# National Interagency Coordination Center Incident Management Situation Report <br> Friday, June 29, 2007-0530 MDT <br> National Preparedness Level 2 

## National Fire Activity

Initial attack activity:
New large fires:
Heavy (364 new fires)
7 (*)
Large fires contained:
3
Uncontained large fires:19

Area Command Teams committed:
NIMOs committed:
Type 1 IMTs committed:
2
Type 2 IMTs committed: 4
Fire Use Teams committed:
** Uncontained large fires do not include WFU or confine/contain incidents. **

## Northern California Area (PL 2)

New fires:
New large fires:
0
Uncontained large fires:
1
Type 1 IMTs committed:1

Angora, Lake Tahoe Basin Management Unit, FS. IMT 1 (Hawkins). Two miles southwest of South Lake Tahoe, CA. Timber and grass. Light fire activity. Numerous structures, recreation sites and cultural resources remain threatened. Voluntary evacuation remains in effect.

Predictive Services Discussion: Windy conditions will continue today over portions of California and the Great Basin and develop in western Wyoming and Montana. There is a chance for thunderstorms, some dry, to develop over eastern Arizona, western New Mexico, Colorado, central Idaho and Montana. In Alaska, conditions will continue to warm with a chance of thunderstorms. The Southeast will see widespread showers and thunderstorms today into the weekend.

## DRIVING SAFETY

Driving is one of the most hazardous tasks that we perform when assigned to fires. Because of the fact that we perform the task literally hundreds of times in the course of our daily lives we tend to take it for granted. Based on recent accident trends, vehicle accidents are the source of more deaths and serious injuries to wildland firefighters than any other single cause. Vehicle operators need to recognize their own poor driving habits and strive to develop proper defensive driving techniques.

- A good starting point is attitude. A positive attitude towards improving your defensive driving skills will help you achieve the necessary changes in your driving habits. Most of what you do in operating vehicles is performed from habit. You do not consciously think about every thing you do when you drive. Rather, your subconscious performs most techniques. It's important to remember that a bad habit is as easy to develop as a good one. Take a good, hard look at your driving habits. Are you training yourself to do the right things the right way, like fastening your seat belt, checking your mirrors, and maintaining safe following distances?
- Inattentiveness is a major contributing factor in motor vehicle accidents within the wildland firefighting community. Because driving is such a common component of our lives, it is difficult to realize that it requires $100 \%$ of our attention. Since the average adult attention span is 1520 minutes we must develop techniques that allow us to refocus our attention on the task at hand, operating a motor vehicle safely. There are many forms of inattentive driving; fatigue, telematics, daydreaming, eating, drinking, reading, writing, and talking. Here are some techniques for maintaining your attention while driving.
- Drive only when you are well rested and alert; avoid driving during the hours of 10:00 PM and 6:00 AM. Take a 10 to 15 minute break after every 2 hours of driving.
- Practice situational awareness when driving; be aware of what is happening in front, behind, and on both sides of your vehicle. Never drive when taking medications that make you drowsy.
- Avoid using cell phones, radios, GPS units, CD players or computers while driving. Have a passenger operate them, or pull off the road and park.
- By constantly moving your vision, checking mirrors and distant road conditions, you can avoid highway hypnosis and daydreaming.
- Avoid eating or drinking while driving. Take frequent breaks to perform these activities.
- Do not attempt to read maps or write directions while driving, pull over and park.
- When talking with passengers, keep your eyes on the road and both hands on the steering wheel. Keep conversations causal and limited to small talk. Avoid conversations of a serious or technical nature. Do not engage in confrontational or argumentative conversations.
- Do not be in a hurry, be patient. The more impatient you are, the more agitated you can become. Agitation will only magnify other inattentive driving behaviors.

Safe driving starts with a safe vehicle. While mechanical failure is rarely a contributing factor in motor vehicle accidents something as simple as under inflated tires can have serious consequences. Before operating any vehicle, you must be sure the vehicle is in safe operating condition. Not only should you perform a pre-operation inspection, some vehicle defects can only be detected while the vehicle is operating. The vehicle operator is also responsible preoperation, during operation, and post-operation inspections.
