**RE: WOMEN'S WELLNESS BREAST HEALTH**

Dear Sir / Madam:

This is a **30-day** notification of a statement of nutritional support for a dietary supplement. The product name is **Andrew Lessman's Women's Wellness Breast Health**. The structure / function claims on all sizes and configurations of this product are identical. They are as follows:

**Andrew Lessman's WOMEN'S WELLNESS BREAST™ HEALTH** is designed to support the health of the delicate tissues of a woman's breast at all stages of life. This formula incorporates natural components that target breast tissue, along with powerful anti-oxidants that help to support these delicate cells. **Indole-3-Carbinol** is a major constituent of cruciferous vegetables and has been shown to support and maintain the health of the breast. Animal research shows that **Indole-3-Carbinol** may also help to maintain normal estrogen activity. **Sulforaphane** is important because it works by supporting and stimulating the body's production of its own powerful anti-oxidants, such as glutathione. **Green Tea**, with its myriad of health benefits, is the customary beverage consumed in the healthy Asian diet and contains powerful anti-oxidants called polyphenols to support the health of a woman's breast. We also add **Lutein** and **Lycopene**, two powerful anti-oxidant carotenoids of particular importance to women since they are concentrated in specific tissues in the body. Additional free radical scavenging benefits are delivered by high levels of **Grape Seed Extract** and **Curcumin**, with their standardized levels of powerful anti-oxidants that support the health of the breast.

Respectfully Submitted,

Shawn Tiller
