INCIDENT MANAGEMENT SITUATION REPORT
THURSDAY, AUGUST 17, 2000 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL V

## CURRENT SITUATION:

Thirteen new large fires were reported, including five in the Northern Rockies Area and three in the Eastern Great Basin Area. Containment was reached on 12 fires, three of which were in Nevada. Total acres burned this year has now topped five million. Initial attack of new lightning starts was moderate to heavy in the Great Basin and California. Winds are forecast to increase in the western portion of the Great Basin today, but lightning activity should be restricted to the southern part of the country. The National Interagency Coordination Center continues to process numerous orders for aircraft, crews, equipment and overhead. Very high to extreme fire indices have been reported in all 11 western states, plus Texas and North Dakota.

## NORTHERN ROCKIES AREA LARGE FIRES:

An Area Command Team (Edrington) is assigned to manage the large fires in the Hamilton area. An Area Command Team (Mann) is assigned to manage the large fires in southwest Montana. An Area Command Team (Meuchel) is assigned to manage the large fires in central Montana. A Type I Incident Management Team (Wands) is assigned to manage the large fires in northwest Montana. Priorities are being established by the Northern Rockies MultiAgency Coordinating Group based on information submitted via Wildfire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

BLODGETT TRAILHEAD, Bitterroot National Forest. A Type I Incident Management Team (Gage) is assigned. This fire is three miles northwest of Hamilton, MT. The fire is spreading downslope into the upper portions of the Sheafman Creek drainage. It is also moving up the Canyon Creek drainage. Fire activity is more vigorous above 6000 feet elevation. Approximately 900 structures are still threatened.

VALLEY COMPLEX, Bitterroot National Forest. Two Type I Incident Management Teams (Frye and Myer) are assigned. Myer's team will manage the north end of the complex as the Skalkaho Complex beginning today. These fires are seven miles south of Darby, MT. One cabin in Little Sleeping Child area has been confirmed destroyed. Action is focusing on structure protection for more than one thousand residences in the Sleeping Child, Little Sleeping Child, East Fork, Springer, Bonanza, West Fork, Hughes Creek and Lost Trail Pass areas.

WILDERNESS COMPLEX, Bitterroot National Forest. A Type II Incident Management Team (Cook) is assigned. The complex consists of 20 fires in the Selway-Bitterroot and Frank Church River of No Return Wildernesses, 40 miles southwest of Hamilton, MT. Large fires included in this complex include the Hamilton, Lonely, Fitz, Thirty, Echo and Gabe. An inversion limited fire growth in the morning but activity picked up once the inversion lifted in the afternoon.

UPPER NINEMILE COMPLEX, Lolo National Forest. A Type I Incident

Management Team (Bennett) is assigned. The Army's 20th Engineers Battalion from Ft. Hood, Texas, commanded by LTC Shumway, is assigned. These fires are burning 25 miles northwest of Missoula, MT. Crews and equipment were removed from one division due to intense fire behavior. Progress continues on the southeast flank of the Ninemile fire where the Ninemile Valley is threatened. The Alpine fire is not currently staffed due to hazardous terrain and shifting winds. The South Fork Nemote \#4 fire has escaped containment lines on the southeast corner.

RYAN GULCH, Southwestern Land Office, Montana Department of Natural Resources and Conservation. A Type I Incident Management Team (Melton) is assigned. This fire is 15 miles east of Clinton, MT. Winds have moderated, allowing crews to make good progress constructing fireline around slopovers on the northwest and northeast corners of the fire. A burnout operation on the northeast part of the fire is underway.

THOMPSON FLAT COMPLEX, Lolo National Forest. A Type II Incident Management Team (Hoff) is assigned. This is a complex of six fires in the vicinity of Superior, MT. Crews are progressing with fireline construction on the east perimeter of the Thompson Flat fire. Fireline construction and burnout operations continue near the Trout Creek residences on the Landowner fire. Four residences and 15 outbuildings are threatened.

CLEAR CREEK DIVIDE COMPLEX, Flathead Agency, BIA. A Type I Incident Management Team (MacGregor) is assigned. This complex, 60 miles northwest of Missoula, consists of the Clear Creek, Vanderburg, Siegel and Magpie fires. Helicopter bucket work is supporting a burnout operation on the east side of the Vanderburg. Evacuation plans are in place for the communities of Magpie Creek, Revais Creek and Dixon. Resources from this fire are providing initial attack action on the nearby Schley fire.

MONTURE/SPREAD RIDGE, Lolo National Forest. A Type I Incident Management Team (Waterbury) is assigned. The fires are 15 miles east of Seeley Lake, MT. Both fires continue to spread under current weather conditions. The Monture fire is threatening structures in the Bob Marshall Wilderness as it moves north. The Spread fire has crossed the Falls Creek drainage and is running toward the northeast.

CROOKED, Clearwater National Forest. A Type I Incident Management Team (Hefner) is assigned. The fire is 50 miles southwest of Missoula, MT, near Lolo Pass. The estimated containment date has been postponed due to extremely difficult terrain and fuels.

SCHLEY, Flathead Agency, BIA. This human-caused fire was started on 8/15 near the town of Evaro, MT. No structures are threatened.

MUSSIGBROD COMPLEX, Beaverhead-Deerlodge National Forest. A Type II Incident Management Team (Swope) is assigned. This complex includes the Mussigbrod and Maynard fires, which are 12 miles northwest of Wisdom, MT. Crews were forced off part of the fireline for the second day in a row due to extremely active burning, and 30 chains of fireline were lost. Good progress has been made on other parts of the fireline. Poor visibility is deterring accurate mapping.

MIDDLE FORK COMPLEX, Beaverhead-Deerlodge National Forest. A Type I Incident Management Team (Carvelho) is assigned. The complex consists of
the Falls Creek, Cougar Creek/Coyote Springs, Skalkaho Pass, Lick Creek and Copper Creek fires, 30 miles southwest of Philipsburg, MT. Fire behavior has been observed to be primarily on the ground with occasional torching. Poor visibility due to smoke has limited helicopter water bucket support.

JUDITH COMPLEX, Lewis and Clark National Forest. A Type II Incident Management Team (Szczepanik) is assigned. This complex consists of the Studhorse, Lost Fork and High Springs fires, which are 25 miles southwest of Stanford, MT. Threatened resources include timber, a watershed and endangered species habitat. No new information was received.

BOULDER COMPLEX, Central Land Office, Montana Department of Natural Resources and Conservation. A Type I Incident Management Team (Humphrey) is assigned. This complex, three miles northeast of Basin, MT, consists of the Boulder Hill and High Ore Road fires. Little fire activity has been noted. Due to topography, heavy duff and roots, complete containment of a portion of the fireline will not be possible until significant moisture is received.

CANYON FERRY COMPLEX, Helena National Forest. This complex, located 12 miles north of Helena, MT, consists of the Bucksnort and Cave Gulch fires. Fuels within the perimeter have been burning actively throughout the day. Some unburned fuel still exists near the fireline in two divisions.

BURNT FLATS, Clearwater area, Idaho State Department of Lands. A Type II Incident Management Team (Ostman) is assigned. The fire is three miles from Whitebird, ID. The fire continues to move east through timber and brush. Short crown runs, torching and mid-range spotting have been observed. The fire is threatening firelines in Jimmie Creek and Free Use Roads. Beyond these firelines are an electronic site and the town of Grangeville.

BEAVER CREEK, Gallatin National Forest. A Type II Incident Management Team (Duke) is assigned. This fire is south of Big Sky, MT. The main fire activity has consisted of some torching and spotting on the east perimeter. Crews are anchoring the south end of the fire to Boat Mountain and suppressing spot fires in Carrot and Sage Basins. A morning inversion delayed aerial reconnaissance.

STONE YOUNG, Kootenai National Forest. A Type II Incident Management Team (Colla) is assigned. The complex consists of the Young, Lydia, Stone Hill and Cliff Point fires near Eureka, MT. Threat is to 162 structures in the community of Pinkham Creek, which is north of the fires.

KOOTENAI COMPLEX, Kootenai National Forest. A Type II Incident Management Team (Cowin) is assigned. This complex consists of 34 fires that are 20 miles northwest of Libby, MT. Nine more fires were staffed yesterday. At least two new starts have been added to the complex. Structure protection plans and evacuation plans are being made for the approximately 100 buildings which are threatened.

TROY SOUTH, Kootenai National Forest. A Type II Incident Management Team (Berndt) is assigned. This complex of 41 fires is near Troy, MT. Five of the fires are high priority due to threats to a municipal watershed and structures in the city of Troy. A structure protection plan is being developed. Difficult access has been hindering effective reconnaissance
and suppression efforts.
ELK MOUNTAIN, Northwestern Land Office, Montana Department of Natural Resources and Conservation. A Type II Incident Management Team (Gauger) is assigned. This fire is 30 miles east of Libby, MT. Crews are working to contain spots on the east side of the fire. Patrol and holding of existing fireline continues.

NORTHWEST LAND OFFICE (NWLO) IA COMPLEX, Northwestern Land Office, Montana Department of Natural Resources and Conservation. These fires are all within 45 miles of Kalispell, MT. The total number of fires in the complex has been reduced to 18 due to containment being achieved on some. Progress is being made on the Bald Hill and Metcalf fires, including containment of a ten acre slopover on the north end of the Bald Hill fire.

CHIPMUNK, Flathead National Forest. The fire is burning in spruce, subalpine fir and brush 45 miles southeast of Kalispell, MT. Firefighters are locating strategic points and beginning structure protection planning. The fire is observed to have a rate of spread of one to two miles per hour with some torching.

GREEN MOUNTAIN, Kootenai National Forest. This fire started on 8/11, five miles southeast of Noxon, MT. A spot fire on the east side has been the priority. Strong winds are challenging containment efforts.

MALONEY CREEK, Clearwater Area, Idaho State Department of Lands. A Type II Incident Management Team (Specht) is assigned. This fire is 12 miles southeast of Craigmont, ID. Strong southwest winds have pushed the fire up side canyons in Eagle and Deer Creeks. The fire continues to burn underneath the powerline which is part of the regional grid. Four additional outbuildings have been destroyed.

THREE BEARS, Nez Perce National Forest. A Type II Incident Management Team (Cones) is assigned. This fire is on both sides of the Salmon River, 29 miles from Elk City, ID. The fire is currently burning actively in Big Squaw Creek, Rattlesnake Creek and Bargamin Creek. Dry fuels and rolling material on steep terrain are causing rapid downhill spread. Fire spread on the north side of the Salmon River is estimated at $3 / 4$ to one mile per day.

LEWIS CREEK II, Flathead National Forest. This fire is burning in the Bob Marshall Wilderness 50 miles southeast of Kalispell, MT. Two trails in the immediate area have been closed. A historic lookout is threatened and has been wrapped with fire shelter material.

SPRUCE COMPLEX, Yellowstone National Park. This is a complex of 11 fires in Yellowstone National Park. The Thumb, Star, Fred, Boundary and Lost fires are staffed. Cabin protection is occurring along the south boundary of the park in anticipation of the Enos fire's approach. The park road has been temporarily closed between West Thumb and Flagg Ranch at the south entrance.

NORTHWEST PEAKS COMPLEX, Idaho Panhandle National Forest. The fires are burning in subalpine fir and spruce seven miles southeast of Eastport, ID. Single and multiple group torching and 20 to 40 acre runs have been noted. Fuels are continuous from the fire north to the Canadian border.
Threatened resources include wildlife habitat, timber production and
scenic areas.

MAUDLOW/TOSTON, Central Land Office, Montana Department of Natural Resources and Conservation. These fires are 25 miles north of Belgrade, MT. Approximately 20 ranches have been evacuated from Maudlow through three miles south. Two outbuildings in Maudlow have been destroyed.

MCDONALD II, Lewis and Clark National Forest. The fire is 36 miles southwest of Choteau, MT. No new information was received.

HIDDEN CREEK, Clearwater National Forest. The fire is 12 miles southeast of Powell, ID. The north perimeter has become inactive and the fire is backing toward Big Sand Creek. Occasional torching has been noted on the east and south perimeters. The fire is being monitored by US Forest Service personnel.

HELEN CREEK, Flathead National Forest. This fire is 22 miles south of Spotted Bear, MT. Threatened resources are three administrative structures and one pack bridge. The fire is being monitored by US Forest Service personnel.

FROG LAKE, Clearwater National Forest. The fire is 16 miles southeast of Powell, ID. The fire is being monitored by US Forest Service personnel.

ELIZABETH, Clearwater National Forest. The fire is 33 miles northeast of Pierce, ID. The fire is being monitored by US Forest Service personnel.

SNOW CREEK, Clearwater National Forest. The fire is 30 miles northeast of Pierce, ID. The fire is being monitored by US Forest Service personnel.

## EASTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildfire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

RANKIN, Salmon-Challis National Forest. A Type I Incident Management Team (Stam) is assigned. This fire is 40 miles west of Challis, ID. Extremely dry fuels and low humidities continue to hamper containment efforts.

DRY FORK II, Vernal Field Office, BLM. The fire is burning in pinyon pine, juniper, aspen, fir and lodgepole pine 20 miles northwest of Vernal, UT. No new information was reported.

SWAINS, South Central State of Utah. A Type II Incident Management Team (Burdick) is assigned. This human-caused fire is burning east of Holden, UT. Fire activity includes interior torching and some minor runs. Thunderstorms moved through the area causing swirling winds. A significant amount of rain fell on parts of the fire.

BOULDER, Bridger-Teton National Forest. A Type II Incident Management Team (Zimmerman) is assigned. This fire is 15 miles east of Jackson, WY, in the Gros Ventre Wilderness. Active burning and torching has been observed on parts of the fire. Sprinkler systems at developed sites are operational.

TRAIL CREEK, Boise National Forest. This fire is five miles south of Atlanta, ID. The fire is actively spreading to the north and east in heavy bug killed spruce and fir with uphill runs and spotting up to one-half mile ahead. A structural protection group has been formed and is developing a contingency plan for Atlanta. Crews supported by helicopters and air tankers are making good progress on the north and west flanks.

NICK, Payette National Forest. A Type II Incident Management Team (Saleen) is assigned. This fire is burning in subalpine fir 12 miles east of McCall, ID. Firefighters continue to develop structure protection zones around Krassel work station and the Zena Ranch. One private individual was evacuated by air.

CLEAR CREEK, Salmon-Challis National Forest. A Type I Incident Management Team (Hart) is assigned. A Type I Incident Management Team (Hutchinson) has been assigned to transition with Hart's team. The fire is 12 miles west of Salmon, ID. The 3rd Battalion 5th Marines from Camp Pendleton, California, commanded by Col. Callihan, is assigned. The arrival of several large pieces of logging equipment has accelerated fuel reduction efforts along the Salmon River Road. This is being done to support preparation of the contingency fireline above the town of Salmon and its watershed.

BURGDORF JUNCTION, Payette National Forest. A Type I Incident Management Team (Dague) is assigned. The 3rd Battalion 16th Field Artillery from Ft. Hood, Texas, commanded by LTC Darryl Williams, is assigned. The fire is 23 miles north of McCall, ID. Primary fire spread is out of the Rabbit Creek drainage toward Republican Flats. Helicopter water drops have been used to slow fire spread on the northwest and northeast perimeters.

ELK VALLEY, Caribou National Forest. This lightning-caused fire is 20 miles northeast of Montpelier, ID. Firefighters are making excellent containment progress. Crews continue to reinforce firelines and mopup.

GLADE, Grand Teton National Park. This lightning-caused fire is 12 miles north of Colter Bay, WY. Fire behavior is moderate to extreme. U.S. Highway 89 has been closed from Lizard Creek Campground to Grant Village in Yellowstone National Park.

BLIND, Bridger-Teton National Forest. The fire is southeast of Alpine, WY. Dry fuels and windy conditions continue to cause extreme fire behavior, including crowing and long range spotting.

FONTENELLE, Bridger-Teton National Forest. This lightning-caused fire is northeast of Cokeville, WY. Extreme fire behavior continues with long range spotting and torching. Current threats are to private and public lands and to many natural gas wells.

HALF MOON, Bridger-Teton National Forest. A Type II Incident Management Team (Carr) is assigned. This fire is near Pinedale, wY. Firefighters are making good progress toward containment goals. Minimal perimeter growth has been noted.

TRIANGLE, Bridger-Teton National Forest. A Type II Incident Management Team (Carr) is assigned. This fire is burning near Pinedale, WY. This is the last report for this fire. It will be combined with the Half Moon fire today and be managed as the Half Moon Complex.

LOOKOUT POINT, Payette National Forest. The fire is 51 miles east of McCall, ID. Structure protection at Taylor Ranch and Cabin Creek continues to be provided by 12 smokejumpers. This fire has burned into the Diamond Peak fire. Both will be reported as the Diamond Peak fire as of today.

DIAMOND PEAK, Payette National Forest. This lightning-caused fire is 42 miles northeast of McCall, ID. Fire activity has moderated with decreased winds.

MORSE, Salmon-Challis National Forest. A Type II Incident Management Team (Suwyn) is assigned. The fire is burning in grass, sagebrush and douglas
fir 12 miles southeast of Ellis, ID. No new information was reported.
ENOS, Bridger-Teton National Forest. A Type II Incident Management Team (Zimmerman) is assigned. This fire is burning in the Teton Wilderness 33 miles northeast of Jackson, WY. Fire activity continues to increase as evidenced by a substantial convection column.

MORAN, Grand Teton National Park. This fire is burning in the Teton Range, west of Jackson Lake at Moran Canyon. The fire continues to burn with great intensity in very heavy fuels. A major concern is ash fallout at Colter Bay. Firefighters are attempting to secure the southern flank.

WILCOX, Grand Teton National Park. The fire is five miles northwest of Colter Bay, WY. Fire activity is extreme, with significant runs, torching and spotting up to one-quarter mile. It is burning east and north along the west shore of Jackson Lake. The fire is being monitored by air and water.

HETCHMAN, Targhee National Forest. The fire is 30 miles east of Ashton, ID. It is actively burning in the Jedediah Smith Wilderness Area. The fire is being monitored by air.

FLOSSIE COMPLEX, Payette National Forest. This fire is 50 miles northeast of McCall, ID. Fire behavior has been calm due to light winds.

NORTH FORK WILDERNESS COMPLEX, Salmon-Challis National Forest. The ten fires in this complex, including the Butts and Filly fires, are 40 miles northwest of Salmon, ID. The Salmon River Lodge burnout operations have been successfully completed.

SOUTH ZONE WILDERNESS COMPLEX, Salmon-Challis National Forest. This fire is 50 miles northwest of Challis, ID. These fires are being monitored for fire growth and behavior. The fires are very active, even at higher elevations.

INDIAN/PROSPECT, Payette National Forest. The fire is 33 miles east of McCall, ID.

NORTH SHELLROCK, Payette National Forest. The fire is 55 miles east of McCall, ID. It is currently being monitored from the air.

SOUTH SHELLROCK, Payette National Forest. The fire is burning in the Frank Church River of No Return Wilderness Area 55 miles east of McCall, ID. It is currently being monitored from the air.

CHOURNOS, Northwest Utah State. This fire is 30 miles west of Ogden, UT. No new information was reported.

WESTERN GREAT BASIN AREA LARGE FIRES:
Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildfire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

SOUTH WILLOW, Winnemucca Field Office, BLM. The fire is burning in sagebrush, grass and juniper 60 miles west of Winnemucca, NV. Firefighters have been able to hold all the firelines.

PARSNIP, Ely Field Office, BLM. This fire is burning in sagebrush, dense pinyon pine and juniper 30 miles northeast of Caliente, NV in a wilderness study area. The fire received light precipitation. All resources have been demobilized.

PHILLIPS RANCH, Humboldt-Toiyabe National Forest. The fire is 50 miles southeast of Ely, NV. USFS personnel are monitoring the fire. The fire received light precipitation.

MAMMOTH, Humboldt-Toiyabe National Forest. The fire is burning in white fir 75 miles southwest of Ely, NV. It started on 8/2 in the Grant Range Wilderness Area. On $8 / 11$ the fire grew to its present size due to strong gusty winds. The fire has not been active due to some light
precipitation.
CHERRY, Ely Field Office, BLM. This fire is 30 miles northwest of Ely, NV. Due to its inaccessibility, the fire is being monitored by BLM personnel. No new information was received.

LITTLE WATER, Humboldt National Forest. This fire is 60 miles southeast of Elko, NV. The fire was not active due to rain and cloud cover.

## ROCKY MOUNTAIN AREA LARGE FIRES:

HELL'S CANYON, Rawlins District, BLM. A Type II Incident Management Team (Hartman) is assigned. Cooler weather is helping containment efforts.

KATE'S BASIN COMPLEX, Wind River Agency, BIA. A Type I Incident Management Team (Lohrey) is assigned. This complex includes the Kate's Basin and the Blondie \#2 fires, eight miles southwest of Thermopolis, WY. A spike camp has been established on the west side of the fire which will increase crew efficiency.

FLAGPOLE MOUNTAIN, South Dakota State Forestry. A Type II Incident Management Team (Gardner) is assigned. This fire is near the town of Hot Springs, SD. Firefighters are making good progress towards containment goals.

BURRO FLATS, Shoshone National Forest. The fire is 12 miles south of Dubois, WY. It is burning in the Fitzpatrick Wilderness at high elevations. The fire is being held in check with hose lays and helicopter water drops. A major wilderness trail runs through the fire area. It is closed to public use.

SHEEP MOUNTAIN, Rock Springs District, BLM. A Type II Incident Management Team (Carlson) is assigned. This lightning-caused fire is near Rock Springs, WY. Firefighters are making good progress on firelines on the north and south ends of the fire.

HOGBACK, Craig Dispatch Center Counties. This fire is five miles south of Meeker, CO. No new information was received.

BLACKHALL, Rawlins District, BLM. A Type II Incident Management Team (Hartman) is assigned. Firefighters are making significant progress towards containment due to overcast skies, higher humidities and small
amounts of rain.
WOODS CANYON, Custer Dispatch Center Counties. The fire is 10 miles northwest of Hulett, WY. It is being staffed by Wyoming State and Crook County resources. No new information was received.

NORTHWEST AREA LARGE FIRES:
MILEPOST 244, Umatilla National Forest. A Type II Incident Management Team (Jackson) is assigned. The fire is burning in grass, brush and timber five miles southeast of Gibbon, OR. An inversion remained over the fire until early afternoon. Crews are constructing and holding firelines and conducting a burnout operation. Road closures are being planned to limit public access to the fire area.

FLAT CREEK, Wenatchee National Forest. This lightning-caused fire is 18 miles northwest of Stehekin, WA, in the Glacier Peak Wilderness. Monitoring by agency personnel from a viewpoint and by helicopter continues.

## SOUTHERN AREA LARGE FIRES:

POST OAK, Texas State Forest Service. This fire is burning in heavy oak, pinyon pine and juniper 30 miles west of Austin, TX. Two outbuildings have been destroyed. Low fuel moisture, spotting and torching are causing challenges to containment efforts. National Guard Blackhawk helicopters are assisting.

C \& R, Texas State Forest Service. The fire is 60 miles east of Waco. It is burning actively in pine, brush and grass. National Guard Chinooks have been doing water drops to assist suppression efforts.

OKS = Oklahoma State Division of Forestry

## OUTLOOK:

A dry southwest to west flow aloft will prevail over Washington, Oregon, Idaho and Montana. Further south, monsoon moisture will continue to bring a possibility of thunderstorms to the four corners states and to Nevada and Wyoming. Poor smoke dispersal will continue today, and as a result many valleys in the northern Rockies will have low visibility throughout the afternoon hours.

Winds will generally be southwest to west at 10 to 20 mph . In the western Great Basin, ridgetop winds will increase out of the southwest by late afternoon and gusts of 25 to 35 mph are possible.

High temperatures will range from the 80 's to the mid $90^{\prime}$ 's in most areas and up to 110 in the deserts of western Utah, northern Arizona and southern Nevada. Up to 115 degree temperatures will occur across the deserts of southern California and southwest Arizona. Afternoon relative humidities will range from the low teens to the 20's in most areas, except drier in the hottest deserts and valleys.

A fire weather watch is posted in the Florida panhandle for low relative humidities.
