\* I suggest the new contact lens  
law. It is easy to buy lenses  
where I desire & less expensive.  
I have worn contacts since I  
was 13 yr old, now 43 yr old &  
the price of lenses has gone down  
tremendously since you don't have  
to buy them from your doctors  
office, and the wait if you loose one  
used to be  
tremendously long.

Lenses are way to expensive and not easily purchased if your eye Dr. is not in the same town. As a soft Contact lens wearer, I can never have enough on hand. I go through them so quickly, that it would be impossible to go to the eye Dr. everytime I need a pair. Also, it would be to expensive. As it is, I order in bulk by mail and get twice as many lenses. If I run out before I reorder I can go to Walmart and pick up a pair. Still cheaper than Dr.

Members of The Federal Trade Commission,

I am writing in support of the new Contact Lens Law. Although getting a copy of my eyeglass prescription is automatic after examination, getting a contact prescription is much harder. I either haven't been given one, or I've had to wait for a period of time & then return to the office (about 2 weeks later) to pick the prescription up. Because I teach & coach, this is a huge inconvenience. It is very important to me that I am able to purchase my contacts from whomever I feel is most economical and convenient. Thank you for your consideration of my point of view on this matter.

Sincerely,

Jimmy Harper

I would like to see the law which gives consumers the right to buy contact lenses whenever or from who ever they want to <sup>purchase</sup>. I am tired of being treated as a child with someone else telling me how or what I can do. I am an educated adult quite capable of making my own decisions and if I make the wrong one than there is no one else to blame but me. When the government starts making all the decisions for the people than the people soon loses the power to think for themselves. It seems as if everyday some sort of freedom we have had for hundreds of years get taken away because someone thinks they know better than we do.

I support the law which gives patients the right to their contact lens prescriptions. Eye doctors are the only physicians who gain financial rewards for the prescriptions they write. Forcing their patients to purchase lenses directly from them when more affordable options exist is unethical. What if I (a pediatrician) told my patients they could only purchase the antibiotic they need from me and had to do so at twice the price they could obtain it from a pharmacist? There would be a huge outcry from the public! How is this situation any more tolerable?

I called 1-800 contacts to place an order. They had to call to confirm my prescription w/ my eye doctor. My eye doctor would not confirm - they called me & said that I needed to order the contacts from them. I was told that they would not let 1-800-contacts release my order, so I was assured that 1 set of contacts would be delivered & that I would only be billed once. Wrong - both my eye doctor & 1-800-contacts sent me contacts & I was billed twice. I kept both sets because I did not want to deal w/ the hassle again. I did not appreciate being held hostage to the choice with my prescription. I should be able to choose where I order from.

I support the law which gives me the rights to my  
Contact lens prescription. I want to be able to buy  
them where I can get the best deal (meaning cheaper)  
and the same quality lens that I would get at the eye  
doctor - request. I like to be able to order them with my  
doctor's prescription by mail & have deliver at my door. It  
is alot of saving to me due to I don't have to drive & burn  
gas on extra unnecessary trips to town when I can get  
them thru the mail. I have had to pay \$233.00 for the same  
lens & same quality from O.K. office where as I order I only pay \$59.10 for  
the same lens.

Dear Ladies and Gentlemen:

I wholeheartedly support the law which allows me to have a copy of my contact lens prescription so that I have the right to choose the seller of my contact lens. There are large disparities in pricing in the marketplace. It is critical that the consumer have the right to purchase from the least expensive (and likely the most efficient) provider.

To whom it may concern:

I support this law. I had an Eye doctor that wouldn't give me my prescription. I found a new doctor. I had little respect for a medical doctor that puts making a buck above their patients eye health.

His contacts were too expensive I couldn't afford to buy them, to be able to change my contacts the way I should to keep my eyes healthy.
