

submission or untimely progress reporting; delayed start in project implementation; inconsistent Federal funds draw-downs in relation to approved work plan; or other grant/project management concerns.

In the case of a multi-year grant, this activity will help ANA determine if continued funding is justified. In addition, 45 CFR 1336.40 requires that progress reports and continuation applications from ANA grantees contain sufficient information for ANA to determine the extent to which the recipient satisfies ANA project evaluation standards. Sufficient information means information adequate to enable ANA to compare the recipient's accomplishments with the goals and activities of the grantee's approved work plan and with ANA project evaluation criteria. Grantees identified as potentially at-risk for project implementation will receive an on-site visit by one of ANA's T/TA providers. In collaboration, the T/TA provider and the grantee will identify challenges or barriers to the project and develop a plan to bring the project into compliance with its approved Objective Work Plan. On-site visits shall be conducted by persons not directly involved in the administration of the project.

V. Electronic Application Submission

Pursuant to the Federal Financial Assistance Management Improvement Act (Pub. L. 106-107), HHS is improving the efficiency and coordination of its grant-making processes by participating in the Federal Government's Grant Streamlining Initiative. For all FY06 competitions, ANA will participate in the Grants.gov process, which allows applicants the opportunity to submit applications electronically. Applicants are not required to submit electronically and can still submit hard copy applications. The applicant is responsible for ensuring on-time electronic submission is fully achieved. The following activities and application submission requirements will become effective in FY06:

- ANA will no longer publish PAs in the **Federal Register**. Official ANA PAs will be posted on the Grants.gov Web site. PAs will also be posted on the ANA Web site and on the ANA T/TA providers' Web sites.

- Due to limitations on the number of times the Objective Work Plan form can be replicated within the Grants.gov system, applicants will be limited to no more than six (6) project objectives per budget period. This limitation applies to all applicants regardless of type of

submission format: Hard copy or electronic submission.

VI. Environmental Mitigation

ANA received pass-through funds from the Department of Defense for Tribal and Tribal organizations to offset the effects of military actions at Formerly Used Defense Sites (FUDS). ANA will announce the availability of these funds in FY06. A request for financial assistance in this program area does not require a non-Federal share match requirement.

VII. SEDS Special Initiatives

ANA has the discretionary authority to make awards in support of special initiatives, including but not limited to, healthy marriage and relationships, fatherhood, positive youth development and emergency support to Native communities affected by man-made or natural disasters. In FY06, ANA will announce the availability of funding for special initiatives when practicable. A request for financial assistance for any of the special initiatives will require a non-Federal share match requirement.

VIII. Post Award Training

ANA, through contracted services, conducts regional post award training. Past practice has been to provide funding to new grantees for attendance at this training in order to provide additional assistance and information on managing a Federal award. In FY06, ANA will require all applicants to include in their Federal budget request the costs associated for the proposed project's finance person and the project manager to attend this regional training. It is determined that due to many reasons, largely grantee staff turnover, every grantee receiving an ANA award will benefit from the information provided at post award training, and therefore the expense is considered reasonable for all applicants to include in their budget request and also reflect in the activity in their Objective Work Plans.

IX. ANA Administrative Policy

The following policy will be used in all FY06 PAs. ANA has clarified many areas that applicants have historically found difficult to understand and that have previously prompted numerous questions and created application and project development inconsistencies. The ANA PAs will now include this clarified policy:

- If the applicant, other than a Tribe or an Alaska Native Village government, is proposing a project benefiting Native Americans, Alaska Natives, or both, it must provide assurance that its duly

elected or appointed board of directors is representative of the community to be served. An applicant's governing board will be considered representative of the community to be served if the applicant demonstrates that at least a majority of the board individuals fall into one or more of the following categories: (1) A current or past member of the community to be served; (2) a prospective participant or beneficiary of the project to be funded; (3) have experience working with the community to be served by the project; or (4) have a cultural relationship with the community to be served.

Commissioner, Administration for Native Americans.
