Comments:

If there is any hope left in washington, the banks will be held to the same standard as everyone else. They should not be permitted to be predatorial and Legally STEAL from their victims/customers. I see no reason why any and every banking practice should not be in the open under the light of day. I want the BANKS held responsible to the public just as other institutions are scrutenized. PLEASE MAKE THESE THIEVES AT LEAST TELL US IN NONE MICROSCOPIC WRITING AND/OR VERBALLY WHAT THEY ARE PREPARING TO DO TO US. I think that would be fair and not flat dishonest. How can a government that regulates so much let this go unnoticed??????? You have heartings on gouging in the oil business, but the sector that leads in annual earnings half the time in the last 15 years is left to rape it's victims continually. Please stop these predatory practices. P.S. Are you going to be swayed by the big money bank lobbttists that got the bankruptcy laws changed in their favor. If so could you also do us, the american taxpayer(a much larger group), an equal favor and let us see what is coming at us.
