CERES SCF Working Group STATUS Table for Sept. 03, 1997

DESCRIPTION	Status	Problems
Thunder (onsite PCXL)	no updates.	
Lightning (Origin 2000)	The scheduled installation of the FDDI interface was September 2. All preparations had been completed and were ready to configure the high speed interface	SGI delivered the wrong FDDI interface, the item has been placed back on order again
blizzard (off-site desk side challenge)	no updates.	None, waiting on additional memory.
High speed Connection to the DAAC & Bldg. 1250 Network	One of the faulty routers were replaced. The NFS testing between the DAAC and the SCF began yesterday.	
SAIC Network WAN/LAN	The 10Mbps connection between NASA and SAIC is now operational. The capability does exist to upgrade the WAN connection to 100 Mbps	
new mail application (zmail)	The zmail/Ntrigue integration effort is finally coming to an end. The first brown bag seminars have been completed at the off site facility.	
helpdesk automation	We are using a beta version of a problem tracking system at this time	System Administrators have found it somewhat difficult to use. We are investigating the in house capabilities to enhance the tool to make it more user friendly
NearLine Storage Device (our AMLJ)	no updates.	
NIS+	Under evaluation	
Enterprise 5000 (asdsun)	no updates.	
Security	no updates	
ASD web server	no updates.
