2	COMBINED WRENCHES AND PUMPS OR	7	.Jewel setters'
	OILERS	7.5	.Mainspring winders
3.05	SHELL, PROJECTILE, OR WAD	8	.Ruby pin setters
	EXTRACTORS	8.1	PACKING
3.07	RECEPTACLE CLOSURE REMOVER	9.2	STYLUS
3.08	.Having discrete retainer or	9.21	STAMP SCARIFIER
	receptacle for removed closure	9.22	PERFORATOR AND INKER
3.09	.Combined or plural	9.24	TAPPET ADJUSTER
3.15	Attached to receptacle or	9.26	PLOWSHARE HOLDER
	closure	9.3	HOSE-CLAMP APPLIERS
3.2	.Power-, vacuum-, or fluid	9.4	WIRE STRIPPER
0.2	pressure-operated	9.51	.Bench tools
3.25	.Wall or surface mounted or	9.41	.Having relatively movable clamp
3.23	supported		and blade
3.31	With receptacle supporting or	9.42	Clamp and blade move relative
3.31	grasping means		to supporting structure
3.32	With bottom support	9.43	Blade moves relative to handle
3.33	Rotary remover device, gear or		to remove insulation
3.33	lever actuated	9.44	.Pivoted blade
3.27	Lever or prying type	10	NUT LOCK
3.35	.Movable into or over handle	13	BOLT HOLDERS
3.36	.With additional receptacle-	15.2	REPAIR TOOLS FOR RESILIENT TIRES
3.30	engaging means	15.3	.Holders for spread tire casings
3.37	Lever- or gear-translated	15.4	.Deflating tools
3.37	closure remover	15.5	.Combined cement injectors and
3.29	For engaging receptacle about	13.3	plug or patch inserters
J • Z J	closure (e.g., socket type)	15.6	.Cement injectors
3.39	Bottom support	15.7	.Plug or patch inserters
3.4	Bottom support .Gripping type	15.8	SKID CHAIN APPLYING TOOLS
3.41	Finger grapple type	15.9	FOR LOCK OR LATCH
3.42	With reciprocating closure-	16	CHUCK KEY
3.42	engaging	44	HOLDER, PUSHER, OR SETTER FOR
3.43	With deformable strip-	44	DRIVEN-TYPE FASTENERS
3.43	tightening means	45	SHINGLE TOOL
3.44	With pivoted closure-engaging	46	WOODEN FLOORING TOOL
3.44	_	300	TOOL JAW(S) POSITIONED BY
2 15	parts	300	RELATIVELY MOVABLE PLURAL
3.45	Screw type		HANDLES (E.G., PLIERS)
3.55	Levering or prying type	301	
3.47	With impaling or inserting	302	.Including hydraulic features .Antipodal jaw surfaces move
3.56	remover	302	apart as handles approach
3.50	Having discrete relatively		(e.g., outwardly expanding
2 57	movable portions		jaws)
3.57	Having handle, intermediate	303	.With three or more jaws
2 40	hook, and end fulcrum	304	With single pair of handles
3.48	.Impaling or inserting type	304	
3.49	With lateral projection or	305	Double pair Janus-jawed
2 -	abutment		With jaws fixed to handle(s)
3.5	SPECTACLE	307	With intermediate jaw(s) in
3.6	.Plier		line with and between outer
3.7	LEAF-SPRING SPREADERS	308	jaws
3.8	FUSE PULLERS		With three jaws only
4	ENGRAVERS' CLAMPS	309	Two pivoted jaws and one
6	WATCHMAKERS'		sliding jaw

310	Three coacting pivoted jaws	344	Predetermined and discrete
311	With separate jaw pairs		member of leverage selections
312	Parallel jaws perpendicularly spaced	345	Axial motion of handle-attached actuators(s)
313	.With means requiring a	346	Pivotal motion about axis of
	completion of travel of jaw		parallel actuator rod(s)
	movement	347	With means to articulate and/or
314	.With means for step-by-step jaw		slide both jaws
	movement	348	With means for arcuate motion
315	.With means to immobilize handles		of both jaws
	against relative angular	349	Cam actuator
	movement and means to move	350	Dual pivoted actuator levers
	jaw(s) thereafter	351	With jaws pivoted together
316	With plural selective handle	352	With means for parallel
	positions	332	movement of work-engaging
317	With means for relative		surfaces
	longitudinal handle movement	353	Longitudinal guide means
318	.With means to immobilize jaws	354	Lateral guide means
319	With lock-release means	355	With means for sliding jaw
320	With lock-disabling means	333	actuation
321	Including spring-urged handles	356	With adjustment means
321	or jaws	357	Pivoted pawl type
322	And spring-urged latch	358	Pinion and rack
323	Spring-urged latch element(s)	359	Claw lever and rack or notch
324	Positive lock means	360	Plural teeth on claw
325	With plural selective jaw	361	Grip lever and cam
323	positions	362	
326	Threaded lock means		Grip lever and link
327	With threaded jaw adjustment	363	Toggle link
327	means	364	Including claw lever and rack
328	Interdigitated lock means	265	or notch means
329	With means (nontoggle) to hold	365	With adjustment means
323	jaws against only retrograde	366	Plural teeth on claw
	movement	367	Including toggle means
330	With plural preselective jaw	368	With toggle release
330	positions	369	By means acting on
331	Manipulated lock member	270	intermediate pivot
332	Pivoted bail	370	Release means carried by
333	Sliding yoke	2.71	grip lever
334	Threaded member	371	Mounted on intermediate
335	Nut	270	pivot
336	Pivoted rack	372	With means to limit movement
337	Pivoted rack	272	of intermediate pivot
338	Rack and pawl means	373	With means for relative
339		254	parallel movement of jaws
	Coacting friction means	374	With pitman between grip lever
340	Serrated surfaces	255	and intermediate pivot
341	.With means to vary range	375	With toggle linkage and
2.40	limit(s) of jaw movement		actuated jaw mounted on
342	.Jaw-actuating means (handle-	27.6	carrier
2.4.2	manipulation conversion)	376	With connecting rod between
343	With means to choose one of a	200	grip lever and actuated jaw
	plurality of actuator	377	With connecting rod between
	leverages		grip lever and handle member

378	With actuated jaw pivoted on handle member	411	With pivot pin fulcrum in notched slot
379	With means for resiliently biasing jaw and/or toggle	412	With flattened cross section pin
380	Extension coil spring	413	With toothed-member fulcrum on
2.01	between jaw and handle member	41.4	notched handle
381	Including grip lever actuator and pivoted jaw (e.g., tandem levers)	414	With opposed interdigitated concentric segmental annular portions
382	With adjustment means	415	.Crossed handles
383	With link connecting jaw and	416	Joint detail
303	grip lever	417	Resiliently urged
383.5	Including cam actuator and	418	Resiliently diged .Jaw features
303.3	pivoted jaw	419	Tined or digitated jaws
384			
	With adjustment means	420	Jaws extend laterally beyond
385	.Adjustable relationship between	404	side edge plane of handle(s)
206	<pre>jaw(s) and/or handle(s)</pre>	421	Jaw attachment and/or inserts
386	By relative positioning of	422	Selective
	jaw(s) only	423	By detachment
387	Both jaws adjustable	424	Articulated
388	By threaded elements	424.5	Nonplanar jaw face
389	Rotatable screw type	426	And diversely shaped face
390	Rotatable nut type	426.5	Work conforming face
391	Maintained by detent and rack	427	.Resiliently urged
392	Maintained by locked	427.5	.Handle
	interdigitated members	463	INCLUDING TOOL DRIVING BY IMPACT
393	By angular orientation of one	103	DELIVERING COMPONENT OR
	handle portion relative to	4.5.4	COOPERATING ANVIL
	other	464	Makasa asa asasa dasi
204			.Motor or gear driven
394	By selection of pivot hole(s)	465	.Structurally constrained to
	By selection of pivot hole(s) in each handle	465	.Structurally constrained to arcuate movement
395	By selection of pivot hole(s) in each handleBy threaded adjustment means		.Structurally constrained to arcuate movementAbout turning axis of work
395 396	By selection of pivot hole(s) in each handleBy threaded adjustment meansWorm and rack type	465 466	Structurally constrained to arcuate movementAbout turning axis of work engaging portion

476	Having friction type contact surfaces	432	Including vibratory work supporting member
477	Work engaging portion attached	433	Including revolvably driven
	to and turned by resilient		work contacting member
	member	434	Including driven, flexible,
478	Work engaging portion pivotally		work supporting strip
	or rotatably connected to	435	Including driven,
	handle		reciprocating, conveying
479	With electric signal device		member
480	Axis of connection coaxial to	57.38	With tensioning means
	rotational axis of work	57.39	Step by step
481	\ldots With arm extending from	57.4	With support
	portion	57.41	Vehicular
482	With pivoted locking pawl	57.42	Direct drive
483	With arm extending from	57.43	Flexible
	portion and through connection	57.44	Fluid
54	.Machine	57.45	Oblique angle
55	Bolt-holding	57.46	Tangential engagement
56	Gear-operated	57.5	.Turret head
57	Gear-operated	74	.Wheel or endless track operated
57.11	With motor	75	Hub-rim grasp
57.12	Oblique angle drive	76	Internal
57.13	Right angle drive	58	.Handle clutched to head
57.14	Parallel axis drive	58.1	With additional head-turning
57.15	Round work		means
57.16	With additional work-engaging	58.2	Radially slotted or open end
	means		head
57.17	Flexible jaw	58.3	Axially movable clutching parts
57.18	Cam-operated jaw	58.4	Positive two-way drive (e.g.,
57.19	Fluid-operated jaw		dog clutch)
57.2	Pivoted jaw	58.5	Radially extending
57.21	Sliding jaw	50 4	eccentrically movable handle
57.22	Multiple drive or driven means	59.1	Ball or roller wedge
57.23	With magazine	60	One-way detent drive, e.g.,
57.24	With support	C1	ratchet
57.25	Vehicular	61	Pivoted pawl
57.26	Adjustable angle driveFlexible shaft	62	Reversing
57.27		63 63 1	Single
57.28 57.29	Oblique angle drive	63.1 63.2	Reversing
57.29	Right angle driveParallel axis drive	436	Single pawl
57.31	Common axis drive	436	.Having work engaging and force exerting portion inserted into
57.31	Common axis drive Double or duplex		cavity (e.g., allen wrench,
57.32	Round work		screwdriver)
57.34	With additional work-engaging	437	Combined with or usable as
37.34	means	10 /	diverse-type wrench
57.35	With support	438	Having structure adapting
57.36	With supportMultiple work-engaging means		portion or tool for separation
57.37	With feed or magazine means	439	Including discrete, separately
430	Utilizing fluid to convey work		usable inserted portions
431	Including chute having	440	Pivotally or rotatably mounted
	longitudinal axis collinear	441	Inserted portion cuts into or
	with rotational axis of work		deforms cavity
	turning portion	442	Inserted portion having
			relatively movable components

443	Having camming or wedging element for moving components	90.1	.Plural pivoted jaws and handle- lever
444	Axially shiftable element	90.2	Cam or gear operated
	located between and wedging	90.3	Jaws enclose work
	against components	90.4	Including latch to connect jaw
445	With threaded surface for		to handle-lever
	cooperating with mating tool	90.5	At least three jaws enclose
	structure		work
446	Rotatable element located	90.6	Including latch to connect
	between and camming against		pivoted jaws
	components	90.7	At least three jaws enclose
447	Having cooperating threaded		work
	element type actuating means	90.8	Two jaw pairs connected by
448	Having resilient or spring		latch
	biased component	90.9	Including means to adjust or to
449	Biased component rotated		secure jaw in adjusted
	about axis collinear to		position
	rotational axis of tool	91.1	Slidable pivot
450	Inserted portion mounted to	91.2	First jaw pivoted directly to
	pivot or swivel relative to		handle and to second jaw
	longitudinal axis of handle	91.3	Two jaws pivoted directly to
451	With separate means for guiding		intermediate member
	or gripping work	92	.Pivoted inner jaw
452	Having resilient, relatively	93	Nut or screw fulcrum
	movable, work gripping members	94	Pin fulcrum
453	With camming or wedging	95	Roller jaw
	element for moving members	96	Pinion
454	Having pivoted, relatively	97	Spring-pressed
	movable, work gripping members		.Pivoted outer jaw
455	With camming or wedging		Fixed fulcrum
	element for moving members	98	Nontraveling jaw
456	Having member with work	99	Spring-pressed
	underlying portion	100	Traveling jaw
457	Member spring biased for	101	Nut fulcrum
	axial movement	102	Rocking sleeve
458	Resilient member	103	Spring-pressed
459	Inserted portion having	104	Fulcrum washer
	threaded periphery	105	Sleeve-enclosed nut
460	Inserted portion having plural,	106	Traveling fulcrum
	noncollinear blades (e.g.,	107	Threaded handlebar
	Phillips)	108	Axillary rotating
461	Inserted portion having plural,	109	Slotted guide
	separate, work-engaging	110	Fulcrum tooth and rack
	projections	111	.Pivoted side jaw
64	.Flexible	112	Bevel-closing
65	Threaded adjustment	113	Cammed into socket by axial
65.2	Link	113	nut or screw
68	Handle jaw	114	Sleeve socket nut
69	Pivoted	115	Rotating ring
70	Duplex	116	Wedge
65.4	Toothed adjustment	117	Rocking link
73	.U-crank arm	118	Transverse screw clamp
77	.Double-ended, simultaneous	126	.Sliding jaw, handle-lever grip
	adjustment	127	Claw
		<i>'</i>	Staw

128	Cliding joy gom aloging	176.15	Harring manns to angego work
129	.Sliding jaw, cam-closing	170.13	Having means to engage work
129.5	.Slidable jaw adjustmentsRack	176.2	<pre>axiallyAnd means to engage peripheral</pre>
131	Interlocking jaw handles	170.2	face of work
132	Locking set screw or nut	176.3	Having relatively movable jaws
133	Pinion lock	119	Rigid jaws
134		120	Round work
	Pivoted rack catch	121.1	
135 136	Nontraveling	121.1	Watch and clock keys
	Intermediate fulcrum	123	_
137	Transverse		Dust protectors
138	Cam-seated	124.1	With nut ejectors
139	Indirectly operated	125	Work-holding
140	Intermediate fulcrum	124.2	Slotted socket
141	Shank-engaged cam	124.3	Through socket and
142	Sliding rack catch	1011	perpendicular handle
143	Cam-seated	124.4	Plural sockets
144	Screw- or nut-seated	124.5	Slidably or pivotally
145	Spring-seated		connected to handle or each
146	Spring-seated jaw frame	104.5	other
147	Integral frame and teeth	124.6	Having axial opening for
148	Wedge lock	404 5	removable handle
149	Wedge pusher	124.7	Having perpendicular handle
150	Shank grip	125.1	Double-ended
151	Side jaw	177.1	.Handle or shank
152	Clutch yoke	177.8	Angularly adjustable handle
153	Roller clutch	177.9	With yieldable one-way detent
154	Locking incline	177.2	Extensible handle or handle
155	Thread		extension
156	Displaceable half nut	177.3	Having finger opening
157	Displaceable nut or screw	177.4	Having means to store parts
158	Traveling screw, shank rack	177.5	Having terminal cross arm
159	Interrupted	177.6	Foldable or flexible
160	Nut set	177.7	Having pivoted handle section
161	Traveling nut	177.75	Universal joint
162	Traveling screw, shank rack	177.85	Including socket and boss type
163	Right and left threads		connecting means
164	Rotatable threaded handle	178	.Reversible jaws
	shank	179	.Sliding jaw face
165	Sliding side jaw	462	.Having stationary structure for
103	Nontraveling rotatable nut		supporting wrench or
166	Intermediate		screwdriver
167	Causing outer jaw to slide	180.1	.Attachment, or including adjunct
168	Terminal		or replaceable portion
169	Causing outer jaw to slide	181	Cutters
170		182	Rotary
171	Nontraveling rotatable screw	183	Roller clutch
172	Bracket-bearing	184	Shank-embracing
1/2	Spiral groove engaged by	185	Socket reducers
172	slidable actuator	185.1	Removable jaw face
173	Traveling and rotating nut	185.2	Movably mounted
174	Threaded handlebar	186	.Jaw faces
175	Traveling and rotating screw	19	DEFORMABLE HEAD MALLET
176	Shank rack	20	HAMMER
176.1	. Spanner		

21	.Having work protector	DIG 2	SPIRAL DRIVE FOR WRENCHES
	surrounding face	DIG 3	WRENCHES, THREAD-ADJUSTMENT LOCK
22	.Having shock absorbing means	DIG 4	DOUBLE ADJUSTMENTS, SLIDING JAW
23	.Having nail placer	DIG 5	WRENCH SCALES AND INDICIA
24	Magnetic	DIG 6	SPRING MEANS BIASING WRENCH JAWS
25	.Having replaceable striking face	DIG 7	BICYCLE SPOKE OR NIPPLE WRENCH
26	.Having plural striking faces	DIG 8	CROWFOOT-TYPE WRENCHES
27	.Rod encircling type	DIG 9	PIVOTED JAW LATCH MEANS
28	BIT STOCK HAVING MANUAL DRIVE	DIG 10	IRIS-TYPE WRENCH HEAD
	MEANS (E.G., BRACE)	DIG 11	ADAPTERS FOR DIFFERENT-SIZED
29	.Having ratchet mechanism		FASTENERS
30	Straight crank arm	DIG 12	POWER HAMMER
31	Adjustable pawl		
32	Pivoted pawl		
33	Sliding pawl		
34	.Straight stock having side driving gear		
35	.Having U-shaped crank arm		
36	Speeding gear		
37	Bit shaft inclined relative to crank		
484	FOR ADJUSTING VARIABLE POSITIONED		
	PARTS		
485	SPREADER		
486	RESILIENT ARTICLE TENSIONER OR		
	COMPRESSOR		
489	HANDLE FOR TOOL		
490	.Having storage compartment		
491	.Having discrete relatively movable tool clamp		
492	.Having cap or reinforcing means		
487	HAND HELD HOLDER OR HAVING CLAMP		
488	MISCELLANEOUS
