Keeping an eye on the skies for the next big (or small) meteor

International Herald Tribune

The Earth is pockmarked with the evidence of ancient collisions - huge craters blasted into its surface by asteroids or comets. One such object, striking 65 million years ago in the Yucat?in Mexico, is believed...

NASA to Attempt Historic Solar Sail Deployment

NASA

| | | June 26, 2008: "Hold your hands out to the sun. What do you feel? Heat, of course. But there's pressure as well – though you've never noticed it, because it's so tiny. Over the area of your hands, it...

NASA seeks more data on global warming

Ohio

BELTSVILLE, MD.: NASA plans to launch a satellite next year that will help scientists fill in a gap in their understanding of global warming: the role of clouds and airborne particles. The satellite Glory,...

Farming Solar Energy in Space

Scientific American

Kakuda, japan—In a recent spin-off of the classic Japanese animated series Mobile Suit Gundam, the depletion of fossil fuels has forced humanity to turn to space-based solar power generation as global...

NASA's Phoenix touches Martian soil with fork-like probe to find water

The Times Of India

WASHINGTON : NASA's Phoenix Mars Lander has touched Martian soil with a fork-like probe for the first time, which could provide information about...

Reports back theory of massive meteor as cause of Mars's strange shape

International Herald Tribune

The lopsided shape of Mars may well be a result of a cataclysmic impact of a Pluto-size meteor billions of years ago, three teams of scientists are reporting. That would suggest that the lowlands of Mars's...
