

AAZPA LIBRARIANS SPECIAL INTEREST GROUP BIBLIOGRAPHY SERVICE

The bibliography is provided as a service of the AAZPA LIBRARIANS SPECIAL INTEREST GROUP and THE CONSORTIUM OF AQUARIUMS, UNIVERSITIES AND ZOOS.

TITLE: The Lion-tailed Macaque (Macaca silenus):
An Indexed Bibliography

AUTHOR &
INSTITUTION: Gregg Thompson
Woodland Park Zoological Gardens
Seattle, Washington

DATE: August, 1988

While the author of the following bibliography has attempted to make it as comprehensive as possible, it should not be considered as a complete listing of lion-tailed macaque references. In addition to the Primate Reference Library of the University of Washington Regional primate Center, most major bibliographic sources I have been utilized in the search for citations for inclusion in this bibliography. Despite such a search, it is inevitable that additional references exist. The author would appreciate receiving information regarding articles or publications that contain reference to lion-tailed macaques that are not listed in this bibliography. Except for the articles to which the author had direct access, the references have not been annotated. This bibliography will be updated on an annual basis and published as an addition to the yearly International Lion-tailed Macaque Studbook supplement. The author hopes that this bibliography will be of assistance to those working with or studying the lion-tailed macaque and welcomes comments or suggestions.

INDEX

This index was created from the general topics of the title. Therefore, the index topics should not be considered as mutually exclusive and subject searches should consider alternate index entries. For example, articles on sexual behavior are indexed under the general

category of Behavior and under the separate category of Sexual Behavior. Likewise, Shigella is listed under the general category of Diseases/ Infections and the sub-heading of Shigella as well as under the general category of Shigella; Shigella but might also be found in a article indexed under Bacteria.
