1 New Moon
2 Waxing Crescent Moon
3 First Quarter Moon
4 Waxing Gibbous Moon
5 Full Moon
6 Waning Gibbous Moon
7 Third Quarter Moon
8 Waning Crescent Moon

## NASA Breaking News

**NASA Responds to California Wildfire Emergency Imaging Request**
A remotely piloted aircraft carrying a NASA sensor flew over much of California earlier this week, gathering information that will be used to help fight more than 300 wildfires burning within the state.
read more...

**Ocean Wind Power Maps Reveal Possible Wind Energy Sources**
Efforts to harness the energy potential of Earth's ocean winds could soon gain an important new tool: global satellite maps from NASA.
read more...

**NASA and ESA Complete Comparative Exploration Architecture Study**
Over the last 6 months, representatives from NASA and the European Space Agency, or ESA, have been engaged in a detailed assessment of potential programs and technologies that when conducted cooperatively could one day support a human outpost on the moon.
read more...

**NASA Extends Space Station Cargo Delivery Contract**
NASA has awarded Lockheed Martin Integrated Systems Inc. in Houston, a one-year contract extension valued at $42 million to provide integration services for cargo delivery to and from the International Space Station.
read more...

**Shuttle Crew to Visit NASA Headquarters, Available for Interviews**
NASA is developing new spacecraft, the Ares rockets and Orion crew capsule, to deliver astronauts to the International Space Station and send them on their way to the moon.
read more...

**NASA Sets Launch Dates for Remaining Space Shuttle Missions**
Following a detailed, integrated assessment, NASA selected target launch dates for the remaining eight space shuttle missions on the current manifest in 2009 and 2010.
read more...

**College Students Design Future Aircraft in NASA Competition**

Sixty-one students from 14 colleges and universities around the globe have imagined what the next generation of airliners and cargo planes may look like.
read more...

**NASA Reveals New Discoveries From Mercury**
Scientists have argued about the origins of Mercury's smooth plains and the source of its magnetic field for more than 30 years. Now, data from the January 2008 flyby of the planet by MESSENGER spacecraft have shown that volcanoes were involved in plains formation.
