SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

NEW OPERATING SYSTEM FOR THE GLOBAL POSITIONING SYSTEM

The U.S. Air Force is transitioning to a new operating system for the GPS Constellation. The phased operational transition will migrate each satellite, ground antenna, monitor station and other GPS data feeds from the Master Control Station to the architecture evolution plan new Master Control Station in an incremental manner.

Users that experience problems, anomalies or outages with GPS are requested to provide online feedback via the USCG NAVCEN-S -GPS Outage Worksheet- at: [HTTP://WWW.NAVCEN.USCG.GOV/GPS/GPSUSERINPUT.HTM](http://WWW.NAVCEN.USCG.GOV/GPS/GPSUSERINPUT.HTM)

Mariners are encouraged to report all GPS, DGPS, LORAN or AIS problems, anomalies or outages to the USCG Navigation Center at: (703) 313-5900, E-mail: NISWS@NAVCEN.USCG.GOV

FLORIDA - ST JOHNS RIVER to ENTRANCE to JACKSONVILLE HARBOR - Waterways Analysis and Management System Study (WAMS ANNOUNCEMENT)

The U.S. Coast Guard is conducting a Waterways Analysis Management System (WAMS) study of the St Johns River. The study will include

FLORIDA - ST JOHNS RIVER to ENTRANCE to JACKSONVILLE HARBOR - Waterways Analysis and Management System Study (WAMS ANNOUNCEMENT)

looking at waterborne commerce and safe commercial and recreational navigation with a focus on the existing aids to navigation in the area. The St Johns River WAMS study includes the navigable waters from the St Johns Lighted Buoy STJ inbound to Winter Point south of the Fuller Warren Bridge.

The study specifically targets: Precautionary and Regulated Navigation Areas, port facilities and Army Corps of Engineer surveys and projects. The study will also be expanded to include the ST Johns Light, Mayport Basin, intersection of the Intracoastal Waterway, Blount Island and the Trout River up to the Trout River Swing Bridge.

WAMS studies are conducted periodically throughout designated navigable waters to better facilitate safe and effective waterways. Any interested group, association, company or individual wishing to provide recommendations or comments on existing, additional or reduction of aids to navigation in this area, may participate in a user survey, or receive further information may contact CWO4 Dave Foley by 30 November 2007.

CWO4 Dave Foley can be reached at Coast Guard Sector Jacksonville, Waterways Management Division, at (904) 564-7565, via e-mail at David.X.Foley@uscg.mil or via mail at: Commander (WAMS), USCG Sector Jacksonville, 4200 Ocean Street, Atlantic Beach, FL 32233, Attn: CWO4 D. X. Foley Jr.

Hurricane Season

The hurricane season extends from June through November. Hurricanes can cause excessive damage to vessels and loss of life. To minimize these dangers, the following precautions should be taken by all mariners before getting underway during the hurricane season:

- (a) Instruction of crew and passengers in location of emergency equipment and emergency procedures;
- (b) Pre-sailing check of vessel, machinery, and equipment for seaworthiness;
- (c) Installation of strong ground tackle;
- (d) Review of storm center evasion procedures;
- (e) Knowledge of nearest hurricane shelter or port; and
- (f) Constant radio watches on channel 16 VHF-FM and frequent monitoring of weather broadcasts.

HURRICANE INFORMATION

The civilian hurricane warning service for the North Atlantic is provided by the National Hurricane Center, Miami, Florida. The center collates ship, aircraft, radar, and satellite data to produce and issue tropical cyclone warnings and forecasts for the North Atlantic Ocean, including the Caribbean Sea and the Gulf of Mexico. A Tropical Cyclone Advisory message is issued every six hours, with intermediate bulletins provided as needed.

For tropical storms and hurricanes threatening to cross the coast of the U.S., coastal warnings are issued to the public so that precautionary actions, including evacuation, can be initiated to minimize damage and loss of life. Two levels of warnings are employed:

Hurricane Season

(a) HURRICANE WATCH - a preliminary alert that a hurricane MAY threaten a specified portion of the coast. It is issued 36 hours before landfall may occur; and

(b) HURRICANE WARNING - which indicate that hurricane conditions are EXPECTED along a specified portion of the coast. It is issued 24 hours before landfall. To provide additional information for maritime interests, a Marine Advisory is also issued which provides storm position forecasts for up to 72 hours in advance of a storm, and probabilities of hurricane strikes for coastal locations and offshore coordinates.

Mariners are reminded that aids to navigation, particularly lighted and unlighted buoys, may be moved from charted position, damaged, destroyed, extinguished or otherwise deemed discrepant as a result of hurricane and storms. Mariners should not rely solely upon the position or operation of an aid to navigation, but also employ such other methods of determining position as may be available.

Mariners are further reminded that during the hurricane season drawbridges along the coast may deviate from normal operating procedures. Drawbridges are authorized to remain closed upon approach of gale force winds of 34 knots or greater. Others may be authorized to extend closed periods prior to gale force winds to facilitate evacuation of land traffic or close operations up to 8 hours before expected arrival of gale force winds. Due to the uncertainty of hurricane movements and bridge closures, mariners are urged to seek passage through drawbridges well in advance of the arrival of gale force winds.

GPS INTERFERENCE TESTING FOR CAPE CANAVERAL

The GPS Navigational Signal may be unreliable from 25 May 2007 through 31 December 2007, due to interference testing on GPS Frequencies used in shipboard navigation and handheld systems. GPS systems that rely on GPS, such as E-911, AIS and DSC, may be affected within a 3NM radius of position 28-28-14N 080-34-48W. During this period GPS users are encouraged to report any GPS service outages that they may experience during this testing via the Navigation Information Service (NIS) by calling (703) 313-5900 or by using the NAVCEN's web-site's GPS report a problem worksheet at www.navcen.uscg.gov

LNM: 24/07

SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. **It is up to the mariner to decide which chart(s) are to be corrected.** The following example explains individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners

FLORIDA- TAMPA BAY ENTRANCE- TAMPA BAY: Marine Advisory.

In order to minimize the risk of collision with deep draft vessels and improve the safe transit of shallow draft vessels within the Tampa Bay and its approaches, the Coast Guard Captain of Port Tampa, Florida issues the following advisory: A NOAA survey number H-11344 conducted in July, 2004 reported that a water depth of 10 feet extends approximately 500 feet outward from both sides of the main ship channel in the waters west of the Sunshine Skyway Bridge adjacent to Egmont Channel, Mullet Key Channel, and Tampa Bay Cut "A" except in the vicinity of the Sunshine Skyway Bridge where existing security zones prohibit navigation closer than 100 feet around all bridge supports, dolphins, and rocky outcroppings from piers 88 to 135. Continuing east of the Sunshine Skyway Bridge, the advisory includes the waters adjacent to Point Pinellas Channel, Tampa Bay Cuts -A-, "B", "C", "D", "E", "F", "G", "J", "J-2", West of "K" Cut, Gadsen Point Cut, and Hillsborough Bay Cuts "A", and "C". All vessels drafting less than 10 feet may consider utilizing waters that have been identified by the 2004 NOAA survey parallel to, and within 500 feet of, the main ship channel when identifying the safest navigational course for transiting Tampa Bay and its approaches.

OPERATION "ON GUARD"

U. S. Coast Guard Marine Safety Office Miami announces Operation "ON GUARD". This operation is designed to employ Coast Guard - active duty, reserve and auxiliary, Federal Bureau of Investigation, US Customs Service, US Immigration and Naturalization Service and the Florida Department of Law Enforcement personnel in response to suspected terrorist activity at the waterfront facilities of the United States. South Florida is extremely vulnerable because it is the terminus of illegal alien and narcotics smuggling routes from the Bahamas, the Caribbean and South America. These routes are well established and are readily available for use by terrorist organizations. An urgent need existed to make the American Public equal partners in the fight on terrorism. Operation "ON GUARD" creates an effective deterrent measure that employs the eyes and ears of the marine industry and the boating public, people that know every inch of the coastline because it is where they work and play. Potential terrorists are put on notice that their activities will be seen and reported.

Operation "ON GUARD" takes a two pronged approach consisting of face to face visits by Coast Guard, FBI, USCS, INS and FDLE personnel combined with a coordinated joint agency media campaign to reach Marina Operators, Marine Dealers, Bridge Tenders, Commercial Fishermen, and the Boating Public. This operation relies on Coast Guard Auxiliary programs already in place like the "Clean Marina" program, Vessel Safety Checks, Marine Dealer Visits and the Commercial Fishing Vessel Safety Program to reach their normal customers, the waterfront users. The public is provided with the toll free number (1.800.424.8802) for reporting suspected terrorist activity to the National Response Center and the 1.800.BE ALERT number for US Customs along with a list of reporting criteria.

Report:

- Suspicious persons conducting unusual activities
- Individuals establishing businesses or roadside food stands in proximity to marina or bridge
- Unknown persons photographing or creating diagrams
- Unknown or suspicious persons loitering for extended periods of time
- Unknown or suspicious persons renting watercraft
- Suspicious vendors attempting to sell/deliver merchandise or drop off packages
