**Federal Supply Schedule 78 I A
Athletic and Recreational Equipment, Toys, and Preschool Aids**

**TODDLER OASIS
FIVE-IN-ONE FUN!**

This activity island combines some of a toddler's favorite activities: a mirror to play peek-a-boo, beads to touch and turn, objects to grasp that slide and move, and a picture story wheel. These features help develop eye/hand coordination and fine motor skills. This compact unit only occupies 26" x 20" of space, yet can entertain up to four toddlers. The Toddler Oasis is self-contained—no loose pieces to end up in little mouths. All edges are rounded and cushioned. No clutter. No mess. No worry. Easy to clean, laminated surfaces. Arrives fully assembled.

**Federal Supply Schedule 49 I B
Automotive/Truck Maintenance &
Repair Shop Equipment**

**THE MIGHTY MOVER
AUTO DOLLY**

Are you still moving dead vehicles with a floor jack? Use the Mighty Mover. The Mighty Mover is essential equipment for all vehicle maintenance facilities, training facilities, fleet maintenance, body shops, and transmission facilities. Free up valuable lifts in shops and create mobility in disabled vehicles with the Mighty Mover.

The Mighty Mover has been tested and approved by Lackland Air Force Base and Luke Air Force Base under MEEP (Military Equipment Evaluation Program).

The Mighty Mover has a weight capacity of 4,800 pounds and is easy to install.

There is nothing to bolt on. Easily adjusts to width of vehicle up to 60 inches. (Two Mighty Movers would be needed to move a vehicle with all four wheels off.)

Digital Battery Testers and Vehicle Computer System Diagnostics

**KAL EQUIPMENT BY ACTRON – PROFESSIONAL AUTOMOTIVE
DIAGNOSTIC EQUIPMENT**

Actron Manufacturing has introduced a low-cost digital battery tester that will determine the internal battery condition in seconds. The Kal-Equip Model KM4500 Digital Battery Tester will take the guesswork out of battery diagnosis.

Features & Benefits:

- Quick test saves hours of charging.
- 2 line X 16 character LCD display.
- Easy-to-use three-button keypad control.
- Microprocessor speed and accuracy.
- Heavy duty style battery cables.
- Tester will indicate incorrect hook-up.
- Tests are temperature compensated.
- Backed by a three-year warranty.
- Made in the U.S.A.

ABLOY® MAXIMUM SECURITY PADLOCKS DEMAND THE BEST TO SURVIVE THE WORST

Heat. Ice. Snow. Mud. Storms. Burglars. Extreme conditions call for extreme measures. ABLOY® Maximum Security Padlocks are the choice when looking for superior security performance in extreme environmental conditions. ABLOY® offers a complete range of high security padlocks that are designed to protect against the various forms of corrosion and deterioration encountered in inclement environments and harsh operational use.

The ABLOY® detainer disc cylinder has no spring-loaded parts, which in other types of mechanisms can cause malfunction through wear, dirt, moisture, corrosion and freezing. The Hardened Boron Steel Shackle along with the Heel and Toe Locking of the Stainless Steel Ball Bearings provides optimum resistance against physical attack. These products are designed and manufactured not only to provide high levels of security, but also to be reliable and user-friendly. All ABLOY® products go through very careful quality control before shipment to the customer and are ISO-9001 Quality.

Whether ABLOY® padlocks are used for industrial machinery, sheds, truck doors, security gates, or dozens of other applications, they are designed to give an extra measure of protection in today's security minded world.

Introducing a New Product under Multiple Award Schedule 62 II
Energy Systems, Energy Saving Lighting Products, and Specialty Lighting

ECOLINX — PROMOTING THE ENVIRONMENT

SolarVerter® line of portable, personal solar panels are compact, easy-to-use panels that come in a range of power output capacities from 4 volts to 17.5 volts. These solar panels can be used for powering small electronic devices such as radios and cassette players, charging rechargeable batteries from AAA to D sizes, powering cell phones and recharging their batteries, and trickle charging 12-volt marine, auto and RV batteries.

SolarVerter® panels can be used singly, or multiple panels can be connected to increase voltage and/or current output for the requirements of many electronic devices. Jumper cord and adapter tips permit reversal of polarity and connection to virtually any commonly sized DC jack. Both parallel and series cords, which are used to interconnect panels for volt/current multiplication, are optional accessories, as is a patented DC jack adapter. This adapter allows a solar panel to be connected to a device lacking its own DC jack by creating one via the device's battery compartment; this adapter also permits rechargeable batteries to be charged without having to remove them from the device or purchase a separate unit for this purpose. An optional 12-foot extension cord offers the ability to remotely power a device connected to a solar panel – for example, the device is indoors and the panel is mounted outside.

Trophies and Awards, Presentation & Promotional Materials, Brief Cases and Carrying Cases**

ECOLINX — PROMOTING THE ENVIRONMENT

Both the private and public sectors are now keenly aware of the world's various environmental problems, and many organizations are making buying decisions with the environment in mind. EcoLinx manufactures a unique line of promotional/advertising specialty products made from recycled materials and natural materials obtained from sustainable sources in the rainforest. These products are particularly unusual in an industry notorious for its "throw-away" items. EcoLinx products can be imprinted with a corporate or organizational logo.

TAGUA CLOCKS

These Tagua products are made from the ivory-like nuts of the Tagua Palm. Popularly known as "Vegetable Ivory," Tagua is harvested by indigenous peoples in the rainforests of Ecuador and Colombia, as part of an economic initiative to help protect endangered South American rainforests.

Schedule 72 VII A
Recycling Collection Containers and Specialty Waste Receptacles

**THE TRASH BAG POPPER TURNS A PLASTIC BAG
INTO A TRASH CAN!**

The Trash Bag Popper is made of a space-age plastic that is inserted into a 30+ gallon trash bag. Once inserted, the Trash Bag Popper expands the bag to its full capacity, ready to be filled with trash and refuse. Since the Bag Popper is on the inside of the trash bag, it limits tears and punctures while filling, and operates to maintain the bag opening for refuse to be easily inserted.

Effective for household, yard, recycling, and environmental uses!

Once the trash bag is full, simply remove the Trash Bag Popper and tie the bag. It is completely reusable and will last for years.

The Trash Bag Popper is manufactured in the USA with recycled materials, and is shipped in a convenient 15-unit display shipper box, complete with a full-color explanatory display.

MILITARY FOOD CARTS

New ideas in an old business!

The Carriage Works, Inc. has developed a new concept for the traditional military food program.

Mobile food carts are a fairly recent entry into the military food service arena. Savvy operators are using mobile food carts to entice potential customers by bringing the food to them. Food carts are completely mobile and can be stocked in the cafeteria and taken on elevators to different floors.

These mobile food carts solve the problems associated with old style carts. Bright color schemes and exciting graphics are incorporated with interchangeable logos and menu panels, which allow one cart to be used for different programs.

MULTI-WASH DISINFECTANTS

Multi-Wash Disinfectants are Iodophor based Tuberculocidal disinfectant cleaners for hard surface application. Not only are these disinfectants infection-control strength Tuberculocidal, but also Virucidal, Germicidal, Bactericidal, Fungicidal, and Pseudomonacidal. They are very easy to use - just spray and wipe.

The ready to use disinfectant mix is packaged in three sizes. The first is a 2 oz. Spray, which is great to carry along with you for immediate protection wherever you go, or it fits nicely into any first aid kit. The other two sizes are 16 oz. and a gallon size. Both come with a trigger sprayer for easy cleaning of hard surfaces such as countertops, tables, bathroom fixtures, gas masks, and more. Finally, the concentrate form is also packaged in a 1 oz. dispensing pump for easy mixing. The gallon of concentrate will make 128 gallons of infection-control strength disinfectant at just pennies a gallon.
