

Allowing Mexican trucking company's, in my opinion, to do business in our country will only result in problems ranging from security issues to destroying the American driver workforce. For you, our representatives, to honestly believe that Mexican trucking company's competing for freight business in our country won't ultimately result in American driver's inability to compete with cheap freight rates, and thus result in the hardship of thousands of American family's, is beyond me. Only foolish businessmen would actually think this won't happen.

I implore you, OUR representatives (not Mexican representatives), to put a deaf ear to the lobbyist and protect the workers of America and stop this pursuit of opening our borders to Mexican trucking company's. Many American's are not aware of the big American trucking company's doing business in Mexico, but I am one of the few that do. Common sense dictates that these company's are the force behind the lobbyist. If our government allows the borders to be opened to Mexican trucker's, these company's will take advantage of the cheap labor force and ultimately put thousands upon thousands of American family's in jeopardy. To point out the reality of what I'm stating...you, our government, de-regulated freight rates years ago - which has already placed hardships on many American drivers. If the border is opened to Mexican trucking company's, they WILL take advantage of this. And just like the owner-operator was unable to compete with large trucking company's because of cheap freight rates, so will the American driver be unable to compete with Mexican drivers because of cheap labor rates.

I DO VOTE
