

## ROMANIZATION POLICIES FOR CATALOGING CHINESE MATERIAL

Revised February 23, 2004

### Separation of Syllables

Separate the romanization of each Chinese character with a space, except as directed below. This includes corporate names, terms of address and titles of royalty. Do not join syllables of general, non-specific geographic terms.

1. Terms of address. A term of address may follow a surname, a courtesy name, or another appellation. Separate syllables in the term of address. If a term appearing as an integral part of a name is not a title or term of address, romanize the name in running form, as a forename (see below).

**Certain terms, such as 先生 (xian sheng) are sometimes used as terms of address, and sometimes as forenames (i.e., pseudonyms or pen names). When they are used as terms of address, separate syllables; however, when they are used as forenames, romanize the name in running form (see Connection of syllables, section 1A).**

**When establishing a forename followed by a term of address, a title of position or office, enter under the forename. Refer from the name in direct order.**

白沙先生

|                         |                                       |
|-------------------------|---------------------------------------|
| Romanize name as:       | Baisha xian sheng                     |
| Heading established as: | Chen, Xianzhang, \$d 1428-1500        |
| Give reference as:      | Baisha xian sheng, \$d 1428-1500      |
| Also give reference as: | Baisha, \$c xian sheng, \$d 1428-1500 |

**When establishing names that consist of a surname followed by a term of address, follow AACR2 rule 22.15A by adding the word or phrase to the surname. Separate the term of address from the surname with a comma in the heading. Refer from the name in direct order.**

林老师

|                         |                  |
|-------------------------|------------------|
| Romanize name as:       | Lin lao shi      |
| Heading established as: | Lin, \$c lao shi |
| Give reference as:      | Lin lao shi      |

韋大夫

|                         |                 |
|-------------------------|-----------------|
| Romanize name as:       | Wei dai fu      |
| Heading established as: | Wei, \$c dai fu |
| Give reference as:      | Wei dai fu      |

2. Titles, and titles of royalty. Syllables in a title should be separated and written in lower-case. If a term appearing as an integral part of a name is not a title or term of address, romanize the name in running form, as a forename. An epithet is separated from the name of a person, using lower case letters and separated syllables.

**Follow AACR2 rule 22.12 when establishing names that include titles of nobility and terms of honor. Note that this rule applies to names that consist of a surname and a title, or a forename and a title. Names with titles will be established as: Name, \$c title. Examples of Chinese titles include: *fei* and *gui fei*.**

董鄂妃

Romanize name as: Donge fei  
Heading established as: Donge, \$c fei, \$d 1638-1660  
Give reference as: Donge fei, \$d 1638-1660

楊貴妃

Romanize name as: Yang gui fei  
Heading established as: Yang, \$c gui fei, \$d 719-756  
Give reference as: Yang gui fei, \$d 719-756

**Headings for persons with the highest royal status are established according to AACR2 rule 22.16A1. Enter the name in direct order.**

慈禧皇太后

Romanize name as: Cixi huang tai hou  
Heading established as: Cixi, \$c Empress dowager of China, \$d 1835-1908  
Give references as: Cixi, \$c huang tai hou, \$d 1835-1908  
Cixi huang tai hou, \$d 1835-1908

秦始皇帝

Romanize name as: Qin shi huang di  
Heading established as: Qin shi huang, \$c Emperor of China, \$d 259-210 B.C.  
Give reference as: Qin shi huang di, \$c Emperor of China, \$d 259-210 B.C.

楊太后

Romanize name as: Yang tai hou  
Heading established as: Yang, \$c Empress, consort of Song Ningzong, Emperor of China, \$d 1162-1233  
Give references as: Yang, \$c tai hou, \$d 1162-1233  
Yang tai hou, \$d 1162-1233

3. General, non-specific geographic terms. Some terms have both general and specific usage, depending upon context. For example, when the term 东北 refers to the direction northeast, or, in a general way, to the Northeast, separate syllables; when it is used to refer specifically to Manchuria, capitalize and join syllables.

|    |          |
|----|----------|
| 华东 | Hua dong |
| 西北 | xi bei   |
| 东北 | dong bei |
| 陕北 | Shan bei |

But:

**Connection of syllables.**

1. Join together (without spaces or hyphens) the syllables associated with multi-character surnames and given names. Also join together given names, Buddhist names, courtesy names, etc., in more than one syllable. For example:

|      |               |
|------|---------------|
| 孫中山  | Sun Zhongshan |
| 歐陽修  | Ouyang Xiu    |
| 司馬相如 | Sima Xiangru  |
| 尼克森  | Nikesen       |
| 康有為  | Kang Youwei   |

- 1A. Forenames, given names, courtesy names. A forename does not include a person's surname. Only capitalize the first letter of a forename. If a term appearing as an integral part of a name is not a title or term of address, romanize the name in running form.

**Certain terms, such as 先生 (xian sheng) are sometimes used as terms of address, and sometimes as forenames (i.e., pseudonyms or pen names). When they are used as forenames, romanize the name in running form (see Connection of syllables, section 1A); however, when they are used as terms of address, separate syllables (see Separation of syllables, section 1A).**

**There are many sorts of Chinese forenames. It is frequently difficult to clearly divide syllables because the structure or origin of terms, or the meanings of the characters themselves, are obscure. Therefore, to promote consistent application and to save time, all forenames will be romanized with connected syllables, leaving no space between them. Alternative forms of access may be given for the form which a cataloger feels that a user might employ to find a name (for example, romanized form, Wugangzhuren; possible reference, Wugang zhuren)**

無名氏

Romanize name as: Wumingshi  
 Heading established as: Wumingshi, \$c pseud. (AACR2 compatible heading)

梧崗主人

Romanize name as: Wugangzhuren  
 Heading established as: Wugangzhuren

雲谷老人

Romanize name as: Yungulaoren  
 Heading established as: Zhu, Xi, \$d 1130-1200  
 Give reference as: Yungulaoren, \$d 1130-1200

孔子

Romanize name as: Kongzi  
 Heading established as: Confucius

Give reference as: Kongzi

老子

Romanize name as: Laozi

Heading established as: Laozi

浩然

Romanize name as: Haoran

Heading established as: Haoran, \$d 1932-

1B. Married women. Separate and capitalize family names. **Connect the syllables of the forename, and capitalize only the first letter.**

蔣宋美齡

Romanize name as: Jiang Song Meiling

Heading established as: Jiang Song, Meiling, \$d 1897-

陳趙月英

Romanize name as: Chen Zhao Yueying

Heading established as: Chen Zhao, Yueying, \$d 1914-

1C. Fictional characters. The names of fictional characters are romanized in the same manner as those of real people.

駱駝祥子

Luotuo Xiangzi

秦可卿

Qin Keqing

1D. Names of persons of religious vocation. Separate a term of address from a family name or forename. **Syllables of a term of address should be written separately and in lower case. In a heading or reference, the term of address should appear in the \$c subfield, following the surname or forename. See AACR2 rule 22.16D for instructions on headings for persons of religious vocation.**

惠能

Romanize name as: Huineng

Heading established as: Huineng, \$d 638-713

釋吉藏

Romanize name as: shi Jizang

Heading established as: Jizang, \$d 549-623

Give references as: Jizang, \$c shi, \$d 549-623

Jizang shi, \$d 549-623

Shi Jizang, \$d 549-623

智顓大師

Romanize name as: Zhiyi da shi

Heading established as: Zhiyi, \$d 538-597

Give references as: Zhiyi, \$c da shi, \$d 538-597

Zhiyi da shi, §d 538-597

沙門元賢

Romanize name as: sha men Yuanxian  
Heading established as: Yuanxian, \$c shi  
Give reference as: Yuanxian, \$c sha men  
Sha men Yuanxian  
Shi Yuanxian

1E. Personal names appearing as part of the names of corporate bodies and meetings are romanized in the same manner as all other personal names. (See also Section 2J)

中山大學 Zhongshan da xue  
《刘少奇研究论文集》编辑组“Liu Shaoqi yan jiu lun wen ji” bian ji zu  
周恩来研究学术讨论会 Zhou Enlai yan jiu xue shu tao lun hui

2. Join together (without spaces or hyphens) the syllables associated with multi-character geographic names. Do not join the names of jurisdictions and topographical features to geographic names, but separate them from the proper name by a space.

中华人民共和国史稿 Zhonghua Renmin Gongheguo shi gao  
臺灣省立博物館 Taiwan sheng li bo wu guan  
西藏自治区文物管理委员会 Xizang Zizhiqu wen wu guan li wei yuan hui  
东北林学院 Dongbei lin xue yuan  
扬子江 Yangzi Jiang  
广州市 Guangzhou Shi  
安徽省 Anhui Sheng  
商丘地区 Shangqiu Diqu  
鹿港镇 Lugang Zhen  
纽约市 Niuyue Shi  
甘南藏族自治州 Gannan Zangzu Zizhizhou  
翠亨村 Cuiheng Cun  
浦棠乡 Putang Xiang  
海南岛 Hainan Dao

2A. Names of countries. Connect syllables according to the practice followed by the U.S. Board on Geographic Names on GEOnet (GNS).

中华人民共和国 Zhonghua Renmin Gongheguo  
朝鲜民主主义人民共和国 Chaoxian Minzhu Zhuyi Renmin Gongheguo  
中華民國 Zhonghua Minguo  
民国档案与民国史学术讨论会论文集  
Minguo dang an yu Minguo shi xue shu tao lun hui lun wen ji  
俄国戏剧史概要 Eguo xi ju shi gai yao  
美国 Meiguó  
日本国 Ribenguo

朝鲜国

Chaoxianguo

2B. Generic terms for geographical features are capitalized and separated from the names of the features.

**NOTE: PROPOSED CHANGE: add three sentences; the highlighted examples have been changed to conform:**

The syllables of the name of a jurisdiction or geographic feature that are included within another place name are connected together. These practices are also followed when geographic names appear within corporate names. In case of doubt, separate.

**Because the conversion programs connected hyphenated Wade-Giles syllables together when converting them to pinyin, the romanized forms of many geographical features were converted into forms that do not follow the new pinyin romanization guidelines. For example, Huang-ho (Yellow River in Wade-Giles) was converted by the program to Huanghe. This romanized form must now be manually changed to the correct pinyin form, Huang He. Locating romanized strings for geographical features that now need to be corrected may be time-consuming and difficult.\* Refer to GEOnet (GNS) to identify generic terms for place names, or do so using one's knowledge of the Chinese language. Place names should be systematically romanized in descriptive strings. Please note: place names that are included within other place names may be romanized differently than when they stand alone. For example, the name of the river 长江 is romanized Chang Jiang, but the name of the Mouth of the river 长江口 is romanized Changjiang Kou. Also, please note that the form of name found in headings may vary from the systematically romanized form.**

|            |                                                                                                       |
|------------|-------------------------------------------------------------------------------------------------------|
| 海南岛        | Hainan Dao (Hainan Island)                                                                            |
| 太平洋        | Taiping Yang (Pacific Ocean)                                                                          |

\* Decisions about romanization should not be made without first determining, insofar as possible, the meaning of a romanized string. To do this for a roman-only record, one must try to figure out what characters a romanized string represents, and then what those characters mean. The presence of corresponding characters in 880 fields usually helps one determine meaning. However, the same character or characters may have different meanings on different records. For example,

Characters in title / romanization \_\_\_\_\_ refers to

1. 金山民间传说  
Jin Shan min jian chuan shuo  
Mountain – see 500: Cover title also in English: The folklores of Mount Jinshan.
2. 前进啊，金山工程！  
County near Shanghai – see 650: Engineering \$z China \$z Shanghai.

Qian jin a, Jinshan gong cheng!

- |                                                        |                                                                                                                         |

| 11. (no characters on LC record)<br><br>Jinshan ge ji  | prefer San Francisco – see 650: Chinese Poetry<br>\$z California \$z San Francisco – rather than<br>245: Gold Mountain. |
| 12. (no characters on LC record)<br><br>Jin Shan zhi   | Mountain – see 651: Jin Mountain (Jiangsu<br>Sheng, China)                                                              |

In some instances, however, the information on the bibliographic record does not provide us with enough information to decide. One must refer to the item itself to determine what the characters mean, and then romanize accordingly. For example,

Characters in title / romanization \_\_\_\_\_ refers to

- |              |                                 |
|--------------|---------------------------------|
| 13. 金山龍遊禪寺志略 | Mountain (referred to the book) |
|--------------|---------------------------------|

Jin Shan Long you chan si zhi lue

14. 金山得寶集

San Francisco (referred to the book, which is a memoir about growing up in the Bay Area)

Jinshan de bao ji

15. (no characters)

Refer to a record with non-roman script in a utility's shared database: 千军万马战金山; because the 610 is: Shanghai Shi you hua gong zong chang, it probably refers to the county

Qian jun wan ma zhan Jinshan

16. 金山錢氏家刊書目

Most likely San Francisco; one should refer to the book

Jinshan Qian shi jia kan shu mu

17. 金山电脑公司传

Part of the name of a firm; does it name Jin Mountain, or Jin County, or the name of a person? One can't be sure, and must refer to the book

\*\*\* \*\*

2C. Two-syllable place names, in which the second syllable is a generic term. Separate and capitalize the generic term for the jurisdiction. **Refer to GEOnet (GNS) to identify generic terms for place names, or do so using one's knowledge of the Chinese language.**

吳縣  
祁縣

Wu Xian  
Qi Xian

2D. Place names consisting of more than two syllables. Separate and capitalize a generic term for the jurisdiction. **Refer to GEOnet (GNS) to identify generic terms for place names, or do so using one's knowledge of the Chinese language.**

安徽省  
廣州市  
高雄市  
寶山區  
鹿港鎮  
翠亨村  
商丘地區  
甘南藏族自治州

Anhui Sheng  
Guangzhou Shi  
Gaoxiong Shi  
Baoshan Qu  
Lugang Zhen  
Cuiheng Cun  
Shangqiu Diqu  
Gannan Zangzu Zizhizhou

2E. Obsolete terms for administrative units are romanized in the same manner as the names of contemporary places.

福寧州  
昌平州

Funing Zhou  
Changping Zhou

|     |            |
|-----|------------|
| 錦州府 | Jinzhou Fu |
| 安順府 | Anshun Fu  |

2F. Names of non-Chinese jurisdictions are romanized in the same manner as the names of Chinese jurisdictions.

|     |             |
|-----|-------------|
| 加州  | Jia Zhou    |
| 紐約市 | Niuyue Shi  |
| 亞洲  | Ya Zhou     |
| 東南亞 | Dong nan Ya |

2G. Terms for archaeological sites, bridges, and other constructions of geographic extent are capitalized and separated from the names themselves. Individual syllables of multi-syllable generic terms are connected together.

***NOTE: PROPOSED CHANGE: change the second sentence; the highlighted examples have been changed to conform.***

Individual syllables of multi-syllable generic terms are connected together, as are the syllables of the names of a jurisdiction or geographic feature that are included within the term.

**Refer to GEOnet (GNS) to identify generic terms for place names, or do so using one's knowledge of the Chinese language. Place names should be systematically romanized in descriptive strings. Please note that the romanization in headings may vary from systematic form. For example, 黃壁庄水庫 is systematically romanized as Huangbi Zhuang Shuiku, but the subject heading has been established as Huangbizhuang Dam (China), based on the form Huangbizhuang Shuiku, which is recommended by GEOnet.**

|        |                          |
|--------|--------------------------|
| 瀘州長江大橋 | Luzhou Changjiang Daqiao |
| 黃壁庄水庫  | Huangbizhuang Shuiku     |
| 京杭運河   | Jing Hang Yunhe          |

2H. Names of buildings and other constructions of less than geographic extent. Syllables are separated and not capitalized, except for proper nouns.

|     |              |
|-----|--------------|
| 黃鶴樓 | Huang he lou |
| 聖果寺 | Sheng guo si |

2I. Names of continents and regions. Generic terms are separated and capitalized in the names of continents and regions. Distinguish when a term refers to a region, and when it refers to direction or position.

|     |                                                    |
|-----|----------------------------------------------------|
| 亞洲  | Ya Zhou                                            |
| 東南亞 | Dong nan Ya                                        |
| 北美洲 | Bei Mei Zhou                                       |
| 東北  | dong bei (when referring to direction or position) |

But:  
東北 Dongbei (when referring to the particular area formerly known as Manchuria)

- 2J. Personal names appearing as part of geographic names are romanized in the same manner as all other personal names.

**NOTE: PROPOSED CHANGE:** *change Section 2J to read as follows; change the example, and add two others:*

**The syllables of personal names that appear within geographic names are connected together. The generic term for the jurisdiction or geographic feature is separated. This rule is an exception to Section 1E.**

|      |                 |
|------|-----------------|
| 张自忠路 | Zhangzizhong Lu |
| 左权县  | Zuoquan Xian    |
| 鲁迅公园 | Luxun Gongyuan  |

3. Join together transliterations of two or more characters comprising the names of racial, linguistic, or tribal groupings of mankind. Join the term zu (for tribe or people) to a name only in proper names of places.

|       |                      |
|-------|----------------------|
| 基督徒   | Jidu tu              |
| 桐城派   | Tongcheng pai        |
| 毛南族   | Maonan zu            |
| 美国人   | Meiguo ren           |
| 客家话   | Kejia hua            |
| 苗族风情录 | Miao zu feng qing lu |

But:  
德宏傣族景颇族自治州 Dehong Daizu Jingpozu Zizhizhou

4. Add an apostrophe before joined syllables that begin with a vowel in cases of ambiguity. For example:

|     |                                                        |
|-----|--------------------------------------------------------|
| 長安市 | Chang'an Shi <i>to distinguish it from Changan Shi</i> |
| 延安市 | Yan'an Shi <i>to distinguish it from Yanan Shi</i>     |

|     |                                               |
|-----|-----------------------------------------------|
| 张章昂 | Zhang Zhang'ang <i>to distinguish it from</i> |
| 张占钢 | Zhang Zhangang                                |

|     |                                            |
|-----|--------------------------------------------|
| 劉正安 | Liu Zheng'an <i>to distinguish it from</i> |
| 刘镇干 | Liu Zhengan                                |

|     |                                            |
|-----|--------------------------------------------|
| 王健安 | Wang Jian'an <i>to distinguish it from</i> |
| 王佳南 | Wang Jianan                                |

But:  
雲谷老人

Yungulaoren (*not* Yun'gulaoren)
