Subject Search strategy and results for TSCA §21 petition on air fresheners

Search strategy and results for TSCA §21 petition on air fresheners

Searches were conducted on the National Library of Medicine's PubMed database, ScienceDirect (which provides access to journals from Elsevier and other publishers), Google Scholar, and the websites of several other publishers. Search terms and results are provided below.

PubMed Search Results

Using narrow terms

<u>Searches</u>	<u># of hits</u>
"air freshener" as a term:	24
"air freshener" AND "adverse effects":	6
"air freshener" AND toxicity:	2

While one could argue that those results show a lack of data, one should remember that most data acceptable from a regulatory perspective are tied to specific chemicals. Thus, one would not expect to find a lot of articles about toxicity testing of air fresheners.

In order to get a better feel for the universe of substances that might be included, the search was expanded to cover the term "fragrance". Controlled vocabulary terms from the National Library of Medicine's Medical Subject Headings (MeSH) were also used. "Perfume" appeared to be the term most directly related, though "Oils, Volatile" could conceivably be used as well. A quick scan of the literature indicates that many fragrances consist in part of "essential oils" (which are volatile, natural, complex compounds characterized by a strong odor).

MeSH Headings Used

Perfume: *Scope Note* - A substance, extract, or preparation for diffusing or imparting an agreeable or attractive smell, especially a fluid containing fragrant natural oils extracted from flowers, woods, etc., or similar synthetic oils. (Random House Unabridged Dictionary, 2d ed)

Oils, Volatile: *Scope Note* - Oils which evaporate readily. The volatile oils occur in aromatic plants, to which they give odor and other characteristics. Most volatile oils consist of a mixture of two or more TERPENES or of a mixture of an eleoptene (the more volatile constituent of a volatile oil) with a stearopten (the more solid constituent). The synonym essential oils refers to the essence of a plant, as its perfume or scent, and not to its indispensability.

Using broader terms

Searches

	<u># of hits</u>
(1) "perfume/AE" as a MeSH heading:	539 (AE = MeSH subheading for adverse effects)
(2) "fragrance" and "AE" as keywords:	752
(3) "fragrance" AND "adverse effects":	562

(4) "Perfume" (as a major MeSH heading) OR "Oils, Volatile" (as a MeSH heading) OR "Deodorants" (as a Substance Name) OR "Perfume" (as a Substance Name): - 5,927 hits
- The intersection of those results with "adverse effects": 860 hits

(5) An on-topic article was identified. "Cleaning products and air fresheners: emissions and resulting concentrations of glycol ethers and terpenoids," by B.C. Singer, et al., BC, Indoor Air. 2006 Jun;16(3):179-91. Selecting "Related articles" resulted in a set of 898 articles (including the aforementioned Singer article, i.e. there were 897 articles in addition to that article).

(6) Other articles identified as relevant were then used to retrieve sets of related articles. The union of those sets resulted in a superset of almost 3,000 articles.

Searches Using ScienceDirect

A broad search for articles from 1970 and on, using the following search formula: ("air freshener" OR perfume OR fragrance) AND (toxicity OR "adverse effects" OR "toxicological data" OR "risk assessment" OR "hazard assessment") returned 3,163 hits. Intersecting those results with "(household OR consumer)" dropped the number of hits to 946 articles. Randy

On detail from the Office of Pollution Prevention and Toxics (OPPT)

860 articles combining "adverse effects" AND Deodorants or Perfume (substance name) or Perfume or Oils, Volatile (MeSH heading)

1: Aronson DB, Bosch S, Gray DA, Howard PH, Guiney PD.

A comparative human health risk assessment of p-dichlorobenzene-based toilet rimblock products versus fragrance/surfactant-based alternatives.
J Toxicol Environ Health B Crit Rev. 2007 Oct;10(7):467-526.
PMID: 17934948 [PubMed - indexed for MEDLINE]

2: Llombart M, García-Abujeta JL, Sánchez-Pérez RM, Hernando de Larramendi C.

Pompholyx induced by intravenous immunoglobulin therapy.
J Investig Allergol Clin Immunol. 2007;17(4):277-8. No abstract available.
PMID: 17694704 [PubMed - indexed for MEDLINE]

3: Genebriera J, Davis MD, Yang H, Borrowman TA.

Papillomatous axillary rash due to granular parakeratosis.
J Eur Acad Dermatol Venereol. 2007 Aug;21(7):994-5. No abstract available.
PMID: 17659023 [PubMed - indexed for MEDLINE]

4: Williams JD, Nixon RL, Lee A.

Recurrent allergic contact dermatitis due to allergen transfer by sunglasses.
Contact Dermatitis. 2007 Aug;57(2):120-1.
PMID: 17627654 [PubMed - indexed for MEDLINE]

5: Placzek M, Frömel W, Eberlein B, Gilbertz KP, Przybilla B.

Evaluation of phototoxic properties of fragrances.
Acta Derm Venereol. 2007;87(4):312-6.
PMID: 17598033 [PubMed - indexed for MEDLINE]

6: Oniga I, Pârvu AE, Toiu A, Benedec D.

Effects of Salvia officinalis L. extract on experimental acute inflammation.
Rev Med Chir Soc Med Nat Iasi. 2007 Jan-Mar;111(1):290-4.
PMID: 17595884 [PubMed - indexed for MEDLINE]

7: Wu M, Li Z, Yu JE, Lu WW, Ni JX, Xia YL.

Multi-centered clinical study on effects of nano-amomi paste in treating children's anorexia.
Chin J Integr Med. 2007 Mar;13(1):55-8.
PMID: 17578320 [PubMed - indexed for MEDLINE]

8: Adışen E, Onder M.

Allergic contact dermatitis from Laurus nobilis oil induced by massage.
Contact Dermatitis. 2007 Jun;56(6):360-1.
PMID: 17577382 [PubMed - indexed for MEDLINE]

9: Sfia M, Dhaoui MA, Doss N.

Consort allergic dermatitis to cosmetic agents in a 10-year-old young girl.
Contact Dermatitis. 2007 Jul;57(1):56-7. No abstract available.
PMID: 17577362 [PubMed - indexed for MEDLINE]

10: Schnuch A, Geier J, Uter W, Frosch PJ.

Majantol--a new important fragrance allergen.
Contact Dermatitis. 2007 Jul;57(1):48-50. No abstract available.
PMID: 17577359 [PubMed - indexed for MEDLINE]

11: Schnuch A, Uter W, Geier J, Lessmann H, Frosch PJ.

Sensitization to 26 fragrances to be labelled according to current European regulation. Results of the IVDK and review of the literature.
Contact Dermatitis. 2007 Jul;57(1):1-10. Review.
PMID: 17577350 [PubMed - indexed for MEDLINE]

12: Kurtz JL.

Prepubertal gynecomastia linked to lavender and tea tree oils.

N Engl J Med. 2007 Jun 14;356(24):2542-3; author reply 2543-4. No abstract available.

PMID: 17575593 [PubMed - indexed for MEDLINE]

13: Kalyan S.

Prepubertal gynecomastia linked to lavender and tea tree oils.

N Engl J Med. 2007 Jun 14;356(24):2542; author reply 2543-4. No abstract available.

PMID: 17575592 [PubMed - indexed for MEDLINE]

14: Dean CJ.

Prepubertal gynecomastia linked to lavender and tea tree oils.

N Engl J Med. 2007 Jun 14;356(24):2543; author reply 2543-4. No abstract available.
