

## Net Neutrality is a necessity

We the people should not let ISP's take control of our internet. Virgin media is only the start. Things will begin to change for the worse unless we stop this problem now. Don't let the media put a noose on our internet freedoms. The internet should be as free as possible. Net neutrality needs to be a main issue when you choose who you buy from, and who you vote for. Virgin mobile needs to be stopped, or more will join them.

This is our internet, we the people make it. We can defend it! The power of the internet can be seen in the anon protests of scientology. We must do the same and organize for net neutrality.
