running efficient and successful projects using the new RIBA Plan of Work 2013. Each guide takes a core project task – in this case managing information exchanges - and explains the essential activities and considerations required at each stage of the new Plan of Work. Easy to use and navigate and in a small and handy format these guides will provide the ultimate quick reference support at your desk or on site. The author provides concise and pragmatic advice rooted in real world experience – a 'how to' that will resonate with practitioners. In-text features such as 'hints and tips', 'checklists', 'forms and templates' and 'signposts' to trusted resources will provide user-friendly support. Boxed examples will highlight best practice and illuminate common problems and solutions borne of hard won experience.

The professional architect's business management bible now encompasses the RIBA Plan of Work 2013 to reflect the very latest practice in today's cutting-edge architectural environment. With an emphasis on the practical aspects of working as an architect, the 9th edition combines clear and comprehensive guidance with a focus on new directions in practice management which will give a modern practice that vital commercial edge. Topics range from starting up a practice and developing a business strategy, to how to win clients, manage people, and handle fees. It includes new sections on topics such as knowledge management, QA, IT and project management too. With its clear, accessible layout, and no-nonsense style aimed at busy architects, this is a must-read for practices of all sizes and the ideal companion to the RIBA Job Book, 9th edition
