Section A. Purpose

This INSTRUCTION prescribes the various uniforms, uniform articles, and uniform accessories to be worn by female officers of the Public Health Service (PHS) Commissioned Corps. This INSTRUCTION also provides information on prescribable and optional uniform components, occasions for wearing the uniform, and uniform requirements.

Section B. Authority

See Section B of INSTRUCTION 1, "General Information on Uniforms and Appearance," of this Subchapter.

Section C. General

1. All officers, except officers participating in the Junior Commissioned Officer Student Training and Extern Program (COSTEP) and in the Senior COSTEP, shall maintain all required components of the Service Dress Blue (SDB), Summer White (SW), and Working Khaki (WK) uniforms. In addition, officers are responsible for buying and maintaining other uniforms as required by their prescribing authority. There is no minimum number of uniforms required to be in an officer's possession. Sufficient quantities of uniform items shall be procured and maintained in order to assure the highest possible standard of personal hygiene and appearance.
2. Officers assigned to patient care or laboratory areas may wear a suitable lab coat over the uniform when required to perform assigned duties. However, the lab coat may not be worn over the uniform outside the immediate place of work and any covered area associated with that location. See Section F.3. of INSTRUCTION 1 of this Subchapter for the definition of covered area. See Section E. of

INSTRUCTION 7, "Special Uniform Situations," of this Subchapter for more guidance on protective clothing.

3. The dinner dress uniforms (with the exception of the Tropical Dress Blue) are available in both dinner dress "regular" and "jacket" versions. The jacket versions have the word "jacket" as part of the designation. The jacket versions are more formal than the regular versions. They use a dinner jacket, while the regular versions use the service dress coat. Officers at the O-5 rank and above should generally use the jacket versions, and these versions may be prescribed by the local uniform authority (LUA) for certain functions. Junior officers may wear the jacket versions but may not be required to do so.
4. The fabric of service dress coats should match that of the skirt or slacks. For "summer" version of the white uniforms, the shirt material should match that of the skirt or slacks. White and Khaki uniforms are available in Certified Navy Twill (CNT) When CNT is worn, the belt and cap cover must be of matching fabric. A vinyl cap cover is optional.

The "service" version of the khaki uniforms is made of dressier fabric than the polyester/cotton working version (CNT or polyester/wool is a "service" khaki fabric).
5. Clothing articles (except the Army Black Sweater) must meet the Navy specification for the applicable item. For example, the skirt of the SDB must be of approved design, not merely correct color. Articles purchased from Navy uniform shops (including the Uniform Support Center in Chesapeake, VA <http://www.navy-nex.com/uniform/u-contact-us.html>) can be assumed to be approved. Each article purchased from commercial sources should have a certification tag sewn into the garment.
6. In Exhibit I, below, each uniform is accompanied by four sections:
 - a. Required Basic Uniform Components identifying each of the elements of the particular uniform that must be owned, and worn as appropriate to make the uniform complete;
 - b. Prescribable Items identifying elements that the LUA may direct officers to wear or which may be worn at the officer's discretion unless directed otherwise if the uniform itself is worn;
 - c. Optional Items identifying the elements an officer may add or substitute in her discretion unless the LUA has imposed a restriction; and
 - d. Occasions for Wear identifying the kinds of situations where a particular uniform may be appropriate. Note, however, that the LUA, not the officer, determines which uniform(s) is to be worn as the uniform of the day or for other circumstances.

BALL CAP, COMMAND

- a. Description: The cap shall be a conventional baseball cap style made of 100 percent polyester, polyester/cotton, or a polyester/wool blend of the specified color and weight (see technical specifications below). "U.S. PUBLIC HEALTH SERVICE" shall be embroidered using ½-inch-high letters in an arch across the top of the front panel. Centered under "U.S. PUBLIC HEALTH SERVICE" is the large, bright metal rank device. All lettering shall be in upper case Arial (or equivalent) print. Visor ornamentation (in the style described for the combination cap visor in CC26.3, INSTRUCTION 6) is authorized for O-5 rank and above.
- b. Correct Wear: Wear squarely on the head, with the bottom edge parallel to the ground and approximately ½-inch above the top of the ears. The visor shall not be bent or shaped other than as manufactured. The command ball cap may be worn with any working uniform (except Indoor Duty White), if authorized by the LUA. The LUA may prescribe wear of the subdued, large rank device (when worn with the Battle Dress Uniform (BDU)). When wearing the O-6 rank device, the eagle will look to the wearer's right. At any location other than the duty site, (i.e., the specific location where the assigned task is to be performed) the garrison cap, combination cap, or (when worn with the BDU) camouflage headgear must be worn. The cap may be worn, without rank device, with civilian clothing.
- c. Technical Specifications:
 - (1) Color and weight of basic material: The color shall be black and weigh 11-12 ounces per square yard.
