

INCIDENT MANAGEMENT SITUATION REPORT  
 SUNDAY, JULY 21, 1996 - 0900 MDT  
 NATIONAL PREPAREDNESS LEVEL II

\*\*\* ALL FIREFIGHTERS HAVE THE RIGHT TO A SAFE ASSIGNMENT \*\*\*

CURRENT SITUATION: Large fire activity increased in the Rocky Mountain Area. The Eastern Great Basin, Northern California and Alaska Areas experienced moderate initial attack. Resource mobilization through NICC remained minimal.

Rocky Mountain Large Fires:

DISAPPOINTMENT, San Juan NF. This fire is burning in scrub oak and sage brush approximately 20 miles northwest of Durango, CO. Burnout operations were conducted to tie in with containment lines.

SQUAW CANYON, Montrose District, BLM. The fire is located about 15 miles west of Cortez, CO. The blaze made a 2.5 mile run through pinyon-juniper and sage brush in two hours yesterday. Current threats include Lowry Ruins, seven structures and a microwave tower. Structure protection measures have been instated on the north and east flanks. Steep terrain and low fuel moistures are hampering control efforts.

RAILROAD #2, Wind River Agency, BIA. This fire is burning in the Wind River Canyon, 12 miles south of Thermopolis, WY. Steep terrain has made line construction difficult. Mop-up using helicopter bucket drops continues.

TGU = Tehama-Glenn RU

Southwest Area Large Fires: Two fires are in a confinement suppression strategy totalling 19,736 acres.

Alaska Large Fires: Twenty-seven fires are in a non-suppression status totalling 321,091 acres.

OUTLOOK:

\*\*\* FIRE WEATHER WATCH IS POSTED FOR THE NORTHERN SACRAMENTO VALLEY OF CALIFORNIA AND SURROUNDING FOOTHILLS FOR MODERATE NORTH WINDS AND LOW RELATIVE HUMIDITIES \*\*\*

An upper level ridge of high pressure will build over the western United States and a thermal low is developing in California. The Northern Rockies may experience light showers and high temperatures in the 70's and 80's. Eastern Arizona, New Mexico and Colorado will have isolated thundershowers and temperatures in the 80's and 90's in the mountains reaching 120 degrees in the southwest deserts. The potential for initial attack and large fire activity continues as hot and dry conditions dominate the western United States.
