INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY, AUGUST 29, 2000 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL V

## CURRENT SITUATION:

A total of nine new large fires were reported, three in the Northern Rockies, three in the Southern Area and one each in the Northwest, Southern California and Northern California Areas. Crews reached containment goals on eight large fires in the Northern Rockies, Northwest, Southwest and Southern Areas. Initial attack activity was light to moderate nationwide. Predicted strong winds in Wyoming and Montana will present challenges for firefighters on the large fires in the northern Rocky Mountains. Very high to extreme fire indices have been reported in all western states and in North Dakota, Texas, Arkansas and Oklahoma.

## NORTHERN ROCKIES AREA LARGE FIRES:

An Area Command Team (Edrington) is assigned to manage the large fires in the Hamilton area. An Area Command Team (Mann) is assigned to manage the large fires in southwest Montana. An Area Command Team (Meuchel) is assigned to manage the large fires in central Montana. An Area Command Team (Gale) is assigned to manage the large fires in northwest Montana. Priorities are being established by the Northern Rockies Multi-Agency Coordinating Group based on information submitted via Wildfire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

WILLIE, Custer National Forest. A Type I Incident Management Team (Frye) is assigned. This fire is five miles southwest of Red Lodge, MT. The fire is moving north and west with some slopover into Rock Creek. Retardant has been used very effectively. Approximately 100 structures are threatened. Acreage decrease is due to more accurate mapping.

VALLEY COMPLEX, Bitterroot National Forest. A Type I Incident Management Team (Stutler) is assigned. The Army's 3rd Battalion 327th Infantry from Ft. Campbell, KY, commanded by LTC Lehr, is assigned. These fires are seven miles south of Darby, MT. The complex consists of the Bear, Taylor, Taylor Spot, Hilltop, Razor, Fat and Mink fires. The Fat and Taylor fires have grown due to winds. Fire activity has increased on most of the other fires also. Poor visibility is hampering aerial support and reconnaissance flights. At least 700 homes are still evacuated.

SKALKAHO COMPLEX, Bitterroot National Forest. A Type I Incident Management Team (Myers) is assigned. This group of fires is ten miles southeast of Hamilton, MT. Included in the complex are the Bear, Coyote and Skalkaho Falls fires. Increased activity has been observed on the north slopes. Protection of structures in Skalkaho, Sleeping Child, Little Sleeping Child and the east side of Old Darby Road remain the priority.

BLODGETT TRAILHEAD, Bitterroot National Forest. A Type II Incident Management Team (Hendricks) is assigned. This fire is three miles northwest of Hamilton, MT. Fire activity has again been light, with smoldering and creeping through unburned fuels with little open flame
observed. Helicopters have been utilized to keep the fire out of the Sheafman Creek and Canyon Creek drainages.

WILDERNESS COMPLEX, Bitterroot National Forest. A Type II Incident Management Team (Cook) is assigned. The complex consists of 14 fires in the Selway-Bitter root and Frank Church River of No Return Wildernesses, 40 miles southwest of Hamilton, MT. Large fires in the complex include the Hamilton, Lonely, Fitz, Thirty, Echo and Throng fires. Helicopter bucket work has been initiated on the Lonely fire to reduce spread near the Magruder Ranger Station.

THOMPSON FLAT COMPLEX, Lolo National Forest. A Type I Incident Management Team (Studebaker) is assigned. This is a complex of six fires in the vicinity of Superior, MT. A burnout operation along the northeast portion of the Flat Creek fire has been slowed due to increasing winds developing in the area. Structure protection continues in the Trout Creek and Quartz Flat areas.

UPPER NINEMILE COMPLEX, Lolo National Forest. A Type I Incident Management Team (Bateman) is assigned. The Army's 20th Engineers Battalion from Ft. Hood, Texas, commanded by LTC Shumway, is assigned. These fires are burning 25 miles northwest of Missoula, MT. Indirect fireline construction on two divisions of the Ninemile fire should be complete in one or two days. All firelines on the Alpine fire are holding and mopup operations are continuing.

CLEAR CREEK DIVIDE COMPLEX, Flathead Agency, BIA. A Type I Incident Management Team (MacGregor) is assigned. This complex, 60 miles northwest of Missoula, consists of the Clear Creek, Vanderburg, Siegel, Seepay and Magpie Creek fires. Crews are maintaining fireline west of Magpie Creek and securing fireline along the south side of the Vanderburg fire. The fireline constructed by dozers on the Upper Sepay fire is holding.

RYAN GULCH, Southwestern Land Office, Montana Department of Natural Resources and Conservation. A Type II Incident Management Team (Hoff) is assigned. This fire is 15 miles east of Clinton, MT. Crews are making good progress with mopup and rehabilitation operations. Helicopter bucket drops have been utilized on the Alder Creek fire.

MONTURE/SPREAD RIDGE, Lolo National Forest. A Type I Incident Management Team (Wands) is assigned. The fires are 15 miles east of Seeley Lake, MT. Winds have been relatively calm. The northern and northeast portions of the Crimson, Monture and Spread fires continue to grow. Crews are holding the southern edge of the Spread fire and constructing fireline on the western flank of the Monture fire.

CROOKED, Clearwater National Forest. A Type II Incident Management Team (Anderson) is assigned. The fire is 50 miles southwest of Missoula, MT, near Lolo Pass. Burnout operations on the south flank of the fire are continuing. Some isolated torching has been observed on the interior of the fire, but otherwise activity has been minimal overall.

MAUDLOW/TOSTON, Central Land Office, Montana Department of Natural Resources and Conservation. Two Type II Incident Management Teams (Joki and Greene) are assigned. These fires are 25 miles northeast of Belgrade, MT. Interior islands continue to burn out with some torching. Rehabilitation plans and specifications are being developed.

MIDDLE FORK COMPLEX, Beaverhead-Deerlodge National Forest. A Type I Incident Management Team (Hart) is assigned. The complex consists of the Falls Creek, Cougar Creek/Coyote Springs/Medicine Lake (CCML), Skalkaho Pass, Lick Creek and Cooper Creek fires, 30 miles southwest of Philipsburg, MT. Fuels are burning actively with single and group torching continuing throughout the afternoon. Short crown runs, mainly in the interior and on the Skalkaho Pass fire, have been observed. The acreage reduction is due to counting only that portion of the Coyote fire which is on the Beaverhead- Deerlodge National Forest. The rest of the Coyote fire is being counted as part of the Skalkaho Complex.

MUSSIGBROD COMPLEX, Beaverhead-Deerlodge National Forest. A Type I Incident Management Team (Humphrey) is assigned. These fires are 12 miles northwest of Wisdom, MT. The complex includes the Mussigbrod and Maynard fires which have now burned together. Efforts have been initiated to strengthen the fireline by burning the interior grass and sage fuels.

KOOTENAI COMPLEX, Kootenai National Forest. A Type I Incident Management Team (Longpre) is assigned. These fires are 20 miles northwest of Libby, MT. Crews have initial attacked the North Grizzly fire and will suppress the West Grizzly fire today.

STONE YOUNG, Kootenai National Forest. A Type II Incident Management Team (Colla) is assigned. The complex is 65 miles northeast of Libby, MT. Spotting across firelines is continuing in the area of Pinkham Creek Road. Calmer weather and higher humidities are aiding suppression efforts. No major spots have been located outside the firelines. On the Cliff Point fire, construction of indirect firelines has been completed and a burnout operation is in progress.

TROY SOUTH, Kootenai National Forest. A Type II Incident Management Team (Gauger) is assigned. The Army's 1st Battalion 321st Artillery from Ft. Bragg, NC, commanded by LTC Mathis, is assigned. This complex of fires is near Troy, MT. Torching and occasional short runs are causing short range spotting and some fire growth. Crews continue to patrol, suppress and mopup the Studebaker Draw, Kadsie Creek, 0'Brien, No See Um, Frezkat East and West fires. Mopup operations continue on the Pulpit and Taylor Peak fires.

CHIPMUNK, Flathead National Forest. The fire is burning in spruce, subalpine fir and brush 45 miles southeast of Kalispell, MT. The fire continues to move east with slowed fire activity occurring as the fire encounters lighter fuels. Spotting to the north is a concern. The fire received . 03 inch of rain overnight.

GREEN MOUNTAIN, Kootenai National Forest. These fires are seven miles northwest of Trout Creek, MT. The complex includes the Green Mountain, McNeeley, Basin Creek and Engle fires. No new information was received.

BEAVER CREEK, Gallatin National Forest. A Type II Incident Management Team (Corbin) is assigned. This fire is south of Big Sky, MT. No significant fire behavior or perimeter growth has been reported.

BURNT FLATS, Clearwater area, Idaho State Department of Lands. A Type I Incident Management Teams (Stovall) are assigned. The fire is three miles from Whitebird, ID. No new information was received.

NORTHWEST PEAKS COMPLEX, Idaho Panhandle National Forest. A Type II Incident Management Team (Tainsh) is assigned. The fires are burning in subalpine fir and spruce 40 miles northeast of Bonners Ferry, ID. Fireline has been completed along the northwest perimeter and is being built around a slopover on the southwest flank. Fire behavior has been mild, but a large amount of unburned fuel in the interior has the potential for reignition, torching and spotting. Helicopter bucket work and mopup operations continue on several spot fires.

THREE BEARS, Nez Perce National Forest. A Type II Incident Management Team (Stump) is assigned. This fire is on both sides of the Salmon River, 29 miles from Elk City, ID. Site protection measures are complete at Lantz Bar. Protection of Campbells Ferry and the Jim Moore Place are underway. The fire has been given responsibility for structure protection along a 14 mile stretch of the Salmon River Canyon, and evaluation of the sites there has started.

SUGARLOAF, Gallatin National Forest. The fire is 13 miles northeast of Wilsall, MT. Observed fire behavior includes individual tree torching and small uphill runs. The fire is located in an area of very steep, rocky terrain.

CYCLONE RIDGE, Flathead National Forest. This fire is 35 miles north of Kalispell, MT. No fire growth was observed on 8/27. Then the fire jumped containment lines on $8 / 28$ and has grown to 200 acres.

SPRUCE COMPLEX, Yellowstone National Park. This is a complex of 11 fires in Yellowstone National Park. The complex consists of the Plateau, Moose, Unlucky, Boundary and several smaller fires. The fires are showing heat on their perimeters but no major acreage gains have occurred.

NOSEBAG 22, Idaho Panhandle National Forest. This fire is burning in subalpine fir, spruce, brush and grass 18 miles northeast of Sandpoint, ID. Crews and hose lays are being used on hot spots along the northern and northeast perimeters of the fire. Extremely heavy brush and deep-burning hot spots are slowing containment efforts.

JUDITH COMPLEX, Lewis and Clark National Forest. This complex consists of the Studhorse, Lost Fork and High Springs fires, which are 25 miles southwest of Stanford, MT. High relative humidities kept the fire inactive until late afternoon, when some torching occurred on the southeast corner.

BLACKTAIL COMPLEX, Theodore Roosevelt National Park. This complex of four fires is 20 miles north of Medora, ND. They were caused by lightning on 8/26. The Maahdaahhey Trail and Scenic Drive Loop in the South Unit of the park have been closed. The fires are burning in badlands with steep terrain, limited access and dry fuels hindering containment efforts.

PEASE, Crow Agency, BIA. This fire is five miles east of Billings. Crews and dozers are making good progress toward containment.

SHARON, Glacier National Park. This fire is near North Fork in Glacier National Park, MT. The fire continues to spread actively to the southeast. Passive torching and spotting has been noted. Winds are hampering suppression efforts. POACHER, Clearwater National Forest. This
fire was ignited by lightning on 8/19 and has now grown to reportable size.

LIGHTNING MOUNTAIN 17, Idaho Panhandle National Forest. This fire is 18 miles northeast of Sandpoint, ID. It started on $8 / 12$ and is burning in a remote area of steep, rocky terrain. Fuels are subalpine fir, Engleman spruce, brush and grass. This fire has received some retardant drops to slow the spread into sensitive ecosystems and areas with erosion-prone soils. A crew has been flown in to construct a helispot on a ridge at the southern end of the fire, to facilitate planned suppression efforts.

SHEEP LIGHTNING 3, Idaho Panhandle National Forest. This fire is 18 miles northeast of Sandpoint, ID. It was ignited on $8 / 10$ by lightning. The fuels involved are subalpine fir, Engleman spruce, brush and grass. An excavator has built a fireline along the east flank of the fire. Crews are laying hose, constructing fireline and suppressing hot spots. Cooler temperatures and higher relative humidities are helping to moderate fire activity.

COPPER, Clearwater National Forest. This fire, which was ignited by lightning on 8/5, is 40 miles northeast of Pierce, ID. The fire is being monitored by U.S. Forest Service personnel.

HELEN CREEK, Flathead National Forest. This fire is 22 miles south of Spotted Bear, MT. The fire is actively backing to the west and south with minimal movement to the north. Four structures are threatened, but the threat to the Mud Lake Lookout has been reduced. The fire is being monitored by U.S. Forest Service personnel.

HIDDEN CREEK, Clearwater National Forest. The fire is 12 miles southeast of Powell, ID. The fire has been burning actively on all flanks. Movement has been toward Big Sand Creek. Helicopter bucket drops are preventing the fire from moving out of the wilderness to the northwest.

LONG RIDGE, Nez Perce National Forest. This fire is in the SelwayBitterroot Wilderness, 14 miles southwest of the Moose Creek Ranger Station. The fire is being monitored by reconnaissance flights and by the Gardiner Lookout. Minimal fire activity has been noted.

MINARET PEAK, Flathead National Forest. The fire is near the Spotted Bear Ranger Station in the Bob Marshall Wilderness. No significant fire activity has been reported.

EAST THUNDER 14, Idaho Panhandle National Forest. This fire is 23 miles east of Sandpoint, ID. Fuels are subalpine fir, spruce, brush and grass. Forest Service personnel are monitoring the fire. The fire is less than 0.2 miles from the boundary of a proposed wilderness area. Strategies are being prepared for suppression if the fire leaves the proposed wilderness area.

MCDONALD II, Lewis and Clark National Forest. This fire is 36 miles northwest of Choteau, MT. This will be the last report unless significant activity occurs.

PARKE PEAK, Glacier National Park. The fire has been burning since 7/23 in the northwest corner of the park. No significant fire activity has been reported.

FROG LAKE, Clearwater National Forest. The fire is 16 miles southeast of Powell, ID. The fire is being monitored by U.S. Forest Service personnel. No smokes have been visible for several days.

ELIZABETH, Clearwater National Forest. The fire is 33 miles northeast of Pierce, ID. The fire is being monitored by U.S. Forest Service personnel.

SNOW CREEK, Clearwater National Forest. The fire is 30 miles northeast of Pierce, ID. U.S. Forest Service personnel are monitoring the fire.

ALDER CREEK, Lolo National Forest. This fire is 31 miles southeast of Missoula, MT. Fire activity has primarily been in the fire's interior. The fire movement is backing down to Rock Creek.

CRIMSON PEAK, Flathead National Forest. This fire is located in the Bob Marshall Wilderness. The fire is backing into Young's Creek drainage. The rate of spread is being monitored by U.S. Forest Service personnel.

## EASTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildfire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

TRAIL CREEK, Boise National Forest. A Type II Incident Management Team (Shell) is assigned. This fire is near the community of Atlanta, ID. Structure protection and safety remain the primary concerns. The fire continues to burn actively. Southwest winds are persistent in pushing the fire back against itself.

CLEAR CREEK, Salmon-Challis National Forest. A Type I Incident Management Team (Hutchison) is assigned. The fire is ten miles west of Salmon, ID. The 3rd Battalion 5th Marines from Camp Pendleton, California, commanded by Col. Callihan, is assigned. Unfavorable fire weather combined with frequent spot fires is making containment objectives difficult to attain. The Clear Creek and Aparejo fires are one half mile apart, and are expected to burn together. Burnout operations continue on the northeast corner of the fire.

MARLIN SPRINGS, Salmon-Challis National Forest. A Type I Incident Management Team (Hefner) is assigned. This fire is burning along the ridge between Montana and Idaho, 40 miles northwest of Salmon, ID. This complex consists of the Marlin Springs, Full Circle and Sister fires. The fires continue to increase in size. Heavy smoke has prevented any detailed reconnaissance.

TETON COMPLEX, Grand Teton National Park, NPS. A Type II Incident Management Team (Murphy) is assigned. This complex is north of Jackson, WY. It consists of the Wilcox, Moran, Hechtman, Glade and Enos fires. Yellowstone National Park employees are providing structural protection for Flagg Ranch. The Wilcox fire continues to spot and advance to the west and north. Structure protection continues for the Berry Creek patrol cabin.

NICK, Payette National Forest. A Type II Incident Management Team
(Saleen) is assigned. This fire is burning in subalpine fir 12 miles east of McCall, ID. The fire continued to advance down Fitsum Creek to within one mile of Krassel Work Station. Structure protection and evacuation plans for the Zena Ranch, Krassel Work Station, the town of Yellowpine and Eiguren Ranch have been developed.

BLIND TRAIL COMPLEX, Bridger-Teton National Forest. A Type II Incident Management Team (Williams) is assigned. This complex consists of the Blind and Boulder fires. The fires are 26 miles southeast of Jackson, WY. The Boulder fire is in mopup and patrol status. Rough terrain is slowing containment on the Blind Trail fire.

FONTENELLE, Bridger-Teton National Forest. A Type II Incident Management Team (Mesenbrink) is assigned. This lightning-caused fire is 20 miles north of Kemmerer, WY. Current threats are two ranches and 150 to 200 summer homes.

BURGDORF JUNCTION, Payette National Forest. A Type I Incident Management Team (Dague) is assigned. The fire is 23 miles north of McCall, ID. Structure protection continues to be successful. An inversion reduced fire intensity. The fire has spread slowly into the Mackay Bar area, as well as Warren and Mann Creek.

HARMON CREEK, Dixie National Forest. This fire is located 25 miles north of St. George, UT. Some torching and ground fire have been noted with minor runs and minimal spread.

MORSE, Salmon-Challis National Forest. The fire is burning in grass, sagebrush and douglas fir five miles east of May, ID. Sunny skies and gusty afternoon winds on the fire caused some runs. Crews are constructing a fuel break in the east fork of Little Morgan Creek. Structure protection is also in place for that area.

SIDDOWAY, Targhee National Forest. This fire is burning in moderate to heavy timber 14 miles east of Swan Valley. Limited access, torching and spotting are hampering control efforts.

HALF MOON COMPLEX, Bridger-Teton National Forest. This complex, consisting of the Half Moon and the Triangle Lake fires, is near Pinedale, WY. The Half Moon fire is contained and progress continues with mopup. The Triangle fire is 50 percent contained by natural barriers with minimal fire activity.

INDIAN/PROSPECT, Payette National Forest. A Type II Incident Management Team (Saleen) is assigned. The fire is 33 miles east of McCall, ID. Resources have been committed to structure protection at Zena Ranch and Krassel Work Station.

SCF WILDERNESS, Salmon-Challis National Forest. A Type II Incident Management Team (Adams)has been assigned. Eleven wildland fires are currently burning within the Salmon Challis Wilderness Complex: Little Pistol, Indian Creek, Filly, Butts, Papoose, Parker, Packer Meadow, Shell Rock, Wilson Creek, Jackass and Jack Creek. The Little Pistol fire has crossed the Middle Fork of the Salmon River, burning 17 primary structures and four outbuildings at Pistol Creek Ranch. The Indian Creek Guard Station is currently threatened. Middle Fork Lodge has been evacuated. Smoke is hampering aerial observations.

DIAMOND COMPLEX, Payette National Forest. These lightning-caused fires are 42 miles northeast of McCall, ID. This complex consists of the Lookout, Point, North Shellrock and South Shellrock fires. Loss of the Acorn Butte Lookout in the Frank Church River of No Return Wilderness has been confirmed.

FLOSSIE COMPLEX, Payette National Forest. These fires are 50 miles northeast of McCall, ID. Structure protection continues at Root Ranch.

## NORTHWEST AREA LARGE FIRES:

EASTSIDE COMPLEX, Wallowa-Whitman National Forest. A Type II Incident Management Team (Gardner) is assigned. The complex consists of 11 fires adjacent to the Snake and Imnaha Rivers, 37 miles northeast of Enterprise, OR. Efforts are focused on structure protection. All fires in the complex continue to spread, with the Deep Creek fire spread primarily to the south. Threatened resources include historical structures, residences, powerlines, grazing lands, private lands and archeological sites.

CARROL CREEK, Wallowa-Whitman National Forest. An Oregon Department of Forestry Incident Management Team (Gilpin) is assigned. The fire is ten miles east of Wallowa Lake, OR. Fire activity has moderated. Some minor spotting is occurring, but helicopter bucket drops are helping to manage that situation. A burnout operation is underway on the southwest end of the fire.

MEADOW, Umatilla National Forest. A Type II Incident Management Team (Jennings) is assigned. This fire is 20 miles southeast of Ukiah, OR. Fuels are subalpine fir and lodgepole pine. The fire has been staying within containment firelines with few spotting problems.

HASH ROCK, Ochoco National Forest. A Type II Incident Management Team (Jackson) is assigned. This fire is 18 miles northeast of Prineville, OR. Isolated ground runs and minor torching on the interior of the fire have been observed. Long range spotting is a concern.

RAIL CREEK, Oregon Department of Forestry. The fire is ten miles east of Pilot Rock, OR. The primary fuel is grass. Engines and dozers are close to containment and plan to patrol the fire overnight.

FLAT CREEK, Wenachee National Forest. This fire is 70 miles south of Chelan, WA, in the Glacier Peak Wilderness. The fire is being monitored by U.S. Forest Service personnel. No new information was received.

## WESTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildfire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

PHILLIPS RANCH, Humboldt-Toiyabe National Forest and Great Basin National Park. The fire is 50 miles southeast of Ely, NV, and is being monitored by Park Service personnel. Crews are mopping up along the west side as the fire continues to smolder in stumps and duff.

CHERRY, Ely Field Office, BLM. This fire is 30 miles northwest of Ely, NV. Wildlife habitat and the Goshute Wilderness Study Area remain threatened. BLM personnel are monitoring the fire.

LITTLE WATER, Humboldt-Toiyabe National Forest. This fire is 60 miles southeast of Elko, NV, burning in white fir, isolated pinyon pine and mahogany. U.S. Forest Service personnel are monitoring the fire.

MAMMOTH, Humboldt-Toiyabe National Forest. The fire is burning in white fir and pinyon pine 75 miles southwest of Ely, NV, within the Grant Range Wilderness Area. U.S. Forest Service personnel continue to monitor this fire.

ROCKY MOUNTAIN AREA LARGE FIRES:
JASPER, Black Hills National Forest. This fire is 15 miles east of Newcastle, WY. A Type 1 Incident Management Team (Waterbury) is assigned. The fire continues to spread north and west. Good progress is being made south of Highway 16, although the highway remains closed. Direct fireline construction with dozers is progressing on the east and west flanks. Evacuations are still in effect around the fire.

ST. LAWRENCE, Wind River Agency, BIA. This fire is burning in the Wind River Roadless Area ten miles northwest of Fort Washakie. Low relative humidities and increased winds have resulted in active fire behavior mainly in the interior.

## NORTHERN CALIFORNIA AREA LARGE FIRES:

STORRIE, Plumas National Forest. A Type I Incident Management Team (Vail) is assigned. The fire is 20 miles west of Quincy, CA, in the Feather River Canyon. Two firing operations are working toward meeting at the head of Chips Creek drainage. Crews continue constructing indirect fireline on the northeast and west flanks of the fire. The south end of the fire is in patrol status. Structure protection activities continue along Highway 70 in the Rich Bar area.

AMERICAN, Nevada-Yuba-Placer Ranger Unit, California Department of Forestry. This human-caused fire started on 8/27 in the American River Canyon. The fire threatened a subdivision on the outskirts of the city of Auburn. Low fuel moistures, poor access and low relative humidities are causing challenges to crews. Containment was expected late last night.

## SOUTHERN AREA LARGE FIRES:

SNAKE EYES, Mississippi National Forest. This fire is located near Potts Camp, MS. The fire is burning in a 15 year old plantation. Containment is proving difficult due to heavy fuels, low humidities and high temperatures.

POSSOM, Florida Division of Forestry. The fire is near Orlando, FL. No new information was received.

ROYAL GORGE, Florida Division of Forestry. This lightning-caused fire is located near Lafayette, FL. No new information was received.

ROBERTSON ROAD, Texas State Forest Service. The fire is 30 miles north of Beaumont, TX. This fire is burning in a thick pine plantation and has jumped several roads. National Guard Blackhawks are assisting in containment efforts.

ROSELAND, Texas State Forest Service. This fire is burning in grass, brush, mesquite and juniper 50 miles southwest of Dallas, TX. Helicopter bucket drops are assisting efforts to protect structures.

LOCO GRANDE, Texas State Forest Service. This fire is located 40 miles west of Austin, TX. This fire is burning is in cedar, oak and juniper. The terrain is making access difficult.

## OUTLOOK:

*** A RED FLAG WARNING IS POSTED IN WESTERN AND CENTRAL WYOMING FOR GUSTY WINDS, LOW RELATIVE HUMIDITIES, DRY FUELS AND DRY LIGHTNING ***

```
*** A FIRE WEATHER WATCH IS POSTED ON THE EAST SLOPES OF THE ROCKY
MOUNTAINS IN CENTRAL MONTANA FOR GUSTY WEST WINDS AND LOW RELATIVE
HUMIDITIES ***
```

A Pacific trough will move across the northwest along the Canadian border. This will bring a chance of showers and thunderstorms to northern Washington, northern Idaho and western Montana. The air mass will remain dry in Oregon and central and southern Idaho. Monsoonal moisture will bring thunderstorms to the higher elevations in the Sierra Nevada, across central Nevada, Utah, Wyoming, and southward. Some storms in Wyoming may produce dry lightning, but the lightning will be wet elsewhere.

Winds will generally be southwest to west at 10 to 20 mph in the northwest United States. East slopes of the northern Rockies will be a little stronger. Further south, winds will be upslope or southwest at 15 mph or less.

Temperatures will be in the 70's to mid 80's in the mountains, mid 80's to $90^{\prime}$ s in the lower elevations and 100 to 110 in the hottest deserts.

Relative humidity will be in the teens and 20's with some single digit readings occurring in the driest areas.
***A FIRE WEATHER WATCH IS POSTED IN THE INLAND AREAS OF NORTHEAST FLORIDA FOR A HIGH DISPERSION INDEX DUE TO INCREASED WINDS AND DEEP MIXING.
