

Mark Abrams
845 Spring St. NW Unit 313
Atlanta, GA 30308

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. In due time conglomerants will own the internet. Just like they've taken control of the news media and tv networks. All news media is already controlled by five companies. If governments allow it, and in time, every segment of society will be owned by two companies each. (for competition) And, after that, when the time is right, those two companies will merge. With our present rules of government, it's inevitable.

You can either protect consumers from the abuses of telephone and cable companies, or walk away and let the telephone and cable companies chip away at the free and open Internet little by little until they can control consumer use of the network as they please. Comcast has demonstrated its abuse of the American people and our system of law and democracy when it paid disinterested bystanders to fill up the hearing in Boston, thereby preventing concerned citizens from attending, participating, and being heard on this issue. The people they paid to attend (and block out opposing voices) didn't even know what the hearing was about and many promptly feel asleep. This is a disgrace to our country and our supposed "representative democracy." Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Stop "Big Brother" from becoming a reality. Please send a message loud and clear so that other corporate entities learn from Comcast's actions.

Dot Dedman
245 Alabama Street
St Simons Island, GA 31522

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers, like AT&T, from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation, among other unfair, undemocratic practices. Please help us save net neutrality, so that the Net can help us revive our democracy. Our nation is in serious trouble. That is no secret to anyone but the most concrete among us. The Internet, when equally available to all Americans, can and will be one of the most effective tools we will ever have in, not only reviving our Democratic Republic, but improving it, in ways still not imaginable to many of us. I sincerely ask for your help, ongoing, and appreciate your decision to investigate Comcast

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I must say that I am in full agreement with the above sentiment. A free and unregulated Internet is vital to the efficient exchange of ideas in our country and should be guarded zealously. Thank you for your consideration of this request and actions to enforce true internet neutrality.

Charles Etheridge
1136 Mason Woods Dr.
Atlanta, GA 30329

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Though I do not personally do much in the way of file sharing, I do have a subscription to Netflix and would be very disappointed to have my online movie watching interfered with. As that viewing is mostly fairly late in the evenings I can't imagine that it would contribute at all to bandwidth overload. Other than that, any move away from Internet Neutrality would seriously jeopardize the ability of those such as I to have this sort of communication with your committee, and that manner of restriction would do the entire country great harm. Thank you for your serious consideration of this matter, and for the legal implementation of Internet Neutrality that I hope will result from that.

Morgan Eubanks
470 Bellemeade Drive SW
Marietta, GA 30008

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. Caleb Jones
1052 Fairmont Park Drive
Dacula, GA 30019

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Pardon the formal introduction so graciously provided to me but to put this in simplified terms, yet parallel, how would you feel sir or madam if your phone company sat in on your phone conversations and told you that this or that was permissible to talk about, or chimed in every few minutes or so and told you to hang up the phone and call back in an allotted amount of time? If telecommunications are going to provide us as consumers with an outlet of free speech then it should be

unfettered access by principal. Please, find it in yourself to overcome the temptations you might be offered (if you are an influential decision maker) by lobbyists to accept monetary compensation for a decision when you know that doing the Right and Just thing is more noble, satisfying, and rewarding in the end than any amount of money you may accept. I urge you to dig and see both sides of the argument on this issue and not just the one most readily presented to you which may very well be influenced by those who hold the monetary means of doing so.

Donal Jones
148 Jefferson Place
Decatur, GA 30030

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. This is a form letter but I'd like to add that Comcast is one of the worst and most deceptive of companies providing cable and internet services. You should be allowed to choose the channels want and pay accordingly instead of being forced to buy expensive packages of channels you don't want in order to get the few you do. Their high speed broadband internet service is deceptively marketed promising superior download speeds to DSL. In fact, their high speed service daily slows to a crawl during periods of increased customer usage. The fact is that their high speed service is rarely any faster than DSL, but considerably more expensive. This company has a virtual monopoly in my area with satellite being the only other real option.

Robert Judy

Carrollton, GA 30118

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Christina Lee
1316 McLendon Ave., NE
Atlanta, GA 30307

Comcast, or any internet service provider, that blocks any type of internet traffic for whatever reason is playing God and deciding on its own what the rest of us can and cannot do on the internet. Due to their filtering communications clandestinely, who knows what opportunities were missed by their customers -- we'll never know. They do this in the name of freeing up bandwidth on their server. But, if that's the case, it is just plain cheapness, or possibly an underhanded trick, on their part because a lack of enough bandwidth is a solvable problem. There are several things their actions demonstrate: First and foremost, we need the protection Net Neutrality provides so that we all have equal opportunity on the internet and no one gets preferential treatment. Why should they? What have they done that makes them so special that we should allow them to screen our communications at their whimsy and not even inform us when they do? The internet belongs to all of us, not to Comcast or any other entity or individual. Comcast is in the wonderful position it's in as a business thanks to net neutrality. Yet now that it's at the top of the heap, it is doing everything in its power to (a) keep from having any viable competition in the broadband market (it has no competition in my area), and (b) keep any other entities or individuals from gaining success as easily as they did. Why should everyone else be denied the same opportunity Comcast had, and why should society give up being able to benefit from all the innovation that the internet can produce, just so Comcast can play God, control elections and/or save themselves some money, all while charging an outrageous price for their service? How greedy can one get! They don't have enough competition because they were somehow able to get out of having to open up their broadband lines for common use, which destroyed all the other fledgling ISP businesses who had been waiting in the wings for those lines to open up for common use. Why do these hugely successful corporations get such preferential treatment at the expense of other companies and society in general. The only ones who benefit from this are Comcast and possibly the elected officials who they paid off in order to be able to stifle competition. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Atlanta, GA 30307

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. Comcast would not be blocking its customers' internet communications if it had competition. I know. I'm one of its customers and if Comcast had any competitors in my area (Atlanta, GA) I would most certainly switch my service to their competitor(s). Now I'm reading that at the public hearing with the FCC in Boston, Comcast filled the room with a bunch of warm, disinterested, bodies in order to keep the public from attending what is a PUBLIC Hearing, and that the people filling the room are all pretty much sleeping. I hope that the FCC is able to see the parallel between this and Comcast's filtering of its customers' internet communications without telling them they were doing so. By blocking the public from the public hearing in Boston, Comcast is showing its true colors. You see, Comcast has gotten a God complex due to having no competition and it has no respect for its customers or the public. The public's vital communications should not be subject to the whims and prejudices of a private corporation that can refuse to provide service if it wants to, or can mismanage its business and collapse, leaving its customers without a critical, sometimes life-sustaining, necessity, with no other available alternatives.

Is the company that tars and maintains our passengar car highways legally allowed to erect it's own toll booths and charge us money? No. And neither should Comcast or AT&T be allowed to. We, the users of the Internet, need fast, consistent, reliable access to any content and to run any application we want on the Internet. Telecommunications monopolies have competing offerings in television, phone services, media, movie delivery, and even in classified ads. It is not possible or even reasonable, in a free market system, for these companies to resist the urge to interfere with the traffic of their competitors. Why should they carry the traffic of their competitors or give them access to the fastest network routes? The answer is ... they won't, unless they are forced to. America needs a comprehensive policy related to the protecting of all Internet content. This policy is often labeled Network Neutrality. A policy is definitely needed as mounting evidence surfaces that these companies are in fact messing with end user applications to the point that they are re-authoring actual packets and falsifying packet identities. There is a broader reason telecommunications monopolies should be blocked from interfering with Internet traffic. Consider that America is suffering from many problems, debt, war, fewer engineers, declining education quality, increasing inflation, increasing debt, declining meritocracy, declining entrepreneurship and other substantial challenges. One exit to these problems is via non-destructive entrepreneurial growth. The principle existing conduit for such growth is the Internet and the implementation of many new ideas on the Internet is continuing to prove to be a substantial engine of economic growth for America. An unrestricted Internet where all entrants participate is required for these applications to grow. No one is saying telecommunications monopolies can't offer their own competitive Internet offerings, but they shouldn't be able to mess with the Internet itself to favor these conflicts of interest.

The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Bittorrent Peer to Peer protocol is used for a variety of legitimate and legal purposes including distributions of the Linux computer operating system, distributions of the OpenOffice.org office productivity suite, upgrades for video games such as those created by Blizzard, Inc., and distribution of user created video on the open source Miro player. These are all legal and legitimate uses of the Bittorrent protocol. A communication protocol does not break the law - people do. It is unjust and wrong to block a protocol that is being used for substantial legitimate traffic. This would be like shutting down a highway that served as the escape route for a group of Bank robbers. The Internet is a vital engine for economic growth, civic participation and free speech. Atlanta, GA 30315

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. What Comcast is trying to do goes against the Constitution of the United States. By trying to limit what one can access on the internet, it is a violation of free speech. If you allow this to happen, you might as well go ahead and limit the books that are published, cease a person's right to have their views published in an editorial, speak their mind at a public forum. The internet is for the people, not corporations to control. We have enough of this problem as it is with the mainstream media outlets. Sincerely, Matthew Mitchell

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.IN RETROSPECT..... We, the people, also recently spoke out against media consolidation in every way we know how: attending hearings, writing letters, submitting comments. However the FCC (Bush's appointed flunky) ignored this widespread public opposition -- just like it did in 2003. The FCC (especially Bush's appointed flunky) has turned its back on its mission and its mandate. Their decision to let Big Media get even bigger will erode localism, diminish minority ownership, and decrease competition.

Nick Moore

Snellville, GA 30078

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Furthermore, by allowing a single company or oligarchy of companies to control traffic to sites, you put the owners of these sites at risk of financial trouble. Google, for instance, makes a profit from the vast number of users who visit it everyday. Cut the number of people who can visit, cut the profit. We cannot allow one company to profit while simultaneously harming another. It is not the democratic system that the internet was established for.

Frank Moorman
910 Riverstone Way
Woodstock, GA 30188

Comcast's blatant and deceptive blocking of peer-to-peer and FTP communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. I am a computer programmer currently specializing in web development. I work from home and I have Comcast service. This blocking directly impacts my ability to work. I constantly need ftp access in order to update client websites. I also use peer to peer in order to download the latest linux distributions so that I have the tools I need to perform my job. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

This will be the beginning of the end of freedom of speech on the internet if you let them decide what we do on the internet. I pay them the money to provide me a internet service and that's exactly what I want them to do. FCC please take this as a petition against Comcast and any service provider who is trying to determine what I do on the internet.

There's a set block of text below, which I whole-heartedly support, but I thought I'd add my own thoughts. The internet has been a remarkably free place, and this freedom has allowed many things, weird, perverse, and wonderful to occur. Don't let that ability go away. The most valuable thing about the internet is its absolute openness. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. Snellville, GA 30039

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Comcast and Verizon reportedly packed the room with seat-fillers at today's meeting to keep the public out of the public hearing. There are even rumors that many of the seat-fillers were paid to sit there for the afternoon. (And many in the crowd had mysteriously matching yellow highlighters stuck in their lapels.) More than 100 people were turned away by campus police when the hearing room filled to capacity. The internet belongs to the public NOT the big corporations.

We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I wish there was a new cable/internet company that was innovative and dedicated to research, transparency and accountability. Maybe the FCC could authorize an "experimental" ISP that is not purely profit-motivated. The World Wide Web should be a tool for learning and sharing. Someone needs to start a new trend- make a stand against greed. Why not, I ask? How can a government agency extend the parameters of freedom and knowledge?

Richard Turner
2915 Newberry Way NW
Kennesaw, GA 30144

I have a small business online which has grown substantially since the development of the web. Without our web presence, we would still be struggling as we were back in the early nineties. Not only can our customers buy our products easily and securely over the web, but our success there has allowed us to hire more employees and put more money back into our community. The Giant telecoms and cable companies are trying to destroy this "level" playing field and force us to pay higher prices or not have our websites equally accessible to all customers. Please, please keep net neutrality. It is a major engine of growth for America's small businesses, the backbone of our economy. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Gabriel Wildau
1103 Sheridan Park NE
Atlanta, GA 30324

I am writing to urge the FCC to crack down on Comcast and its blocking of P2P network traffic. This should be a simple principle: regular Internet users, not big telecom companies like Comcast, should decide how the Internet should be used and what kind of content they want to send and receive. The desires of users should predominate over the priorities of big telecom companies. The Internet is a national resource, not something to be controlled by a few corporations.

Lawrenceville, GA 30044

Net Neutrality protections are nothing but a cover-up for an anarchist mentality that the Internet should be able to do things and be a conduit for activities normally punishable through the courts and other methods of regulation. This is something along the lines of "free love" from the hippy movements of the 60's. The FCC must take seriously a business' right to control how a product or service they provide is utilized. At least in this instance, I agree with any ISP who believes that the use of P2P networking is nothing more than a pipeline for illicit trafficking of copyrighted materials. Everything from software, movies, music, and written literature make up the vast majority of materials "shared" over such networking mediums. To say that an ISP such as Comcast does not have the right or obligation to limit these activities is absurd. The Internet truly is a vital engine for economic growth, civic participation and free speech. No one is limiting anyone's freedom of speech. They are simply limiting a person's ability to make instance headlines. If someone wants their music, video, or literary work published, they can purchase a domain name, create a web site, and offer the song, video, or literary work as a downloadable file. The "anything goes" or "I have the right to do anything I please on the Internet" mentality is ludicrous. The same legal standards, levels of decency, and responsibility should be the governing factors in decisions on such topic

Acworth, GA 30102

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Unfortunately, Comcast has exclusivity to the cable servicing my home and neighborhood. I've already been restricted in my choice of service providers by this restrictive elimination of competition. Do not allow Comcast to censor and restrict what I should legally be allowed to access in terms of public information and use of the Internet. Please hold Comcast accountable for their illegal actions. Sincerely, Janet Wise

THIS IS INFURIATING!!!!!!! Incidents like this incline one to believe that term limits need to be applied to our sleeping representatives. These corporations should be prosecuted for acts such as this and if they aren't breaking any laws by pulling stunts such as this then you folks nee to legislate new ones. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information.
