TRANSPORTATION WORKER IDENTIFICATION CREDENTIAL (TWIC)

TWIC was established by Congress through the Maritime Transportation Act of 2002 (MTSA) and is administered by the Transportation Security Administration (TSA) and U.S. Coast Guard (USCG). TWICs are tamper-resistant biometric credentials that will be issued to ALL USCG CREDENTIALLED MERCHANT MARINERS, as well as workers who require unescorted access to secure areas of ports, vessels, and outer continental shelf facilities.

By April 15, 2009, all USCG credentialed mariners will be required to hold a TWIC in order for their license, Merchant Mariner Document (MMD), Certificate of Registry (COR), or Standards of Training, Certification, and Watchkeeping (STCW) endorsement to remain valid. Failure to obtain a TWIC may result in suspension or revocation of a mariner's credential under 46 U.S.C. 7702 and 7703.

To obtain a TWIC, an individual must visit an enrollment center where they will pay the enrollment fee, provide biographic information and a complete set of fingerprints, and sit for a digital photograph. Pre-enrollment is highly encouraged as it is designed to save the applicant time and provides the ability to make an appointment. You will need to pick up your TWIC, after being notified it is ready, at the same enrollment center where you applied. The cost for TWIC is \$132.50 and it is valid for five years. Mariners who already hold a USCG credential may pay a reduced fee of \$105.25, however, their TWIC will then expire when their USCG credential expires.

For more information on the TWIC program including enrollment locations please visit TSA's websites at <http://www.twicinformation.com/twicinfo/index.jsp> or <http://www.tsa.gov/twic>.

Additional information can be found on the Coast Guard's HOMEPOR website at <http://homeport.uscg.mil/twic>.

LORAN-C OPERATIONS, LORAN DATA CHANNEL (LDC) RESEARCH

(A.) LORAN Stations Jupiter, Florida (7980-Y), Las Cruces, New Mexico (9610-X), and Middletown, California (9940-X) will be on air testing the Loran Data Channel (LDC) uninterrupted until further notice.

(B.) LORAN Stations Seneca, New York (8970-X), Gillette, Wyoming (8290-X), and Grangeville, Louisiana (7980-Y) will be on air testing LDC between 0800 and 1500 local time Monday through Friday.

(C.) LORAN Stations Dana, Indiana (9960-Z) and George, Washington (5990-Y) are expected to begin testing LDC in the near future.

(D.) The test broadcast will use pulse position modulation of a ninth pulse added one thousand microseconds after the standard pulse group. Throughout the test period the signal will meet all service performance parameters published in the 1994 specification of the LORAN-C signal. User should not experience any tracking errors or service interference from this test broadcast. Users will be notified of any changes to the test schedule and when the testing is complete.

(E.) LORAN users are encouraged to report any LORAN service degradation or outages that may experience via the Navigation Information Service (NIS) by calling (703) 313-5900 or by using the NAVCEN web sites report a LORAN problem worksheet at www.navcen.uscg.gov. Additional information on the LORAN data channel and the 1994 LORAN-C signal specification may also be found at this website.

(F.) Address inquiries to the chain operations control officer CWO S. McDonald of the northeast and Great Lakes U.S. LORAN-C Chains at (703) 313-5880 or LT. Boyd for the Southeast and South Central U.S. Chains at (703) 313-5873.

(G.) Current LORAN-C status is available 24 hours per day through internet address www.navcen.uscg.gov.

Hurricane Season

The hurricane season extends from June through November. Hurricanes can cause excessive damage to vessels and loss of life. To minimize these dangers, the following precautions should be taken by all mariners before getting underway during the hurricane season:

- (a) Instruction of crew and passengers in location of emergency equipment and emergency procedures;
- (b) Pre-sailing check of vessel, machinery, and equipment for seaworthiness;
- (c) Installation of strong ground tackle;
- (d) Review of storm center evasion procedures;
- (e) Knowledge of nearest hurricane shelter or port; and

(f) Constant radio watches on channel 16 VHF-FM and frequent monitoring of weather broadcasts.

HURRICANE INFORMATION

The civilian hurricane warning service for the North Atlantic is provided by the National Hurricane Center, Miami, Florida. The center collates ship, aircraft, radar, and satellite data to produce and issue tropical cyclone warnings and forecasts for the North Atlantic Ocean, including the Caribbean Sea and the Gulf of Mexico. A Tropical Cyclone Advisory message is issued every six hours, with intermediate bulletins provided as needed.

For tropical storms and hurricanes threatening to cross the coast of the U.S., coastal warnings are issued to the public so that precautionary actions, including evacuation, can be initiated to minimize damage and loss of life. Two levels of warnings are employed:

(a) HURRICANE WATCH - a preliminary alert that a hurricane MAY threaten a specified portion of the coast. It is issued 36 hours before landfall may occur; and

(b) HURRICANE WARNING - which indicate that hurricane conditions are EXPECTED along a specified portion of the coast. It is issued 24 hours before landfall. To provide additional information for maritime interests, a Marine Advisory is also issued which provides storm position forecasts for up to 72 hours in advance of a storm, and probabilities of hurricane strikes for coastal locations and offshore coordinates.

Mariners are reminded that aids to navigation, particularly lighted and unlighted buoys, may be moved from charted position, damaged, destroyed, extinguished or otherwise deemed discrepant as a result of hurricane and storms. Mariners should not rely solely upon the position or operation of an aid to navigation, but also employ such other methods of determining position as may be available.

Mariners are further reminded that during the hurricane season drawbridges along the coast may deviate from normal operating procedures. Drawbridges are authorized to remain closed upon approach of gale force winds of 34 knots or greater. Others may be authorized to extend closed periods prior to gale force winds to facilitate evacuation of land traffic or close operations up to 8 hours before expected arrival of gale force winds. Due to the uncertainty of hurricane movements and bridge closures, mariners are urged to seek passage through drawbridges well in advance of the arrival of gale force winds.

GPS INTERFERENCE TESTING (Ref: SPC 2007-150), CAPE CANAVERAL , AFS, FLORIDA. (Updated as of May 16, 2008)

The GPS Navigational Signal maybe unreliable from October 24, 2008 to April 24, 2010, due to interference testing on GPS frequencies used in shipboard navigation and handheld systems. GPS systems that rely on GPS, such as E-911, AIS and DSC, may be effected within a close proximity of position 28-28-10.5N 080-34-44W. During this period GPS users are encouraged to report any GPS service outages that they may experience during this testing via the Navigation Information Service (NIS) by calling (703) 313-5900 or by using the NAVCEN's web-site's "GPS a problem worksheet" at www.navcen.uscg.gov.

SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners

FLORIDA-GULF OF MEXICO-HORSESHOE POINT TO ROCKS ISLANDS-HORSESHOE BEACH: Dredging Operations. (UPDATED AS PER NOVEMBER 13, 2008)

All-American Concrete Inc. has commenced maintenance dredging operations with hydraulic dredge MISS KATHERINE in the vicinity of Horseshoe Beach, Dixie County, Florida. The area of operation for this project is the Horseshoe Beach federally navigable channel and turning basin.

Dredge operations will continue on a twenty-four (24) hour per day, and seven (7) days per week basis until completion on or about January 9, 2009. A submerged pipeline marked by yellow lights and orange buoys in vicinity of the channel will run outside the south edge of the channel and turning basin, transferring material to the upland disposal area. Due to the shallow depth the pipeline may be visible at low water.

For safety and maneuvering information the dredge MISS KATHERINE can be contacted on VHF-FM Channels 13 and 16. Additional equipment on-scene will be four (4) floatation barges with booster pumps and two (2) work barges.

All mariners are urged to use extreme caution in the area, transit at their slowest safe speed to minimize wake, and proceed with caution after passing arrangements have been made.

For further information please contact Mr. Kevin Rose (727) 528-8756 or Mr. Jack Fulford (813) 792-0180 (Project Managers). (See Enclosure Number 8).

FLORIDA- TAMPA BAY ENTRANCE- TAMPA BAY: Marine Advisory.

In order to minimize the risk of collision with deep draft vessels and improve the safe transit of shallow draft vessels within the Tampa Bay and its approaches, the Coast Guard Captain of Port Tampa, Florida issues the following advisory: A NOAA survey number H-11344 conducted in July, 2004 reported that a water depth of 10 feet extends approximately 500 feet outward from both sides of the main ship channel in the waters west of the Sunshine Skyway Bridge adjacent to Egmont Channel, Mullet Key Channel, and Tampa Bay Cut "A" except in the vicinity of the Sunshine Skyway Bridge where existing security zones prohibit navigation closer than 100 feet around all bridge supports, dolphins, and rocky outcroppings from piers 88 to 135. Continuing east of the Sunshine Skyway Bridge, the advisory includes the waters adjacent to Point Pinellas Channel, Tampa Bay Cuts -A-, "B", "C", "D", "E", "F", "G", "J", "J-2", West of "K" Cut, Gadsen Point Cut, and Hillsborough Bay Cuts "A", and "C". All vessels drafting less than 10 feet may consider utilizing waters that have been identified by the 2004 NOAA survey parallel to, and within 500 feet of, the main ship channel when identifying the safest navigational course for transiting Tampa Bay and its approaches.

OPERATION "ON GUARD"

U. S. Coast Guard Marine Safety Office Miami announces Operation "ON GUARD". This operation is designed to employ Coast Guard - active duty, reserve and auxiliary, Federal Bureau of Investigation, US Customs Service, US Immigration and Naturalization Service and the Florida Department of Law Enforcement personnel in response to suspected terrorist activity at the waterfront facilities of the United States. South Florida is extremely vulnerable because it is the terminus of illegal alien and narcotics smuggling routes from the Bahamas, the Caribbean and South America. These routes are well established and are readily available for use by terrorist organizations. An urgent need existed to make the American Public equal partners in the fight on terrorism. Operation "ON GUARD" creates an effective deterrent measure that employs the eyes and ears of the marine industry and the boating public, people that know every inch of the coastline because it is where they work and play. Potential terrorists are put on notice that their activities will be seen and reported.

Operation "ON GUARD" takes a two pronged approach consisting of face to face visits by Coast Guard, FBI, USCS, INS and FDLE personnel combined with a coordinated joint agency media campaign to reach Marina Operators, Marine Dealers, Bridge Tenders, Commercial Fishermen, and the Boating Public. This operation relies on Coast Guard Auxiliary programs already in place like the "Clean Marina" program, Vessel Safety Checks, Marine Dealer Visits and the Commercial Fishing Vessel Safety Program to reach their normal customers, the waterfront users. The public is provided with the toll free number (1.800.424.8802) for reporting suspected terrorist activity to the National Response Center and the 1.800.BE ALERT number for US Customs along with a list of reporting criteria.

Report:

- Suspicious persons conducting unusual activities
- Individuals establishing businesses or roadside food stands in proximity to marina or bridge
- Unknown persons photographing or creating diagrams
- Unknown or suspicious persons loitering for extended periods of time
- Unknown or suspicious persons renting watercraft
- Suspicious vendors attempting to sell/deliver merchandise or drop off packages

Boating restrictions lifted from some areas of St. Johns River

St. Johns River boaters can now access some portions of the river that have been under emergency-rule vessel restrictions for the safety of boaters since August.

Lake Jesup is now unrestricted to vessels. The river had been closed to vessels from the south part of Lake Monroe all the way to State Road 50 because of flood waters from Tropical Storm Fay.

The emergency rule sets in motion a system that automatically enacts restrictions based on daily water-level measurements taken from four U.S. Geological Survey gauges located in different parts of the river.

The gauges are located at Astor (ASTF1), Deland (DLAF1), near Sanford (SNFF1) and near Geneva (GENF1). The rule specifies at what level different restrictions are in effect. The best way to find out if a vessel restriction has changed is to check the levels daily at www.weather.gov/ahps <<http://www.weather.gov/ahps>> and reference the gauge associated with the particular section of the river you are concerned about.

For a full list of the areas affected by the new emergency rule, please go to [MyFWC.com/DisasterPlan/News.htm](http://myfwc.com/DisasterPlan/News.htm) <<http://myfwc.com/DisasterPlan/News.htm>> , and check under the heading "What is open, closed..."

As of 4:30 p.m., Friday the restrictions for each of the affected areas were as follows:

- * Lake George fender system to Highlands Park Canal at Day Mark 39 - Idle
- * Highlands Park Canal at Day Mark 39 to the I-4 Bridge - Idle
- * I-4 Bridge and most of Lake Monroe - No restrictions
- * Southeast portion of Lake Monroe to State Road 46 Bridge south of Lake Harney - Idle
- * Baxter's Point to Hatbill Road Boat Ramp - No restrictions
- * Lake Jesup - No restrictions

Again, the water levels change daily, which means these restrictions could change frequently; so it's important for anyone who plans to use the river to monitor the water levels daily at www.weather.gov/ahps.
