

National Aquaculture Drug Research Forum

2008 Directory Aquaculture Drug Approval Research Subject Matter Experts

The following is a list of (1) Center for Veterinary (CVM; U.S. Food and Drug Administration) staff, (2) scientists and researchers, and (3) coordinators directly involved with aquaculture drug approval research and coordination of drug approvals. The individuals listed below are considered subject matter experts in areas related to aquaculture drug approval research who agreed to provide assistance to others as time permits on issues such as protocol development, study conduct, final study reports, submissions to CVM, Freedom of Information Summary, and related subjects.

Major Technical Project Categories include: Efficacy, Target Animal Safety (TAS), Antimicrobial Resistance (AR), Environmental Safety (ES), Good Laboratory Practice (GLP) Compliance, and the following four categories under the broad category of Human Food Safety: (1) Analytical Methods Development and Validation (AMD&V), (2) Total Residue Depletion (TRD), (3) Marker Residue Depletion (MRD), and (4) Toxicology. In addition, experts involved in Manufacturing and Regulatory Affairs are included.
