

INCIDENT MANAGEMENT SITUATION REPORT
WEDNESDAY, AUGUST 2, 2000 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL V

CURRENT SITUATION:

Dry lightning and very heavy initial attack activity occurred in Arizona, southern New Mexico, southern California, Nevada and Utah. Many of the new starts are unstaffed. Seventeen new large fires were reported in the Western and Eastern Great Basin, Northern Rockies, Southern California, and Southern Areas. An Area Command Team was mobilized to Northern Rockies Area. One Type I Incident Management Team was mobilized to Nevada, one was mobilized to the Eastern Great Basin Area and one was reassigned within the Northern Rockies Area. Containment goals were reached on three large fires. Numerous aircraft, equipment, crew and overhead resource orders are being processed by the National Interagency Coordination Center. All eleven western states are reporting very high to extreme fire danger indices.

EASTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildfire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

LOGAN COMPLEX, Wasatch-Cache National Forest. A Type II Incident Management Team (Carr) is assigned. This complex is comprised of the High Point (600 acres) and the Millville 2 (160 acres) fires, both located near Logan, UT. The Millville is a new fire that was ignited on 7/31 near the town of Millville. Helicopters are doing bucket work to support the suppression effort.

OLDROYD COMPLEX, Fishlake National Forest. A Type I Incident Management Team (Hutchinson) is assigned. This complex includes the Oldroyd, Mona West, Broad, Mourning Dove and Yance fires near Richfield, UT. Significant fire spread has occurred on the Oldroyd and Mona West. Both fires are spotting and jumping containment lines. Residences in communities of Oak City, Mammoth, Silver Springs and Eureka are threatened. Structure protection plans have been developed.

WASATCH COMPLEX, Wasatch-Cache National Forest. A Type I Incident Management Team (Dague) is assigned. This complex consists of the Oak Hill, Iron Mine Lake, Cottonwood, East Vivian and Wallsburg fires. All are located southeast of Salt Lake City, UT. The Oak Hill and East Vivian fires are both threatening structures. The Oak Hill is crowning in brush and timber. Helicopter bucket work has slowed spread on the ridgetop. Numerous fingers and reburn potential on the East Vivian fire are a major concern.

EASTERN IDAHO COMPLEX, Upper Snake River District, Eastern Idaho Area, BLM. A Type I Incident Management Team (Humphrey) is assigned. This complex includes the following fires which have previously been reported separately: Coffee Point North, Flattop, Fisher Springs, Rattlesnake, Moonshine, Gentile Valley, Putnam, Tin Cup, Supon and West Fork. At least

11 new fires have been added to the complex, including the 120 acre Station Creek fire which temporarily forced the closure of Interstate 15, and the Camus Creek fire which burned 2000 acres. Two new fires remain unstaffed. The Moonshine fire has burned through retardant lines into extremely rugged terrain.

CLEAR CREEK, Salmon-Challis National Forest. Two Type I Incident Management Teams (Hart and Bateman) are assigned. The fire is 12 miles west of Salmon, ID. The fire has made a major acreage increase on the southern perimeter. Spotting is occurring up to 1.5 miles ahead. Poor humidity recovery and hot, dry conditions are deterring containment efforts. Structures are threatened.

BURGDORF JUNCTION, Payette National Forest. A Type I Incident Management Team (Vail) is assigned. The fire is 23 miles north of McCall, ID. The 3rd Battalion 16th Field Artillery from Ft. Hood, Texas, commanded by LTC Daryl Williams, has arrived and will begin field training today. The fire's growth has been minimal. Fire behavior is limited to isolated torching and short runs.

JOHN ALLEN, Dixie National Forest. The fire is burning in ponderosa pine, fir and heavy ground fuels ten miles northwest of Escalante, UT. Cooler temperatures and cloud cover for the second day in a row are helping crews to make good progress toward containment.

TWIN CREEK, Salmon-Challis National Forest. A Type I Incident Management Team (Stam) is assigned. This fire is 30 miles north of Salmon, ID near the Lost Trail Ski Area. Numerous new lightning-caused fire starts in the area are causing problems. Resistance to control is high. The new fires are threatening structures and the community of Sula, Montana. State Highway 93 has been closed at Lost Trail Pass. Construction of containment lines is impeded by steep country, heavy fuel loading and hot, dry weather.

BISMARCK, Salt Lake Field Office, BLM. A Type I Incident Management Team (Hefner) is assigned. This fire is burning in grass, sagebrush, pinyon pine and juniper 15 miles south of Fairfield, UT. The fire is moving toward the Juab/Utah county line. One seasonal structure is threatened. Hot, dry conditions are hampering suppression efforts.

BOULDER, Bridger-Teton National Forest. A Type II Incident Management Team (Zimmerman) is assigned. This fire is 15 miles east of Jackson, WY, in the Gros Ventre Wilderness. The fire has made a major run, exhibiting long range spotting. Approximately 200 residents and campers have been evacuated from the Granite Creek Road area.

BOX CANYON, Salt Lake District, BLM. The fire is 25 miles north of the Dugway Proving Grounds, UT. Three residences have been destroyed. Evacuations of several ranch buildings are underway and engines are protecting structures.

GARDEN CREEK, Vernal Field Office, BLM. The fire is 25 miles northeast of Vernal, UT. Ignited by lightning, this fire ran actively, pushed by shifting winds until sunset. The plan is for crews to protect structures and begin building fireline on the east side today.

NEBO CREEK, Uinta National Forest. This fire is burning in sagebrush,

pinyon pine and juniper near Birdseye, UT. A campground and ten outbuildings are threatened. The fire is driven by strong shifting winds and has great potential for growth.

NORTHERN ROCKIES AREA LARGE FIRES:

An Area Command Team (Edrington) is assigned to manage the large fires in western Montana. Priorities are being established by the Northern Rockies Multi-Agency Coordinating Group based on information submitted via Wildfire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

VALLEY COMPLEX, Bitterroot National Forest. A Type I Incident Management Team (Frye) is assigned. This is a complex of fires that were ignited by lightning south of Hamilton, MT. Highway 93 is closed between Connor and Sula, due to fires on both sides of the road. Evacuations have been ordered for residents in the Warm Springs, Dickson, Robbins Gulch and Rye Creek drainages.

CANYON FERRY COMPLEX, Helena National Forest. A Type I Incident Management Team (Waterbury) and a Type II Incident Management Team (Hoff) are assigned. This complex, located 12 miles north of Helena, MT, consists of the Bucksnot Fire and the Cave Gulch Fire. The fire remains active in Magpie Creek and upper Hellgate Gulch. Crews continue building fireline on the northwest perimeter. Abandoned mine shafts are posing a safety hazard to firefighters.

CROOKED, Clearwater National Forest. A Type II Incident Management Team (Johnson) is assigned. The fire is burning in logging slash 50 miles southwest of Missoula, MT. The fire has spotted over Rock Creek and is less than two miles from Lolo Pass. Threatened resources include wildlife habitat, private timber land, Forest Service plantations, historic trails and buildings near Lolo Pass.

COUGAR CREEK, Beaverhead-Deerlodge National Forest. A Type II Incident Management Team (Gauger) is assigned. The fire is 30 miles southwest of

Philipsburg, MT. Small runs along the ridges have been observed, but fire activity has moderated due to higher relative humidity and shade from the smoke of new fires.

UPPER MONTURE COMPLEX, Lolo National Forest. A Type I Incident Management Team (Bennett) is assigned. This complex is 34 miles northeast of Missoula. Problems include lack of road access to the fires, extremely dry fuels and intense fire behavior. This fire is being managed in conjunction with the Spread Ridge fire.

SPREAD RIDGE, Lolo National Forest. A Type II Incident Management Team (Specht) is assigned. This fire is 19 miles east of Seeley Lake, MT. Crews are clearing an indirect fireline in conjunction with the Upper Monture fire. The fire has burned actively until midnight. Thunderstorms have occurred in the fire area, along with scattered very light precipitation.

FORT HOWES COMPLEX, Miles City Field Office, BLM. A Type II Incident Management Team (Colla) is assigned. This complex consists of the Stag Butte fire, Taylor Butte fire and others south of Ashland, MT. Torching is still being observed.

WILDERNESS COMPLEX, Bitterroot National Forest. A Type II Incident Management Team (Cook) is assigned. This complex consists of numerous new lightning-caused starts in wilderness areas of the Bitterroot, south of Hamilton, MT.

MCDONALD II, Lewis and Clark National Forest. A Type II Incident Management Team (Doman) is assigned. The fire is 36 miles southwest of Choteau, MT. Observed fire behavior includes isolated torching, short runs and backing in downed logs and grass.

BLOOD, Lewiston Field Office, BLM. This fire is 20 miles northeast of Winnett, MT. The fire jumped a road and is moving north. Some rain was received later in the afternoon.

WILD HOG BUTTE, Miles City Field Office, BLM. This fire is 12 miles southwest of Fort Howes. After today this fire will be reported in the Fort Howes Complex. Retardant drops have been successful in slowing the fire's spread.

TOBIN, Miles City Field Office, BLM. A Type II Incident Management Team (Cowin) is assigned. This fire is 26 miles northwest of Broadus, MT. Crews are making progress toward containment.

DAILY, Miles City Field Office, BLM. This fire is five miles northwest of Ashland, MT. Dozers have completed fireline around most of the fire. Mopup will be time consuming due to a large number of snags.

WESTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildfire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

ARROWCREEK, Western Region, Nevada Division of Forestry. A Type I Incident Management Team (Melton) is assigned. This fire is on the southwest edge of Reno, NV. Numerous structures are threatened. Voluntary evacuations have taken place in the neighborhoods closest to the fire, where six to eight homes have received partial damage. The fire is also threatening the Arrowcreek Golf Course and a wilderness study area.

RED ROCK, Carson City Field Office, BLM. This fire is north of Stead, NV. The fire is burning actively toward the east in sagebrush, grass, pinyon pine and juniper. There is high potential for growth and a threat to structures. The terrain is inaccessible for engines.

ADOBE, Elko Field Office, BLM. The fire is burning in sagebrush and grass 21 miles north of Elko, NV. Two structures are threatened. Crews and engines are flanking the fire to protect the structures.

SOUTH CRICKET, Elko Field Office, BLM. A Type II Incident Management Team (Burdick) is assigned. This fire is 15 miles northeast of Wells, NV. Moderate activity is occurring on the northeast and southern sections of the fire. Firefighters are progressing with fireline construction and providing initial attack to new fires within 20 miles of the South Cricket fire.

GALENA HILL, Western Region, Nevada Division of Forestry. This fire is near Reno, NV. The fire exhibited extreme behavior as it spread in the hills southwest of Reno. Current threats are to a geothermal plant and communication towers.

COYOTE, Ely Field Office, BLM. A Type II Incident Management Team (Kearney) is assigned. This fire is burning 40 miles northeast of Pioche, NV. Very little fire activity has been observed in the past 24 hours and crews are making good progress with fireline construction and mopup of hot spots.

CHERRY, Ely Field Office, BLM. This fire, 30 miles northwest of Ely, NV, was contained on 7/19 but has spotted outside containment lines and grown 500 acres. A burnout operation will be taking place for the next two or

three days.

TWIN PEAK, Carson City Field Office, BLM. This lightning-ignited fire is 60 miles east of Fallon, NV. One crew is working to suppress the fire. Difficult terrain is hindering containment.

PHILLIPS RANCH, Humboldt-Toiyabe National Forest. This fire is burning in mixed conifer 50 miles southeast of Ely, NV. The fire continues to torch within the interior. Water drops by the helicopters have been very effective.

SOUTHWEST AREA LARGE FIRES:

PEAK, Tonto National Forest. A Type II Incident Management Team (Anderson) is assigned. The fire is burning in dense chaparral and mixed conifer six miles south of Globe, AZ. At least one electronic site has been burned over and the fire is threatening numerous other electronic sites and summer homes as well as a lookout tower, recreation areas and endangered species habitat. Residents of the summer homes and the lookout have been evacuated.

RIDGE, Fort Apache Agency. A Type II Incident Management Team (Leech) is assigned. This fire is four miles west of Carrizo, AZ. Fire activity has been minimal.

HONEY WELL, Navajo Area Office, BIA. This fire is 25 miles northwest of Window Rock, AZ. The fire is active within the interior and on the west flank. Crews are constructing fireline on the north and east sides.

GOLF, Coconino National Forest. The fire is in a remote area 20 miles east of Camp Verde, AZ. It was ignited on 7/21 by lightning. Fuels are ponderosa pine, pinyon pine and juniper. The fire is being monitored by USFS personnel. This will be the last report unless new information is received.

WALL, Albuquerque Field Office, BLM. The fire is burning in a remote portion of the El Malpais Wilderness 20 miles southwest of Grants, NM and is being monitored by BLM personnel. This will be the last report unless new information is received.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

PECHANGA, Riverside Ranger Unit, California Department of Forestry. Unified Command with a California Division of Forestry Team (Heil) and a U.S. Forest Service Type II Incident Management Team (Dietrich) is in effect. The fire is five miles east of Temecula, CA. Thunderstorm activity has pushed the fire across the western perimeter and caused the fire to double in size. Residences are immediately threatened.

MANTER, Sequoia National Forest. A Type I Incident Management Team (Studebaker) is assigned. This fire is 15 miles northeast of Kernville, CA. Crews have completed burnout operations on the eastern flank. The fire received heavy thunderstorms which decreased fire activity and allowed crews to make progress.

GOLDEN, Bakersfield District, BLM. A Type II Incident Management Team (Terwilleger) is assigned. This fire is burning in sagebrush and timber near Walker, CA. Thunderstorm winds have caused the fire to run to the south. Three historic structures, an old mill, timber and wildlife habitat are threatened. PLASKETT 2, Los Padres National Forest. A Type I Incident Management Team (Gage) is assigned. This fire is 25 miles north of Cambria, CA east of Highway 1. Mopup and rehabilitation projects are underway. Demobilization of excess resources is in progress.

ROCKY MOUNTAIN AREA LARGE FIRES:

DEAD HORSE, Casper District, BLM. A Type II Incident Management Team (Hartman) is assigned. This fire is burning in steep, rocky country eight miles south of Casper, WY. Lighter winds and higher humidities have allowed good progress. Most burning has occurred in interior islands of

grass, juniper, sagebrush and ponderosa pine.

MIDDLE ENOS, Worland District, BLM. A Type II Incident Management Team (Gardner) is assigned. This fire is burning in sagebrush, juniper and limber pine 15 miles south of Meeteetse, WY. The fire is active on the west flank and made a significant run. Crews are providing initial attack on new starts in the area.

WTS = West Texas Counties

OUTLOOK:

*** A FIRE WEATHER WATCH IS POSTED IN EASTERN MONTANA FOR STRONG WINDS AND LOW HUMIDITY ***

Hot and dry conditions will continue across much of the western United States with a slight chance of dry thunderstorms over Idaho, Montana and

Wyoming. Central portions of the western states will be hot and dry with a little more thunderstorm activity. In the southwest there will be a chance of showers along with the thunderstorms.

Temperatures will again reach the 90's to 105 across much of the west, with highs around 110 in the deserts of Arizona and Utah. Humidities will be in the single digits and teens. Winds will be decreasing in the northern areas but remain locally gusty, especially during the afternoon hours in Southern California. Gusts of 40 to 50 mph can be expected near thunderstorms.

The Sierra Nevada and southern California will have a slight chance of showers along with thunderstorms, mainly over higher terrain. Low clouds and fog will be common along the coast. Winds in the Sierra Nevada be southwest to northwest at 8 to 15 mph with gusts to 20 mph across the Tehachapi mountains. Ridgetop winds in southern California will be from the east to south at 8 to 16 mph.
