DIRECTORY OF PRINCIPAL AGGREGATES PRODUCERS IN THE CONTERMINOUS UNITED STATES IN 1999

Based on information reported to the U.S. Geological Survey quarterly sample survey, it was estimated that a total of 2.6 billion metric tons of aggregates—crushed stone and construction sand and gravel—were produced and shipped for consumption in the United States in 1999. The quarterly sample survey collects information by company and State only, and not by individual operation. A total of 356 companies and subsidiaries representing large- and medium-sized producers operating crushed stone quarries and construction sand and gravel pits in 48 States reported to the quarterly survey during 1999. Only those companies are listed in this directory. Not all operations listed in this directory reported production data to the quarterly sample survey, but were included to provide a complete listing for the reporting companies. The first three tables list the top 25 U.S. companies producing aggregates, crushed stone, and construction sand and gravel. The ranking of companies in these tables was based on the total production-for-consumption provided by the companies. Table 4 lists major producers in each of the 48 States surveyed.
