

Form Letter	Comment Text
4	<p>Dear Ms. Roadifer,</p> <p>I am opposed to the BLM's proposal to increase natural gas production in the Pinedale Anticline, in the magnificent Upper Green River Valley. This dramatic drilling expansion would allow leasing to continue on at least 70 percent, or 850,000 acres, of the resource area, and would relax wildlife protections as well as result in a significant increase in air pollution. Expanding drilling in this region would also scar the landscape with roads, pipelines and transmission lines, harm crucial wildlife habitat, and could pollute the fisheries of the Green and New Fork rivers.</p> <p>I urge you instead to adopt a balanced resource management plan, based on Alternative 3, with modifications. While the draft plan recognizes the crucial role that the Upper Green River Valley plays in providing habitat for the area's outstanding wildlife and protects land around Trappers Point as an Area of Critical Environmental Concern (ACEC), it stops short of fully protecting the abundant wildlife and clean air that make the area so extraordinary. The BLM needs to go farther and protect all nine areas proposed for ACEC designation, as well as maintain and strengthen seasonal drilling stipulations, tighten exemptions to stipulations and set thresholds for wildlife impacts that would restrict development.</p> <p>In order to sufficiently protect the air quality of the Upper Green River Valley, the resource management plan should mandate air emission controls and establish a stringent emissions cap. It should also eliminate loopholes to waive surface protections, and strictly define management objectives and monitoring and mitigation measures.</p> <p>I urge the BLM to abandon the proposed plan, and instead develop a long-term plan for the Upper Green River Valley that will allow balanced development as part of a clean and sustainable energy future that includes full protection of wildlife habitat, clean air, clean water and rural community life.</p>
