General Comment:public comment on federal register of 8/8/07 vol 72 #152 risk  
assessment forum

william p. wood executive director epa 2007-0680-0001

i need a paper copy so that i can comment more fully on this. i have no way to  
read 50 pages on the internet. i know this is vital to have public input on this  
issue

because no child should be used irrationally. i also believe the time to comment  
by the public should be 3 months. we do not need to rush here. we want to do  
this

right.
