Standard Atlantic

Fishery Information System (SAFIS):

A Winning Solution for Fisheries Statistics

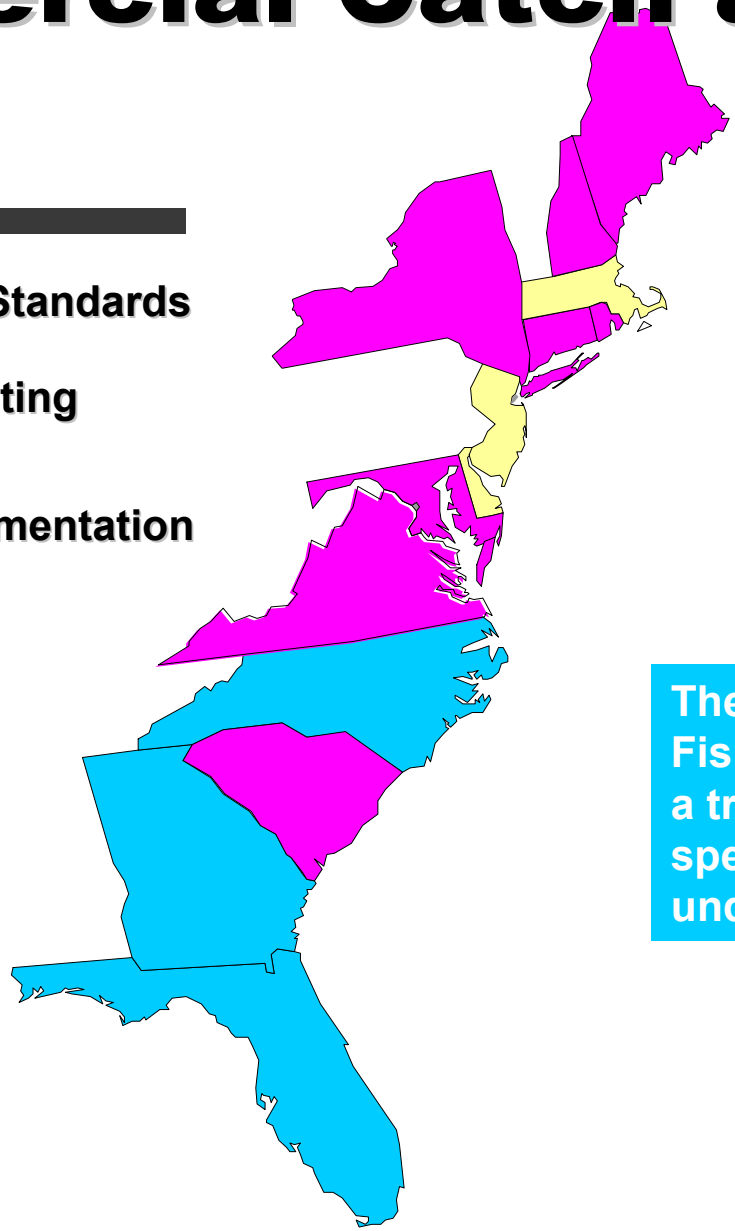
ACCSP
Good Data, Good Decisions

Atlantic Coastal Cooperative Statistics Program

Maury Osborn, Director

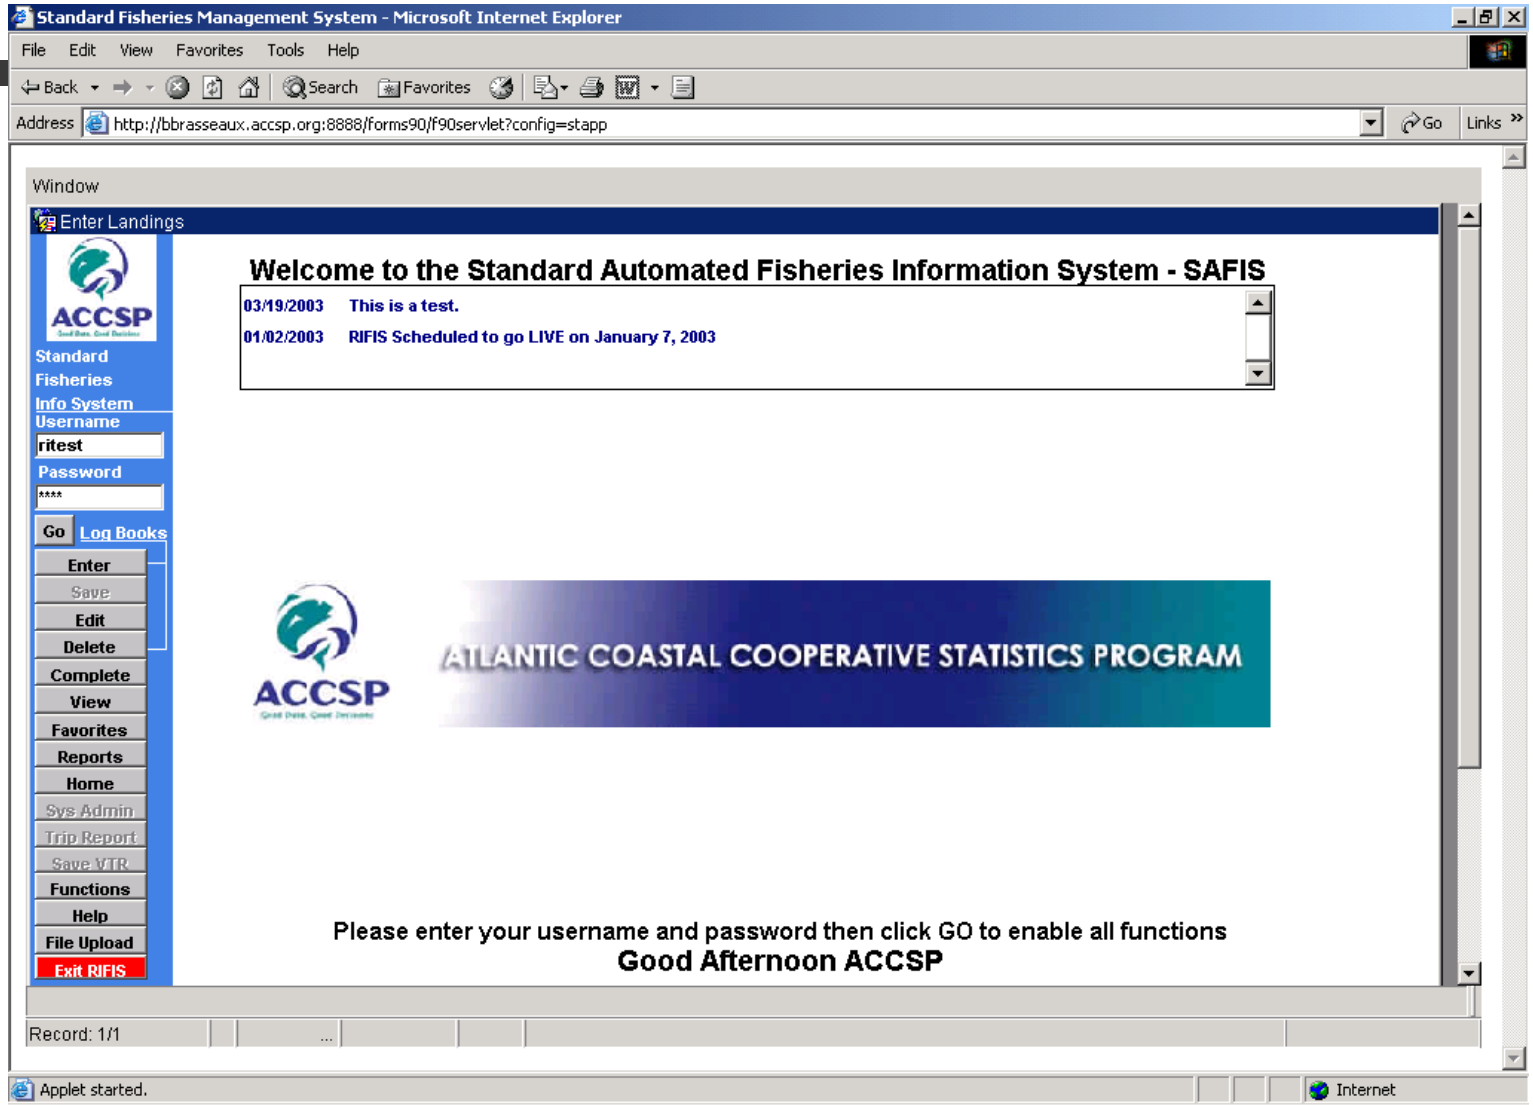
Commercial Catch and Effort

- Fully meet ACCSP Standards
- Currently Implementing ACCSP Standards
- Preparing for Implementation



The National Marine Fisheries Service requires a trip report for any species harvested or sold under a federal permit.

Integrated Data Collection



Customized for Partners

Benefits to Partners

Real-time for superior quota monitoring.

Easy quality control tools for partners to monitor data before it enters the state and coastwide data sets.

Free to partners wishing to host the system internally.

Cheap for partners and the industry with no mailing or printing costs for logbooks or reports.

Cheap for partners to maintain with no data entry clerks necessary.

Customer Service

The ACCSP staff is available to provide support to partners without dedicated IT staff under the marine resource management division.

The ACCSP staff works to simplify and integrate fishery-dependent data, not licensing, revenues or other functions.

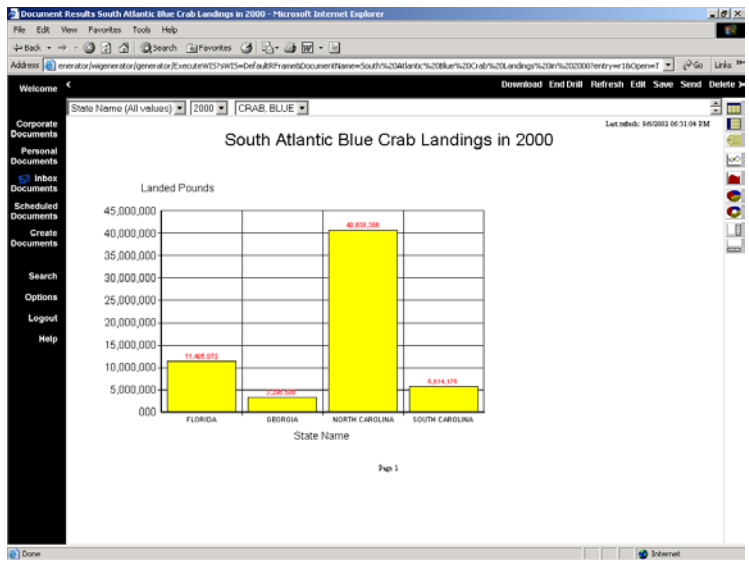
The ACCSP staff will provide the SAFIS code to other regional and state programs who wish to modify it.

Data Retrieval

Integrated Database Design

Timely Availability of Data

- **Non-confidential data for all**
- **Confidential data with appropriate permission from partners**



Highly Flexible Web Interface

ACCSP
Good Data, Good Decisions
