

LMMCC– Wildlife Work Group

Summary of Priority Species for Relevant States and Agencies
Draft: December, 2001

* Information not available for Indiana

State/Agency Ranks:

T: Threatened; E: Endangered; SC: Special Concern; X: Extirpated; PWA: Protected Wild Animal; N: Nuisance; R/Dec: Rare/Declining; Rec/Ec.: Recreational/Economical, GTN: Globally or Nationally Ranked 1-3, RISK: considered “Sensitive” based on Risk Evaluations, NA: Not Available.

Global Rank (TNC and ABI ranks):

Species have both a Global Rank (G) (or Trinomial Rank (I) for subspecies). The numeric ranks describe the status of the species: 1 = the species (or trinomial) is globally critically imperiled, 2 = the species (or trinomial) is globally nationally imperiled; 3 = the species (or trinomial) is either rare or uncommon; 4 = the species (or trinomial) is globally widespread, abundant, or apparently secure, but with cause for long-term concern; 5 = the species (or trinomial) is globally demonstrably widespread, abundant, and secure.

In addition to or in place of the numeric rank, the Global (G) or Trinomial (I), Rank can have one of the following descriptive qualifiers: ? = the species (or trinomial) is either unranked or has a questionable rank; U = the species (or trinomial) is unrankable; H = the species (or trinomial) is historic; X = the species (or trinomial) is extinct; Q = the species (or trinomial) has questionable taxonomy according to TNC and ABI scientists

PLANTS		Global Rank	STATE / AGENCY					
Scientific Name	Common Name		FS	FWS	IL	IN*	MI	WI
<i>Abies fraseri</i>	Fraser Fir	G2	GTN					
<i>Acer pensylvanicum</i>	Striped Maple	G5						SC
<i>Aconitum noveboracense</i>	Northern Wild Monkshood	G3		T				T
<i>Aconitum reclinatum</i>	White Monkshood	G3	GTN					
<i>Aconitum uncinatum</i>	Blue Monkshood	G4	RISK					
<i>Adlumia fungosa</i>	Climbing Fumitory	G4					SC	SC
<i>Adoxa moschatellina</i>	Moschatel	G5	RISK		E			T
<i>Agalinis gattingeri</i>	Gattinger's Gerardia	G4					E	T
