

- A-E**  
 Agricultural aircraft, for remote sensing, Mar-20  
 Agricultural byproducts, new products from, Mar-13  
 Alpine pennycress  
   soil pH affects cadmium uptake of, Nov-23  
   zinc transporter gene in, Jan-20  
 Animal-care ethics and welfare, Mar-2, 4  
 Antibiotics, detecting in meat, milk, fish, Jan-15  
 Antimicrobial-resistant organisms, tracking, Mar-18  
 Appalachia, silvopasture research in, Aug-2, 4  
 Apples  
   laser beams detect quality of, May-8  
   model for cooling sprinkler baths of, May-23  
 Aquatic life, effect of grass farms on, Oct-18  
 ARS partnerships, research advances from, Jul-16  
 ARS-Ohio State pest detection team, May-2, 4  
 Ash trees, biocontrols for emerald ash borer, Feb-22  
 Avian influenza, global migration of, Nov-8  
 BAC map of cow, Jan-4  
 Bacteria  
   detecting in shellfish, Mar-10  
   from animals, resistant populations of, Mar-18  
   irradiation used to inactivate on foods, Feb-10  
   new adhesive from combined strains of, Feb-23  
   new *Hespellia* found in pig manure, Jan-23  
   spotting antibiotic resistance genes in, Nov-17  
 Barber pole worm, copper controls, Jun-23  
 Barley, advances in uses for, Jul-20  
 Beef, calpastatin controls tenderness of, Feb-8  
 Bell pepper, Charleston Belle, Feb-23  
 Biocontrol  
   of emerald ash borer by wasps, Feb-22  
   of fire blight with *Pantoea agglomerans*, Oct-23  
   of mealybug with parasitoids, predator, Apr-16  
   of red imported fire ants with SINV-1, Jul-23  
   of saltcedar with leafbeetle, Apr-2, 4  
   of termite alates with fungus, Nov-23  
 Biodiesel production, new method for, Apr-13  
 Biofumigation with *Brassica* crops, Dec-20  
 Bioplastics, made from cornstarch, Dec-10  
 Biting midge, vector of vesicular stomatitis virus, Apr-22  
 Bristlecone pine, genetic studies of, Apr-8  
 Broccoli, breeding for high glucoraphanin in, Dec-14  
 Cacao, fungal pathogens of are related, Oct-17  
*Campylobacter*  
   antimicrobial resistance in, Mar-18  
   assessing bacteriocins to combat, Nov-8  
   predictive model for, Jun-18  
   testing dairy cow samples for, Apr-20  
*Candida albicans*, new DNA test identifies, Jul-22  
 Cantaloupe  
   calcium, potassium applications improve, Aug-20  
   *Salmonella* biofilm on rind of, Dec-17  
   slicing under water, ultraviolet light, Aug-10  
 Canola, as rotation crop for potatoes, Dec-20  
 Carbon sequestration  
   effect of grazing on, Jun-4  
   in tillage vs. no-till, Apr-14  
 Carbon storage of eastern gamagrass, Sep-7  
 Casein-based edible film, Nov-21  
 Catfish, remote sensing of algae in ponds of, Mar-20  
 Cattle  
   *Cryptosporidium* in calves, May-22  
   forages for year-round grazing of, Jun-4  
   vesicular stomatitis virus transmission to, Apr-22  
   water attracts better than salt, May-23  
 CATTs technique for killing insect pests on stored fruit, Jul-6  
 Center of Excellence in Extrusion and Polymer Rheology, Mar-13  
 Center Pivot Evaluation and Design computer program, Oct-14  
 Charles Valentine Riley's papers, artifacts at NAL, Oct-20  
 Chicken feathers, useful fiber made from, Jan-23  
 Chickens  
   free-range, *Salmonella* incidence in, Apr-23  
   infrared/laser methods to trim beaks of, Mar-4  
   sequencing genome of, Jan-2, 4  
 Chili peppers, new cleaner for harvesting, Feb-18  
 Citrus  
   cancer-fighting limonoids in, Feb-16  
   cholesterol-reducing flavonoids in peels, Sep-16  
 Citrus collection, species identification from molecular markers, Jun-20  
 Computer models for small-dams, Aug-14  
 Conservation Effects Assessment Project (CEAP), May-23; Dec-2, 4  
 Controlled drainage, increasing use of, Sep-2, 4  
 Copper fed to sheep controls nematode, Jun-23  
 Corn stover, fermented, improves eroded soil, Apr-23  
 Corn  
   rotation, irrigation study with, Nov-18  
   viral team identifies viruses in, May-4  
 Cornstarch, electroactive bioplastics from, Dec-10  
 Cotton  
   faster roller gin stands for, Feb-18  
   gossypol from hairy root cultures of, Jul-12  
   yield vs. profit with varying irrigation, Nov-18  
 Cotton/flax mix for moisture management, Nov-12  
 Cows  
   chronic pain from tail docking, Mar-4  
   dairy, rotational grazing system tested, Apr-23  
   new big bluestems put weight on, Nov-17  
   sequencing genome of, Jan-2, 4  
   testing for bacteria in dairy, Apr-20  
   transport stress in, Mar-4  
 Crop rotations  
   best for potatoes in Maine, Dec-10  
   best sequences for use in Great Plains, Jun-14  
 Cryopreservation  
   methods shared with scientists overseas, Nov-22  
   of plant genetic material, Apr-8  
*Cryptosporidium*, prevalence of in cattle, May-22  
 Dairy cows, corralling of keeps nutrients on fields, Sep-8  
 Dairy farms  
   best management practices for, Apr-20  
   rotational grazing system tested, Apr-23  
 DNA analyses, Jan-2  
 DNA chip spots antibiotic resistance genes, Nov-17  
 Drainage, controlled, increasing use of, Sep-2, 4  
 Drainage pipes  
   proximity to wormholes, Sep-10  
   radar locates underground, Sep-4  
 Drainage water, saline, use for irrigation, Sep-18  
*E. coli*  
   antimicrobial resistance in, Mar-18  
   irradiation inactivates on foods, Feb-10  
   new air sampler for in poultry houses, Oct-22  
   testing dairy cow samples for, Apr-20  
   using antibodies to detect, Jan-15  
 Eastern gamagrass, effects of heat, CO<sub>2</sub> on, Sep-7  
 Eggs, human absorption of lutein from, Mar-23  
 Electrostatic air sampler for use in poultry houses, Oct-22  
 Emerald ash borer, potential biocontrol wasps identified, Feb-22  
*Enterococcus*, antimicrobial resistance in, Mar-18  
 Erosion of topsoil, effect on wheat yields, Dec-9  
 Ethanol production, high-starch barley lines for, Jul-20  
 Exotic pest identification, prevention, May-2, 4  
**F-L**  
 Fertilizer  
   application using canopy reflectance, Feb-23  
   movement through drainage pipes, Sep-10  
   using manure on legumes, Aug-16  
 Finger millet, fingerprinting accessions of, Apr-12  
 Fire ants, remote sensing detects, Mar-20  
 Fire blight, *Pantoea agglomerans* fights, Oct-23  
 Fish, new vaccines against bacteria, May-10  
 Flax  
   as rotation crop for cotton, Nov-12  
   blended with cotton for comfort, Nov-12  
   blended with polymers for molded materials, Nov-12  
   new standards for fiber quality of, Aug-22  
 Food safety  
   ARS-UMES research center for, Jul-16  
   bacteria control in dairy products, Apr-20  
   changing antimicrobial use in animals, Mar-18  
   high-pressure processing of shellfish, Mar-10  
   how microbes survive produce washing, Dec-17  
   irradiating ready-to-eat foods, Feb-10  
   models for pathogen growth on poultry, Jun-18  
   new detection methods improve, Jan-15  
   new DNA test identifies food pathogens, Jul-22  
   *Salmonella* incidence in chickens, Apr-23  
   time-resolved fluorescence, Jan-15  
 Forage  
   filling feeding gap between crops of, Dec-18  
   high-CO<sub>2</sub> levels affect quality of, Aug-23  
   quality, spectral reflectance studies of, Sep-20  
   salt-tolerant, irrigating with drainage water, Sep-18  
   systems for year-round livestock feeding, Jun-4  
   two new big bluestems for cows, Nov-17  
   yield and protein of in silvopastures, Aug-4  
**FORUMS**  
 ARS Pounces on Sudden Oak Death Pathogen, Feb-2  
 CEAP: Right Idea, Right Time, Dec-2  
 Connecting a Vital Region's Agriculture, Ecology, and People, Jun-2  
 Finding Out What Makes Animals Tick—Genetically, Jan-2  
 Gaining Insight From Probing Insects' Genes, Nov-2  
 Helping Industry Ensure Animal Well-Being, Mar-2  
 Helping School Kids Reach Nutritional Excellence, Oct-2  
 North, South, East, or West—Suiting Farms to Their Environment, Aug-2  
 Protecting Crops From Alien Invaders, May-2  
 Saltcedar Scientists Trounce Troublesome Tree, Apr-2  
 Taking Jack IN the Beanstalk, Jul-2  
 Upgrading America's Underground Drainage Network, Sep-2  
 Foulbrood disease, finding resistance genes in bees to, Jan-4  
 Fruit  
   fresh-cut, processing methods tested, Aug-10  
   minor, efforts to introduce, Jan-12  
   stored, CATTs method kills insect pests on, Jul-6  
 Functional genomics, TILLING technique used in soybeans, Jul-2, 4  
 Fungal plant diseases, sampangine controls, Sep-23  
 Fungi  
   *Crinipellis* reclassified to new genus, Oct-17  
   *Myrothecium* toxin and indoor air quality, Feb-23  
*Fusarium*  
   DNA test spots head blight species, Nov-23  
   *F. graminearum* genome mapped, on Web, Feb-6  
   wilt, grafting for watermelon resistance to, Jul-8  
 Garlic, cryopreserving, identifying, Apr-8  
 Genes for green color in southernpea, Dec-14  
 Genetic linkage map of watermelon, Dec-14  
 Genetics technology, evolution of, Jan-2  
 Genome sequencing  
   of farm animals, Jan-2, 4  
   of insects, Nov-2, 4  
 Germplasm  
   finger millet collection, Apr-12  
   pineapple collection, Oct-12  
   plant, ARS efforts to preserve, Apr-8  
   sheep, efforts to preserve, Apr-11  
 Global climate change, projects on, Apr-14  
 Golf courses, fertilizer runoff from, Aug-18  
 Gossypol, agricultural and medicinal uses of, Jul-12  
 GRACENET, soil carbon research network, Apr-14  
 Grapes  
   cryopreserving, Apr-8  
   pterostilbene in lowers rat blood lipids, Mar-23  
 Grass  
   cool-season perennials fill forage gap, Dec-18  
   new cultivars for forage, Jun-4; Nov-17  
 Grass farming and the environment, Oct-18  
 Grazing  
   effects on mineral cycling, carbon balance, Jun-4  
   extending season in south Great Plains, Dec-18  
 Great Plains, crop rotations for Jun-14  
 Greenhouse gases, GRACENET research network on, Apr-14  
 Groundwater, livestock handling to protect, Sep-8  
 Healthy School Meals Resource System, Oct-2, 4  
 Hepatitis A, in shellfish, detecting, Mar-10  
 Herb garden at National Arboretum, May-20  
 Herbs, Turkish, oils from as insecticides, Jul-23  
 Historically black colleges and universities, ARS partnerships with, Jul-16  
 Honey bees  
   bioassay tests *Varroa* mites' resistance, Apr-19  
   new insecticide kills *Varroa* mites, Jun-8  
   sequencing genome of, Jan-2, 4  
   SMR bees remove *Varroa* mites, Oct-8

Honeydew, calcium, potassium applications improve, Aug-20

Hops, model to time fungicide use on, Feb-23

Horses, vesicular stomatitis virus in, Apr-22

Human nutrition

- absorption of lutein from chicken eggs, Mar-23
- fast-food eaters consume more calories, Jan-23
- feeding guidelines through toddlerhood, Jun-7
- food and exercise effect on bone density, Jan-18
- mother-daughter milk-drinking habits, Mar-22
- nutrients in native communities' foods, Sep-17
- protein intake and calcium excretion, Sep-23
- protein to reverse sarcopenia, May-14
- role of school meals in child nutrition, Oct-2, 4
- strength training to reverse sarcopenia, May-14
- study supports iron fortification of foods, May-14
- Tufts Strong Living Program, May-14
- ubiquitin and eye health, Aug-13
- vitamin B<sub>12</sub> status linked to bone health, Oct-23
- zinc in normal vs. cancerous prostate cells, Jun-12

Hydrilla, gene for fluridone resistance in, Nov-14

Insect genes, importance of studying, Nov-2

Insect pests, CATTs method kills on stored fruit, Jul-6

Insect-borne diseases, ARS-DOD efforts to combat, Sep-12

Insecticide, new class of from sugar esters, Jun-8

Insects, NIR spectroscopy detects inside grain, Mar-8

Irradiation of meats, fruits, and vegetables, Feb-10

Irrigation

- center-pivot, adding sensors to, Oct-14
- crop-rotation study on ideal water use from, Nov-18
- of salt-tolerant forage with drainage water, Sep-18
- site-specific, precision, Oct-14
- sprinkler vs. subsurface drip, Nov-18
- using recycled drainage water for, Sep-4

Irrigator Pro, research to add new data to, Nov-18

LABEX, United States-Brazil collaboration, Apr-14

Land-grant colleges, ARS partnerships with, Jul-16

Lasers, detecting apple quality with, May-8

Leafbeetle

- methods of tracking, Apr-4, 7
- new synthetic attractant for, Apr-7
- success as saltcedar biocontrol, Apr-4

Legume Information Service website, Aug-23

Legumes, using manure to fertilize, Aug-16

*Listeria monocytogenes*

- new DNA test identifies, Jul-22
- radiation doses for inactivating, Feb-10
- testing dairy cow samples for, Apr-20

Livestock behavior and stress research, Mar-2, 4

*Lycoris*, new species of, Dec-12

**M-R**

Mannitol production by fermentation, Oct-23

Manure

- as legume fertilizer curbs nitrogen runoff, Aug-16
- liquid, movement through wormholes, Sep-10
- managing with corralling approach, Sep-8
- system for treating swine wastewater, Mar-14

Marek's disease, resistance genes for, Jan-4

Meat quality, testing facility for assessing, Jul-23

Melons, foliar potassium applications to, Aug-20

Methyl bromide alternatives

- CATTs kills insects on stored fruit, Jul-6
- grafting imparts pathogen resistance, Jul-8

Minor fruits, studies, preservation of, Jan-12

Mosquitoes

- NIR spectroscopy identifies malaria-carrying, Mar-8
- SS220 as repellent for, Sep-12

National Agricultural Library

- four conservation bibliographies at, May-23
- online course for dietitians, Jun-23
- special collections of, Oct-20

National Arboretum, Herb Garden at, May-20

National Center for Genetic Resources Preservation, Apr-11

National Clonal Germplasm Repository, Jan-12, 14; Nov-22

- for Citrus and Dates, Jun-20
- for Tree Fruit and Nut Crops and Grapes, Aug-9
- for Tropical and Subtropical Fruit and Nuts, Oct-12

National Herb Garden, 25th anniversary of, May-20

National School Lunch Week, Oct-2, 4

Nematode, copper controls in sheep, Jun-23

Newcastle disease, saponins for vaccines for, Nov-8

Nitrate losses, wood-chip trenches reduce, Sep-4

Noroviruses, RT-PCR detects in shellfish, Mar-10

Nursery plants, fungal infection of, Feb-2, 4

Oats, two freeze-tolerant genotypes found, Sep-23

Old World hunter fly as greenhouse biocontrol, Oct-7

Peaches

- laser beams detect firmness of, May-8
- two new nonmelting varieties, Jan-22

Peanuts

- European taste panel likes U.S., Aug-22
- yield vs. profit with varying irrigation, Nov-18

Peppers, hot, as organic crop for growers, Apr-23

Pest control with air curtains on planes, Jan-23

Pesticides

- biologically based, mechanism of action, Jun-23
- movement through drainpipes in fields, Sep-10

*Phytophthora ramorum*

- origin, survival, spread of, Feb-2
- PCR used to identify, Feb-4

Phytoremediation of cadmium from soil, Nov-23

Pigs

- immunity boosted with plasma, fish oil, Jul-15
- sequencing genome of, Jan-2, 4
- stress, housing, socializing, Mar-4
- vesicular stomatitis virus transmission to, Apr-22

Pineapple germplasm collection, Oct-12

Pink hibiscus mealybug, diet, lures for, Apr-16

Pinto bean, line that resists anthracnose, May-23

Plant genes, measuring expression of, Jan-20

Plant germplasm

- free exchange of worldwide, Nov-22
- new ways to protect, preserve, Apr-8

Plant physiology

- phytohormone interaction study, Mar-23
- synthetic peptide, SS2, halts cell division, Mar-23

Plant viruses, ARS-Ohio State team identifies, May-2, 4

Plants, hyperaccumulators of heavy metals, Jan-20

Potatoes

- bacterial sprays curb late blight infections, Apr-23
- Defender variety good for frozen products, Nov-23
- disease-suppressing rotations for, Dec-10

Potato Systems Planner software, Dec-10

Poultry

- feathers, lightweight plastic from, Sep-23
- litter made into activated carbons, Jul-10
- modeling growth of bacteria on, Jun-18
- safety, ARS-international research on, Nov-8

Precision agriculture, imaging in, Mar-20

Pumpkins

- mealybug diet made with, Apr-16
- SFE method measures carotenoids in, Oct-10

QuEChERS method detects pesticide residue, Jan-15

Rangeland management, grazing studies to balance ecosystem, Jun-4

Rare-earth elements as soil-erosion tracers, Jun-10

Red flour beetle, genome sequencing of, Nov-4

Red imported fire ants, SINV-1 virus of, Jul-23

Redvine, physiology of its tendrils, Sep-22

Regional Dairy Quality Management Alliance, Apr-20

Remote sensing

- from agricultural aircraft, Mar-20
- gauging forage nutrition by, Sep-20

Response Surface Methodology for developing insect diets, Apr-16

Rice, microfluidizer separates starch and protein, Feb-20

Rice-based batter as coating for fried foods, Jan-23

Runoff of fertilizers, pesticides, Aug-16, 18

**S-Z**

*Salmonella*

- antimicrobial resistance in, Mar-18
- assessing bacteriocins to combat, Nov-8
- detection with air sampler, Oct-22
- forms biofilm on cantaloupe rind, Dec-17
- inactivation of on lettuce, Feb-10
- incidence of in free-range chickens, Apr-23
- introduced jellyfish gene helps track, Jun-18
- irradiation inactivates on foods, Feb-10
- lowering infection of from stress in swine, Mar-4
- modeling growth of, Jun-18
- testing dairy cow samples for, Apr-20
- using antibodies to detect, Jan-15

Saltcedar, research to control, Apr-2, 4

Screwworm, cryopreservation of, Feb-14

Sheep

- hair, copper controls nematode in, Jun-23
- method predicts weight gain in, Sep-20
- Navajo-Churro, efforts to preserve, Apr-11
- weight gain in lambs on silvopasture, Aug-4

Shellfish, methods to detect pathogens in, Mar-10

Silvopasture research in Appalachia, Aug-2, 4

Small dams, research on overtopping of, Aug-14

Soil

- carbon, infrared technology measuring of, Apr-14
- effect of crop rotations on properties of, Jun-14
- fumigants, impermeable film retains, Aug-23
- rare-earth elements to track erosion of, Jun-10
- reclaiming, managing saline-sodic, Sep-18

Sorghum

- increasing sorgoleone production from, May-18
- substituting for wheat in baking, Feb-23

Southernpea lines with green trait, Dec-14

Southern Plains forage and grazing, Jun-2, 4

Soybean aphid, May-2, 4; Nov-7

Soybean oil with higher oleic acid, Jul-2

Soybeans

- automated screening for mutations in, Jul-4
- gene for resistance to soybean aphid, Nov-7
- mapping genome of, Jul-2
- new method to make biodiesel from, Apr-13

*Staphylococcus aureus*, new assays for, Jan-15

Starch-based coatings, Jul-23

Strawberry latent ringspot virus, Aug-23

Stress, in livestock, Mar-4

Sudden oak death, efforts to prevent, Feb-2, 4

Sunflowers, herbicide-resistant lines of, Jan-9

Sustainable agriculture for ecosystems, Aug-2

Swine, see *Pigs*

Termite, biocontrol fungus for alates of, Nov-23

TILLING, functional-genomics technique used in soybeans, Jul-2, 4

Treasures of the National Agricultural Library, Oct-20

Trees, planting in open pastures, Aug-4

Turf management for golf course runoff, Aug-18

USDA school-meal programs, Oct-2, 4

Vaccines, given as a bath for fish, May-10

*Varroa* mites

- low-tech test for chemical resistance, Apr-19
- new insecticide kills mite, safe for bee, Jun-8
- SMR bees remove from brood cells, Oct-8

Vascular puncture inoculation technique, May-4

Vesicular stomatitis virus, vector of, Apr-22

*Vibrio* bacteria, enzyme aids spread of, Mar-10

Viral plant diseases and vectors, May-4

Vitamin B<sub>12</sub> status linked to bone health, Oct-23

Vitamin E in elderly vs. incidence of colds, Apr-21

Walnuts

- gallic acid in Tulare prevents aflatoxin, Mar-16
- identification of, Aug-9

Wasps as biocontrols of ash borer, Feb-22

Wastewater

- charred poultry litter filters metals from, Jul-10
- from swine, automated system to treat, Mar-14

Water quality

- and conservation, Sep-2, 4
- and management, dam failures affect, Aug-14
- curbing nitrogen runoff, Aug-16
- effect of grass farms on, Oct-18
- studies of conservation's effects on, Dec-2, 4

Water stress, remote sensing of in crops, Mar-20

Water use, best rotations in dry areas, Jun-14

Watermelons

- grafting onto squash, gourd rootstock, Jul-8
- wild, evaluating for pest resistance, Dec-14

Watersheds, conservation research on, Dec-2, 4

Weeds, compound from sorghum combats, May-18

Wheat

- alternatives to wheat/fallow in Great Plains, Jun-14
- leaf-spot fungus, gene sequencing of, Oct-23
- Penawawa-X, a new "full-waxy," Nov-23
- proteomics studies in, Jan-10
- scab pathogen mapped, Feb-6
- yields reduced by topsoil erosion, Dec-9

Wild rice, cryopreserving, Apr-8

Wildlife, effect of grass farms on, Oct-18

Wool, biopolishing process to shrinkproof, May-12

Worm burrows funnel manure to pipes, Sep-10

*Yersinia*, radiation resistance of, Feb-10

Zinc transporter proteins, Jun-12
