NATIONAL OCEAN SERVICE ON-LINE CHART VIEWER

NOAA introduced a new public service called the On-Line Chart Viewer in July of 2006. The Viewer lets mariners display any nautical chart in the national suite using only an Internet browser. Each chart is updated weekly for Notice to Mariner corrections by NOAA. The Viewer's fast, image displaying software permits rapid chart display, panning and zooming.

The On-Line Viewer can be used for voyage planning and research. Professional mariners can examine their intended routes for recent changes. With appropriate graphics software, screen captures can be saved for inclusion in reports. The On-Line Chart Viewer is available for free from NOAA at www.NauticalCharts.gov/viewer.

Hurricane Season

The hurricane season extends from June through November. Hurricanes can cause excessive damage to vessels and loss of life. To minimize these dangers, the following precautions should be taken by all mariners before getting underway during the hurricane season:

- (a) Instruction of crew and passengers in location of emergency equipment and emergency procedures;
- (b) Pre-sailing check of vessel, machinery, and equipment for seaworthiness;
- (c) Installation of strong ground tackle;
- (d) Review of storm center evasion procedures;
- (e) Knowledge of nearest hurricane shelter or port; and
- (f) Constant radio watches on channel 16 VHF-FM and frequent monitoring of weather broadcasts.

HURRICANE INFORMATION

The civilian hurricane warning service for the North Atlantic is provided by the National Hurricane Center, Miami, Florida. The center collates ship, aircraft, radar, and satellite data to produce and issue tropical cyclone warnings and forecasts for the North Atlantic Ocean, including the Caribbean Sea and the Gulf of Mexico. A Tropical Cyclone Advisory message is issued every six hours, with intermediate bulletins provided as needed.

For tropical storms and hurricanes threatening to cross the coast of the U.S., coastal warnings are issued to the public so that precautionary actions, including evacuation, can be initiated to minimize damage and loss of life. Two levels of warnings are employed:

- (a) HURRICANE WATCH - a preliminary alert that a hurricane MAY threaten a specified portion of the coast. It is issued 36 hours before landfall may occur; and
- (b) HURRICANE WARNING - which indicate that hurricane conditions are EXPECTED along a specified portion of the coast. It is issued 24 hours before landfall. To provide additional information for maritime interests, a Marine Advisory is also issued which provides storm position forecasts for up to 72 hours in advance of a storm, and probabilities of hurricane strikes for coastal locations and offshore coordinates.

Mariners are reminded that aids to navigation, particularly lighted and unlighted buoys, may be moved from charted position, damaged, destroyed, extinguished or otherwise deemed discrepant as a result of hurricane and storms. Mariners should not rely solely upon the position or operation of an aid to navigation, but also employ such other methods of determining position as may be available.

Mariners are further reminded that during the hurricane season drawbridges along the coast may deviate from normal operating procedures.

Hurricane Season

Drawbridges are authorized to remain closed upon approach of gale force winds of 34 knots or greater. Others may be authorized to extend closed periods prior to gale force winds to facilitate evacuation of land traffic or close operations up to 8 hours before expected arrival of gale force winds. Due to the uncertainty of hurricane movements and bridge closures, mariners are urged to seek passage through drawbridges well in advance of the arrival of gale force winds.

SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. **It is up to the mariner to decide which chart(s) are to be corrected.** The following example explains individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners

(Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true.

Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM) unless otherwise noted.

FLORIDA- TAMPA BAY ENTRANCE- TAMPA BAY: Marine Advisory.

In order to minimize the risk of collision with deep draft vessels and improve the safe transit of shallow draft vessels within the Tampa Bay and its approaches, the Coast Guard Captain of Port Tampa, Florida issues the following advisory: A NOAA survey number H-11344 conducted in July, 2004 reported that a water depth of 10 feet extends approximately 500 feet outward from both sides of the main ship channel in the waters west of the Sunshine Skyway Bridge adjacent to Egmont Channel, Mullet Key Channel, and Tampa Bay Cut "A" except in the vicinity of the Sunshine Skyway Bridge where existing security zones prohibit navigation closer than 100 feet around all bridge supports, dolphins, and rocky outcroppings from piers 88 to 135. Continuing east of the Sunshine Skyway Bridge, the advisory includes the waters adjacent to Point Pinellas Channel, Tampa Bay Cuts -A-, "B", "C", "D", "E", "F", "G", "J", "J-2", West of "K" Cut, Gadsen Point Cut, and Hillsborough Bay Cuts "A", and "C". All vessels drafting less than 10 feet may consider utilizing waters that have been identified by the 2004 NOAA survey parallel to, and within 500 feet of, the main ship channel when identifying the safest navigational course for transiting Tampa Bay and its approaches.

FLORIDA-ESTERO BAY TO LEMON BAY, INCLUDING CHARLOTTE HARBOR: Bridge Construction.

All mariners are advised that construction has begun on the Cape Coral bridge fender system on the Caloosahatchee River, Cape Coral, Florida.

This fender replacement project will require a tug and barge to be placed in the navigable channel partially blocking the channel during working hours only. The unaffected portion of the channel, approximately forty-five (45) feet will remain unobstructed and open to traffic.

The nature of this work and the close proximity of the channel present a hazard to mariners transiting the area. The working tug will monitor VFH Channel 16. This project will be completed on or about 22 December 2006.

All mariners are advised to use extreme caution while transiting the area. For further information please contact Petty Officer Chuck Voss at (813) 228-2191 ext 8126

OPERATION "ON GUARD"

U. S. Coast Guard Marine Safety Office Miami announces Operation "ON GUARD". This operation is designed to employ Coast Guard - active duty, reserve and auxiliary, Federal Bureau of Investigation, US Customs Service, US Immigration and Naturalization Service and the Florida Department of Law Enforcement personnel in response to suspected terrorist activity at the waterfront facilities of the United States. South Florida is extremely vulnerable because it is the terminus of illegal alien and narcotics smuggling routes from the Bahamas, the Caribbean and South America. These routes are well established and are readily available for use by terrorist organizations. An urgent need existed to make the American Public equal partners in the fight on terrorism. Operation "ON GUARD" creates an effective deterrent measure that employs the eyes and ears of the marine industry and the boating public, people that know every inch of the coastline because it is where they work and play. Potential terrorists are put on notice that their activities will be seen and reported.

Operation "ON GUARD" takes a two pronged approach consisting of face to face visits by Coast Guard, FBI, USCS, INS and FDLE personnel combined with a coordinated joint agency media campaign to reach Marina Operators, Marine Dealers, Bridge Tenders, Commercial Fishermen, and the Boating Public. This operation relies on Coast Guard Auxiliary programs already in place like the "Clean Marina" program, Vessel Safety Checks, Marine Dealer Visits and the Commercial Fishing Vessel Safety Program to reach their normal customers, the waterfront users. The public is provided with the toll free number (1.800.424.8802) for reporting suspected terrorist activity to the National Response Center and the 1.800.BE ALERT number for US Customs along with a list of reporting criteria.

Report:

- Suspicious persons conducting unusual activities
- Individuals establishing businesses or roadside food stands in proximity to marina or bridge
- Unknown persons photographing or creating diagrams
- Unknown or suspicious persons loitering for extended periods of time
- Unknown or suspicious persons renting watercraft
- Suspicious vendors attempting to sell/deliver merchandise or drop off packages

**POSSIBLE SUBMERGED HAZARDS/DEMOLITION DEBRIS IN COOPER RIVER
SHALLOWS FOR DURATION OF GRACE AND PEARMAN BRIDGE DEMOLITION**

Boaters are advised to stay in the main channel when transiting under the new Ravenel Bridge on the Cooper River. The South Carolina Department of Transportation and their demolition contractor are in the process of removing the remaining foundations for the Grace and Pearman bridges. This project will continue into 2007. During this period, there is the possibility of both partially submerged hazards and demolition debris in the areas outside the main channel. The contractor's work area will be marked with temporary buoys, but these buoys may not be visible at night. To avoid hazards boaters should transit only through the main Cooper River channel (HOG ISLAND REACH) or should consider using Town Creek channel as an alternate route.

Boaters are also reminded to obey Navigation Rule 9 and give large ships the right of way while in or planning to cross the main channel. Vessels less than 20 meters long, and sailing vessels, shall not impede the passage of a vessel that can safely navigate only within a narrow channel.

The U.S. Coast Guard has designated the waters under the old and new bridges as a Regulated Navigation Area (shown below in purple). All vessels are prohibited from anchoring, mooring, or loitering within the regulated area, unless specifically authorized by the U.S. Coast Guard.

Boaters should contact Coast Guard Sector Charleston's 24x7 operations center on VHF channel 16 or via phone at (843) 724-7616 to report any concerns or ask any questions about this notice.
