

CHILDREN GROWING HEALTHY

Balancing Healthy Meals and Snacks at Home

Use the Food Pyramid to help you plan a well-balanced day of meals and snacks.

Make meal and snack planning simpler

Arrange your cupboards and refrigerator by food groups. Give each of the groups (see list at right) their own area.

Make snacks more nutritious by selecting foods from at least two different areas. Mix colors and textures for an appealing and tasty treat with variety. The more colorful the plate, the more nutrients!

Make a snack spot where children can help themselves to healthy choices.

Food Guide Pyramid

In your cupboard store these foods together:

1. Pasta, rice, breads, cereals, and other grain products
2. Canned fruits, dried fruits and canned vegetables
3. Dried beans, tuna fish, sardines, nuts and seeds

In your refrigerator store these foods together:

4. Milk, yogurt, cheese and eggs
5. Fruits (apples, grapes, oranges, etc.)
6. Vegetables (carrots, peppers, lettuce, tomatoes, etc.)

Sneaky Vegetables

PASTA/PIZZA SAUCE:

add chopped carrots, broccoli, mushrooms

LASAGNA OR CASSEROLES: add spinach, zucchini, chopped fresh tomatoes, fresh parsley, basil

CHILI: add tomatoes, carrots, celery, peas, corn

CANNED SOUP: add pureed sweet potato and carrots

EGGS:

add mushrooms, tomato, broccoli with cheese for a tasty omelet

MASHED POTATO:

mix in sweet potato

SALSA: add chopped green beans, peppers, corn, tomato

Super Snack Ideas

melced lowfat cheese on toasted pita bread • baked sweet potato boats • fruit smoothies • chickpeas • baked chips with chunky salsa • English muffin pizza topped with veggies • rice cakes • popcorn • peanutbuttered apples • yogurt (fruited or plain) • 100% fruit juice • pretzels • M&M's cereal •

Food Rules

- Keep meal times and snack times about the same each day.
- Offer foods first, drinks/beverages last.
- If child is thirsty in between meals and snacks, offer water.
- If child plays with food without eating it, remove food after 10-15 minutes.
- If food is thrown in anger, end the meal.
- Keep table talk about the day's activities and fun topics.
- Don't comment on food intake.
- Don't praise, reward or punish for food eaten or not eaten.
- Instead of giving food as a reward, read, dance, play, and laugh with your child.
- Don't give food as a present.
- It's OK if your child likes to eat the same food everyday if it's a nutritious food. Just keep offering a variety of foods.

Eat Smart When Eating Out

Star Picks

If you're out and about and need a snack there are many "star picks" to grab at convenience stores or from vending machines. Look for **graham crackers**, **fig newtons**, **animal crackers**, **ginger snaps**, **100% juice**, **baked chips**, **pretzels**, **nut and seed mixes**, **raisins**, **yogurt**, **cottage cheese** and **string cheese**. It's fun to eat on the go and you can eat healthy.

- fig newtons
- graham crackers
- ginger snaps
- animal crackers
- 100% juice
- nut & seed mixes
- yogurt
- cottage cheese
- string cheese
- low fat milk
- pretzels
- teddy grahams

On the Run? Be Prepared!

Don't be stuck with high fat snacks when you're out and about. It's easy to bring nutritious snacks with you.

Fast Food Choices and Fix Ups!

- Order pizza with veggies (mushrooms, green pepper, fresh tomato, onion, broccoli) in place of pepperoni, sausage and other high fat meats.
- Order sandwich with extra tomato and lettuce, on whole wheat bread with mustard in place of mayo.
- Give your salad a makeover – use clear dressings in place of creamy, and ask for it on the side. Go with veggies that are dark in color.
- Pick a non-creamy soup with chunks of vegetables or pasta and rice. Soups with beans are a treat and filling too. Try vegetable lentil, split pea or black bean.
- Ask for tomato or marinara sauce on pasta dishes. Top it with a little parmesan ... a real child pleaser.

Get Moving! Be Active!

Get your child ... and yourself ... moving!

Go for at least 30 minutes of physical activity 5 days a week.* Follow the Activity Pyramid above. The activities toward the bottom are worth more – a gold star. They should be done on a regular basis.

Limit the activities at the top. There is a link between TV viewing and being overweight so turn off the TV, the video games, the computer and move your body.

* Use the “Physical Activity Prescription” forms to have your child chart their daily activities.

Creative Activities

What can we do?

Walk, dance, play catch, clean your room, help with the chores, rake the leaves, kick a ball, shoot hoops, skip, play hopscotch, jump rope, shovel snow, help out in the garden, hop from room to room, climb the stairs, get up to change the TV channel.

Juicy-Crunchy Bowling: Set up 6 empty frozen juice cans or cereal boxes at one end of a room. Stand at other end with ball and roll ball into cans/boxes. Count the number knocked down.

Scooper Catch: Cut the bottoms off two empty plastic gallon milk jugs. Tape up any sharp edges and use the "catchers" to play catch.

Freeze Dancing: Play music and dance. When the music stops everyone freezes. Start dancing again when music comes on.

Basketball Cleanup: Use a box as a basketball hoop. Have child pick up toys, books, games and drop in the box for points.

Marching Band: March around house with homemade instruments: dry beans in jar and shake, spoon banging on pots, rubber bands on containers.

Box cars: "Drive" boxes around while crawling on floor.

Box Buildings: Stack empty boxes and jump over or knock down. Keep building higher buildings.

Boxer Shoes: Cut holes in fronts of cereal boxes large enough for little feet to fit in. Walk around the house in new "shoes."

Where?

You can be active everywhere ...

Inside, outside,
recreational center,
YMCA, home,
playground, daycare.

Teaching Confidence and Self-Love

A child's self-image comes from their parent.

Children develop feelings of self worth when they feel valued by you. Spend time reading, singing, and playing with your child.

Listen to your child.
Be positive and always tell your child what she is doing well.

I feel HAPPY when...

I feel SPECIAL when...

Ask your child what makes them feel happy and special and write their answers in the smile and heart above!

As a Family Do we...

	Yes	No
Share our feelings?	_____	_____
Talk with, not at?	_____	_____
Practice being courteous and civil?	_____	_____
Encourage individuality?	_____	_____
Act in loving and trusting ways?	_____	_____
Allow mistakes to be made without punishment?	_____	_____
Help each other to succeed?	_____	_____
Take joy in each other's successes?	_____	_____

Positive Parenting

1. Compliment and encourage your child every day.
2. Smile a lot in your home.
3. Always have a listening ear and feeling heart with your child.
4. Tell them you love them as a person, although there may be a behavior you dislike.
5. Understand and try to meet your child's need for attention in a positive way to reduce the need for negative attention.
6. Each child is as an individual. Treat each child as being special and unique.
7. If your child fails at something, remind him of all his successes and that he will succeed again.

If a child lives with tolerance...

She learns to be patient

If a child lives with encouragement
He learns to be confident

If a child lives with praise
She learns to appreciate

If a child lives with fairness
He learns to be just

If a child lives with security
She learns to have faith

If a child lives with approval
She learns to like herself

If a child lives with friendship
He learns to find love in the world.

**Create a
positive
environment
for a happy,
healthy child.**

A Healthy Lifestyle is a Family Issue

The Whole Family Should Be Involved In:

- Preparing, cooking and eating healthy at home
- Eating smart when eating out
- Being physically active
- Building self-esteem

Developing positive eating and activity habits is great for kids and the whole family. Parents will feel healthier and more energetic. Kids will grow to be healthy teens and young adults. Building a healthy lifestyle is for your family, now and in the future.

These kids have been active today and are very hungry!

Find the hidden snacks in the picture below.

Walk Together and

Play Together...

for a Healthy Future!

It takes
a strong and
healthy family
to raise a
strong and
healthy child.

Keep Moving!

Dear Colleague,

The Washington State Department of Health (DOH) is pleased to provide camera-ready art for printing this educational material. To ensure that the original quality of the piece is maintained, please read and follow the instructions below and the specifications included for professional printing.

- **Use the latest version.** DOH materials are developed using the most current information available, are checked for clinical accuracy, and are field tested with the intended audience to ensure they are clear and readable. DOH programs make periodic revisions to educational materials, so please check this web site to be sure you have the latest version. DOH assumes no responsibility for the use of this material or for any errors or omissions.
- **Do not alter.** We are providing this artwork with the understanding that it will be printed without alterations and copies will be free to the public. Do not edit the text or use illustrations or photographs for other purposes without first contacting us. Please do not alter or remove the DOH logo, publication number or revision date. If you want to use a part of this publication for other purposes, contact the Office of Health Promotion first.
- **For quality reproduction:** Low resolution PDF files are intended for black and white or color desktop printers. They work best if you are making only one or two copies. High resolution PDF files are intended for reproducing large quantities and are set up for use by professional offset print shops. The high resolution files also include detailed printing specifications. Please match them as closely as possible and insist on the best possible quality for all reproductions.
