NORTH ATLANTIC RIGHT WHALES WARNING: Updated Version.

From December to March the coastal waters between Altamaha Sound, GA, and Sebastian Inlet, FL, are used as calving grounds by the severely endangered North Atlantic Right Whale. This is the worlds only known calving ground for this species. Right Whales are the rarest whales in the world and are protected under law from disturbance or injury by the endangered species act of 1973, and the Marine Mammal Protection act of 1972. Right Whales, especially females and their calves, are slow swimmers and frequently lie at the surface. This behavior makes them vulnerable to collisions with ships, which are a significant source of mortality. Vessels operating within 25 miles of shore between 31-27N and 29-50N and within five miles of shore from 29-50N and 28-00N should take precautions to avoid collisions with Right Whales.

SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners
12327	91st Ed.	19-APR-97	Last LNM: 26/97	NAD 83		27/97

	Green can					
Corrective Action	Object of Corrective Action				Position	

(Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true.

Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM) unless otherwise noted.

In order to minimize the risk of collision with deep draft vessels and improve the safe transit of shallow draft vessels within the Tampa Bay and its approaches, the Coast Guard Captain of Port Tampa, Florida issues the following advisory: A NOAA survey number H-11344 conducted in July, 2004 reported that a water depth of 10 feet extends approximately 500 feet outward from both sides of the main ship channel in the waters west of the Sunshine Skyway Bridge adjacent to Egmont Channel, Mullet Key Channel, and Tampa Bay Cut "A" except in the vicinity of the Sunshine Skyway Bridge where existing security zones prohibit navigation closer than 100 feet around all bridge supports, dolphins, and rocky outcroppings from piers 88 to 135. Continuing east of the Sunshine Skyway Bridge, the advisory includes the waters adjacent to Point Pinellas Channel, Tampa Bay Cuts -A-, "B", "C", "D", "E", "F", "G", "J", "J-2", West of "K" Cut, Gadsen Point Cut, and Hillsborough Bay Cuts "A", and "C". All vessels drafting less than 10 feet may consider utilizing waters that have been identified by the 2004 NOAA survey parallel to, and within 500 feet of, the main ship channel when identifying the safest navigational course for transiting Tampa Bay and its approaches.

NORTH ATLANTIC RIGHT WHALES WARNING (UPDATE VERSION: 20 MARCH 2007)

From December to March the coastal waters between Altamaha Sound, GA, and Sebastian Inlet, FL, are used as calving grounds by the severely endangered North Atlantic Right Whale. The critically endangered right whales, including females with very young calves, may be encountered in offshore and coastal waters. Right whales are slow moving and at risk of serious injury or death due to collisions with vessels. Vessels operators are reminded to use caution and proceed at safe speeds in area used by right whales. Intentionally approaching within 500 yards of right whales is prohibited and is a violation of U.S. Laws. A minimum distance of 500 yards must be maintained from a sighted whale unless hazardous to the vessel or its occupants. NOAA recommends that operators assume that any whale sighting is a right whale.

NOAA also recommends speeds of 10 knots or less in areas used by right whales when consistent with safety of navigation. Please report all right whale sighting and collisions to (305) 862-2850 or the Coast Guard via channel 16. For more information, consult the U.S. Coast Pilot.

OPERATION "ON GUARD"

U. S. Coast Guard Marine Safety Office Miami announces Operation "ON GUARD". This operation is designed to employ Coast Guard - active duty, reserve and auxiliary, Federal Bureau of Investigation, US Customs Service, US Immigration and Naturalization Service and the Florida Department of Law Enforcement personnel in response to suspected terrorist activity at the waterfront facilities of the United States. South Florida is extremely vulnerable because it is the terminus of illegal alien and narcotics smuggling routes from the Bahamas, the Caribbean and South America. These routes are well established and are readily available for use by terrorist organizations. An urgent need existed to make the American Public equal partners in the fight on terrorism. Operation "ON GUARD" creates an effective deterrent measure that employs the eyes and ears of the marine industry and the boating public, people that know every inch of the coastline because it is where they work and play. Potential terrorists are put on notice that their activities will be seen and reported.

Operation "ON GUARD" takes a two pronged approach consisting of face to face visits by Coast Guard, FBI, USCS, INS and FDLE personnel combined with a coordinated joint agency media campaign to reach Marina Operators, Marine Dealers, Bridge Tenders, Commercial Fishermen, and the Boating Public. This operation relies on Coast Guard Auxiliary programs already in place like the "Clean Marina" program, Vessel Safety Checks, Marine Dealer Visits and the Commercial Fishing Vessel Safety Program to reach their normal customers, the waterfront users. The public is provided with the toll free number (1.800.424.8802) for reporting suspected terrorist activity to the National Response Center and the 1.800.BE ALERT number for US Customs along with a list of reporting criteria.

Report:

- Suspicious persons conducting unusual activities
- Individuals establishing businesses or roadside food stands in proximity to marina or bridge
- Unknown persons photographing or creating diagrams
- Unknown or suspicious persons loitering for extended periods of time
- Unknown or suspicious persons renting watercraft
- Suspicious vendors attempting to sell/deliver merchandise or drop off packages

Mariners are advised that emergency structural steel repairs will be performed at the Margate Bridge, at ICW mile 74.0, across Beach Thorofare in Margate, NJ. PUBLIC NOTICE (01-08)

All interested parties are notified that the Commander, Seventh Coast Guard District has received an application from Johnson Engineering, on behalf of Charlotte County, Florida requesting approval of the location and plans for the replacement of a bridge over a navigable waterway of the United States.

WATERWAY AND LOCATION: Venice Canal, mile 0.9, on Aqui Esta Drive at Punta Gorda, Charlotte County, Florida

CHARACTER OF WORK: This proposed project consists of replacing the existing 2-lane bridge with a 2-lane bridge over Venice Canal on Aqui Esta Drive. The overall length of the proposed replacement bridge is 83.0 feet. The out to out width of the proposed bridge is 43.6 feet. The proposed bridge provides: two 12-foot travel lanes with a 4-foot shoulder and 5.0-foot sidewalk on one side and a 6-foot shoulder on the other side. All parts of the existing bridge not used in the construction of the new bridge will be removed to two feet below the mudline prior to the construction of the proposed replacement bridge

MINIMUM NAVIGATIONAL CLEARANCES:

Existing

Horizontal: 26.8 feet between
piles, normal to channel axis

Vertical: 7.7 feet above
Mean High Water

Proposed

Horizontal: 31.5 feet between
piles, normal to channel axis

Vertical: 8.1 feet above
Mean High Water

ENVIRONMENTAL CONSIDERATIONS:

The Coast Guard, the lead federal agency, has made a tentative determination that the bridge replacement is a categorical exclusion for the purposes of the National Environmental Policy Act (NEPA) because it satisfies criteria for such actions listed in the Coast Guard's NEPA Implementing Instructions. The bridge is located in the floodplain. The Federal Emergency Management Agency (FEMA) 100-year flood elevation is 9.0 feet NGVD. The elevation of the low member of the proposed bridge is 9.9 feet NGVD. No fill material to be placed below mean high water level for the construction of the bridge. Water Quality Certification for this project pursuant to Section 401, Public Law 92-500, 33 USC Section 1341, will be satisfied by the issuance of an Environmental Resource Permit by the Southwest Florida Water Management

District which was applied for November 08, 2007. No parklands, wildlife refuges, or historic properties will be affected by the project. No residential or business displacements are anticipated in association with the bridge replacement.

This notice initiates the Essential Fish Habitat (EFH) consultation requirements of the Magnuson-Stevens Fishery Conservation and Management Act. No wetland impacts are anticipated as a result of the proposed project. Although Venice Canal is not listed as critical habitat for Manatee it is recognized that they may be occasionally present, therefore standard Manatee protection construction condition will be adhered to at all times. Based on the lack of suitable habitat, the Coast Guard finds that the proposed project will have no adverse effect on EFH or federally listed threatened or endangered species. Our final determination relative to project impacts and the need for mitigation measures is subject to review by and coordination with the National Marine Fisheries Service and the U.S. Fish and Wildlife Service.

SOLICITATION OF COMMENTS:

Mariners are requested to comment on the need for a bridge protective fendering system and other navigational safety issues, including the extent of nighttime navigation past the bridge site. Interested parties are requested to express their views, in writing, on the proposed bridge project giving sufficient detail to establish a clear understanding of their reasons for support of or opposition to the proposed work. Comments will be received for the record at the office of: Commander (dpb), Seventh Coast Guard District, 909 Southeast First Avenue (Suite 432), Miami, Florida 33131, for 30 days from the date of this public notice. Our project manager for this application is Mr. Randall Overton who can be contacted by telephone at (305) 415-6749, by mail at the above address, or by email at randall.d.overton@uscg.mil. All comments will be made considered and made part of the case record.
