DEPARTMENT OF LABOR

Employment and Training Administration

[TA-W-62,875]

Bolton Metal Products Co. Bellefonte, PA; Notice of Revised Determination on Reconsideration

On April 21, 2008, the Department issued an Affirmative Determination Regarding Application on Reconsideration applicable to workers and former workers of the subject firm. The notice was published in the **Federal Register** on April 25, 2008 (73 FR 22434).

The previous investigation initiated on February 21, 2008, resulted in a negative determination issued on March 19, 2008, was based on the finding that, during the relevant period, imports of

brass rod, wire, and low melt alloys did not contribute importantly to worker separations at the subject firm and no shift of production to a foreign source occurred. The denial notice was published in the **Federal Register** on April 24, 2008 (73 FR 22170).

In the request for reconsideration, the petitioner provided additional information regarding production at the subject firm, imports and customers.

Upon further investigation the Department requested an additional list of customers from the subject firm. New information revealed that Bolton Metal Products Co., Bellefonte, Pennsylvania supplies brass rod, wire and low melt alloys for hydraulic fittings produced by the primary firm, and a loss of business with a domestic manufacturer (whose workers were certified eligible to apply for adjustment assistance) contributed importantly to the workers' separation or threat of separation.

In accordance with Section 246 the Trade Act of 1974 (26 U.S.C. 2813), as amended, the Department of Labor

herein presents the results of its investigation regarding certification of eligibility to apply for alternative trade adjustment assistance (ATAA) for older workers.

In order for the Department to issue a certification of eligibility to apply for ATAA, the group eligibility requirements of Section 246 of the Trade Act must be met. The Department has determined in this case that the requirements of Section 246 have been met.

A significant number of workers at the firm are age 50 or over and possess skills that are not easily transferable. Competitive conditions within the industry are adverse.

Conclusion

After careful review of the additional facts obtained on reconsideration, I determine that workers of Bolton Metal Products Co., Bellefonte, Pennsylvania qualify as adversely affected secondary workers under Section 222 of the Trade Act of 1974, as amended. In accordance

with the provisions of the Act, I make the following certification:

All workers of Bolton Metal Products Co., Bellefonte, Pennsylvania, who became totally or partially separated from employment on or after February 18, 2007, through two years from the date of this certification, are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974, and are also eligible to apply for alternative trade adjustment assistance under Section 246 of the Trade Act of 1974.

Signed in Washington, DC this 9th day of May 2008.

Elliott S. Kushner,

Certifying Officer, Division of Trade Adjustment Assistance.

BILLING CODE 4510-FN-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-225]

The Rensselaer Polytechnic Institute; Notice of Acceptance for Docketing of the Application and Notice of Opportunity for Hearing Regarding Renewal of the Rensselaer Polytechnic Institute Reactor Critical Facility License No. CX-22 for an Additional 20-Year Period

The Nuclear Regulatory Commission (NRC or the Commission) is considering an application for the renewal of Facility License No. CX-22, which authorizes the Rensselaer Polytechnic Institute (RPI or the licensee) to operate the Rensselaer Polytechnic Institute Reactor Critical Facility (RCF) at 100 watts thermal power. The renewed license would authorize the licensee to operate the RCF for an additional 20 years from the date of issuance.

On November 19, 2002, the Commission's staff received an application from RPI filed pursuant to 10 CFR 50.51(a), to renew Facility License No. CX-22 for the RCF. Because the license renewal application was filed in a timely manner in accordance with 10 CFR 2.109, the license will not be deemed to have expired until the license renewal application has been finally determined.

Based on its initial review of the application, the Commission's staff determined that RPI submitted sufficient information in accordance with 10 CFR 50.33 and 50.34 so that the application is acceptable for docketing. The current Docket No. 50-225 for Facility License No. CX-22 will be retained. The docketing of the renewal application does not preclude requests for additional information as the review proceeds, nor does it predict whether

the Commission will grant or deny the application. Prior to a decision to renew the license, the Commission will make findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations.

Within 60 days after the date of publication of this notice, the applicant may file a request for a hearing, and any person(s) whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene, via electronic submission through the NRC E-filing system. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested person(s) should consult a current copy of 10 CFR 2.309, which is available at the Commission's PDR, located at One White Flint North, Public File Area O1F21, 11555 Rockville Pike (first floor), Rockville, Maryland and on the NRC Web site, <http://www.nrc.gov/reading-rm/doc-collections/cfr>. Publicly available records will be accessible from the Agencywide Documents Access and Management System's (ADAMS) Public Electronic Reading Room on the Internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams.html>. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or a presiding officer designated by the Commission or by the Chief Administrative Judge of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the Chief Administrative Judge of the Atomic Safety and Licensing Board will issue a notice of a hearing or an appropriate order.

As required by 10 CFR 2.309, a petition for leave to intervene shall set forth with particularity the interest of the petitioner/requestor in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following general requirements: (1) The name, address and telephone number of the requestor or petitioner; (2) the nature of the requestor's/petitioner's right under the Act to be made a party to the proceeding; (3) the nature and extent of the requestor's/petitioner's property, financial, or other interest in the proceeding; and (4) the possible effect of any decision or order which may be entered in the proceeding on the requestor's/petitioner's interest. The

petition must also identify the specific contentions which the petitioner/requestor seeks to have litigated at the proceeding.

Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner/requestor shall provide a brief explanation of the bases for the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. The petition must include sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact.

Contentions shall be limited to matters within the scope of the licensing action (i.e., license renewal) under consideration. The contention must be one which, if proven, would entitle the petitioner/requestor to relief. A petitioner/requestor who fails to satisfy these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing.

A request for hearing or a petition for leave to intervene must be filed in accordance with the NRC E-Filing rule, which the NRC promulgated on August 28, 2007 (72 FR 49139). The E-Filing process requires participants to submit and serve documents over the Internet or in some cases to mail copies on electronic storage media. Participants may not submit paper copies of their filings unless they seek a waiver in accordance with the procedures described below.

To comply with the procedural requirements of E-Filing, at least ten (10) days prior to the filing deadline, the petitioner/requestor must contact the Office of the Secretary by e-mail at hearingdocket@nrc.gov, or by calling (301) 415-1677, to request (1) a digital ID certificate, which allows the participant (or its counsel or representative) to digitally sign documents and access the E-Submittal server for any proceeding in which it is participating; and/or (2) creation of an electronic docket for the proceeding (even in instances in which the petitioner/requestor (or its counsel or
