JOINT ASCONES AND REGIONAL AOSCA MEETING

On March 19, 2002, the Maryland Department of Agriculture's Turf and Seed Section hosted a joint meeting of the Association of Seed Control Officials of the Northeastern States (ASCONES) and of the seed certifying agencies of the Northeastern States. ASCONES President Joe Garvey (PA) called the joint meeting to order. State officials in attendance were Lisa Jones (DE); Malcolm Sarna, Roger Burton, Lois Capshaw, and Dale Morris (MD); Bill Nastyn (NY); Steve Binns (VA); and Charles Dransfield and Marjorie McCutcheon (WV). Association of Official Seed Certifying Agencies (AOSCA) President Richard Arnett attended. President Drew Kinder represented the American Seed Trade Association (ASTA). Executive Director John Baylor and Vice-President Gil Barber of The Atlantic Seedsmen's Association (ASA), a seed industry group, also attended. Seed Regulatory and Testing Branch personnel present were Dr. Richard Payne, Don Dreyer, Jonathan Farmer, Jeri Irwin, Harold Laswell, and Linda Vanderhoof.

Each of the organizations reported on the status of their program and concerns that they face. Budget and personnel considerations remain critical problems for nearly all of the organizations. Maryland and Pennsylvania are already in the process of trying to incorporate into their seed laws changes that have been made in the Association of American Seed Control Officials' (AASCO) Recommended Uniform State Seed Law (RUSL). Several supervisory changes were reported in the States. John Bates is the new Program Supervisor for Virginia, replacing Jay Crane who has retired. Tom Brand is the new Director of West Virginia's Regulatory and Environmental Affairs Division. Malcolm Sarna is retiring from Maryland effective April 1. ASTA and ASA are also undergoing personnel changes. Drew Kinder's term as president of ASTA is nearing its end and Sonny Beck will take his place. On April 15, Dr. Richard Crowder will become ASTA's Chief Executive Officer, replacing Dean Urmston who left last November. Dr. Baylor plans to retire from ASA at the end of the year.

Following the overview of the programs, the certification officials left the group meeting to convene separately to discuss certification issues. Richard Payne attended a portion of this meeting to discuss the revised instructions and questionnaire for use by AOSCA when evaluating member agencies for compliance with the certification procedures and standards in the Federal Seed Act Regulations.

The primary item on the ASCONES' agenda was the RUSL changes and how they can best be implemented in actual seed laws in an effort to increase uniformity among the various laws. In recent years, RUSL has been amended to include additions such as arbitration wording, combination product labeling, changes in test dates for cool season grasses, germination standards for vegetable seeds, undesirable grass seed labeling, sell-by dates, and relabeling regulations. Some States have already moved to implement changes to their seed laws.

The concept of 3-part purity labeling was discussed at length. The basic difference between the 4-part labeling commonly used in the United States and 3-part labeling is that the other crop seed component and weed seed component are combined. Outside of the United States, 3-part purity labeling is commonly used.

The ASCONES participants discussed soybean mislabeling problems where seed labeled to be one variety was actually a mixture of varieties. Another problem is the failure of companies to recognize that traits such as hilum-color, flower-color, and hypocotyl-color are uniform within a variety and when they vary it is clearly indicative of a varietal mixture. The group also discussed the best regulatory procedure to follow involving chain stores that reship seed from central warehouse locations into other States. Mail delays concerning the anthrax problem and mail directed to Federal offices were also covered.

The last major item on the agenda was ASCONES' future as a result of budgetary problems and personnel issues. Several of the ASCONES States have also joined the southern association since ASCONES rarely has a quorum present at the AASCO national meeting. The situation unfortunately leaves States that cannot attend meetings voiceless on issues that may have importance for them.

INTERNATIONAL SEED TESTING ASSOCIATION ACCREDITATION

The Seed Regulatory and Testing Branch (SRTB) has been re-accredited by the International Seed Testing Association (ISTA). The scope of accreditation includes sampling and testing carried out using ISTA Rules in our service-testing program. Service testing is the voluntary, fee-for-service, seed-testing program authorized by the Agricultural Marketing Act. The ISTA accreditation does not involve testing and other regulatory activities carried out under the Federal Seed Act. The U.S. Government was a charter member of ISTA, and SRTB has continuously maintained its status as an accredited member. The re-accreditation is valid for three years, starting from June 4, 2001. This ISTA accreditation does not change U.S. policy of not issuing ISTA certificates for agricultural and vegetable seed.

SERVICE-TESTING FEE INCREASE

Effective April 15, 2002, the rate for testing and issuing Federal Seed Analysis Certificates will be \$52 per hour. The voluntary seed inspection program is conducted as authorized by the Agricultural Marketing Act (AMA). The fee increase ensures that the program is self supporting as required by the AMA.

In addition to the hourly rate increase for testing and issuing certificates, the cost of issuing duplicate certificates has increased from \$11.10 to \$13 per certificate. Duplicate certificates should be requested at the time the sample is submitted. Any additional certificate besides the original and two copies issued to the applicant (customer to be billed) is considered a duplicate. Preliminary test reports will be issued upon request for a fee of \$13.

Further information about submitting samples for the testing service can be found on the Seed Regulatory and Testing Branch Web site at <http://www.ams.usda.gov/lsg/seed/servicetesting.htm>.

LABELING PURE SEED AND OTHER CROP SEED OF AGRICULTURAL HYBRIDS

Under the Federal Seed Act Regulations heading "Labeling Agricultural Seeds," in Section 201.11a Hybrid, is the statement: "The percentage that is hybrid shall be at least 95 percent of the percentage of pure seed shown unless the percentage of pure seed which is hybrid is shown separately." This means that when labeling seed of agricultural hybrids, such as corn, the percentage of pure seed would be the percentage of corn seed, provided at least 95 percent of the pure seed is hybrid seed of the labeled seed kind. In this case, out-crosses and selfs would be considered part of the pure seed while other crop seed would consist of other kinds of seed. Section 201.11a allows a five percent "fudge factor" to account for unintended selfs and out-crosses during hybrid seed production. The other labeling option would be to label the actual percentage of hybrid seed of the labeled variety with the remaining pure seed labeled as other varieties.

If the pure seed is less than 95 percent hybrid but more than 75 percent hybrid the percentage of pure seed that is hybrid must be shown or the statement: "Contains from 75 percent to 95 percent hybrid seed" can be shown on the label. Seed cannot be labeled as hybrid if it is less than 75 percent hybrid.

For an explanation of labeling other crop seed in non-hybrid agricultural seed, please see "Are You Sure It's Other Crop Seed?" on page 3 of the Winter 2002 edition of the "Items of Interest in Seed Control" (<http://www.ams.usda.gov/lsg/seed/winter02.pdf>).

NOXIOUS-WEED SEED LIST AND REGULATIONS ON OUR WEB SITE

The 2002 edition of "State Noxious-Weed Seed Requirements Recognized in the Administration of the Federal Seed Act" is now on our Web site (<http://www.ams.usda.gov/lsg/seed/nox02.pdf>). We are no longer mailing paper copies of this publication unless specifically requested.

We have changed our listing of the Federal Seed Act Regulations so that it is now a link to the Code of Federal Regulations (http://www.access.gpo.gov/nara/cfr/waisidx_02/7cfr201_02.html).

We also want to remind you that we have a subscription service on our Web site. If you subscribe to the service you will receive an e-mail notification when new material is posted. If you try this service and wish to unsubscribe later, you may also do that at the Web site. We have had several positive comments from our customers regarding this reminder service.

CATJANG vs. COWPEA

Recently we received a complaint on seed labeled "CATJANG COWPEAS." When no reference is made on the label as to variety or kind, we consider this type of labeling to be "Variety: Catjang" and "Kind: cowpea." "Catjang" is the common name for *Vigna unguiculata* (L.) Walp. subsp. *cylindrica* (L.) Verdc. and not a cultivar name for cowpea.

The catjang seeds in our herbarium collection range in color from cream, brick red, to black. There is a variety of 'Buff' catjang, presumably named after the color of the seeds (Morse, W.J. 1947. Cowpeas: Culture and Varieties. USDA Farmers' Bulletin No. 1148). Catjang is a kind of seed that is not subject to Federal Seed Act (FSA) requirements.

"Cowpea," however, is a kind of seed that is subject to the FSA. Since the seed was labeled as being "cowpea," this shipment was subject to FSA requirements. The shipment was found to be falsely labeled as to kind, because the seed in the bag was catjang not cowpea.

MAIL SECURITY

Due to increased security measures being taken with the mail at the USDA Beltsville Agricultural Research Center (BARC), the Seed Regulatory and Testing Branch is experiencing delays of a week or more in the delivery time for incoming mail. Although mail sent to BARC is not being irradiated, it is being quarantined and tested for anthrax contamination before being released for delivery. This applies equally to the Priority Mail and Express Mail services of the U.S. Postal Service. UPS, FedEx, and other courier services are not being delayed; therefore, time-sensitive deliveries should use these services.

FEDERAL SEED ACT CASE SETTLED

The following case was settled administratively under the Federal Seed Act on February 27, 2002. Under the administrative settlement procedure, the Seed Regulatory and Testing Branch and the firm agreed to settle the case for the amount specified, with the firm neither admitting nor denying the charges:

- Pennington Seed, Inc., Madison, GA, has paid \$39,350 for a case involving 71 seed shipments. The alleged violations, while not the same for all shipments, were false labeling as to purity, variety name, germination percentage and test date; failure to test for germination within the prescribed period prior to interstate shipment; false labeling of noxious-weed seeds and their presence in excess of state's limits; presence of prohibited noxious-weed seeds; failure to show the presence of noxious-weed seeds and the rate of occurrence; failure to show the required information for a seed component in a mixture; mislabeling the identification of the shipper; placement of relabels (considered advertisements) having false information on to previously shipped seed; and failure to keep required records, including those establishing the variety name. Seed regulatory officials in Alabama, Arizona, Florida, Georgia, Illinois, Indiana, Kentucky, Maryland, North Carolina, Ohio, Oklahoma, Pennsylvania, Texas, and Virginia cooperated in the initial sampling and inspection.

RYEGRASS FLUORESCENCE LIST

The Association of Official Seed Certifying Agencies National Grass Variety Review Board (NGVRB) issued a memorandum dated March 26, 2002, updating their ryegrass fluorescence list. They added 15 varieties and experimental varieties of perennial ryegrass: Brightstar SLT, Cinderella, Covet, Easy Livin', Ecologic, Elfkin, FPT (Integra), High Life, MB 411 (Splendid), MB 412 (Gallery), MB 413 (Summerset), PST-2BR (Citation Fore), Quick Trans, Racer 2, and Rutgers 8000 (Inspire).

The perennial ryegrasses Magic II and Vail have been accepted for certification as varieties.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 14th and Independence Avenue, SW, Washington, DC 20250-9410 or call 202-720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.
